TITLE I—IMPROVING THE ACADEMIC PERFORMANCE OF THE DISADVANTAGED

PART A—BASIC PROGRAM

SEC. 101. DISADVANTAGED CHILDREN MEET HIGH ACADEMIC STANDARDS.

Section 1001 is amended to read as follows:

“SEC. 1001. FINDINGS; STATEMENT OF PURPOSE; AND RECOGNITION OF NEED.

“(a) FINDINGS.—Congress finds the following:

“(1) The Constitution of the United States reserves to the States and to the people the responsibility for the general supervision of public education in kindergarten through the twelfth grade.

“(2) States, local educational agencies and schools should be given maximum flexibility in exchange for greater academic accountability, and be given greater freedom to build upon existing innovative approaches for education reform.

“(3) The best education decisions are made by those who know the students and who are responsible for implementing the decisions.

“(4) Educators and parents should retain the right and responsibility to educate their pupils and children free of excessive regulation by the Federal Government.

“(5) The Supreme Court has regarded the right of parents to direct the upbringing of their children as a fundamental right implicit in the concept of ordered liberty within the 14th Amendment to the Constitution, as specified in *Meyer v. Nebraska*, 262 U.S. 390 (1923), and *Pierce v. Society of Sisters*, 268 U.S. 510 (1925).

“(6) Schools that enroll high concentrations of children living in poverty face the greatest challenges, but effective educational strategies based on scientific

ically based research can succeed in educating children to high academic standards.

“(7) High-poverty schools are much more likely to be identified as failing to meet State academic standards for satisfactory progress. As a result, these schools are generally the most in need of additional resources and technical assistance to build the capacity of these schools to address the many needs of their students.

“(8) The educational progress of children participating in programs under this title is closely associated with their being taught by a highly qualified staff, particularly in schools with the highest concentrations of poverty, where paraprofessionals, uncertified teachers, and teachers teaching out of field frequently provide instructional services.

“(9) Congress and the public would benefit from additional data evaluating the efficacy of the Elementary and Secondary Education Act of 1965.

“(10) Schools operating programs assisted under this part must be held accountable for the educational achievement of their students, when those students fail to demonstrate progress in achieving high academic standards, local educational agencies and States must take significant actions to improve the educational opportunities available to them.

“(b) PURPOSE AND INTENT.—The purpose and intent of this title are to ensure that all children have a fair and equal opportunity to obtain a high-quality education.

“(c) RECOGNITION OF NEED.—The Congress recognizes the following:

“(1) Educational needs are particularly great for low-achieving children in our Nation’s highest-poverty schools, children with limited English proficiency, children of migrant workers, children with disabilities, Indian children, children who are neglected or delinquent, and young children who are in need of reading assistance and family literacy assistance.

“(2) Despite more than 3 decades of Federal assistance, a sizable achievement gap remains between minority and nonminority students, and between disadvantaged students and their more advantaged peers.

“(3) Too many students attend local schools that fail to provide them with a quality education, and are given no alternatives to enable them to receive a quality education.

“(4) States, local educational agencies, and schools need to be held accountable for improving the academic achievement of all students, and for identifying and turning around low-performing schools.

“(5) States and local educational agencies need to ensure that high quality academic assessments, accountability systems, teacher preparation and training, curriculum, and instructional materials are aligned with challenging State academic standards so that students, teachers, parents, and administrators can measure progress against common expectations for student academic achievement.

“(6) Federal education assistance is intended not only to increase pupil achievement overall, but also more specifically and importantly, to help ensure that all students, especially the disadvantaged, meet challenging academic achievement standards. It can only be determined if schools, local educational agencies, and States are reaching this goal if student achievement results are reported specifically by disadvantaged and minority status.”.

SEC. 102. AUTHORIZATION OF APPROPRIATIONS.

Section 1002 is amended to read as follows:

“SEC. 1002. AUTHORIZATION OF APPROPRIATIONS.

- “(2) REALLOCATIONS.—If a State does not apply for funds under this subsection, the Secretary shall reallocate such funds to other States in the same proportion funds are allocated under paragraph (1).

SEC. 103. RESERVATION FOR SCHOOL IMPROVEMENT.

Section 1003 is amended to read as follows:

“SEC. 1003. RESERVATION FOR SCHOOL IMPROVEMENT.

“(a) STATE RESERVATIONS.—Each State shall reserve 1 percent of the amount it receives under subpart 2 of part A for fiscal years 2002 and 2003, and 3 percent of the amount received under such subpart for fiscal years 2004 through 2006, to carry out subsection (b) and to carry out the State’s responsibilities under sections 1116 and 1117, including carrying out the State educational agency’s statewide system of technical assistance and support for local educational agencies.

“(b) USES.—Of the amount reserved under subsection (a) for any fiscal year, the State educational agency shall allocate at least 95 percent of that amount directly to local educational agencies for schools identified for school improvement, corrective action, and restructuring under section 1116(c) that have the greatest need for that assistance in amounts sufficient to have a significant impact in improving those schools.

“(c) PRIORITY.—The State educational agency, in allocating funds to local educational agencies under this section, shall give priority to local educational agencies that—

“(1) have the lowest achieving schools;

“(3) demonstrate the strongest commitment to ensuring that such funds are used to enable the lowest achieving schools to meet the yearly progress goals under section 1116(b)(3)(A)(v).

“(d) UNUSED FUNDS.—If, after consultation with local educational agencies in the State, the State educational agency determines that the amount of funds reserved to carry out subsection (b) is greater than the amount needed to provide the assistance described in that subsection, it may allocate the excess amount to local educational agencies in accordance with either or both—

“(1) the relative allocations it made to those agencies for that fiscal year under subpart 2 of part A; or

“(2) section 1126(c).

SEC. 104. BASIC PROGRAMS.

The heading for part A of title I and sections 1111 through 1115 are amended to read as follows:

**“PART A—IMPROVING BASIC PROGRAMS OPERATED BY
LOCAL EDUCATIONAL AGENCIES**

“Subpart 1—Basic Program Requirements

“SEC. 1111. STATE PLANS.

“(a) PLANS REQUIRED.—

“(1) **IN GENERAL.**—Any State desiring to receive a grant under this part shall submit to the Secretary, by March 1, 2002, a plan, developed in consultation with local educational agencies, teachers, principals, pupil services personnel, administrators (including administrators of programs described in other parts of this title), other staff, and parents, that satisfies the requirements of this section and that is coordinated with other programs under this Act, the Individuals with Disabilities Education Act (20 U.S.C. 1400 et seq.), the Carl D. Perkins Vocational and Technical Education Act of 1998 (20 U.S.C. 2301 et seq.), the Head Start Act (42 U.S.C. 9831 et seq.), and the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11431 et seq.).

“(2) **CONSOLIDATED PLAN.**—A State plan submitted under paragraph (1) may be submitted as part of a consolidated plan under section 8302.

“(b) ACADEMIC STANDARDS, ACADEMIC ASSESSMENTS, AND ACCOUNTABILITY.—

“(1) CHALLENGING ACADEMIC STANDARDS.—

“(A) Each State plan shall demonstrate that the State has adopted challenging academic content standards and challenging student academic achievement standards that will be used by the State, its local educational agencies, and its schools to carry out this part, except that a State shall not be required to submit such standards to the Secretary.

“(B) The academic standards required by subparagraph (A) shall be the same academic standards that the State applies to all schools and children in the State.

“(C) The State shall have such academic standards for all public elementary and secondary school children, including children served under this part, in subjects determined by the State, but including at least mathematics, reading or language arts, and science (beginning in the 2005–2006 school year), which shall include the same knowledge, skills, and levels of achievement expected of all children.

“(D) Academic standards under this paragraph shall include—

“(i) challenging academic content standards in academic subjects that—

“(I) specify what children are expected to know and be able to do;

“(II) contain coherent and rigorous content; and

“(III) encourage the teaching of advanced skills; and

“(ii) challenging student academic achievement standards that—

“(I) are aligned with the State’s academic content standards;

“(II) describe 2 levels of high performance (proficient and advanced) that determine how well children are mastering the material in the State academic content standards; and

“(III) describe a third level of performance (basic) to provide complete information about the progress of the lower performing children toward achieving to the proficient and advanced levels of performance.

“(E) For the subjects in which students will be served under this part, but for which a State is not required by subparagraphs (A), (B), and (C) to develop, and has not otherwise developed such academic standards, the State plan shall describe a strategy for ensuring that students are taught the same knowledge and skills in such subjects and held to the same expectations as are all children.

“(F) Nothing in this part shall prohibit a State from revising any standard adopted under this part before or after the date of enactment of the No Child Left Behind Act of 2001.

“(2) ACCOUNTABILITY.—

“(A) **IN GENERAL.**—Each State plan shall demonstrate that the State has developed and is implementing a statewide State accountability system that has been or will be effective in ensuring that all local educational agencies, public elementary schools, and public secondary schools make adequate yearly progress as defined under subparagraph (B). Each State accountability system shall—

“(i) be based on the academic standards and academic assessments adopted under paragraphs (1) and (4) and take into account the performance of all public school students;

“(ii) be the same as the accountability system the State uses for all public schools or all local educational agencies in the State, except that public schools and local educational agencies not participating under this part are not subject to the requirements of section 1116; and

“(iii) include rewards and sanctions the State will use to hold local educational agencies and public schools accountable for student achievement and for ensuring that they make adequate yearly progress in accordance with the State’s definition under subparagraph (B).

“(B) ADEQUATE YEARLY PROGRESS.—Each State plan shall demonstrate, based on academic assessments described under paragraph (4), what constitutes adequate yearly progress of the State, and of public schools and local educational agencies in the State, toward enabling all public school students to meet the State’s student academic achievement standards, while working toward the goal of narrowing the achievement gaps in the State, local educational agency, and school.

“(C) DEFINITION.—‘Adequate yearly progress’ shall be defined by the State in a manner that—

“(i) applies the same high academic standards of academic performance to all public school students in the State;

“(ii) measures the progress of public schools and local educational agencies based primarily on the academic assessments described in paragraph (4);

“(iii) measures the student dropout rate, as defined for the Common Core of Data maintained by the National Center for Education Statistics established under section 403 of the National Education Statistics Act of 1994 (20 U.S.C. 9002);

“(iv) includes separate annual numerical objectives for continuing and significant improvement in each of the following (except that disaggregation of data under subclauses (II) and (III) shall not be required in a case in which the number of students in a category is insufficient to yield statistically reliable information or the results would reveal individually identifiable information about an individual student):

“(I) The achievement of all public school students.

“(II) The achievement of—

“(aa) economically disadvantaged students;

“(bb) students from major racial and ethnic groups;

“(cc) students with disabilities; and

“(dd) students with limited English proficiency;

“(III) solely for the purpose of determining adequate yearly progress of the State, the acquisition of English language proficiency by children with limited English proficiency;

“(v) at the State’s discretion, may also include other academic measures such as promotion, completion of college preparatory courses, and high school completion (and for individual local educational agencies and schools, the acquisition of English language proficiency by children with limited English proficiency), except that inclusion of such other measures may not change which schools or local educational agencies would otherwise be subject to improvement or corrective action under section 1116 if the discretionary indicators were not included; and

“(vi) includes a timeline that—

“(I) uses as a baseline year the year following the date of enactment of the No Child Left Behind Act of 2001;

“(II) establishes a target year by which all members of each group of students described in subclauses (I) and (II) of clause (iii) shall meet or exceed the State’s proficient level of academic performance on the State academic assessment used for the purposes of this section and section 1116, except that the target year shall not be more than 12 years from the baseline year; and

“(III) for each year until and including the target year, establishes annual goals for the academic performance of each group of students described in subclauses (I) and (II) of clause (iii) on the State academic assessment that—

“(aa) indicates a minimum percentage of students who must meet the proficient level on the academic assessment, such that the minimum percentage is the same for each group of students described in subclauses (I) and (II) of clause (iii); or

“(bb) indicates an annual minimum amount by which the percentage of students who meet the proficient level among each group of students described in subclauses (I) and (II) of clause (iii) shall increase, such that the minimum increase for each group is equal to or greater than 100 percent minus the percentage of the group meeting the proficient level in the baseline year divided by the number of years from the baseline year to the target year established under clause (I).

“(D) ANNUAL IMPROVEMENT FOR SCHOOLS.—For a school to make adequate yearly progress under subparagraph (A), not less than 95 percent of each group of students described in subparagraph (C)(iii)(II) who are enrolled in the school are required to take the academic assessments, consistent with section 612(a)(17)(A) of the Individuals with Disabilities Education Act (20 U.S.C. 1412(a)(17)(A)) and paragraph (4)(G)(ii), on which adequate yearly progress is based.

“(E) PUBLIC NOTICE AND COMMENT.—Each State shall ensure that in developing its plan, it diligently seeks public comment from a range of institutions and individuals in the State with an interest in improved student achievement and that the State makes and will continue to make a substantial effort to ensure that information under this part is widely known and understood by the public, parents, teachers, and school administrators throughout the State. Such efforts shall include, at a minimum, publication of such information and explanatory text, broadly to the public through such means as the Internet, the media, and public agencies.

“(3) STATE AUTHORITY.—If a State educational agency provides evidence, which is satisfactory to the Secretary, that neither the State educational agency nor any other State government official, agency, or entity has sufficient authority, under State law, to adopt curriculum content and student academic achievement standards, and academic assessments aligned with such academic standards, which will be applicable to all students enrolled in the State’s public schools, then the State educational agency may meet the requirements of this subsection by—

“(A) adopting academic standards and academic assessments that meet the requirements of this subsection, on a statewide basis, limiting their applicability to students served under this part; or

“(B) adopting and implementing policies that ensure that each local educational agency in the State which receives grants under this part will adopt curriculum content and student academic achievement standards, and academic assessments aligned with such standards, which meet all of the criteria in this subsection and any regulations regarding such standards and assessments which the Secretary may publish, and which are applicable to all students served by each such local educational agency.

“(4) ACADEMIC ASSESSMENTS.—Each State plan shall demonstrate that the State has implemented a set of high-quality, yearly student academic assessments that include, at a minimum, academic assessments in mathematics, and reading or language arts, that will be used as the primary means of determining the yearly performance of the State and of each local educational agency and school in enabling all children to meet the State’s challenging student academic achievement standards. Such assessments shall—

“(A) be the same academic assessments used to measure the performance of all children;

“(B) be aligned with the State’s challenging content and student academic achievement standards and provide coherent information about student attainment of such standards;

“(B) SPECIAL RULE.—Notwithstanding subparagraph (A)(iv), the number of children attending private elementary and secondary schools who are to receive services, and the assistance such children are to receive under this part, shall be determined without regard to whether the public school attendance area in which such children reside is assisted under subparagraph (A).

“(b) RANKING ORDER.—If funds allocated in accordance with subsection (f) are insufficient to serve all eligible school attendance areas, a local educational agency—

“(1) shall annually rank from highest to lowest according to the percentage of children from low-income families in each agency’s eligible school attendance areas in the following order—

“(A) eligible school attendance areas in which the concentration of children from low-income families exceeds 75 percent; and

“(B) all remaining eligible school attendance areas in which the concentration of children from low-income families is 75 percent or lower either by grade span or for the entire local educational agency;

“(2) shall, within each category listed in paragraph (1), serve schools in rank order from highest to lowest according to the ranking assigned under paragraph (1);

“(3) notwithstanding paragraph (2), may give priority, within each such category and in rank order from highest to lowest subject to paragraph (4), to eligible school attendance areas that serve children in elementary schools; and

“(4) not serve a school described in paragraph (1)(B) before serving a school described in paragraph (1)(A).

“(1) ALLOCATION TO PUBLIC SCHOOL ATTENDANCE AREAS.—The local educational agency shall use the same measure of poverty, which measure shall be the number of children ages 5 through 17 in poverty counted in the most recent census data approved by the Secretary, the number of children eligible for free and reduced priced lunches under the Richard B. Russell National School Lunch Act (42 U.S.C. 1751 et seq.), the number of children in families receiving assistance under the State program funded under part A of title IV of the Social Security Act, or the number of children eligible to receive medical assistance under the Medicaid program, or a composite of such indicators, with respect to all school attendance areas in the local educational agency—

“(B) to determine the ranking of each area; and

“(C) to determine allocations under subsection (f).

“(2) ALLOCATION FOR EQUITABLE SERVICE TO PRIVATE SCHOOL STUDENTS.—

“(A) CALCULATION.—A local educational agency shall have the final authority, consistent with section 1120 to calculate the number of private school children, ages 5 through 17, who are low-income by—

“(i) using the same measure of low-income used to count public school children;

“(ii) using the results of a survey that, to the extent possible, protects the identity of families of private school students and allowing such survey results to be extrapolated if complete actual data are not available; or

“(iii) applying the low-income percentage of each participating public school attendance area, determined pursuant to this section, to the number of private school children who reside in that attendance area.

“(B) COMPLAINT PROCESS.—Any dispute regarding low-income data on private school students shall be subject to the complaint process authorized in section 8505.

“(d) EXCEPTION.—This section (other than subsections (a)(3) and (f)) shall not apply to a local educational agency with a total enrollment of less than 1,500 children.

“(e) WAIVER FOR DESEGREGATION PLANS.—The Secretary may approve a local educational agency’s written request for a waiver of the requirements of subsections (a) and (f), and permit such agency to treat as eligible, and serve, any school that children attend under a desegregation plan ordered by a State or court or approved by the Secretary, or such a plan that the agency continues to implement after it has expired, if—

“(1) the number of economically disadvantaged children enrolled in the school is not less than 25 percent of the school’s total enrollment; and

“(2) the Secretary determines on the basis of a written request from such agency and in accordance with such criteria as the Secretary establishes, that approval of that request would further the purposes of this part.

“(f) ALLOCATIONS.—

“(1) IN GENERAL.—A local educational agency shall allocate funds received under this part to eligible school attendance areas or eligible schools, identified under subsection (b) in rank order on the basis of the total number of children from low-income families in each area or school.

graph (1) shall be at least 125 percent of the per-pupil amount of funds a local educational agency received for that year under the poverty criteria described by the local educational agency in the plan submitted under section 1112, except that this paragraph shall not apply to a local educational agency that only serves schools in which the percentage of such children is 35 percent or greater.

“(B) A local educational agency may reduce the amount of funds allocated under subparagraph (A) for a school attendance area or school by the amount of any supplemental State and local funds expended in that school attendance area or school for programs that meet the requirements of section 1114 or 1115.

“(3) RESERVATION.—A local educational agency shall reserve such funds as are necessary under this part to provide services comparable to those provided to children in schools funded under this part to serve—

“(C) RECORDS.—A school that consolidates funds from different Federal programs under this section shall not be required to maintain separate fiscal accounting records, by program, that identify the specific activities supported by those particular funds as long as it maintains records that demonstrate that the schoolwide program, considered as a whole addresses the intent and purposes of each of the Federal programs that were consolidated to support the schoolwide program.

“(4) PROFESSIONAL DEVELOPMENT.—Each school receiving funds under this part for any fiscal year shall devote sufficient resources to effectively carry out the activities described in subsection (c)(1)(D) in accordance with section 1119A for such fiscal year, except that a school may enter into a consortium with another school to carry out such activities.

“(b) ADJUSTMENTS WHERE NECESSITATED BY APPROPRIATIONS.—

“(1) IN GENERAL.—If the sums available under this part for any fiscal year are insufficient to pay the full amounts that all local educational agencies in States are eligible to receive under sections 1124, 1124A, and 1125 for such year, the Secretary shall ratably reduce the allocations to such local educational agencies, subject to subsections (c) and (d) of this section.

“(4) POPULATION DATA.—In any fiscal year for which the Secretary calculates grants on the basis of population data for counties, the Secretary shall apply the hold harmless percentages in paragraphs (1) and (2) to counties, and if the Secretary’s allocation for a county is not sufficient to meet the hold-harmless requirements of this subsection for every local educational agency within that county, the State educational agency shall reallocate funds proportionately from all other local educational agencies in the State that are receiving funds in excess of the hold harmless amounts specified in this subsection.

“(d) RATABLE REDUCTIONS.—

“SEC. 1124. BASIC GRANTS TO LOCAL EDUCATIONAL AGENCIES.

“(a) AMOUNT OF GRANTS.—

“(1) GRANTS FOR LOCAL EDUCATIONAL AGENCIES AND PUERTO RICO.—Except as provided in paragraph (4) and in section 1126, the grant that a local educational agency is eligible to receive under this section for a fiscal year is the amount determined by multiplying—

“(A) the number of children counted under subsection (c); and

“(B) 40 percent of the average per-pupil expenditure in the State, except that the amount determined under this subparagraph shall not be less than 32 percent or more than 48 percent, of the average per-pupil expenditure in the United States.

“(2) CALCULATION OF GRANTS.—

“(A) ALLOCATIONS TO LOCAL EDUCATIONAL AGENCIES.—The Secretary shall calculate grants under this section on the basis of the number of children counted under subsection (c) for local educational agencies, unless the Secretary and the Secretary of Commerce determine that some or all of those data are unreliable or that their use would be otherwise inappropriate, in which case—

“(i) the 2 Secretaries shall publicly disclose the reasons for their determination in detail; and

“(ii) paragraph (3) shall apply.

“(B) ALLOCATIONS TO LARGE AND SMALL LOCAL EDUCATIONAL AGENCIES.—

(i) For any fiscal year in which this paragraph applies, the Secretary shall calculate grants under this section for each local educational agency.

“(ii) The amount of a grant under this section for each large local educational agency shall be the amount determined under clause (i).

“(iii) For small local educational agencies, the State educational agency may either—

“(I) distribute grants under this section in amounts determined by the Secretary under clause (i); or

“(II) use an alternative method approved by the Secretary to distribute the portion of the State’s total grants under this section that is based on those small agencies.

“(iv) An alternative method under clause (iii)(II) shall be based on population data that the State educational agency determines best reflect the current distribution of children in poor families among the State’s small local educational agencies that meet the eligibility criteria of subsection (b).

“(v) If a small local educational agency is dissatisfied with the determination of its grant by the State educational agency under clause (iii)(II), it may appeal that determination to the Secretary, who shall respond not later than 45 days after receipt of such appeal.

“(vi) As used in this subparagraph—

“(I) the term ‘large local educational agency’ means a local educational agency serving an area with a total population of 20,000 or more; and

“(II) the term ‘small local educational agency’ means a local educational agency serving an area with a total population of less than 20,000.

“(3) ALLOCATIONS TO COUNTIES.—

“(A) CALCULATION.—For any fiscal year to which this paragraph applies, the Secretary shall calculate grants under this section on the basis of the number of children counted under section 1124(c) for counties, and State educational agencies shall suballocate county amounts to local educational agencies, in accordance with regulations issued by the Secretary.

“(B) DIRECT ALLOCATIONS.—In any State in which a large number of local educational agencies overlap county boundaries, or for which the State believes it has data that would better target funds than allocating them by county, the State educational agency may apply to the Secretary for authority to make the allocations under this part for a particular fiscal year directly to local educational agencies without regard to counties.

“(C) ASSURANCES.—If the Secretary approves the State educational agency’s application under subparagraph (B), the State educational agency shall provide the Secretary an assurance that such allocations shall be made—

“(i) using precisely the same factors for determining a grant as are used under this part; or

“(ii) using data that the State educational agency submits to the Secretary for approval that more accurately target poverty.

“(D) APPEAL.—The State educational agency shall provide the Secretary an assurance that it shall establish a procedure through which a local educational agency that is dissatisfied with its determinations under subparagraph (B) may appeal directly to the Secretary for a final determination.

“(4) PUERTO RICO.—

“(A) IN GENERAL.—For each fiscal year, the grant which the Commonwealth of Puerto Rico shall be eligible to receive under this section shall be the amount determined by multiplying the number of children counted under subsection (c) for the Commonwealth of Puerto Rico by the product of—

“(i) the percentage which the average per-pupil expenditure in the Commonwealth of Puerto Rico is of the lowest average per-pupil expenditure of any of the 50 States; and

“(ii) 32 percent of the average per-pupil expenditure in the United States.

“(B) MINIMUM PERCENTAGE.—The percentage in subparagraph (A)(i) shall not be less than—

“(i) for fiscal year 2002, 77.5 percent;

“(ii) for fiscal year 2003, 80.0 percent;

“(iii) for fiscal year 2004, 82.5 percent; and

“(iv) for fiscal year 2005 and succeeding fiscal years, 85.0 percent.

“(C) LIMITATION.—If the application of subparagraph (B) would result in any of the 50 States or the District of Columbia receiving less under this part than it received under this part for the preceding fiscal year, the percentage in subparagraph (A) shall be the greater of the percentage in subparagraph (A)(i) or the percentage used for the preceding fiscal year.

“(5) DEFINITION.—For purposes of this subsection, the term ‘State’ does not include Guam, American Samoa, the Virgin Islands, and the Northern Mariana Islands.

“(b) MINIMUM NUMBER OF CHILDREN TO QUALIFY.—A local educational agency is eligible for a basic grant under this section for any fiscal year only if the number of children counted under subsection (c) for that agency is both—

“(c) CHILDREN TO BE COUNTED.—

“(1) CATEGORIES OF CHILDREN.—The number of children to be counted for purposes of this section is the aggregate of—

“(C) the number of children aged 5 to 17, inclusive, in the school district of such agency from families above the poverty level as determined under paragraph (4).

“(2) DETERMINATION OF NUMBER OF CHILDREN.—For the purposes of this section, the Secretary shall determine the number of children aged 5 to 17, inclusive, from families below the poverty level on the basis of the most recent satisfactory data, described in paragraph (3), available from the Department of Commerce. The District of Columbia and the Commonwealth of Puerto Rico shall be treated as individual local educational agencies. If a local educational agency contains 2 or more counties in their entirety, then each county will be treated as if such county were a separate local educational agency for purposes of calculating grants under this part. The total of grants for such counties shall be allocated to such a local educational agency, which local educational agency shall distribute to schools in each county within such agency a share of the local educational agency’s total grant that is no less than the county’s share of the population counts used to calculate the local educational agency’s grant.

“(3) POPULATION UPDATES.—In fiscal year 2001 and every 2 years thereafter, the Secretary shall use updated data on the number of children, aged 5 to 17, inclusive, from families below the poverty level for local educational agencies or counties, published by the Department of Commerce, unless the Secretary and the Secretary of Commerce determine that use of the updated population data would be inappropriate or unreliable. If the Secretary and the Secretary of Commerce determine that some or all of the data referred to in this paragraph are inappropriate or unreliable, they shall publicly disclose their reasons. In determining the families which are below the poverty level, the Secretary shall utilize the criteria of poverty used by the Bureau of the Census in compiling the most recent decennial census, in such form as those criteria have been updated by increases in the Consumer Price Index for all urban consumers, published by the Bureau of Labor Statistics.

“(4) OTHER CHILDREN TO BE COUNTED.—For the purposes of this section, the Secretary shall determine the number of children aged 5 to 17, inclusive, from families above the poverty level on the basis of the number of such children from families receiving an annual income, in excess of the current criteria of

poverty, from payments under a State program funded under part A of title IV of the Social Security Act; and in making such determinations the Secretary shall utilize the criteria of poverty used by the Bureau of the Census in compiling the most recent decennial census for a family of 4 in such form as those criteria have been updated by increases in the Consumer Price Index for all urban consumers, published by the Bureau of Labor Statistics. The Secretary shall determine the number of such children and the number of children aged 5 through 17 living in institutions for neglected or delinquent children, or being supported in foster homes with public funds, on the basis of the caseload data for the month of October of the preceding fiscal year (using, in the case of children described in the preceding sentence, the criteria of poverty and the form of such criteria required by such sentence which were determined for the calendar year preceding such month of October) or, to the extent that such data are not available to the Secretary before January of the calendar year in which the Secretary's determination is made, then on the basis of the most recent reliable data available to the Secretary at the time of such determination. The Secretary of Health and Human Services shall collect and transmit the information required by this subparagraph to the Secretary not later than January 1 of each year. For the purpose of this section, the Secretary shall consider all children who are in correctional institutions to be living in institutions for delinquent children.

“(5) ESTIMATE.—When requested by the Secretary, the Secretary of Commerce shall make a special updated estimate of the number of children of such ages who are from families below the poverty level (as determined under subparagraph (A) of this paragraph) in each school district, and the Secretary is authorized to pay (either in advance or by way of reimbursement) the Secretary of Commerce the cost of making this special estimate. The Secretary of Commerce shall give consideration to any request of the chief executive of a State for the collection of additional census information.

“(d) STATE MINIMUM.—Notwithstanding section 1122, the aggregate amount allotted for all local educational agencies within a State may not be less than the lesser of—

“(1) 0.25 percent of total grants under this section; or

“(2) the average of—

“(A) one-quarter of 1 percent of the total amount available for such fiscal year under this section; and

“(B) the number of children in such State counted under subsection (c) in the fiscal year multiplied by 150 percent of the national average per-pupil payment made with funds available under this section for that year.

“SEC. 1124A. CONCENTRATION GRANTS TO LOCAL EDUCATIONAL AGENCIES.

“(a) ELIGIBILITY FOR AND AMOUNT OF GRANTS.—

“(1) IN GENERAL.—(A) Except as otherwise provided in this paragraph, each local educational agency, in a State other than Guam, American Samoa, the Virgin Islands, and the Commonwealth of the Northern Mariana Islands, which is eligible for a grant under section 1124 for any fiscal year is eligible for an additional grant under this section for that fiscal year if the number of children counted under section 1124(c) in the agency exceeds either—

“(i) 6,500; or

“(ii) 15 percent of the total number of children aged 5 through 17 in the agency.

“(B) Notwithstanding section 1122, no State described in subparagraph (A) shall receive less than the lesser of—

“(i) 0.25 percent of total grants; or

“(ii) the average of—

“(I) one-quarter of 1 percent of the sums available to carry out this section for such fiscal year; and

“(II) the greater of—

“(aa) \$340,000; or

“(bb) the number of children in such State counted for purposes of this section in that fiscal year multiplied by 150 percent of the national average per-pupil payment made with funds available under this section for that year.

“(2) SPECIAL RULE.—For each county or local educational agency eligible to receive an additional grant under this section for any fiscal year the Secretary shall determine the product of—

“(A) the number of children counted under section 1124(c) for that fiscal year; and

“(B) the quotient resulting from the division of the amount determined for those agencies under section 1124(a)(1) for the fiscal year for which the determination is being made divided by the total number of children counted under section 1124(c) for that agency for that fiscal year.

“(3) AMOUNT.—The amount of the additional grant for which an eligible local educational agency or county is eligible under this section for any fiscal year shall be an amount which bears the same ratio to the amount available to carry out this section for that fiscal year as the product determined under paragraph (2) for such local educational agency for that fiscal year bears to the sum of such products for all local educational agencies in the United States for that fiscal year.

“(4) LOCAL ALLOCATIONS.—(A) Grant amounts under this section shall be determined in accordance with section 1124(a)(2) and (3).

“(B) For any fiscal year for which the Secretary allocates funds under this section on the basis of counties, a State may reserve not more than 2 percent of its allocation under this section to make grants to local educational agencies that meet the criteria of paragraph (1)(A)(i) or (ii) and are in ineligible counties that do not meet these criteria.

“(b) STATES RECEIVING MINIMUM GRANTS.—In States that receive the minimum grant under subsection (a)(1)(B), the State educational agency shall allocate such funds among the local educational agencies in each State either—

“(1) in accordance with paragraphs (2) and (4) of subsection (a); or

“(2) based on their respective concentrations and numbers of children counted under section 1124(c), except that only those local educational agencies with concentrations or numbers of children counted under section 1124(c) that exceed the statewide average percentage of such children or the statewide average number of such children shall receive any funds on the basis of this paragraph.

“SEC. 1125. TARGETED GRANTS TO LOCAL EDUCATIONAL AGENCIES.

“(a) ELIGIBILITY OF LOCAL EDUCATIONAL AGENCIES.—A local educational agency in a State is eligible to receive a targeted grant under this section for any fiscal year if the number of children in the local educational agency counted under subsection 1124(c), before application of the weighting factor described in subsection (c), is at least 10, and if the number of children counted for grants under section 1124 is at least 5 percent of the total population aged 5 to 17 years, inclusive, in the local educational agency. For each fiscal year for which the Secretary uses county population data to calculate grants, funds made available as a result of applying this subsection shall be reallocated by the State educational agency to other eligible local educational agencies in the State in proportion to the distribution of other funds under this section.

“(b) GRANTS FOR LOCAL EDUCATIONAL AGENCIES, THE DISTRICT OF COLUMBIA, AND PUERTO RICO.—

“(1) IN GENERAL.—The amount of the grant that a local educational agency in a State or that the District of Columbia is eligible to receive under this section for any fiscal year shall be the product of—

“(A) the weighted child count determined under subsection (c); and

“(B) the amount in paragraph 1124(a)(1)(B).

“(2) PUERTO RICO.—For each fiscal year, the amount of the grant for which the Commonwealth of Puerto Rico is eligible under this section shall be equal to the number of children counted under subsection (c) for Puerto Rico, multiplied by the amount determined in subparagraph 1124(a)(4).

“(c) WEIGHTED CHILD COUNT.—

“(1) WEIGHTS FOR ALLOCATIONS TO COUNTIES.—

“(A) IN GENERAL.—For each fiscal year for which the Secretary uses county population data to calculate grants, the weighted child count used to determine a county’s allocation under this section is the larger of the 2 amounts determined under clause (i) or (ii), as follows:

“(i) BY PERCENTAGE OF CHILDREN.—This amount is determined by adding—

“(I) the number of children determined under section 1124(c) for that county constituting up to 15 percent, inclusive, of the county’s total population aged 5 to 17, inclusive, multiplied by 1.0;

“(II) the number of such children constituting more than 15 percent, but not more than 19 percent, of such population, multiplied by 1.75;

“(III) the number of such children constituting more than 19 percent, but not more than 24.20 percent, of such population, multiplied by 2.5;

“(IV) the number of such children constituting more than 24.20 percent, but not more than 29.20 percent, of such population, multiplied by 3.25; and

“(V) the number of such children constituting more than 29.20 percent of such population, multiplied by 4.0.

“(ii) BY NUMBER OF CHILDREN.—This amount is determined by adding—

“(I) the number of children determined under section 1124(c) constituting up to 2,311, inclusive, of the county’s total population aged 5 to 17, inclusive, multiplied by 1.0;

“(II) the number of such children between 2,312 and 7,913, inclusive, in such population, multiplied by 1.5;

“(III) the number of such children between 7,914 and 23,917, inclusive, in such population, multiplied by 2.0;

“(IV) the number of such children between 23,918 and 93,810, inclusive, in such population, multiplied by 2.5; and

“(V) the number of such children in excess of 93,811 in such population, multiplied by 3.0.

“(B) PUERTO RICO.—Notwithstanding subparagraph (A), the weighted child count for Puerto Rico under this paragraph shall not be greater than the total number of children counted under subsection 1124(c) multiplied by 1.72.

“(2) WEIGHTS FOR ALLOCATIONS TO LOCAL EDUCATIONAL AGENCIES.—

“(A) IN GENERAL.—For each fiscal year for which the Secretary uses local educational agency data, the weighted child count used to determine a local educational agency’s grant under this section is the larger of the 2 amounts determined under clauses (i) and (ii), as follows:

“(i) BY PERCENTAGE OF CHILDREN.—This amount is determined by adding—

“(I) the number of children determined under section 1124(c) for that local educational agency constituting up to 15.233 percent, inclusive, of the agency’s total population aged 5 to 17, inclusive, multiplied by 1.0;

“(II) the number of such children constituting more than 15.233 percent, but not more than 22.706 percent, of such population, multiplied by 1.75;

“(III) the number of such children constituting more than 22.706 percent, but not more than 32.213 percent, of such population, multiplied by 2.5;

“(IV) the number of such children constituting more than 32.213 percent, but not more than 41.452 percent, of such population, multiplied by 3.25; and

“(V) the number of such children constituting more than 41.452 percent of such population, multiplied by 4.0.

“(ii) BY NUMBER OF CHILDREN.—This amount is determined by adding—

“(I) the number of children determined under section 1124(c) constituting up to 710, inclusive, of the agency’s total population aged 5 to 17, inclusive, multiplied by 1.0;

“(II) the number of such children between 711 and 2,384, inclusive, in such population, multiplied by 1.5;

“(III) the number of such children between 2,385 and 9,645, inclusive, in such population, multiplied by 2.0;

“(IV) the number of such children between 9,646 and 54,600, inclusive, in such population, multiplied by 2.5; and

“(V) the number of such children in excess of 54,601 in such population, multiplied by 3.0.

“(B) PUERTO RICO.—Notwithstanding subparagraph (A), the weighted child count for Puerto Rico under this paragraph shall not be greater than the total number of children counted under section 1124(c) multiplied by 1.72.

“(d) CALCULATION OF GRANT AMOUNTS.—Grants under this section shall be calculated in accordance with section 1124(a)(2) and (3).

“(e) STATE MINIMUM.—Notwithstanding any other provision of this section or section 1122, from the total amount available for any fiscal year to carry out this section, each State shall be allotted at least the lesser of—

“(1) 0.25 percent of total appropriations; or

“(2) the average of—

“(A) one-quarter of 1 percent of the total amount available to carry out this section; and

“(B) 150 percent of the national average grant under this section per child described in section 1124(c), without application of a weighting factor, multiplied by the State’s total number of children described in section 1124(c), without application of a weighting factor.

“SEC. 1126. SPECIAL ALLOCATION PROCEDURES.

“(a) ALLOCATIONS FOR NEGLECTED CHILDREN.—

“(1) IN GENERAL.—If a State educational agency determines that a local educational agency in the State is unable or unwilling to provide for the special educational needs of children who are living in institutions for neglected children as described in subparagraph (B) of section 1124(c)(1), the State educational agency shall, if such agency assumes responsibility for the special educational needs of such children, receive the portion of such local educational agency’s allocation under sections 1124, 1124A, and 1125 that is attributable to such children.

“(2) SPECIAL RULE.—If the State educational agency does not assume such responsibility, any other State or local public agency that does assume such responsibility shall receive that portion of the local educational agency’s allocation.

“(b) ALLOCATIONS AMONG LOCAL EDUCATIONAL AGENCIES.—The State educational agency may allocate the amounts of grants under sections 1124, 1124A, and 1125 among the affected local educational agencies—

“(1) if 2 or more local educational agencies serve, in whole or in part, the same geographical area;

“(2) if a local educational agency provides free public education for children who reside in the school district of another local educational agency; or

“(3) to reflect the merger, creation, or change of boundaries of 1 or more local educational agencies.

“(c) REALLOCATION.—If a State educational agency determines that the amount of a grant a local educational agency would receive under sections 1124, 1124A, and 1125 is more than such local agency will use, the State educational agency shall make the excess amount available to other local educational agencies in the State that need additional funds in accordance with criteria established by the State educational agency.

“SEC. 1127. CARRYOVER AND WAIVER.

“(a) LIMITATION ON CARRYOVER.—Notwithstanding section 421 of the General Education Provisions Act or any other provision of law, not more than 15 percent of the funds allocated to a local educational agency for any fiscal year under this subpart (but not including funds received through any reallocation under this subpart) may remain available for obligation by such agency for 1 additional fiscal year.

“(b) WAIVER.—A State educational agency may, once every 3 years, waive the percentage limitation in subsection (a) if—

“(1) the agency determines that the request of a local educational agency is reasonable and necessary; or

“(2) supplemental appropriations for this subpart become available.

“(c) EXCLUSION.—The percentage limitation under subsection (a) shall not apply to any local educational agency that receives less than \$50,000 under this subpart for any fiscal year.

“SEC. 1128. SECULAR, NEUTRAL, AND NONIDEOLOGICAL.

“Any school that receives funds under this part shall ensure that educational services or other benefits provided under this part, including materials and equipment, shall be secular, neutral, and nonideological.”.

SEC. 111. READING FIRST; EARLY READING FIRST.

Part B of title I (20 U.S.C. 6361 et seq.) is amended—

(1) by striking the part heading and inserting the following:

“PART B—STUDENT READING SKILLS IMPROVEMENT GRANTS”;

- (2) by redesignating sections 1201 through 1212 as sections 1231 through 1242, respectively; and

“Subpart 1—Reading First

“SEC. 1201. FINDINGS.

“The Congress finds as follows:

“(1) The 2000 National Assessment of Educational Progress found that 68 percent of fourth grade students in the United States are reading below the proficient level.

“(2) According to the 2000 National Assessment of Educational Progress report on reading, 63 percent of African Americans, 58 percent of Hispanic Americans, 60 percent of children living in poverty, and 47 percent of children in urban schools scored ‘below basic’ in reading.

“(3) More than ½ of the students placed in special education classes are identified as learning disabled and, for as many as 80 percent of the students so identified, reading is the primary difficulty.

“(4) It is estimated that, at a minimum, 10,000,000 children have difficulty learning to read. 10 to 15 percent of those children eventually drop out of high school, and only 2 percent complete a 4-year program at an institution of higher education.

“(5) It is estimated that the number of children who are typically identified as poor readers can be significantly reduced through the implementation of early identification and prevention programs that are based on scientifically based reading research.

“(6) The report issued by the National Reading Panel in 2000 found that the course of reading instruction that obtains maximum benefits for students includes explicit and systematic instruction in phonemic awareness, phonics, vocabulary development, reading fluency, and reading comprehension strategies.

“SEC. 1202. PURPOSES.

“The purposes of this subpart are as follows:

“(1) To provide assistance to States and local educational agencies in establishing reading programs for students in grades kindergarten through 3 that are based on scientifically based reading research, in order to ensure that every student can read at grade level or above not later than the end of the third grade.

“(2) To provide assistance to States and local educational agencies in preparing teachers, including special education teachers, through professional development and other support, so the teachers can identify specific reading barriers facing their students and so the teachers have the tools to effectively help their students learn to read.

“(3) To provide assistance to States and local educational agencies in selecting and administering rigorous diagnostic reading and screening assessment tools that are valid and reliable, document the effectiveness of this subpart in improving the reading skills of students, and improve classroom instruction.

“(4) To provide assistance to States and local educational agencies in selecting or developing effective classroom instructional materials, programs, and strategies to implement scientific research-based methods that have been proven to prevent or remediate reading failure.

“(5) To strengthen coordination among schools and early literacy programs in order to improve reading achievement for all children.

“SEC. 1203. FORMULA GRANTS TO STATES.

PART G—RURAL EDUCATION FLEXIBILITY AND ASSISTANCE

SEC. 171. RURAL EDUCATION.

Title I is amended by adding at the end the following new part:

“PART G—RURAL EDUCATION FLEXIBILITY AND ASSISTANCE

“SEC. 1701. SHORT TITLE.

“This part may be cited as the ‘Rural Education Initiative Act’.

“SEC. 1702. FINDINGS.

“Congress finds the following:

“(1) While there are rural education initiatives identified at the State and local level, no Federal education policy focuses on the specific and unique needs of rural school districts and schools.

“(2) Small school districts often cannot use Federal grant funds distributed by formula because the formula allocation does not provide enough revenue to carry out the program the grant is intended to fund.

“(3) Rural schools often cannot compete for Federal funding distributed by competitive grants because the schools lack the personnel needed to prepare grant applications and the resources to hire specialists in the writing of Federal grant proposals.

“(4) A critical problem for rural school districts involves the hiring and retention of qualified administrators and certified teachers (especially in reading, science, and mathematics). As a result, teachers in rural schools are almost twice as likely to provide instruction in three or more subject areas than teachers in urban schools. Rural schools also face other tough challenges, such as shrinking local tax bases, high transportation costs, aging buildings, limited course offerings, and limited resources.

“Subpart 1—Rural Education Flexibility

“Subpart 1—English Language and Academic Instructional Programs

“SEC. 3101. SHORT TITLE.

“This subpart may be cited as the ‘English Language Proficiency and Academic Achievement Act’.

“SEC. 3102. FINDINGS AND PURPOSES.

“(a) **FINDINGS.**—The Congress finds as follows:

“(1) English is the common language of the United States and every citizen and other person residing in the United States should have a command of the English language in order to develop to their full potential.

“(2) Limited English proficient children, including recent immigrant children, must overcome a number of challenges in receiving an education in order to participate fully in American society, including—

“(A) segregated educational programs;

“(B) disproportionate and improper placement in special education and other special programs due to the use of inappropriate evaluation procedures;

“(C) the limited English proficiency of their parents, which hinders the parents’ ability to fully participate in the education of their children; and

“(D) a need for additional teachers and other staff who are professionally trained and qualified to serve such children.

“(3) States and local educational agencies need assistance in developing the capacity to provide programs of instruction that offer and provide an equal educational opportunity to children who need special assistance because English is not their dominant language.

“(4) Since 1979, the number of limited English proficient children attending school in the United States has more than doubled to greater than 4,000,000, and demographic trends indicate the population of limited English proficient children will continue to increase.

“(5) Native Americans, including native residents of the outlying areas, and Native American languages (as such terms are defined in section 103 of the Native American Languages Act) have a unique status under Federal law that requires special policies within the broad purposes of this part to serve the educational needs of language minority students in the United States.

“(6) Research, evaluation, and data collection capabilities in the field of instruction for limited English proficient children need to be strengthened so that educators and other staff teaching limited English proficient children in the classroom can better identify and promote programs, program implementation strategies, and instructional practices that result in the effective education of limited English proficient children.

“(7) The Federal Government has a special and continuing obligation to ensure that States and local educational agencies provide children of limited English proficiency the same educational opportunities afforded other children.

“(b) PURPOSES.—The purposes of this part are—

“(1) to help ensure that children who are limited English proficient, including recent immigrant children, attain English proficiency, develop high levels of academic attainment in English, and meet the same challenging State academic content standards and challenging State student academic achievement standards expected of all children;

“(2) to develop high-quality programs designed to assist local educational agencies in teaching limited English proficient children;

“(3) to assist local educational agencies to develop and enhance their capacity to provide high-quality instructional programs designed to prepare limited English proficient students, including recent immigrant students, to enter all-English instructional settings within 3 years; and

“(4) to provide State educational agencies and local educational agencies with the flexibility to implement instructional programs, tied to scientifically based reading research and sound research and theory on teaching limited English proficient children, that the agencies believe to be the most effective for teaching English.

“SEC. 3103. PARENTAL NOTIFICATION AND CONSENT FOR ENGLISH LANGUAGE INSTRUCTION.

“(a) NOTIFICATION.—If a local educational agency uses funds under this subpart to provide English language instruction to limited English proficient children, the agency shall inform a parent or the parents of a child participating in an English language instruction program for limited English proficient children assisted under this subpart of—

“(1) the reasons for the identification of the child as being in need of English language instruction;

“(2) the child’s level of English proficiency, how such level was assessed, and the status of the child’s academic achievement;

“(3) how the English language instruction program will specifically help the child acquire English and meet age-appropriate standards for grade promotion and graduation;

“(4) what the specific exit requirements are for the program;

“(5) the expected rate of transition from the program into a classroom that is not tailored for limited English proficient children; and

“(6) the expected rate of graduation from high school for the program if funds under this subpart are used for children in secondary schools.

“(b) CONSENT.—

“(1) AGENCY REQUIREMENTS.—

“(A) INFORMED CONSENT.—For a child who has been identified as limited English proficient prior to the beginning of the school year, each local educational agency that receives funds under this subpart shall make a reasonable and substantial effort to obtain informed parental consent prior to the placement of a child in an English language instruction program for limited English proficient children funded under this subpart, if the program does not include classes which exclusively or almost exclusively use the English language in instruction.

“(B) WRITTEN CONSENT NOT OBTAINED.—

“(i) IN GENERAL.—If written consent is not obtained, the local educational agency shall maintain a written record that includes the date and the manner in which such informed consent was sought, including the specific efforts made to obtain such consent.

“(ii) PROOF OF EFFORT.—Notice, in an understandable form, of specific efforts made to obtain written consent and a copy of the written record described in clause (i) shall be mailed or delivered in writing to a parent or the parents of a child prior to placing the child in a program described in subparagraph (A), and shall include a final request for parental consent for such services. After such notice has been mailed or delivered in writing, the local educational agency shall provide appropriate educational services.

“(iii) SPECIAL RULE APPLICABLE DURING SCHOOL YEAR.—For those children who have not been identified as limited English proficient prior to the beginning of the school year, the local educational agency shall make a reasonable and substantial effort to obtain parental consent under this clause. For such children, the agency shall document, in writing, its specific efforts to obtain such consent prior to placing the child in a program described in subparagraph (A). After such documentation has been made, the local educational agency shall provide appropriate educational services to such child. The proof of documentation shall be mailed or delivered in writing to a parent or the parents

of the child in a timely manner and shall include information on how to have their child immediately removed from the program upon their request. Nothing in this clause shall be construed as exempting a local educational agency from complying with the notification requirements of subsection (a) and the consent requirements of this paragraph.

“(A) shall select among methods of instruction, if more than one method is offered in the program; and

“(a) IN GENERAL.—Assessments of limited English proficient children participating in programs funded under this subpart, to the extent practicable, shall be in the language and form most likely to yield accurate and reliable information on what such students know and can do in content areas.

“(b) SPECIAL RULE.—Notwithstanding subsection (a), in the case of an assessment of reading or language arts of any student who has attended school in the United States (excluding Puerto Rico) for 3 or more consecutive school years, the assessment shall be in the form of a test written in English, except that, if the entity administering the assessment determines, on a case-by-case individual basis, that assessments in another language or form would likely yield more accurate and reliable information on what such student knows and can do, the entity may assess such student in such language or form for 1 additional year.

“SEC. 3105. FORMULA GRANTS TO STATES.

“(a) IN GENERAL.—In the case of each State that in accordance with section 3107 submits to the Secretary an application for a fiscal year, the Secretary shall make a grant for the year to the State for the purposes specified in subsection (b). “(C) SPECIAL RULE FOR PUERTO RICO.—The total amount allotted to Puerto Rico for any fiscal year under subparagraph (A) shall not exceed .5 percent of the total amount allotted to all States for that fiscal year.

“(4) USE OF DATA FOR DETERMINATIONS.—

“(A) IN GENERAL.—Except as provided in subparagraph (B), for the purpose of determining the number of children and youth who are limited English proficient and reside in a State and in all States for each fiscal year, the Secretary shall use the most recent satisfactory data available from the Bureau of the Census and the American Community Survey available from the Department of Commerce.

“(B) EXCEPTION.—If the data described in subparagraph (A) are more than 4 years old or unavailable, the Secretary shall use the most recent satisfactory data provided by the States, such as enrollment data and data that reflect the number of students taking the English proficiency assessments in the States.

“(5) NO REDUCTION PERMITTED BASED ON TEACHING METHOD.—The Secretary may not reduce a State’s allotment based on the State’s selection of any method of instruction as its preferred method of teaching the English language to children who are limited English proficient.

“(A) are based on high-quality, internationally competitive academic content standards and student academic achievement standards and build on Indian culture and the Indian community;

“(B) assist local educational agencies, Indian tribes, and other entities and individuals in providing Indian students the opportunity to achieve such standards; and

“(C) meet the unique educational and culturally related academic needs of American Indian and Alaska Native students;

“(2) since the date of the enactment of the initial Indian Education Act in 1972, the level of involvement of Indian parents in the planning, development, and implementation of educational programs that affect such parents and their children has increased significantly, and schools should continue to foster such involvement;

“(3) although the number of Indian teachers, administrators, and university professors has increased since 1972, teacher training programs are not recruiting, training, or retraining a sufficient number of Indian individuals as edu-

cators to meet the needs of a growing Indian student population in elementary, secondary, vocational, adult, and higher education;

“(4) the dropout rate for Indian students is unacceptably high; 9 percent of Indian students who were eighth graders in 1988 had dropped out of school by 1990;

“(5) during the period from 1980 to 1990, the percentage of Indian individuals living at or below the poverty level increased from 24 percent to 31 percent, and the readiness of Indian children to learn is hampered by the high incidence of poverty, unemployment, and health problems among Indian children and their families; and

“SEC. 3202. PURPOSE.

“(4) research, evaluation, data collection, and technical assistance.

“(c) REDUCTION OF PAYMENT FOR FAILURE TO MAINTAIN FISCAL EFFORT.—

“(1) IN GENERAL.—The Secretary may not pay a local educational agency the full amount of a grant award determined under section 3213 for any fiscal year unless the State educational agency notifies the Secretary, and the Secretary determines that, with respect to the provision of free public education by the local educational agency for the preceding fiscal year, the combined fiscal effort of the local educational agency and the State, computed on either a per student or aggregate expenditure basis, was not less than 90 percent of the amount of the combined fiscal effort, computed on the same basis, for the second preceding fiscal year.

“(2) FAILURE TO MAINTAIN EFFORT.—If, for any fiscal year, the Secretary determines that a local educational agency failed to maintain the fiscal effort of such agency at the level specified in paragraph (1), the Secretary shall—

“(A) reduce the amount of the grant that would otherwise be made to such agency under this chapter in the exact proportion of such agency’s failure to maintain its fiscal effort at such level; and

“(3) WAIVER.—(A) The Secretary may waive the requirement of paragraph (1), for not more than 1 year at a time, if the Secretary determines that the failure to comply with such requirement is due to exceptional or uncontrollable circumstances, such as a natural disaster or a precipitous and unforeseen decline in the agency’s financial resources.

“(B) The Secretary shall not use the reduced amount of such agency’s expenditures for the fiscal year preceding the fiscal year for which a waiver is granted to determine compliance with paragraph (1) for any succeeding fiscal year, but shall use the amount of expenditures that would have been required to comply with paragraph (1) in the absence of the waiver.

“(d) REALLOCATIONS.—The Secretary may reallocate, in a manner that the Secretary determines will best carry out the purpose of this chapter, any amounts that—

“Subpart 2—Alaska Native Education

“SEC. 3301. SHORT TITLE.

“This subpart may be cited as the ‘Alaska Native Educational Equity, Support, and Assistance Act’.

“SEC. 3302. FINDINGS.

“The Congress finds and declares:

“(1) The attainment of educational success is critical to the betterment of the conditions, long-term well-being and preservation of the culture of Alaska Natives.

“(2) It is the policy of the Federal Government to encourage the maximum participation by Alaska Natives in the planning and the management of Alaska Native education programs.

“(3) Alaska Native children enter and exit school with serious educational handicaps.

“(4) The educational achievement of Alaska Native children is far below national norms. In addition to low Native performance on standardized tests, Native student dropout rates are high, and Natives are significantly underrepresented among holders of baccalaureate degrees in the State of Alaska. As a result, Native students are being denied their opportunity to become full participants in society by grade school and high school educations that are condemning an entire generation to an underclass status and a life of limited choices.

“(5) The programs authorized herein, combined with expanded Head Start, infant learning and early childhood education programs, and parent education programs are essential if educational handicaps are to be overcome.

“(6) The sheer magnitude of the geographic barriers to be overcome in delivering educational services in rural and village Alaska should be addressed through the development and implementation of innovative, model programs in a variety of areas.

“(7) Congress finds that Native children should be afforded the opportunity to begin their formal education on a par with their non-Native peers. The Federal Government should lend support to efforts developed by and undertaken within the Alaska Native community to improve educational opportunity for all students.

“SEC. 3303. PURPOSE.

“It is the purpose of this subpart to—

“(1) recognize the unique educational needs of Alaska Natives;

“(2) authorize the development of supplemental educational programs to benefit Alaska Natives;

“(3) supplement existing programs and authorities in the area of education to further the purposes of this subpart; and

“(4) provide direction and guidance to appropriate Federal, State and local agencies to focus resources, including resources made available under this subpart, on meeting the educational needs of Alaska Natives.

“SEC. 3304. PROGRAM AUTHORIZED.

“(a) GENERAL AUTHORITY.—

“(1) PROGRAM AUTHORIZED.—The Secretary is authorized to make grants to, or enter into contracts with, Alaska Native organizations, educational entities with experience in developing or operating Alaska Native programs or programs of instruction conducted in Alaska Native languages, and consortia of such organizations and entities to carry out programs that meet the purpose of this subpart.

“(2) PERMISSIBLE ACTIVITIES.—Programs under this subpart may include—

“(A) the development and implementation of plans, methods, and strategies to improve the education of Alaska Natives;

“(B) the development of curricula and educational programs that address the educational needs of Alaska Native students, including—

“(ii) instructional programs that make use of Native Alaskan languages; and

“(iii) networks that introduce successful programs, materials, and techniques to urban and rural schools;

“(C) professional development activities for educators, including—

- “(i) programs to prepare teachers to address the cultural diversity and unique needs of Alaska Native students;
 - “(ii) in-service programs to improve the ability of teachers to meet the unique needs of Alaska Native students; and
 - “(iii) recruiting and preparing teachers who are Alaska Natives, reside in communities with high concentrations of Alaska Native students, or are likely to succeed as teachers in isolated, rural communities and engage in cross-cultural instruction;
 - “(D) the development and operation of home instruction programs for Alaska Native preschool children, the purpose of which is to ensure the active involvement of parents in their children’s education from the earliest ages;
 - “(E) family literacy services;
 - “(F) the development and operation of student enrichment programs in science and mathematics that—
 - “(i) are designed to prepare Alaska Native students from rural areas, who are preparing to enter high school, to excel in science and math; and
 - “(ii) provide appropriate support services to the families of such students that are needed to enable such students to benefit from the program;
 - “(G) research and data collection activities to determine the educational status and needs of Alaska Native children and adults;

- “(3) HOME INSTRUCTION PROGRAMS.—Home instruction programs for Alaska Native preschool children under paragraph (2)(D) may include—
- “(A) programs for parents and their infants, from prenatal through age three;
 - “(B) preschool programs; and

- “SEC. 3305. ADMINISTRATIVE PROVISIONS.**
- “(a) APPLICATION REQUIRED.—No grant may be made under this subpart, nor any contract be entered into under this subpart, unless an application is submitted to the Secretary in such form, in such manner, and containing such information as the Secretary may determine necessary to carry out the provisions of this subpart.

“(2) FURTHER REVISIONS.—Not later than 6 months after the close of the comment period, the Secretary shall establish final standards, distribute such standards to all tribes and publish such final standards in the Federal Register. “(C) by State accreditation standards for the State in which it is located.

“(2) DETERMINATION OF STANDARDS TO BE APPLIED.—The accreditation type or standards applied for each school shall be determined by the school board of the school, in consultation with the Administrator of the school, provided that in the case where the School Board and the Administrator fail to agree on the type of accreditation and standards to apply, the decision of the school board with the approval of the tribal governing body shall be final.

“(3) ASSISTANCE TO SCHOOL BOARDS.—The Secretary, through contracts and grants, shall assist school boards of contract or grant schools in implementation of the standards established under subsections (c) and (d), if the school boards request that such standards, in part or in whole, be implemented.

On an annual basis, the Secretary shall submit to the appropriate committees of Congress, all Bureau funded schools, and the tribal governing bodies of such schools a detailed plan to bring all Bureau schools and contract or grant schools up to the level required by the applicable standards established under this section. Such plan shall include detailed information on the status of each school's educational program in relation to the applicable standards established under this section, specific cost estimates for meeting such standards at each school and specific timelines for bringing each school up to the level required by such standards.

“(4) NOTICE.—Whenever closure, transfer to another authority, consolidation, or substantial curtailment of a school is under active consideration or review by any division of the Bureau or the Department of the Interior, the affected tribe, tribal governing body, and designated local school board, will be notified immediately, kept fully and currently informed, and afforded an opportunity to comment with respect to such consideration or review. When a formal decision is made to close, transfer to another authority, consolidate, or substantially curtail a school, the affected tribe, tribal governing body, and designated school board shall be notified at least 6 months prior to the end of the school year preceding the proposed closure date. Copies of any such notices and information shall be transmitted promptly to the appropriate committees of Congress and published in the Federal Register.

“(B) If the Secretary fails to make the determination with respect to an application by the date described in subparagraph (A), the application shall be treated as having been approved by the Secretary.

“(3) REQUIREMENTS FOR APPLICATIONS.—(A) Notwithstanding paragraph (2)(B), an application described in paragraph (1)(A) may be approved by the Secretary only if—

“(ii) written evidence of such approval is submitted with the application.

“(B) Each application described in paragraph (1)(A) shall provide information concerning each of the factors described in paragraph (1)(B).

“(4) DENIAL OF APPLICATIONS.—Whenever the Secretary makes a determination to deny approval of any application described in paragraph (1)(A), the Secretary shall—

“(A) state the objections in writing to the applicant not later 180 days after the application is submitted to the Secretary;

“(B) provide assistance to the applicant to overcome stated objections; and

“(C) provide the applicant a hearing, under the same rules and regulations pertaining to the Indian Self-Determination and Education Assistance Act and an opportunity to appeal the objections raised by the Secretary.

“(j) GENERAL USE OF FUNDS.—Funds received by Bureau funded schools from the Bureau of Indian Affairs and under any program from the Department of Education or any other Federal agency for the purpose of providing education or related services may be used for schoolwide projects to improve the educational program for all Indian students.

“(k) STUDY ON ADEQUACY OF FUNDS AND FORMULAS.—The Comptroller General shall conduct a study, in consultation with Indian tribes and local school boards, to determine the adequacy of funding, and formulas used by the Bureau to determine funding, for programs operated by Bureau funded schools, taking into account unique circumstances applicable to Bureau funded schools, as well as expenditures for comparable purposes in public schools nationally. Upon completion of the study, the Secretary of the Interior shall take such action as necessary to ensure distribution of the findings of the study to all affected Indian tribes, local school boards, and associations of local school boards.

“SEC. 1122. NATIONAL CRITERIA FOR HOME-LIVING SITUATIONS.

“(a) IN GENERAL.—The Secretary, in consultation with the Secretary of Education, Indian organizations and tribes, and Bureau funded schools, shall revise the national standards for home-living (dormitory) situations to include such factors as heating, lighting, cooling, adult-child ratios, needs for counselors (including special needs related to off-reservation home-living (dormitory) situations), therapeutic pro-

grams, space, and privacy. Such standards shall be implemented in Bureau operated schools, and shall serve as minimum standards for contract or grant schools. Once established, any revisions of such standards shall be developed according to the requirements established under section 1138A.

“(b) IMPLEMENTATION.—The Secretary shall implement the revised standards established under this section immediately upon their completion.

“(c) PLAN.—At the time of each annual budget submission for Bureau educational services is presented, the Secretary shall submit to the appropriate committees of Congress, the tribes, and the affected schools, and publish in the Federal Register, a detailed plan to bring all Bureau funded schools that provide home-living (dormitory) situations up to the standards established under this section. Such plan shall include a statement of the relative needs of each Bureau funded home-living (dormitory) school, projected future needs of each Bureau funded home-living (dormitory) school, detailed information on the status of each school in relation to the standards established under this section, specific cost estimates for meeting each standard for each such school, aggregate cost estimates for bringing all such schools into compliance with the criteria established under this section, and specific timelines for bringing each school into compliance with such standards.

“(d) WAIVER.—The criteria established under this section may be waived in the same manner as the standards provided under section 1121(c) may be waived.

“(e) CLOSURE FOR FAILURE TO MEET STANDARDS PROHIBITED.—No school in operation on or before January 1, 1987 (regardless of compliance or noncompliance with the criteria established under this section), may be closed, transferred to another authority, consolidated, or have its program substantially curtailed for failure to meet the criteria.

“SEC. 1123. CODIFICATION OF REGULATIONS.

“(a) PART 32 OF TITLE 25 OF CODE OF FEDERAL REGULATIONS.—The provisions of part 32 of title 25 of the Code of Federal Regulations, as in effect on January 1, 1987, are incorporated into this Act and shall be treated as though such provisions are set forth in this subsection. Such provisions may be altered only by means of an Act of Congress. To the extent that such provisions of part 32 do not conform with this Act or any statutory provision of law enacted before November 1, 1978, the provisions of this Act and the provisions of such other statutory law shall govern.

“(b) REGULATION DEFINED.—For purposes of this part, the term ‘regulation’ means any rules, regulations, guidelines, interpretations, orders, or requirements of general applicability prescribed by any officer or employee of the executive branch.

“SEC. 1124. SCHOOL BOUNDARIES.

“(a) ESTABLISHMENT BY SECRETARY.—The Secretary shall establish, by regulation, separate geographical attendance areas for each Bureau funded school.

“(b) ESTABLISHMENT BY TRIBAL BODY.—In any case where there is more than one Bureau funded school located on an Indian reservation, at the direction of the tribal governing body, the relevant school boards of the Bureau funded schools on the reservation may, by mutual consent, establish the relevant attendance areas for such schools, subject to the approval of the tribal governing body. Any such boundaries so established shall be accepted by the Secretary.

“(c) BOUNDARY REVISIONS.—

“(1) IN GENERAL.—On or after July 1, 2001, no geographical attendance area shall be revised or established with respect to any Bureau funded school unless the tribal governing body or the local school board concerned (if so designated by the tribal governing body) has been afforded—

“(A) at least 6 months notice of the intention of the Bureau to revise or establish such attendance area; and

“(B) the opportunity to propose alternative boundaries.

Any tribe may petition the Secretary for revision of existing attendance area boundaries. The Secretary shall accept such proposed alternative or revised boundaries unless the Secretary finds, after consultation with the affected tribe or tribes, that such revised boundaries do not reflect the needs of the Indian students to be served or do not provide adequate stability to all of the affected programs. The Secretary shall cause such revisions to be published in the Federal Register.

“(2) TRIBAL RESOLUTION DETERMINATION.—Nothing in this section shall be interpreted as denying a tribal governing body the authority, on a continuing basis, to adopt a tribal resolution allowing parents the choice of the Bureau funded school their children may attend, regardless of the attendance boundaries established under this section.

“(d) FUNDING RESTRICTIONS.—The Secretary shall not deny funding to a Bureau funded school for any eligible Indian student attending the school solely because

that student's home or domicile is outside of the geographical attendance area established for that school under this section. No funding shall be made available without tribal authorization to enable a school to provide transportation for any student to or from the school and a location outside the approved attendance area of the school.

“(e) RESERVATION AS BOUNDARY.—In any case where there is only one Bureau funded program located on an Indian reservation, the attendance area for the program shall be the boundaries (established by treaty, agreement, legislation, court decisions, or executive decisions and as accepted by the tribe) of the reservation served, and those students residing near the reservation shall also receive services from such program.

“(f) OFF-RESERVATION HOME-LIVING (DORMITORY) SCHOOLS.—Notwithstanding any geographical attendance areas, attendance at off-reservation home-living (dormitory) schools shall include students requiring special emphasis programs to be implemented at each off-reservation home-living (dormitory) school. Such attendance shall be coordinated between education line officers, the family, and the referring and receiving programs.

“SEC. 1125. FACILITIES CONSTRUCTION.

“(a) COMPLIANCE WITH HEALTH AND SAFETY STANDARDS.—The Secretary shall immediately begin to bring all schools, dormitories, and other Indian education-related facilities operated by the Bureau or under contract or grant with the Bureau into compliance with all applicable tribal, Federal, or State health and safety standards, whichever provides greater protection (except that the tribal standards to be applied shall be no greater than any otherwise applicable Federal or State standards), with section 504 of the Rehabilitation Act of 1973, and with the Americans with Disabilities Act of 1990. Nothing in this section shall require termination of the operations of any facility which does not comply with such provisions and which is in use on the date of the enactment of the No Child Left Behind Act of 2001.

“(b) COMPLIANCE PLAN.—At the time that the annual budget request for Bureau educational services is presented, the Secretary shall submit to the appropriate committees of Congress a detailed plan to bring all facilities covered under subsection (a) of this section into compliance with the standards referred to in subsection (a). Such plan shall include detailed information on the status of each facility's compliance with such standards, specific cost estimates for meeting such standards at each school, and specific timelines for bringing each school into compliance with such standards.

“(c) CONSTRUCTION PRIORITIES.—

“(1) SYSTEM TO ESTABLISH PRIORITIES.—On an annual basis the Secretary shall submit to the appropriate committees of Congress and cause to be published in the Federal Register, the system used to establish priorities for replacement and construction projects for Bureau funded schools and home-living schools, including boarding schools and dormitories. “(B) using the list prepared under subparagraph (A), propose a list for the orderly replacement of all Bureau funded education-related facilities over a period of 40 years to enable planning and scheduling of budget requests;

“(C) cause the list prepared under subsection (B) to be published in the Federal Register and allow a period of not less than 120 days for public comment;

“(D) make such revisions to the list prepared under subparagraph (B) as are appropriate based on the comments received; and

“(E) cause the final list to be published in the Federal Register.

“(3) EFFECT ON OTHER LIST.—Nothing in this section shall be construed as interfering with or changing in any way the construction priority list as it exists on the date of the enactment of the No Child Left Behind Act of 2001.

“(d) HAZARDOUS CONDITION AT BUREAU SCHOOL.—

“(1) CLOSURE OR CONSOLIDATION.—A Bureau funded school may be closed or consolidated, and the programs of a Bureau funded school may be substantially curtailed by reason of plant conditions that constitute an immediate hazard to health and safety only if a health and safety officer of the Bureau determines that such conditions exist at the Bureau funded school.

“(2) INSPECTION.—(A) After making a determination described in paragraph (1), the Bureau health and safety officer shall conduct an inspection of the condition of such plant accompanied by an appropriate tribal, county, municipal, or State health and safety officer in order to determine whether conditions at such plant constitute an immediate hazard to health and safety. Such inspection shall be completed by not later than the date that is 30 days after the date on which the action described in paragraph (1) is taken. No further negative action may be taken unless the findings are concurred in by the second, non-Bureau of Indian Affairs inspector.

“(B) If the health and safety officer conducting the inspection of a plant required under subparagraph (A) determines that conditions at the plant do not constitute an immediate hazard to health and safety, any consolidation or curtailment that was made under paragraph (1) shall immediately cease and any school closed by reason of conditions at the plant shall be reopened immediately.

“(C) If a Bureau funded school is temporarily closed or consolidated or the programs of a Bureau funded school are substantially curtailed under this subsection and the Secretary determines that the closure, consolidation, or curtailment will exceed 1 year, the Secretary shall submit to the Congress, by not later than 6 months after the date on which the closure, consolidation, or curtailment was initiated, a report which sets forth the reasons for such temporary actions, the actions the Secretary is taking to eliminate the conditions that constitute the hazard, and an estimated date by which such actions will be concluded.

“(e) FUNDING REQUIREMENT.—

“(1) DISTRIBUTION OF FUNDS.—Beginning with the fiscal year following the year of the date of the enactment of the No Child Left Behind Act of 2001, all funds appropriated for the operations and maintenance of Bureau funded schools shall be distributed by formula to the schools. No funds from this account may be retained or segregated by the Bureau to pay for administrative or other costs of any facilities branch or office, at any level of the Bureau.

“(2) REQUIREMENTS FOR CERTAIN USES.—No funds shall be withheld from the distribution to the budget of any school operated under contract or grant by the Bureau for maintenance or any other facilities or road related purpose, unless such school has consented, as a modification to the contract or in writing for grants schools, to the withholding of such funds, including the amount thereof, the purpose for which the funds will be used, and the timeline for the services to be provided. The school may, at the end of any fiscal year, cancel an agreement under this paragraph upon giving the Bureau 30 days notice of its intent to do so.

“(f) NO REDUCTION IN FEDERAL FUNDING.—Nothing in this section shall be construed to diminish any Federal funding due to the receipt by the school of funding for facilities improvement or construction from a State or any other source.

“(B) LOCAL SUPERVISORS.—The appropriate education line officers shall make arrangements for the maintenance of education facilities with the local supervisors of the Bureau maintenance personnel. The local supervisors of Bureau maintenance personnel shall take appropriate action to implement the decisions made by the appropriate education line officers, except that no funds under this chapter may be authorized for expenditure unless such appropriate education line officer is assured that the necessary maintenance has been, or will be, provided in a reasonable manner.

“(3) IMPLEMENTATION.—The requirements of this subsection shall be implemented as soon as practicable after the date of the enactment of the No Child Left Behind Act of 2001.

“(e) ACCEPTANCE OF GIFTS AND BEQUESTS.—Notwithstanding any other provision of law, the Director shall promulgate guidelines for the establishment of mechanisms for the acceptance of gifts and bequests for the use and benefit of particular schools or designated Bureau operated education programs, including, where appropriate, the establishment and administration of trust funds. “SEC. 1127. ALLOTMENT FORMULA.

“(a) FACTORS CONSIDERED; REVISION TO REFLECT STANDARDS.—

“(1) FORMULA.—The Secretary shall establish, by regulation adopted in accordance with section 1138A, a formula for determining the minimum annual amount of funds necessary to sustain each Bureau funded school. In establishing such formula, the Secretary shall consider—

“(A) the number of eligible Indian students served and total student population of the school;

“(B) special cost factors, such as—

“(i) the isolation of the school;

“(ii) the need for special staffing, transportation, or educational programs;

“(iii) food and housing costs;

“(iv) maintenance and repair costs associated with the physical condition of the educational facilities;

“(v) special transportation and other costs of isolated and small schools;

“(vi) the costs of home-living (dormitory) arrangements, where determined necessary by a tribal governing body or designated school board;

“(viii) the costs of therapeutic programs for students requiring such programs; and

“(ix) special costs for gifted and talented students;

“(C) the cost of providing academic services which are at least equivalent to those provided by public schools in the State in which the school is located; and

“(D) such other relevant factors as the Secretary determines are appropriate.

“(2) REVISION OF FORMULA.—Upon the establishment of the standards required in sections 1121 and 1122, the Secretary shall revise the formula established under this subsection to reflect the cost of funding such standards. Not later than January 1, 2003, the Secretary shall review the formula established under this section and shall take such steps as are necessary to increase the availability of counseling and therapeutic programs for students in off-reservation home-living (dormitory) schools and other Bureau operated residential facilities. Concurrent with such action, the Secretary shall review the standards established under section 1122 to be certain that adequate provision is made for parental notification regarding, and consent for, such counseling and therapeutic programs.

“(c) ANNUAL ADJUSTMENT; RESERVATION OF AMOUNT FOR SCHOOL BOARD ACTIVITIES.—

“(1) ANNUAL ADJUSTMENT.—For fiscal year 2003, and for each subsequent fiscal year, the Secretary shall adjust the formula established under subsection (a) to ensure that the formula does the following:

“(A) Uses a weighted unit of 1.2 for each eligible Indian student enrolled in the seventh and eighth grades of the school in considering the number of eligible Indian students served by the school.

“(B) Considers a school with an enrollment of less than 50 eligible Indian students as having an average daily attendance of 50 eligible Indian students for purposes of implementing the adjustment factor for small schools.

“(C) Takes into account the provision of residential services on less than a 9-month basis at a school when the school board and supervisor of the school determine that a less than 9-month basis will be implemented for the school year involved.

“(D) Uses a weighted unit of 2.0 for each eligible Indian student that—

“(i) is gifted and talented; and

“(ii) is enrolled in the school on a full-time basis,

in considering the number of eligible Indian students served by the school.

“(E) Uses a weighted unit of 0.25 for each eligible Indian student who is enrolled in a yearlong credit course in an Indian or Native language as part of the regular curriculum of a school, in considering the number of eligible Indian students served by such school. The adjustment required under this subparagraph shall be used for such school after—

“(i) the certification of the Indian or Native language curriculum by the school board of such school to the Secretary, together with an estimate of the number of full-time students expected to be enrolled in the curriculum in the second school year for which the certification is made; and

(ii) the funds appropriated for allotment under this section are designated by the appropriations Act appropriating such funds as the amount necessary to implement such adjustment at such school without reducing allotments made under this section to any school by virtue of such adjustment.

“(2) RESERVATION OF AMOUNT.—

“(A) IN GENERAL.—From the funds allotted in accordance with the formula established under subsection (a) for each Bureau school, the local school board of such school may reserve an amount which does not exceed the greater of—

“(i) \$8,000; or

“(ii) the lesser of—

“(I) \$15,000; or

“(II) 1 percent of such allotted funds,

for school board activities for such school, including (notwithstanding any other provision of law) meeting expenses and the cost of membership in, and support of, organizations engaged in activities on behalf of Indian education.

“(B) TRAINING.—Each school board shall see that each new member of the school board receives, within 12 months of the individual’s assuming a position on the school board, 40 hours of training relevant to that individual’s service on the board. Such training may include legal issues pertaining to schools funded by the Bureau, legal issues pertaining to school boards, ethics, and other topics deemed appropriate by the school board.

“(d) RESERVATION OF AMOUNT FOR EMERGENCIES.—The Secretary shall reserve from the funds available for distribution for each fiscal year under this section an amount which, in the aggregate, shall equal 1 percent of the funds available for such purpose for that fiscal year. Such funds shall be used, at the discretion of the Director of the Office of Indian Education Programs, to meet emergencies and unforeseen contingencies affecting the education programs funded under this section. Funds reserved under this subsection may only be expended for education services or programs, including emergency repairs of educational facilities, at a schoolsite (as defined by section 5204(c)(2) of the Tribally Controlled Schools Act of 1988). Funds reserved under this subsection shall remain available without fiscal year limitation until expended. However, the aggregate amount available from all fiscal years may not exceed 1 percent of the current year funds. Whenever, the Secretary makes funds available under this subsection, the Secretary shall report such action to the appropriate committees of Congress within the annual budget submission.

“(B) the school board consents;

“(C) the student is a dependent of a Bureau, Indian Health Service, or tribal government employee who lives on or near the schoolsite; or

“(a) GRANTS; EFFECT UPON APPROPRIATED AMOUNTS.—

“(1) GRANTS.—Subject to the availability of appropriated funds, the Secretary shall provide grants to each tribe or tribal organization operating a contract school or grant school in the amount determined under this section with respect to the tribe or tribal organization for the purpose of paying the administrative and indirect costs incurred in operating contract or grant schools, provided that no school operated as a stand-alone institution shall receive less than \$200,000 per year for these purposes, in order to—

“(A) enable tribes and tribal organizations operating such schools, without reducing direct program services to the beneficiaries of the program, to provide all related administrative overhead services and operations necessary to meet the requirements of law and prudent management practice; and

“(B) carry out other necessary support functions which would otherwise be provided by the Secretary or other Federal officers or employees, from resources other than direct program funds, in support of comparable Bureau operated programs.

“(2) EFFECT UPON APPROPRIATED AMOUNTS.—Amounts appropriated to fund the grants provided under this section shall be in addition to, and shall not reduce, the amounts appropriated for the program being administered by the contract or grant school.

“(b) DETERMINATION OF GRANT AMOUNT.—

“(1) IN GENERAL.—The amount of the grant provided to each tribe or tribal organization under this section for each fiscal year shall be determined by applying the administrative cost percentage rate of the tribe or tribal organization to the aggregate of the Bureau elementary and secondary functions operated by the tribe or tribal organization for which funds are received from or through the Bureau. The administrative cost percentage rate determined under subsection (c) does not apply to other programs operated by the tribe or tribal organization.

“(2) DIRECT COST BASE FUNDS.—The Secretary shall—

“(A) reduce the amount of the grant determined under paragraph (1) to the extent that payments for administrative costs are actually received by an Indian tribe or tribal organization under any Federal education program included in the direct cost base of the tribe or tribal organization; and

“(B) take such actions as may be necessary to be reimbursed by any other department or agency of the Federal Government for the portion of grants made under this section for the costs of administering any program for Indians that is funded by appropriations made to such other department or agency.

“(c) ADMINISTRATIVE COST PERCENTAGE RATE.—

“(1) IN GENERAL.—For purposes of this section, the administrative cost percentage rate for a contract or grant school for a fiscal year is equal to the percentage determined by dividing—

“(A) the sum of—

“(i) the amount equal to—

“(I) the direct cost base of the tribe or tribal organization for the fiscal year, multiplied by

“(II) the minimum base rate; plus

“(ii) the amount equal to—

“(I) the standard direct cost base; multiplied by

“(II) the maximum base rate; by

“(B) the sum of—

“(i) the direct cost base of the tribe or tribal organization for the fiscal year; plus

“(ii) the standard direct cost base.

“(2) ROUNDING.—The administrative cost percentage rate shall be determined to the $\frac{1}{100}$ of a decimal point.

“(d) COMBINING FUNDS.—

“(1) IN GENERAL.—Funds received by a tribe or contract or grant school as grants under this section for tribal elementary or secondary educational programs may be combined by the tribe or contract or grant school into a single administrative cost account without the necessity of maintaining separate funding source accounting.

“(2) INDIRECT COST FUNDS.—Indirect cost funds for programs at the school which share common administrative services with tribal elementary or sec-

ondary educational programs may be included in the administrative cost account described in paragraph (1).

“(e) AVAILABILITY OF FUNDS.—Funds received as grants under this section with respect to tribal elementary or secondary education programs shall remain available to the contract or grant school without fiscal year limitation and without diminishing the amount of any grants otherwise payable to the school under this section for any fiscal year beginning after the fiscal year for which the grant is provided.

“(f) TREATMENT OF FUNDS.—Funds received as grants under this section for Bureau funded programs operated by a tribe or tribal organization under a contract or agreement shall not be taken into consideration for purposes of indirect cost underrecovery and overrecovery determinations by any Federal agency for any other funds, from whatever source derived.

“(g) TREATMENT OF ENTITY OPERATING OTHER PROGRAMS.—In applying this section and section 105 of the Indian Self-Determination and Education Assistance Act with respect to an Indian tribe or tribal organization that—

“(2) operates one or more other programs under a contract or grant provided under the Indian Self-Determination and Education Assistance Act, the Secretary shall ensure that the Indian tribe or tribal organization is provided with the full amount of the administrative costs that are associated with operating the contract or grant school, and of the indirect costs, that are associated with all of such other programs, provided that funds appropriated for implementation of this section shall be used only to supply the amount of the grant required to be provided by this section.

“(3) DIRECT COST BASE.—(A) Except as otherwise provided in subparagraph (B), the direct cost base of a tribe or tribal organization for the fiscal year is the aggregate direct cost program funding for all tribal elementary or secondary educational programs operated by the tribe or tribal organization during—

“(i) the second fiscal year preceding such fiscal year; or

“(ii) if such programs have not been operated by the tribe or tribal organization during the two preceding fiscal years, the first fiscal year preceding such fiscal year.

“(B) In the case of Bureau elementary or secondary education functions which have not previously been operated by a tribe or tribal organization under contract, grant, or agreement with the Bureau, the direct cost base for the initial

year shall be the projected aggregate direct cost program funding for all Bureau elementary and secondary functions to be operated by the tribe or tribal organization during that fiscal year.

“(4) MAXIMUM BASE RATE.—The term ‘maximum base rate’ means 50 percent.

“(5) MINIMUM BASE RATE.—The term ‘minimum base rate’ means 11 percent.

“(i) STUDIES FOR DETERMINATION OF FACTORS AFFECTING COSTS; BASE RATES LIMITS; STANDARD DIRECT COST BASE; REPORT TO CONGRESS.—

“(1) STUDIES.—Not later than 120 days after the date of the enactment of the No Child Left Behind Act of 2001, the Director of the Office of Indian Education Programs shall—

“(A) conduct such studies as may be needed to establish an empirical basis for determining relevant factors substantially affecting required administrative costs of tribal elementary and secondary education programs, using the formula set forth in subsection (c); and

“(B) conduct a study to determine—

“(i) a maximum base rate which ensures that the amount of the grants provided under this section will provide adequate (but not excessive) funding of the administrative costs of the smallest tribal elementary or secondary educational programs;

“(ii) a minimum base rate which ensures that the amount of the grants provided under this section will provide adequate (but not excessive) funding of the administrative costs of the largest tribal elementary or secondary educational programs; and

“(iii) a standard direct cost base which is the aggregate direct cost funding level for which the percentage determined under subsection (c) will—

“(I) be equal to the median between the maximum base rate and the minimum base rate; and

“(II) ensure that the amount of the grants provided under this section will provide adequate (but not excessive) funding of the administrative costs of tribal elementary or secondary educational programs closest to the size of the program.

“(2) GUIDELINES.—The studies required under paragraph (1) shall—

“(A) be conducted in full consultation (in accordance with section 1131) with—

“(C) take into account the availability of skilled labor; commodities, business and automatic data processing services, related Indian preference and Indian control of education requirements, and any other market factors found substantially to affect the administrative costs and efficiency of each such tribal elementary or secondary educational program studied in order to assure that all required administrative activities can reasonably be delivered in a cost effective manner for each such program, given an administrative cost allowance generated by the values, percentages, or other factors found in the studies to be relevant in such formula;

“(D) identify, and quantify in terms of percentages of direct program costs, any general factors arising from geographic isolation, or numbers of programs administered, independent of program size factors used to compute a base administrative cost percentage in such formula; and

“(E) identify any other incremental cost factors substantially affecting the costs of required administrative cost functions at any of the tribal elementary or secondary educational programs studied and determine whether the

factors are of general applicability to other such programs, and (if so) how the factors may effectively be incorporated into such formula.

“(3) CONSULTATION WITH INSPECTOR GENERAL.—In carrying out the studies required under this subsection, the Director shall obtain the input of, and afford an opportunity to participate to, the Inspector General of the Department of the Interior.

“(4) CONSIDERATION OF DELIVERY OF ADMINISTRATIVE SERVICES.—Determinations described in paragraph (2)(C) shall be based on what is practicable at each location studied, given prudent management practice, irrespective of whether required administrative services were actually or fully delivered at these sites, or whether other services were delivered instead, during the period of the study.

“(5) REPORT.—Upon completion of the studies conducted under paragraph (1), the Director shall submit to Congress a report on the findings of the studies, together with determinations based upon such studies that would affect the definitions set forth under subsection (e) that are used in the formula set forth in subsection (c).

“(6) PROJECTION OF COSTS.—The Secretary shall include in the Bureau’s justification for each appropriations request beginning in the first fiscal year after the completion of the studies conducted under paragraph (1), a projection of the overall costs associated with the formula set forth in subsection (c) for all tribal elementary or secondary education programs which the Secretary expects to be funded in the fiscal year for which the appropriations are sought.

“(7) DETERMINATION OF PROGRAM SIZE.—For purposes of this subsection, the size of tribal elementary or secondary educational programs is determined by the aggregate direct cost program funding level for all Bureau funded programs which share common administrative cost functions.

“(j) AUTHORIZATION OF APPROPRIATIONS.—

“(1) IN GENERAL.—There are authorized to be appropriated such sums as necessary to carry out this section.

“(2) REDUCTIONS.—If the total amount of funds necessary to provide grants to tribes and tribal organizations in the amounts determined under subsection (b) for a fiscal year exceeds the amount of funds appropriated to carry out this section for such fiscal year, the Secretary shall reduce the amount of each grant determined under subsection (b) for such fiscal year by an amount that bears the same relationship to such excess as the amount of such grants determined under subsection (b) bears to the total of all grants determined under subsection (b) section for all tribes and tribal organizations for such fiscal year.

“(k) APPLICABILITY TO SCHOOLS OPERATING UNDER TRIBALLY CONTROLLED SCHOOLS ACT OF 1988.—The provisions of this section shall also apply to those schools operating under the Tribally Controlled Schools Act of 1988.

Such Division shall be under the direct supervision and control of the Director of the Office.

“(b) FUNCTIONS.—In consultation with the tribal governing bodies and tribal school boards, the Director of the Office, through the Division, shall conduct studies, surveys, or other activities to gather demographic information on Bureau funded schools and project the amount necessary to provide Indian students in such schools the educational program set forth in this part.

Such system shall allot funds in accordance with section 1127. All amounts appropriated for distribution under this section may be made available under paragraph (2).

“(2) TIMING FOR USE OF FUNDS.—(A) For the purposes of affording adequate notice of funding available pursuant to the allotments made under section 1127, amounts appropriated in an appropriations Act for any fiscal year shall become available for obligation by the affected schools on July 1 of the fiscal year in which such amounts are appropriated without further action by the Secretary, and shall remain available for obligation through the succeeding fiscal year.

“(B) The Secretary shall, on the basis of the amount appropriated in accordance with this paragraph—

“(i) publish, not later than July 1 of the fiscal year for which the funds are appropriated, allotments to each affected school made under section 1127 of 85 percent of such appropriation; and

“(ii) publish, not later than September 30 of such fiscal year, the allotments to be made under section 1127 of the remaining 15 percent of such appropriation, adjusted to reflect the actual student attendance.

“(3) LIMITATION.—(A) Notwithstanding any other provision of law or regulation, the supervisor of a Bureau funded school may expend an aggregate of not more than \$50,000 of the amount allotted the school under section 1127 to acquire materials, supplies, equipment, services, operation, and maintenance for the school without competitive bidding if—

“(i) the cost for any single item purchased does not exceed \$15,000;

“(ii) the school board approves the procurement;

“(iii) the supervisor certifies that the cost is fair and reasonable;

“(iv) the documents relating to the procurement executed by the supervisor or other school staff cite this paragraph as authority for the procurement; and

“(v) the transaction is documented in a journal maintained at the school clearly identifying when the transaction occurred, what was acquired and from whom, the price paid, the quantities acquired, and any other information the supervisor or school board considers relevant.

“(B) Not later than 6 months after the date of the enactment of the No Child Left Behind Act of 2001, the Secretary shall cause to be sent to each supervisor of a Bureau operated program and school board chairperson, the education line officer or officers of each agency and area, and the Bureau Division in charge of procurement, at both the local and national levels, notice of this paragraph.

“(C) The Director shall be responsible for determining the application of this paragraph, including the authorization of specific individuals to carry out this paragraph, and shall be responsible for the provision of guidelines on the use of this paragraph and adequate training on such guidelines.

“(B) the Secretary may waive the application of the provisions of section 1121(h) with respect to the closure or consolidation of a school, or the curtailment of a program at a school, during such fiscal year if the funds described in clauses (i) and (ii) of subparagraph (A) with respect to such school are used to fund allotments made under section 1127 for such fiscal year.

“(b) LOCAL FINANCIAL PLANS FOR EXPENDITURE OF FUNDS.—

“(1) PLAN REQUIRED.—In the case of all Bureau operated schools, allotted funds shall be expended on the basis of local financial plans which ensure meeting the accreditation requirements or standards for the school established pursuant to section 1121 and which shall be prepared by the local school supervisor in active consultation with the local school board for each school. The local school board for each school shall have the authority to ratify, reject, or amend

such financial plan, and expenditures thereunder, and, on its own determination or in response to the supervisor of the school, to revise such financial plan to meet needs not foreseen at the time of preparation of the financial plan.

“(2) The supervisor—

“(A) shall put into effect the decisions of the school board;

“(B) shall provide the appropriate local union representative of the education employees with copies of proposed draft financial plans and all amendments or modifications thereto, at the same time such copies are submitted to the local school board; and

“(C) may appeal any such action of the local school board to the appropriate education line officer of the Bureau agency by filing a written statement describing the action and the reasons the supervisor believes such action should be overturned. A copy of such statement shall be submitted to the local school board and such board shall be afforded an opportunity to respond, in writing, to such appeal. After reviewing such written appeal and response, the appropriate education line officer may, for good cause, overturn the action of the local school board. The appropriate education line officer shall transmit the determination of such appeal in the form of a written opinion to such board and to such supervisor identifying the reasons for overturning such action.

“(c) USE OF SELF-DETERMINATION GRANTS FUNDS.—Funds for self-determination grants under section 103(a)(2) of the Indian Self-Determination and Education Assistance Act shall not be used for providing technical assistance and training in the field of education by the Bureau unless such services are provided in accordance with a plan, agreed to by the tribe or tribes affected and the Bureau, under which control of education programs is intended to be transferred to such tribe or tribes within a specific period of time negotiated under such agreement. The Secretary may approve applications for funding tribal divisions of education and development of tribal codes of education from funds appropriated pursuant to section 104(a) of such Act.

“(d) TECHNICAL ASSISTANCE AND TRAINING.—In the exercise of its authority under this section, a local school board may request technical assistance and training from the Secretary, and the Secretary shall, to the greatest extent possible, provide such services, and make appropriate provisions in the budget of the Office for such services.

“(e) SUMMER PROGRAM OF ACADEMIC AND SUPPORT SERVICES.—

“(1) IN GENERAL.—A financial plan under subsection (b) for a school may include, at the discretion of the local administrator and the school board of such school, a provision for a summer program of academic and support services for students of the school. Any such program may include activities related to the prevention of alcohol and substance abuse. The Assistant Secretary for Indian Affairs shall provide for the utilization of any such school facility during any summer in which such utilization is requested.

“(2) USE OF OTHER FUNDS.—Notwithstanding any other provision of law, funds authorized under the Act of April 16, 1934, and this Act may be used to augment the services provided in each summer program at the option, and under the control, of the tribe or Indian controlled school receiving such funds.

“(3) TECHNICAL ASSISTANCE AND PROGRAM COORDINATION.—The Assistant Secretary for Indian Affairs, acting through the Director of the Office, shall provide technical assistance and coordination for any program described in paragraph (1) and shall, to the extent possible, encourage the coordination of such programs with any other summer programs that might benefit Indian youth, regardless of the funding source or administrative entity of any such program.

“(f) COOPERATIVE AGREEMENTS.—

“(1) IN GENERAL.—From funds allotted to a Bureau school under section 1127, the Secretary shall, if specifically requested by the tribal governing body (as defined in section 1141), implement any cooperative agreement entered into between the tribe, the Bureau school board, and the local public school district which meets the requirements of paragraph (2) and involves the school. The tribe, the Bureau school board, and the local public school district shall determine the terms of the agreement. Such agreement may encompass coordination of all or any part of the following:

“(A) Academic program and curriculum, unless the Bureau school is currently accredited by a State or regional accrediting entity and would not continue to be so accredited.

“(B) Support services, including procurement and facilities maintenance.

“(C) Transportation.

“(2) EQUAL BENEFIT AND BURDEN.—Each agreement entered into pursuant to the authority provided in paragraph (1) shall confer a benefit upon the Bureau

school commensurate with the burden assumed, though this requirement shall not be construed so as to require equal expenditures or an exchange of similar services.

“(g) **PRODUCT OR RESULT OF STUDENT PROJECTS.**—Notwithstanding any other provision of law, where there is agreement on action between the superintendent and the school board of a Bureau funded school, the product or result of a project conducted in whole or in major part by a student may be given to that student upon the completion of such project.

“(h) **NOT CONSIDERED FEDERAL FUNDS FOR MATCHING REQUIREMENTS.**—Notwithstanding any other provision of law, funds received by a Bureau funded school under this part shall not be considered Federal funds for the purposes of meeting a matching funds requirement for any Federal program.

During such discussions and joint deliberations, interested parties (including tribes and school officials) shall be given an opportunity to present issues including proposals regarding changes in current practices or programs which will be considered for future action by the Bureau. All interested parties shall be given an opportunity to participate and discuss the options presented or to present alternatives, with the views and concerns of the interested parties given effect unless the Secretary determines, from information available from or presented by the interested parties during one or more of the discussions and deliberations, that there is a substantial reason for another course of action. The Secretary shall submit to any Member of Congress, within 18 days of the receipt of a written request by such Member, a written explanation of any decision made by the Secretary which is not consistent with the views of the interested parties.

“SEC. 1132. INDIAN EDUCATION PERSONNEL.

“(C) that it shall not be a prerequisite to the employment of an individual in an education position at the local level that such individual's name appear on the national list maintained pursuant to subparagraph (A)(ii) or that such individual has applied at the national level for an education position.

“(2) EXCEPTION FOR CERTAIN TEMPORARY EMPLOYMENT.—The Secretary may authorize the temporary employment in an education position of an individual who has not met the certification standards established pursuant to regulations, if the Secretary determines that failure to do so would result in that position remaining vacant.

“(d) HIRING OF EDUCATORS.—

“(1) REQUIREMENTS.—In prescribing regulations to govern the appointment of educators, the Secretary shall require—

“(A)(i) that educators employed in a Bureau operated school (other than the supervisor of the school) shall be hired by the supervisor of the school. In cases where there are no qualified applicants available, such supervisor may consult the national list maintained pursuant to subsection (c)(1)(A)(ii);

“(ii) each school supervisor shall be hired by the education line officer of the agency office of the Bureau in which the school is located;

“(B) that before an individual is employed in an education position in a school by the supervisor of a school (or with respect to the position of supervisor, by the appropriate agency education line officer), the local school board for the school shall be consulted. A determination by such school board that such individual should or should not be so employed shall be instituted by the supervisor (or with respect to the position of supervisor, by the agency superintendent for education);

“(C) that before an individual may be employed in an education position at the agency level, the appropriate agency school board shall be consulted, and that a determination by such school board that such individual should or should not be employed shall be instituted by the agency superintendent for education; and

If such individual is employed at the local level, such individual's name shall be immediately forwarded to the Secretary, who shall, as soon as practicable but in no event in more than 30 days, ascertain the accuracy of the statement made by such individual pursuant to the first sentence of this paragraph. Notwithstanding subsection (e), if the individual's statement is found to have been false, such individual, at the Secretary's discretion, may be disciplined or discharged. If the individual has applied at the national level for an education position in the Bureau, the appointment of such individual at the local level shall be conditional for a period of 90 days, during which period the Secretary may appoint a more qualified individual (as determined by the Secretary) from the list maintained at the national level pursuant to subsection (c)(1)(A)(ii) to the position to which such individual was appointed.

“(3) STATUTORY CONSTRUCTION.—Except as expressly provided, nothing in this section shall be construed as conferring upon local school boards authority over, or control of, educators at Bureau funded schools or the authority to issue management decisions.

“(e) DISCHARGE AND CONDITIONS OF EMPLOYMENT OF EDUCATORS.—

“(1) REGULATIONS.—In prescribing regulations to govern the discharge and conditions of employment of educators, the Secretary shall require—

Upon giving notice of proposed discharge to an educator, the supervisor involved shall immediately notify the local school board for the school of such action. A determination by the local school board that such educator shall not be discharged shall be followed by the supervisor. The supervisor shall have the right to appeal such action to the education line officer of the appropriate agency office of the Bureau. Upon such an appeal, the agency education line officer may, for good cause and in writing to the local school board, overturn the determination of the local school board with respect to the employment of such individual.

“(3) RECOMMENDATIONS OF SCHOOL BOARDS FOR DISCHARGE.—Each local school board for a Bureau school shall have the right—

“(A) to recommend to the supervisor of such school that an educator employed in the school be discharged; and

“(B) to recommend to the education line officer of the appropriate agency office of the Bureau and to the Director of the Office, that the supervisor of the school be discharged.

“(f) APPLICABILITY OF INDIAN PREFERENCE LAWS.—

“(1) IN GENERAL.—Notwithstanding any provision of the Indian preference laws, such laws shall not apply in the case of any personnel action under this section respecting an applicant or employee not entitled to Indian preference if each tribal organization concerned grants a written waiver of the application of such laws with respect to such personnel action and states that such waiver is necessary. This paragraph shall not relieve the Bureau’s responsibility to issue timely and adequate announcements and advertisements concerning any such personnel action if such action is intended to fill a vacancy (no matter how such vacancy is created).

“(2) TRIBAL ORGANIZATION DEFINED.—For purposes of this subsection, the term ‘tribal organization’ means—

“(A) the recognized governing body of any Indian tribe, band, nation, pueblo, or other organized community, including a Native village (as defined in section 3(c) of the Alaska Native Claims Settlement Act); or

Such term shall not include section 7(b) of the Indian Self-Determination and Education Assistance Act.

“(g) COMPENSATION OR ANNUAL SALARY.—

“(1) IN GENERAL.—(A) Except as otherwise provided in this section, the Secretary shall fix the basic compensation for educators and education positions at rates in effect under the General Schedule for individuals with comparable qualifications, and holding comparable positions, to whom chapter 51 of title 5, United States Code, is applicable or on the basis of the Federal Wage System schedule in effect for the locality, and for the comparable positions, the rates of compensation in effect for the senior executive service.

“(B) The Secretary shall establish the rate of basic compensation, or annual salary rates, for the positions of teachers and counselors (including dormitory counselors and home-living counselors) at the rates of basic compensation applicable (on the date of the enactment of the No Child Left Behind Act of 2001 and thereafter) to comparable positions in the overseas schools under the Defense Department Overseas Teachers Pay Act. The Secretary shall allow the local school boards authority to implement only the aspects of the Defense Department Overseas Teacher pay provisions that are considered essential for recruitment and retention. Implementation of such provisions shall not be construed to require the implementation of the Act in its entirety.

“(C)(i) Beginning with the fiscal year following the date of the enactment of the No Child Left Behind Act of 2001, each school board may set the rate of

compensation or annual salary rate for teachers and counselors (including academic counselors) who are new hires at the school and who have not worked at the school on the date of implementation of this provision, at rates consistent with the rates paid for individuals in the same positions, with the same tenure and training, in any other school within whose boundaries the Bureau school lies. In instances where the adoption of such rates cause a reduction in the payment of compensation from that which was in effect for the fiscal year following the date of the enactment of the No Child Left Behind Act of 2001, the new rate may be applied to the compensation of employees of the school who worked at the school on the date of the enactment of that Act by applying those rates to each contract renewal such that the reduction takes effect in three equal installments. Where adoption of such rates lead to an increase in the payment of compensation from that which was in effect for the fiscal year following the date of the enactment of the No Child Left Behind Act of 2001, the school board may make such rates applicable at the next contract renewal such that either—

“(I) the increase occurs in its entirety; or

“(II) the increase is applied in three equal installments.

“(ii) The establishment of rates of basic compensation and annual salary rates under subparagraphs (B) and (C) shall not preclude the use of regulations and procedures used by the Bureau prior to April 28, 1988, in making determinations regarding promotions and advancements through levels of pay that are based on the merit, education, experience, or tenure of the educator.

“(D) The establishment of rates of basic compensation and annual salary rates under subparagraphs (B) and (C) shall not affect the continued employment or compensation of an educator who was employed in an education position on October 31, 1979, and who did not make an election under subsection (p) is in effect on January 1, 1990.

“(2) POST-DIFFERENTIAL RATES.—(A) The Secretary may pay a post-differential rate not to exceed 25 percent of the rate of basic compensation, on the basis of conditions of environment or work which warrant additional pay as a recruitment and retention incentive.

“(B)(i) Upon the request of the supervisor and the local school board of a Bureau school, the Secretary shall grant the supervisor of the school authorization to provide one or more post-differentials under subparagraph (A) unless the Secretary determines for clear and convincing reasons (and advises the board in writing of those reasons) that certain of the requested post-differentials should be disapproved or decreased because there is no disparity of compensation for the involved employees or positions in the Bureau school, as compared with the nearest public school, that is either—

“(I) at least 5 percent; or

“(II) less than 5 percent and affects the recruitment or retention of employees at the school.

“(ii) A request under clause (i) shall be deemed granted at the end of the 60th day after the request is received in the Central Office of the Bureau unless before that time the request is approved, approved with modification, or disapproved by the Secretary.

“(iii) The Secretary or the supervisor of a Bureau school may discontinue or decrease a post-differential authorized under this subparagraph at the beginning of a school year if—

“(I) the local school board requests that such differential be discontinued or decreased; or

“(II) the Secretary or the supervisor determines for clear and convincing reasons (and advises the board in writing of those reasons) that there is no disparity of compensation that would affect the recruitment or retention of employees at the school after the differential is discontinued or decreased.

“(iv) On or before February 1 of each year, the Secretary shall submit to Congress a report describing the requests and grants of authority under this subparagraph during the previous year and listing the positions contracted under those grants of authority.

“(1) ELECTION OF EMPLOYEE.—Notwithstanding any other provision of law, including laws relating to dual compensation, the Secretary, at the election of the employee, shall prorate the salary of an employee employed in an education position for the academic school year over the entire 12-month period. Each educator employed for the academic school year shall annually elect to be paid on a 12-month basis or for those months while school is in session. Such stipend shall be paid as a supplement to the employee's base pay.

SEC. 314. TRIBALLY CONTROLLED SCHOOLS ACT OF 1988.

Sections 5202 through 5212 of the Tribally Controlled Schools Act of 1988 (25 U.S.C. 2501 et seq.) are amended to read as follows:

“SEC. 5202. FINDINGS.

“Congress, after careful review of the Federal Government’s historical and special legal relationship with, and resulting responsibilities to, Indians, finds that—

“(1) the Indian Self-Determination and Education Assistance Act, which was a product of the legitimate aspirations and a recognition of the inherent authority of Indian nations, was and is a crucial positive step towards tribal and community control;

“(2) the Bureau of Indian Affairs’ administration and domination of the contracting process under such Act has not provided the full opportunity to develop leadership skills crucial to the realization of self-government and has denied Indians an effective voice in the planning and implementation of programs for the benefit of Indians which are responsive to the true needs of Indian communities;

“(3) Indians will never surrender their desire to control their relationships both among themselves and with non-Indian governments, organizations, and persons;

“(4) true self-determination in any society of people is dependent upon an educational process which will ensure the development of qualified people to fulfill meaningful leadership roles;

“(5) the Federal administration of education for Indian children has not effected the desired level of educational achievement or created the diverse opportunities and personal satisfaction that education can and should provide;

“(6) true local control requires the least possible Federal interference; and

“(7) the time has come to enhance the concepts made manifest in the Indian Self-Determination and Education Assistance Act.

“SEC. 5203. DECLARATION OF POLICY.

“(a) RECOGNITION.—Congress recognizes the obligation of the United States to respond to the strong expression of the Indian people for self-determination by assuring maximum Indian participation in the direction of educational services so as to render such services more responsive to the needs and desires of those communities.

“(b) COMMITMENT.—Congress declares its commitment to the maintenance of the Federal Government’s unique and continuing trust relationship with and responsibility to the Indian people through the establishment of a meaningful Indian self-determination policy for education which will deter further perpetuation of Federal bureaucratic domination of programs.

“(c) NATIONAL GOAL.—Congress declares that a major national goal of the United States is to provide the resources, processes, and structure which will enable tribes and local communities to effect the quantity and quality of educational services and opportunities which will permit Indian children to compete and excel in the life areas of their choice and to achieve the measure of self-determination essential to their social and economic well-being.

“(d) EDUCATIONAL NEEDS.—Congress affirms the reality of the special and unique educational needs of Indian peoples, including the need for programs to meet the linguistic and cultural aspirations of Indian tribes and communities. These may best be met through a grant process.

“(e) FEDERAL RELATIONS.—Congress declares its commitment to these policies and its support, to the full extent of its responsibility, for Federal relations with the Indian Nations.

“SEC. 4101. FINDINGS AND STATEMENT OF PURPOSE.

- “(a) FINDINGS.—Congress finds that this subpart—
 - “(1) provides flexibility to meet local needs;
 - “(2) promotes local and State education reforms;
 - “(3) contributes to the improvement of academic achievement for all students;
 - “(4) provides funding for critical activities; and
 - “(5) provides services for private school students.
- “(b) STATEMENT OF PURPOSE.—It is the purpose of programs under this subpart—
 - “(1) to provide funding to enable States and local educational agencies to implement promising educational reform programs and school improvement initiatives based on scientifically based research;
 - “(2) to provide a continuing source of innovation and educational improvement, including support for library services and instructional and media materials; and
 - “(3) to meet the educational needs of all students, including at-risk youth.
- “(c) STATE AND LOCAL RESPONSIBILITY.—
 - “(1) IN GENERAL.—The States shall have the basic responsibility for the administration of funds made available under this subpart, but such administration shall be carried out with a minimum of paperwork.
 - “(2) DESIGN AND IMPLEMENTATION.—Notwithstanding paragraph (1), local educational agencies, school superintendents and principals, and classroom teachers and supporting personnel shall be mainly responsible for the design and implementation of programs assisted under this subpart, because such agencies and individuals have the most direct contact with students and are most likely to be able to design programs to meet the educational needs of students in their own school districts.

“CHAPTER 1—STATE AND LOCAL PROGRAMS

“SEC. 4111. ALLOCATION TO STATES.

- “(a) RESERVATIONS.—From the sums appropriated to carry out this subpart for each fiscal year, the Secretary shall reserve not more than 1 percent for payments to outlying areas to be allotted in accordance with their respective needs.
- “(b) ALLOCATION OF REMAINDER.—From the remainder of such sums, the Secretary shall allocate, and make available in accordance with this subpart, to each State an amount which bears the same ratio to the amount of such remainder as the school-age population of the State bears to the school-age population of all States, except that no State shall receive less than an amount equal to $\frac{1}{2}$ of 1 percent of such remainder.

“SEC. 4112. ALLOCATION TO LOCAL EDUCATIONAL AGENCIES.

- “(a) DISTRIBUTION RULE.—
 - “(1) IN GENERAL.—Subject to paragraph (2), from the sums made available each year to carry out this subpart, the State shall distribute not less than 85 percent to local educational agencies within such State according to the relative enrollments in public and private, nonprofit schools within the jurisdictions of such agencies, adjusted, in accordance with criteria approved by the Secretary, to provide higher per-pupil allocations to local educational agencies that have the greatest numbers or percentages of children whose education imposes a higher than average cost per child, such as—

“(A) children living in areas with high concentrations of economically disadvantaged families;

“(B) children from economically disadvantaged families; and

“(C) children living in sparsely populated areas.

“(2) EXCEPTION.—100 percent of any amount by which the funds paid to a State under this subpart for a fiscal year exceed the amount of such funds paid to the State for fiscal year 2001 shall be distributed to local educational agencies and used locally for innovative assistance described in section 4131(b).

“(3) LIMITATION ON USE OF FUNDS FOR ADMINISTRATION.—In each fiscal year, a State may use not more than 25 percent of the funds available for State programs under this subpart for State administration under section 4121.

“(b) CALCULATION OF ENROLLMENTS.—

“(1) IN GENERAL.—The calculation of relative enrollments under subsection

(a)(1) shall be on the basis of the total of—

“(A) the number of children enrolled in public schools; and

“(B) the number of children enrolled in private, nonprofit schools whose parents would like their children to participate in programs or projects assisted under this subpart, for the fiscal year preceding the fiscal year for which the determination is made.

“(2) CONSTRUCTION.—Nothing in this subsection shall diminish the responsibility of each local educational agency to contact, on an annual basis, appropriate officials from private nonprofit schools within the areas served by such agencies in order to determine whether such schools desire that their children participate in programs assisted under this chapter.

“(3) ADJUSTMENTS.—

“(A) IN GENERAL.—Relative enrollments calculated under subsection (a)(1) shall be adjusted, in accordance with criteria approved by the Secretary under subparagraph (B), to provide higher per-pupil allocations only to local educational agencies that serve the greatest numbers or percentages of—

“(i) children living in areas with high concentrations of economically disadvantaged families;

“(ii) children from economically disadvantaged families; or

“(iii) children living in sparsely populated areas.

“(B) CRITERIA.—The Secretary shall review criteria submitted by a State for adjusting allocations under paragraph (1) and shall approve such criteria only if the Secretary determines that such criteria are reasonably calculated to produce an adjusted allocation that reflects the relative needs of the State's local educational agencies based on the factors set forth in subparagraph (A).

“(c) PAYMENT OF ALLOCATIONS.—

“(1) DISTRIBUTION.—From the funds paid to a State under this subpart for a fiscal year, a State shall distribute to each eligible local educational agency that has submitted an application as required in section 4133 the amount of such local educational agency's allocation, as determined under subsection (a).

“(2) ADDITIONAL FUNDS.—

“(A) IN GENERAL.—Additional funds resulting from higher per-pupil allocations provided to a local educational agency on the basis of adjusted enrollments of children described in subsection (a)(1) may, in the discretion of the local educational agency, be allocated for expenditures to provide services for children enrolled in public and private, nonprofit schools in direct proportion to the number of children described in subsection (a)(1) and enrolled in such schools within the local educational agency.

“(B) ELECTION.—In any fiscal year, any local educational agency that elects to allocate such additional funds in the manner described in subparagraph (A) shall allocate all additional funds to schools within the local educational agency in such manner.

“(C) CONSTRUCTION.—Subparagraphs (A) and (B) may not be construed to require any school to limit the use of the additional funds described in subparagraph (A) to the provision of services to specific students or categories of students.

“CHAPTER 2—STATE PROGRAMS

“SEC. 4121. STATE USE OF FUNDS.

“A State may use funds made available for State use under this subpart only for—

“SEC. 4133. LOCAL APPLICATIONS.

“CHAPTER 4—GENERAL PROVISIONS

“SEC. 4141. MAINTENANCE OF EFFORT; FEDERAL FUNDS SUPPLEMENTARY.

“(a) MAINTENANCE OF EFFORT.—

“(1) IN GENERAL.—Except as provided in paragraph (2), a State is entitled to receive its full allocation of funds under this subpart for any fiscal year only if the Secretary determines that either the combined fiscal effort per student or the aggregate expenditures within the State with respect to the provision of free public education for the fiscal year preceding the fiscal year for which the determination is made was not less than 90 percent of such combined fiscal effort or aggregate expenditures for the fiscal year that is 2 fiscal years before the fiscal year for which the determination is made.

“(2) REDUCTION OF FUNDS.—The Secretary shall reduce the amount of the allocation of funds under this subpart in any fiscal year in the exact proportion to which the State fails to meet the requirements of paragraph (1) by falling below 90 percent of both the fiscal effort per student and aggregate expenditures (using the measure most favorable to the State), and no such lesser amount shall be used for computing the effort required under paragraph (1) for subsequent years.

“(3) WAIVER.—The Secretary may waive, for 1 fiscal year only, the requirements of this section if the Secretary determines that such a waiver would be equitable due to exceptional or uncontrollable circumstances such as a natural disaster or a precipitous and unforeseen decline in the financial resources of the State.

“(b) FEDERAL FUNDS SUPPLEMENTARY.—A State or local educational agency may use and allocate funds received under this subpart only to supplement and, to the extent practical, to increase the level of funds that would, in the absence of Federal funds made available under this subpart, be made available from non-Federal sources, and in no case may such funds be used so as to supplant funds from non-Federal sources.

“SEC. 4142. PARTICIPATION OF CHILDREN ENROLLED IN PRIVATE SCHOOLS.

“(a) PARTICIPATION ON EQUITABLE BASIS.—

“(1) IN GENERAL.—To the extent consistent with the number of children in the school district of a local educational agency which is eligible to receive funds under this subpart or which serves the area in which a program or project assisted under this subpart is located, who are enrolled in private nonprofit elementary and secondary schools, or with respect to instructional or personnel training programs funded by the State from funds made available for State use, such agency, after consultation with appropriate private school officials—

“(A) shall provide for the benefit of such children in such schools secular, neutral, and nonideological services, materials, and equipment, including the participation of the teachers of such children (and other educational personnel serving such children) in training programs, and the repair or minor remodeling of public facilities as may be necessary for their provision (consistent with subsection (c) of this section); or

“(B) if such services, materials, and equipment are not feasible or necessary in 1 or more such private schools as determined by the local educational agency after consultation with the appropriate private school officials, shall provide such other arrangements as will assure equitable participation of such children in the purposes and benefits of this subpart.

“(2) OTHER PROVISIONS FOR SERVICES.—If no program or project is carried out under paragraph (1) in the school district of a local educational agency, the State shall make arrangements, such as through contracts with nonprofit agencies or organizations, under which children in private schools in such district are provided with services and materials to the extent that would have occurred if the local educational agency had received funds under this subpart.

“(3) APPLICATION OF REQUIREMENTS.—The requirements of this section relating to the participation of children, teachers, and other personnel serving such children shall apply to programs and projects carried out under this subpart by a State or local educational agency, whether directly or through grants to or contracts with other public or private agencies, institutions, or organizations.

“(1) IN GENERAL.—Expenditures for programs pursuant to subsection (a) shall be equal (consistent with the number of children to be served) to expenditures for programs under this subpart for children enrolled in the public schools of the local educational agency.

“(2) CONCENTRATED PROGRAMS.—Taking into account the needs of the individual children and other factors which relate to the expenditures referred to in paragraph (1), and when funds available to a local educational agency under this subpart are used to concentrate programs or projects on a particular group, attendance area, or grade or age level, children enrolled in private schools who are included within the group, attendance area, or grade or age level selected for such concentration shall, after consultation with the appropriate private school officials, be assured equitable participation in the purposes and benefits of such programs or projects.

“(2) PROVISION OF SERVICES.—The provision of services pursuant to this subpart shall be provided by employees of a public agency or through contract by such public agency with a person, an association, agency, or corporation who or which, in the provision of such services, is independent of such private school and of any religious organizations, and such employment or contract shall be under the control and supervision of such public agency, and the funds provided under this subpart shall not be commingled with State or local funds.

“(d) WAIVER.—

“(1) STATE PROHIBITION WAIVER.—If by reason of any provision of law a State or local educational agency is prohibited from providing for the participation in programs of children enrolled in private elementary and secondary schools, as required by this section, the Secretary shall waive such requirements and shall arrange for the provision of services to such children through arrangements which shall be subject to the requirements of this section.

“(2) FAILURE TO COMPLY.—If the Secretary determines that a State or a local educational agency has substantially failed or is unwilling to provide for the participation on an equitable basis of children enrolled in private elementary and secondary schools as required by this section, the Secretary may waive such requirements and shall arrange for the provision of services to such children through arrangements which shall be subject to the requirements of this section.

“(e) WITHHOLDING OF ALLOCATION.—Pending final resolution of any investigation or complaint that could result in a waiver under subsection (d)(1) or (d)(2), the Secretary may withhold from the allocation of the affected State or local educational agency the amount estimated by the Secretary to be necessary to pay the cost of services to be provided by the Secretary under such subsection.

“(f) TERM OF DETERMINATIONS.—Any determination by the Secretary under this section shall continue in effect until the Secretary determines that there will no longer be any failure or inability on the part of the State or local educational agency to meet the requirements of subsections (a) and (b).

“(g) PAYMENT FROM STATE ALLOTMENT.—When the Secretary arranges for services pursuant to this section, the Secretary shall, after consultation with the appropriate public and private school officials, pay the cost of such services, including the

administrative costs of arranging for those services, from the appropriate allotment of the State under this subpart.

“(h) REVIEW.—

“(1) WRITTEN OBJECTIONS.—The Secretary shall not take any final action under this section until the State and the local educational agency affected by such action have had an opportunity, for not less than 45 days after receiving written notice thereof, to submit written objections and to appear before the Secretary or the Secretary’s designee to show cause why that action should not be taken.

“(2) COURT ACTION.—If a State or local educational agency is dissatisfied with the Secretary’s final action after a proceeding under paragraph (1), such agency may, not later than 60 days after notice of such action, file with the United States court of appeals for the circuit in which such State is located a petition for review of that action. A copy of the petition shall be transmitted by the clerk of the court to the Secretary. The Secretary thereupon shall file in the court the record of the proceedings on which the Secretary based this action, as provided in section 2112 of title 28, United States Code.

“(3) REMAND TO SECRETARY.—The findings of fact by the Secretary, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Secretary to take further evidence and the Secretary may make new or modified findings of fact and may modify the Secretary’s previous action, and shall file in the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

“(4) COURT REVIEW.—Upon the filing of such petition, the court shall have jurisdiction to affirm the action of the Secretary or to set such action aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

“(i) PRIOR DETERMINATION.—Any bypass determination by the Secretary under chapter 2 of title I of this Act (as such chapter was in effect on the day preceding the date of enactment of the Improving America’s Schools Act of 1994) shall, to the extent consistent with the purposes of this title, apply to programs under this title.

“SEC. 4143. FEDERAL ADMINISTRATION.

“(b) RULEMAKING.—The Secretary shall issue regulations under this subpart only to the extent that such regulations are necessary to ensure that there is compliance with the specific requirements and assurances required by this subpart.

“(6) arts education is a valuable part of the elementary and secondary school curriculum.

“Subpart 3—Gifted and Talented Children

“SEC. 4161. SHORT TITLE.

“This subpart may be cited as the ‘Jacob K. Javits Gifted and Talented Students Education Act of 2001’.

“SEC. 4162. FINDINGS AND PURPOSE.

“(a) FINDINGS.—Congress finds the following:

“(1) While the families and communities of some gifted and talented students can provide private educational programs with appropriately trained staff to supplement public educational offerings, most gifted and talented students, especially those from inner cities, rural communities, or low-income families, must rely on the services and personnel available in public schools. In order to ensure that there are equal educational opportunities for all gifted and talented students in the United States, the public schools should provide gifted and talented education programs carried out by qualified professionals.

“(2) Due to the wide dispersal of students who are gifted and talented and the national interest in a well-educated populace, it is the Federal Government that can most effectively and appropriately conduct scientifically based research and development to ensure that there is a national capacity to educate students who are gifted and talented in the 21st century.

“(3) Many State and local educational agencies lack the specialized resources and trained personnel necessary to consistently plan and implement effective programs for the identification of gifted and talented students and for the provision of educational services and programs appropriate for the needs of such students.

“(4) Because gifted and talented students are generally more advanced academically, are generally able to learn more quickly, and generally study in more depth and complexity than others their age, they require educational opportunities and experiences that are different from those usually available to other students.

“(5) A typical elementary school student who is academically gifted and talented has already mastered 35 to 50 percent of the content to be learned in several subjects in any school year before that year begins. Without an advanced and challenging curriculum, such a student may lose motivation and develop poor study habits that are difficult to break.

“(6) Classes in elementary and secondary schools in the United States consist of students with a wide variety of traits, characteristics, and needs. Although most teachers receive some training to meet the needs of students with limited English proficiency, students with disabilities, and students from diverse cultural and racial backgrounds, few receive training to meet the needs of students who are gifted and talented.

“(b) PURPOSE.—The purpose of this subpart is to initiate a coordinated program of scientifically based research, demonstration projects, innovative strategies, and similar activities designed to build and enhance the ability of elementary and secondary schools nationwide to meet the special educational needs of gifted and talented students.

“SEC. 4163. RULE OF CONSTRUCTION.

Nothing in this subpart shall be construed to prohibit a recipient of funds under this subpart from serving gifted and talented students simultaneously with students with similar educational needs, in the same educational settings where appropriate.

“SEC. 4164. AUTHORIZED PROGRAMS.

“(a) ESTABLISHMENT OF PROGRAM.—

“(1) IN GENERAL.—From the sums available to carry out this subpart in any fiscal year, the Secretary (after consultation with experts in the field of the education of gifted and talented students) shall make grants to, or enter into contracts with, State educational agencies, local educational agencies, institutions of higher education, other public agencies, and other private agencies and organizations (including Indian tribes and Indian organizations (as such terms are defined in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b)) and Native Hawaiian organizations) to assist such agencies, institutions, and organizations in carrying out programs or projects authorized by this subpart that are designed to meet the educational needs of gifted and talented students, including the training of personnel in the education of gifted and talented students and in the use, where appropriate, of gifted and talented services, materials, and methods for all students.

“(2) APPLICATION.—

“(A) IN GENERAL.—Each entity seeking assistance under this subpart shall submit an application to the Secretary at such time, in such manner, and containing such information as the Secretary may reasonably require.

“(B) CONTENTS.—Each application submitted under this paragraph shall describe how—

SEC. 411. PUBLIC CHARTER SCHOOLS.

Title IV, as amended by section 401, is further amended by adding at the end the following:

“PART B—PUBLIC CHARTER SCHOOLS

“SEC. 4201. FINDINGS AND PURPOSE.

“(a) FINDINGS.—The Congress finds that—

“(1) enhancement of parent and student choices among public schools can assist in promoting comprehensive educational reform and give more students the opportunity to meet challenging State academic content standards and State student academic achievement standards, if sufficiently diverse and high-quality choices, and genuine opportunities to take advantage of such choices, are available to all students;

“(2) useful examples of such choices can come from States and communities that experiment with methods of offering teachers and other educators, parents, and other members of the public the opportunity to design and implement new public schools and to transform existing public schools;

“(3) charter schools are a mechanism for testing a variety of educational approaches and should, therefore, be exempted from restrictive rules and regulations if the leadership of such schools commits to attaining specific and ambitious educational results for educationally disadvantaged students consistent with challenging State academic content standards and State student academic achievement standards for all students;

“(4) charter schools can embody the necessary mixture of enhanced choice, exemption from restrictive regulations, and a focus on learning gains;

“(5) charter schools, including charter schools that are schools-within-schools, can help reduce school size, and this reduction can have a significant effect on student achievement;

“(6) the Federal Government should test, evaluate, and disseminate information on a variety of charter school models in order to help demonstrate the benefits of this promising educational reform; and

- “(7) there is a strong documented need for cash-flow assistance to charter schools that are starting up, because State and local operating revenue streams are not immediately available.
- “(b) PURPOSE.—It is the purpose of this part to increase national understanding of the charter schools model by—
 - “(1) providing financial assistance for the planning, program design and initial implementation of charter schools;
 - “(2) evaluating the effects of such schools, including the effects on students, student achievement, staff, and parents; and
 - “(3) expanding the number of high-quality charter schools available to students across the Nation.

“SEC. 4202. PROGRAM AUTHORIZED.

“(a) IN GENERAL.—The Secretary may award grants to State educational agencies having applications approved pursuant to section 4203 to enable such agencies to conduct a charter school grant program in accordance with this part.

“(b) SPECIAL RULE.—If a State educational agency elects not to participate in the program authorized by this part or does not have an application approved under section 4203, the Secretary may award a grant to an eligible applicant that serves such State and has an application approved pursuant to section 4203(c).

“(3) PRIORITY CRITERIA.—The criteria referred to in paragraph (1) are the following:

“(A) The State has demonstrated progress, in increasing the number of high quality charter schools that are held accountable in the terms of the schools’ charters for meeting clear and measurable objectives for the educational progress of the students attending the schools, in the period prior to the period for which a State educational agency or eligible applicant applies for a grant under this part.

“(B) The State—

“(i) provides for one authorized public chartering agency that is not a local educational agency, such as a State chartering board, for each individual or entity seeking to operate a charter school pursuant to such State law; or

“(ii) in the case of a State in which local educational agencies are the only authorized public chartering agencies, allows for an appeals process for the denial of an application for a charter school.

“(C) The State ensures that each charter school has a high degree of autonomy over the charter school’s budgets and expenditures.

“There are authorized to be appropriated to carry out this part \$25,000,000 for fiscal year 2002 and such sums as may be necessary for each of fiscal years 2003 through 2006.”.

“PART D—ELEMENTARY AND SECONDARY SCHOOL COUNSELING PROGRAMS

“SEC. 5401. ELEMENTARY AND SECONDARY SCHOOL COUNSELING PROGRAMS.

“(a) FINDINGS.—Congress finds as follows:

“(1) The Surgeon General reported in January 2001 that 1 in 10 children suffer from mental illnesses severe enough to impair development and fewer than 1 in 5 children get treatment for mental illnesses.

“(2) The Surgeon General reported that the burden of suffering by children with mental health needs and their families has created a health crisis in this country. Growing numbers of children are suffering needlessly because their emotional, behavioral, and developmental needs are not being met by the very institutions and systems that were created to take care of them.

“(3) As a result of the concern about the failure of the healthcare system to reach children and adolescents with mental illnesses, there is currently great interest in developing new models for the delivery of mental health and counseling services that can reach underserved groups efficiently.

“(4) Schools are a sensible point of intervention because of their central position in many children’s lives and development, especially when families are unable to assume a leading role.

“(5) School-based mental health and counseling services allow for the identification of children in need of treatment much earlier in their development.

“(6) Establishing mental health and counseling services in schools provides access to underserved youth with or at risk of emotional or behavioral problems.

“(7) The Surgeon General’s 2000 report on youth violence concludes that effective treatment can divert a significant proportion of delinquent and violent youths from future violence and crime.

“(8) Mental health and counseling services can play an important role in violence prevention on all levels, including preventing problem behaviors from developing; identifying and serving specific, at-risk populations; and reducing the deleterious effects of violence on victims and witnesses.

“(9) An evaluation of the model program for the elementary school counseling demonstration program established pursuant to this section prior to the date of enactment of the Elementary and Secondary Counseling Improvement Act of 2001 found that the number of referrals to the principal’s office decreased by nearly half, the use of force, weapons, and threatening of others also decreased, school suspensions were reduced, and students felt safer.

“(10) The report produced by the Institute of Medicine, ‘Schools and Health: Our Nation’s Investment’, recommended a student-to-school counselor ratio of 250:1, student-to-school psychologist ratio of 1000:1, and a student-to-school social worker ratio of 800:1. The United States average student-to-counselor ratio is 551:1. Ratios for school psychologists and school social workers also exceed the recommended levels.

“(b) GRANTS AUTHORIZED.—

“(1) IN GENERAL.—The Secretary may use funds provided under this section to award grants to local educational agencies to enable such agencies to establish or expand elementary and secondary school counseling programs which meet the requirements of subsection (c).

“(2) PRIORITY.—In awarding grants under this section, the Secretary shall give special consideration to applications describing programs which—

“(A) demonstrate the greatest need for new or additional counseling services among children in the schools served by the applicant, in part, by providing information on current ratios of students to school counselors, students to school social workers, and students to school psychologists;

“(B) propose the most promising and innovative approaches for initiating or expanding school counseling; and

“(C) show the greatest potential for replication and dissemination.

“(3) EQUITABLE DISTRIBUTION.—In awarding grants under this section, the Secretary shall ensure an equitable geographic distribution among the regions of the United States and among urban, suburban, and rural local educational agencies.

“(4) DURATION.—A grant under this section shall be awarded for a period not to exceed 3 years.

“(5) MAXIMUM GRANT.—A grant awarded under this program shall not exceed \$400,000 for any fiscal year.

“(6) SUPPLEMENT.—Assistance made available under this section shall be used to supplement, and may not supplant, other Federal, State, or local funds used for providing school-based counseling and mental health services to students.

“(c) REQUIREMENTS FOR COUNSELING PROGRAMS.—Each program funded under this section shall—

“(1) be comprehensive in addressing the counseling and educational needs of all students;

“(2) use a developmental, preventive approach to counseling;

“(3) increase the range, availability, quantity, and quality of counseling services in the elementary and secondary schools of the local educational agency;

“(4) expand counseling services through qualified school counselors, school psychologists, school social workers, and child and adolescent psychiatrists;

“(5) use innovative approaches to increase children’s understanding of peer and family relationships, work and self, decisionmaking, or academic and career planning, or to improve peer interaction;

“(6) provide counseling services in settings that meet the range of needs of students;

“(7) include inservice training, including training for teachers in appropriate identification and intervention techniques for disciplining and teaching students at risk of violent behavior, by school counselors, school psychologists, school social workers, and child and adolescent psychiatrists;

“(8) involve parents of participating students in the design, implementation, and evaluation of a counseling program;

“(9) involve community groups, social service agencies, or other public or private entities in collaborative efforts to enhance the program;

“(10) evaluate annually the effectiveness and outcomes of the counseling services and activities assisted under this section;

“(11) ensure a team approach to school counseling in the elementary and secondary schools of the local educational agency by working toward ratios recommended by the American School Health Association of one school counselor to 250 students, one school social worker to 800 students, and one school psychologist to 1,000 students; and

“(12) ensure that school counselors, school psychologists, school social workers, or child and adolescent psychiatrists paid from funds made available under this section spend a majority of their time at the school in activities directly related to the counseling process.

“(d) LIMITATION ON ADMINISTRATIVE COSTS.—Not more than 3 percent of the amounts made available under this section in any fiscal year may be used for administrative costs to carry out this section.

“(e) DEFINITIONS.—For purposes of this section—

“(a) IN GENERAL.—A local educational agency may receive funds under a covered program for any fiscal year only if the State educational agency finds that either the combined fiscal effort per student or the aggregate expenditures of such agency and the State with respect to the provision of free public education by such agency for the preceding fiscal year was not less than 90 percent of such combined fiscal effort or aggregate expenditures for the second preceding fiscal year.

“(b) REDUCTION IN CASE OF FAILURE TO MEET.—

“(1) IN GENERAL.—The State educational agency shall reduce the amount of the allocation of funds under a covered program in any fiscal year in the exact proportion to which a local educational agency fails to meet the requirement of subsection (a) of this section by falling below 90 percent of both the combined fiscal effort per student and aggregate expenditures (using the measure most favorable to such local agency).

“(2) SPECIAL RULE.—No such lesser amount shall be used for computing the effort required under subsection (a) of this section for subsequent years.

“(B) what services will be offered;

“(C) how, where, and by whom the services will be provided;

“(D) how the services will be assessed and how the results of the assessment will be used to improve such services;

“(E) the size and scope of the equitable services to be provided to the eligible private school children, teachers, and other educational personnel and the amount of funds available for such services; and

“(F) how and when the agency, consortium, or entity will make decisions about the delivery of services, including a thorough consideration and analysis of the views of the private school officials on the provision of contract services through potential third party providers.

“(2) DISAGREEMENT.—If the agency, consortium or entity disagrees with the views of the private school officials on the provision of services through a contract, the agency, consortium, or entity shall provide in writing to such private school officials an analysis of the reasons why the local educational agency has chosen not to use a contractor.

“(3) TIMING.—Such consultation shall occur before the agency, consortium, or entity makes any decision that affects the opportunities of eligible private school children, teachers, and other educational personnel to participate in programs under this Act, and shall continue throughout the implementation and assessment of activities under this section.

“(4) DISCUSSION REQUIRED.—Such consultation shall include a discussion of service delivery mechanisms that the agency, consortium, or entity could use to

“(1) instruction and other classroom activities provide the greatest opportunity for students, especially at-risk and disadvantaged students, to attain high standards and achieve academic success;

“(2) one of the greatest obstacles to establishing an effective, classroom-centered education system is the cost of paperwork compliance;

“(3) paperwork places a burden on teachers and administrators who must complete Federal and State forms to apply for Federal funds and absorbs time and money which otherwise would be spent on students;

“(4) the Education at a Crossroads Report released in 1998 by the Education Subcommittee on Oversight and Investigations states that requirements by the Department of Education result in more than 48,600,000 hours of paperwork per year; and

“(5) paperwork distracts from the mission of schools, encumbers teachers, and administrators with nonacademic responsibilities, and competes with teaching and classroom activities which promote learning and achievement.

“(b) SENSE OF CONGRESS.—It is the sense of Congress that Federal and State educational agencies should reduce the paperwork requirements placed on schools, teachers, principals, and other administrators.

“SEC. 8604. SENSE OF CONGRESS REGARDING MEMORIALS.

“It is the sense of Congress that—

“(1) the saying of a prayer, the reading of a scripture, or the performance of religious music, as part of a memorial service that is held on the campus of a public elementary or secondary school in order to honor the memory of any person slain on that campus is not objectionable under this Act; and

“(2) the design and construction of any memorial which includes religious symbols, motifs, or sayings that is placed on the campus of a public elementary or secondary school in order to honor the memory of any person slain on that campus is not objectionable under this Act.

“PART G—EVALUATIONS**“SEC. 8651. EVALUATIONS.**

TITLE IX—MISCELLANEOUS PROVISIONS

PART A—AMENDMENTS TO OTHER ACTS

Subpart 1—National Education Statistics Act

SEC. 901. AMENDMENT TO NESA.

Section 411 of the National Education Statistics Act of 1994 (20 U.S.C. 9010) is amended—

(1) by amending subsection (b)(2) to read as follows:

“(2) STATE ASSESSMENTS.—(A) The Commissioner, in carrying out the National Assessment—

“(i) may conduct State assessments of student achievement in grades 4, 8, and 12; and

“(ii) shall conduct annual State assessments of student achievement in reading and mathematics in grades 4 and 8 in order for States to carry out section 1111(c)(2) of the Elementary and Secondary Education Act of 1965.

“(B)(i) Except as provided in clause (ii), a participating State shall review and give permission for the release of results from any test of its students administered as a part of a State assessment prior to the release of the data. Refusal by a State to release its data shall not restrict the release of data from other States that have approved the release of that data.

“(ii) A State participating in the annual State assessments of its students in reading and mathematics in grades 4 and 8 shall be deemed to have given its permission to release its data if it has an approved plan under section 1111 of the Elementary and Secondary Education Act of 1965.”; and

(2) by amending subsection (d) to read as follows:

“(d) PARTICIPATION.—

“(1) NATIONAL AND REGIONAL PARTICIPATION.—Participation in the national and regional assessments by State and local educational agencies shall be voluntary.

“(2) STATE PARTICIPATION.—Participation in assessments made on a State basis shall be voluntary.”.

Subpart 2—Homeless Education

SEC. 911. SHORT TITLE.

This subpart may be cited as the “McKinney-Vento Homeless Education Assistance Improvements Act of 2001”.

SEC. 912. FINDINGS.

Congress makes the following findings:

(1) An estimated 1,000,000 children in the United States will experience homelessness in 2001.

(2) Homelessness has a devastating impact on the educational opportunities of children and youth. Homeless children go hungry at more than twice the rate of other children, have four times the rate of delayed development, and are twice as likely to repeat a grade.

(3) Despite steady progress in school enrollment and attendance resulting from the passage in 1987 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11301 et seq.), homeless students still face numerous barriers to education, including residency, guardianship and registration requirements, delays in the transfer of school records, and inadequate transportation service.

(4) School is one of the few secure factors in the lives of homeless children and youth, providing stability, structure, and accomplishment during a time of great upheaval.

(5) Homeless children and youth require educational stability and the opportunity to maintain regular and consistent attendance in school, so that they acquire the skills necessary to escape poverty and lead productive, healthy lives as adults.

(6) In the 14 years since the passage of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11301 et seq.), educators and service providers have learned much about policies and practices which help remove the barriers described.

SEC. 913. PURPOSE.

The purpose of this subpart is to strengthen subtitle B of title VII of Public Law 100–77 (42 U.S.C. 11431 et seq.) by amending it—

(1) to include innovative practices, proven to be effective in helping homeless children and youth enroll, attend, and succeed in school; and

(2) to help ensure that all children and youth impacted by the loss of fixed, regular, and adequate housing receive a quality education and secure their chance for a brighter future.

SEC. 914. EDUCATION FOR HOMELESS CHILDREN AND YOUTH.

Subtitle B of title VII of Public Law 100–77 (42 U.S.C. 11431 et seq.) is amended to read as follows:

“Subtitle B—Education for Homeless Children and Youth

“SEC. 721. STATEMENT OF POLICY.

“It is the policy of the Congress that—

“(1) each State educational agency ensure that each child of a homeless individual and each homeless youth has equal access to the same free, public education, including a public preschool education, as provided to other children and youth;

“(2) in any State that has a compulsory residency requirement as a component of the State’s compulsory school attendance laws or other laws, regulations, practices, or policies that may act as a barrier to the enrollment, attendance, or success in school of homeless children and youth, the State review and undertake steps to revise such laws, regulations, practices, or policies to ensure that homeless children and youth are afforded the same free, public education as provided to other children and youth;

“(3) homelessness alone is not sufficient reason to separate students from the mainstream school environment; and

“(4) homeless children and youth must have access to the education and other services that such children and youth need to ensure that such children and youth have an opportunity to meet the same challenging State student academic achievement standards to which all students are held.

“SEC. 722. GRANTS FOR STATE AND LOCAL ACTIVITIES FOR THE EDUCATION OF HOMELESS CHILDREN AND YOUTH.

“(a) GENERAL AUTHORITY.—The Secretary is authorized to make grants to States in accordance with the provisions of this section to enable such States to carry out the activities described in subsections (d), (e), (f), and (g).

“(c) ALLOCATION AND RESERVATIONS.—

“(1) IN GENERAL.—Subject to paragraph (2) and section 724(d), from the amounts appropriated for each fiscal year under section 726, the Secretary is authorized to allot to each State an amount that bears the same ratio to the amount appropriated for such year under section 726 as the amount allocated under section 1122 of the Elementary and Secondary Education Act of 1965 to the State for that year bears to the total amount allocated under section 1122 of such Act to all States for that year, except that no State shall receive less than \$125,000 or $\frac{1}{2}$ of 1 percent of the amount appropriated under section 726, whichever is greater.

“(2) RESERVATION.—(A) The Secretary is authorized to reserve 0.1 percent of the amount appropriated for each fiscal year under section 726 to be allocated by the Secretary among the United States Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands, according to their respective need for assistance under this subtitle, as determined by the Secretary.

“(B)(i) The Secretary shall transfer one percent of the amount appropriated for each fiscal year under section 726 to the Department of the Interior for programs for Indian students served by schools funded by the Secretary of the Interior, as determined under the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450 et seq.), that are consistent with the purposes of this Act.

“(ii) The Secretary and the Secretary of the Interior shall enter into an agreement, consistent with the requirements of this part, for the distribution and use of the funds described in clause (i) under terms that the Secretary determines best meet the purposes of the programs described in such clause. Such agreement shall set forth the plans of the Secretary of the Interior for the use of the amounts transferred, including appropriate goals, objectives, and milestones.

“(B) EXCEPTION.—A State that operates a separate school for homeless children as of the day preceding the date of enactment of the McKinney-Vento Homeless Education Assistance Improvements Act of 2001—

“(i) shall remain eligible to receive, and to distribute to local educational agencies, funds under this subtitle for such school; and

“(2) develop and carry out the State plan described in subsection (g);

“(3) collect and transmit to the Secretary information gathered pursuant to paragraphs (1) and (2) at such time and in such manner as the Secretary may require;

 - “(iii) the State and its local educational agencies will adopt policies and practices to ensure that transportation is provided, at the request of the parent or guardian (or in the case of an unaccompanied youth, the liaison) to and from the school of origin, as determined in paragraph (3)(A), in accordance with the following, as applicable:

 - “(ii) provide a written explanation, including a statement regarding the right to appeal under subparagraph (E), to the homeless child’s or youth’s parent or guardian if the local educational agency sends such child or youth to a school other than the school of origin or a school requested by the parent or guardian; and

PURPOSE

The purpose of H.R. 1, the No Child Left Behind Act of 2001, is to transform the federal role in education and advance our nation’s education priorities. The bill reauthorizes the Elementary and Secondary Education Act of 1965 and fundamentally reforms the Act by increasing accountability for student performance, focusing on what works, reducing bureaucracy, increasing flexibility, and em-

powering parents. Key components of the legislation include: (1) closing the achievement gap through high State academic standards, annual State academic assessments, and consequences for schools that fail to teach; (2) promoting parental empowerment through reports to parents on the performance of States and schools, assisting charter schools, expanding public school choice, and allowing students in failing schools to receive supplementary educational services from a provider of their parent's choice; (3) improving literacy by focusing on reading in the early grades and early childhood reading instruction; (4) expanding freedom to teach and learn by increasing flexibility in Title I and reducing duplicative and excessive programs and regulations; (5) rewarding success and sanctioning failure by providing financial rewards for States that improve academic achievement and narrow the achievement gap, and reducing federal funds to States that fail to demonstrate results; (6) improving teacher quality by ensuring that all students are taught by fully qualified teachers, encouraging professional development based on research, and strengthening math and science education; and (7) making schools safer by protecting teachers from frivolous lawsuits, promoting school safety, allowing students to escape unsafe schools, and supporting character education.

LEGISLATIVE ACTION

On March 22, 2001, Representative John Boehner (R-OH) introduced H.R. 1, the No Child Left Behind Act of 2001. H.R. 1 contains the President's education proposals for elementary and secondary education, as well as a comprehensive reauthorization of the Elementary and Secondary Education Act of 1965 (ESEA).

On the basis of the hearings, bills referred to the Committee, the Subcommittee on Education Reform and the Subcommittee on 21st Century Competitiveness, the recommendations of the administration, and the recommendations of the education community and groups representing the interests of families, an amendment in the nature of a substitute was prepared. The Committee on Education and the Workforce considered a substitute offered by the Chairman to H.R. 1, the No Child Left Behind Act of 2001 in legislative session on May 2, 3, and 9, 2001 during which 46 amendments were considered on which 8 roll call votes were taken. The Committee on Education and the Workforce with a majority of the Committee present ordered the bill favorably reported by a vote of 41 to 7 on May 9, 2001.

Title I—Improving the Academic Performance of the Disadvantaged

TITLE I, PART A—BASIC PROGRAM

Title I, Part A of H.R. 1 extends and modifies Title I, Part A of the Elementary and Secondary Education Act (ESEA). Part A provides supplemental educational services to low-achieving students to assist them in meeting challenging State student academic achievement standards. The bill expands the existing standards and assessments-based structure to Title I by requiring annual academic assessments in reading and math in grades 3–8 instead of in just three grades; strengthens academic accountability by holding all States, school districts and schools accountable for ensuring that their students meet high academic standards; provides for distribution of report cards on the academic quality of all schools, including the qualifications of teachers and teachers' aides, to parents and communities; gives students the opportunity to leave failing Title I schools and enroll in other public schools or charter schools; allows disadvantaged students in schools that fail for three consecutive years to receive supplemental educational services from a provider of choice; provides rewards to Title I schools that are closing the achievement gap; ensures that all newly-hired teachers funded by Title I are fully qualified; raises the qualifications of teachers' aides; and provides greater flexibility to schoolwide programs.

TITLE I, PART B—STUDENT READING SKILLS IMPROVEMENT GRANTS

Subpart 1—Reading First

Reading First is a new program that would triple the funding for improving classroom reading instruction and provide assistance to States and local educational agencies in establishing scientific research-based reading programs for all children in kindergarten through grade three. It would provide the necessary professional development to ensure that teachers can identify children at-risk for reading failure and provide the most effective early instruction to overcome specific barriers to reading proficiency. Eighty percent of the funds would go to States under a poverty-based formula. The remaining 20 percent would be made available for two-year discretionary performance based grants to States that reduce the number of children who cannot read. States could use up to 15 percent of the funds for professional development. States must distribute at least 80 percent of their funds to local educational agencies through a competitive process, giving priority to high poverty areas in which there are a high percentage of students in grades K–3 reading below grade level. Funds under Reading First are to be used for diagnostic assessments and instructional materials that include the essential components of reading instruction. The Secretary will order a five-year external evaluation of the Reading First program,

and provide such technical assistance to States and local educational agencies as requested.

Subpart 2—Early Reading First

Early Reading First is a new competitive grant initiative that will provide funds to enhance reading readiness for children in high poverty areas, and where there are high numbers of students who are not reading at grade level. Early Reading First is targeted towards children ages three through five, and would support the development of verbal skills, phonemic awareness, pre-reading development and assistance for professional development for teachers in child care centers or Head Start centers in instructional activities that would prepare children for formal reading instruction in kindergarten and grade one.

Subpart 3—William F. Goodling Even Start Family Literacy Programs

H.R. 1 extends and reauthorizes the Even Start Family Literacy Program, which is designed to improve the quality of Even Start programs that provide literacy services to parents and their children in order to break cycles of illiteracy. This was accomplished by requiring Even Start projects to use instructional programs based on scientifically based research on reading, establishing qualifications for program instructors, tying local program objectives to state indicators of program quality, strengthening evaluation of local programs and their use in program improvement, and authorizing research to find the most effective way of improving literacy among adults with reading difficulties.

Subpart 4—Inexpensive Book Distribution Program

H.R. 1 extends and reauthorizes the Inexpensive Book Distribution Program, which is operated under a single, noncompetitive award to Reading is Fundamental, Inc. (RIF). It supports, through subcontracts, local private nonprofit groups and organizations, or public agencies that distribute inexpensive books to children with the objective of motivating children to read. Federal funds pay for up to 75 percent of the cost of books, except that the federal share for programs serving the children of migrant and seasonal farm workers is 100 percent. Contractors are to give priority to programs that serve a substantial number or percent of children with special needs, such as children with disabilities, low-income children, and children at risk of school failure.

TITLE I, PART C—EDUCATION OF MIGRATORY CHILDREN

Title I, Part C of H.R. 1 extends and modifies Title I, Part C of the Elementary and Secondary Education Act, "Education of Migratory Children." The bill makes slight modifications to the eligibility requirements for receiving funds under this Part to better address the needs of migrant children. Some of the most important provisions seek to improve the transfer of migrant student records. These provisions direct the Secretary to assist States in developing effective methods for the transfer of student records and for determining the minimum data elements to be transferred. The bill also provides States with increased flexibility in the use of these funds.

TITLE I, PART D—NEGLECTED AND DELINQUENT YOUTH

Title I, Part D of H.R. 1 makes several minor changes to Title I, Part D of ESEA for neglected and delinquent children. The majority of changes are made to ensure the Subpart 2 program for local educational agencies is focused primarily on addressing the needs of youth returning from local correctional facilities to their local schools or programs of alternative education. The amendments would still permit local educational agencies to serve the needs of other at risk children as long as they first meet the academic and other needs of youth returning from local correctional facilities. The bill also increases the amount of Subpart 1 funds States are to set aside to use to transition youth in State correctional facilities back to their local schools from 10 to 15 percent.

TITLE I, PART E—EVALUATIONS

Section 1501 authorizes the Secretary to conduct evaluations and assessments, collect data, and carry out other activities that support the Title I programs and provide information useful to those who would support the activities that are essential for the Title I programs; and helping States, LEAs, and schools develop management information systems. Section 1501 would also provide for the continued conduct of the national assessment of Title I and a national longitudinal study of Title I schools.

Section 1502 authorizes the Secretary to conduct demonstrations of innovative practices.

Section 1503 authorizes the Ellender Fellowship program. This program, administered by the private, non-profit Close Up Foundation, provides financial aid to enable low-income students, their teachers, older Americans, recent immigrants, and children of migrant parents to come to Washington, DC to study the operations of the three branches of government. Activities include attending seminars on government and current events, and meeting with government leaders.

Section 1504 requires recipients of Title I funds to report drop-outs rates to the National Center for Educational Statistics.

TITLE I, PART F—COMPREHENSIVE SCHOOL REFORM

Title I, Part F of H.R. 1 puts into statutory form the comprehensive school reform grant program. The comprehensive school reform grant program provides financial incentives for schools to develop comprehensive reforms to change an entire school. The reforms must be based upon reliable research and effective practices, and emphasize basic academics and parental involvement.

TITLE I, PART G—RURAL EDUCATION FLEXIBILITY AND ASSISTANCE

H.R. 1 provides rural school districts with increased flexibility and funding to enhance academic achievement and addresses the unique needs of rural school districts that cannot compete for federal education grants because of inadequate resources. Specifically, H.R. 1 will address the different needs of (1) small, rural school districts and (2) low-income, rural school districts. Under Subpart 1, an LEA would be eligible if the total number of students in average daily attendance at all of the schools served by the LEA is less than 600; and all of the schools served by the LEA are designated

with a School Locale Code of 7, or 8, as determined by the Secretary of Education. Eligible LEAs would be able to combine funding under various formula grant programs to support local or Statewide education reform efforts intended to improve the academic achievement of elementary and secondary school students and the quality of instruction provided for these students. Grants under this provision would be awarded to eligible LEAs based on the number of students in average daily attendance less the amount they received from consolidated formula grant programs. LEAs participating in this initiative would have to meet high accountability standards by demonstrating the ability to meet academic achievement standards under Title I, such as the State's definition of adequate yearly progress. Schools failing to meet these requirements would not be eligible for continued funding.

If an LEA did not qualify for funding under Subpart 1, it could seek funds under Subpart 2. An LEA would be eligible to use the applicable funding under Subpart 2 if it serves a school-age population, 20 percent or more of whom are from families with incomes below the poverty line; and all of the schools served by the LEA are designated with a School Locale Code of 6, 7, or 8, as determined by the Secretary of Education. Funds under this Subpart can be used for such things as: educational technology, professional development, technical assistance, and teacher recruitment and retention.

TITLE I, PART H—GENERAL PROVISIONS OF TITLE I

Title I, Part H of H.R. 1 includes general provisions governing Title I. Such provisions include negotiated rulemaking; State rulemaking; a State Committee of practitioners to advise the State in carrying out its responsibilities under Title I; local educational agency administrative cost limitations; and rules of construction.

Title II—Preparing, Training, and Recruiting Quality Teachers

TITLE II, PART A—TEACHER QUALITY TRAINING AND RECRUITING FUND

The purpose of this Part is to provide grants to States, LEAs, and eligible partnerships in order to assist their efforts to increase student academic achievement through such strategies as improving teacher quality and increasing the number of highly qualified teachers in the classroom. H.R. 1 consolidates and streamlines the Eisenhower Professional Development program and the Class Size Reduction program to provide States and local schools additional flexibility in the use of these funds, in exchange for increased accountability, by demonstrating that student achievement is increasing.

Funds are sent to States by formula (50 percent based on population and 50 percent based on poverty). State allotments would have to be equal to funding received under the Eisenhower Professional Development program and the Class Size Reduction program. States are authorized to retain 5 percent of funds for State activities. States send funding to the local level by formula and by competitive grant. Local educational agency allotments would have to be equal to funding received under the Eisenhower Professional Development program and the Class Size Reduction program. 80 to 85 percent of the funds (at the discretion of the State) are sent to

local educational agencies by formula (20 percent based on population and 80 percent based on poverty) for local uses of funds. States, working in conjunction with State Agencies for Higher Education, must award at least 15 percent but not more than 20 percent of the funds (at the discretion of the State) on a competitive basis to eligible partnerships for math and science programs. Eligible partnerships must include at least: (1) a State educational agency; (2) a mathematics or science department of a private independent or State-supported public institution of higher education; and (3) a high need local educational agency. This part also continues and updates the Troops-to-Teachers and Transition to Teaching programs.

TITLE II, PART B—NATIONAL WRITING PROJECT

H.R. 1 continues and updates the authorization for the National Writing Project. The purpose of this program is to support in-service teacher training programs, including the dissemination of effective practices and research funding, regarding the teaching of writing and related skills (in language arts subjects and across the curriculum) at all educational levels. The program supports professional development for teachers of writing and teachers of other subjects who are interested in writing, including teachers who serve students at the pre K–12, postsecondary, and adult education levels. The program is also authorized to award grants for classroom research projects conducted by elementary and secondary school teachers.

TITLE II, PART C—CIVIC EDUCATION

This program supports the Center for Civic Education and its education program that encourages instruction on the principles of our Constitutional democracy; the history of the Constitution and the Bill of Rights; congressional hearings simulations; and annual competitions of simulated congressional hearings for secondary school students. It also authorizes the National Council on Economic Education to conduct Cooperative Education Exchange programs that provide curricula and teacher training programs in civics education and economic education, developed in the U.S., for educators in eligible countries overseas. Countries in Central and Eastern Europe, the Commonwealth of Independent States, and the former Soviet Union are eligible.

TITLE II, PART D—TEACHER LIABILITY PROTECTION

This Part provides civil litigation immunity to teachers, principals, local school board members, superintendents, and other education professionals, when they are sued in their individual capacity under a federal cause of action for monetary damages. The immunity, in general, extends to reasonable actions that teachers and other administrators take to maintain order and discipline in carrying out their official duties. The protections do not extend to reckless or criminal misconduct, or to actions that are prohibited under State or local law. Furthermore, the immunity provisions do not affect in any way tort claims or other causes of action that may be brought under State or local law.

Title III—Education of Limited English Proficient and Immigrant Children; Indian and Alaskan Native Education

TITLE III, PART A—ENGLISH LANGUAGE PROFICIENCY AND ACADEMIC ACHIEVEMENT ACT

Title III, Part A of H.R. 1 consolidates the Bilingual Education Act with the Emergency Immigrant Education Program and the Foreign Language Assistance Program to create a formula grant program to the States. The consolidated program provides States and local providers with the flexibility to choose the type of instructional program provided to limited English proficient (LEP) children. The majority of changes are focused on reforming federally funded programs for limited English proficient children (including immigrant children and youth) in order to ensure they become proficient in English and transition into classrooms where instruction is not tailored for LEP children as soon as possible. Title III, Part A requires local educational agencies to obtain informed parental consent prior to placing children in an instructional program that is not taught primarily in English; provides parents the right to choose among instructional programs if more than one type of program is offered; and gives parents the right to immediately remove their child from a program for limited English proficient children. Title III, Part A also requires reading and language arts assessments for children to be in English who have attended school in the United States for at least three consecutive years, and who participate in a program funded under this Act; ensures that 95 percent of funds must be used at the local level; and holds States accountable for results by reducing all ESEA administrative funds up to 20 percent for States that fail to have the majority of their limited English proficient children becoming English language proficient

TITLE III, PART B—INDIAN AND ALASKAN NATIVE EDUCATION

Title III, Part B re-designates Title IX of the Elementary and Secondary Education Act as Title III, Part B, and amends the old Title IX as well as Title XI of the Education Amendments of 1978, and the Tribally Controlled Schools Act of 1988. Taken together, these statutes provide most of the federal government's education aid that is specifically targeted to American Indian and Alaska Native students and the schools and the organizations that serve them. In updating and improving these programs, the Committee has focused on improving student achievement, targeting resources to the programs that are providing the best results, greatly increasing the flexibility of the programs at the local level so that Native Americans and Alaskan Natives can make the decisions which impact themselves, reducing the administrative burden placed on participating entities, increasing the amount of aid that actually reaches the classroom, and increasing the emphasis placed on family literacy services for the effected populations. In addition, with respect to education programs funded by the Bureau of Indian Affairs, the Committee has shifted as much authority and responsibility to the Tribes, tribal organizations, and local school boards as possible while maintaining accountability for the use of federal funds.

Title IV—Promoting Informed Parental Choice and Innovative Programs

TITLE IV, PART A—INNOVATIVE PROGRAMS

Subpart 1—State and Local Innovative Programs

Innovative Education Program Strategies (Title VI under current law) is the only K–12 education block grant program contained within the ESEA. It is the only formula program that allows recipients to use funds to benefit any and all student populations, in any and all schools. Under H.R. 1, the purposes of the program are to: provide funding to enable States and local educational agencies to implement promising educational reform programs and school improvement initiatives based on scientifically based research; provide a continuing source of innovation and educational improvement, including support for library services and instructional and media materials; and meet the educational needs of all students, including at risk students. H.R. 1 expands the State uses of funds to include support for arrangements that provide for independent analysis to measure and report on school district achievement. In addition, Title IV, part A of H.R. 1 includes language to add more uses of funds to the current list so LEAs can broaden the scope of the program. These new uses include: professional development activities and the hiring of teachers; activities to promote consumer, economic, and personal finance education; expanding and improving school-based mental health services; community service programs that use qualified school personnel to train and mobilize young people to measurably strengthen their communities through nonviolence, responsibility, compassion, respect, and moral courage; activities to improve the quality of civics and government education; alternative educational programs for those students who have been expelled or suspended from their regular educational setting; and programs to hire and support school nurses. Under current law, up to 15 percent of the funds are retained, and controlled, at the State level. H.R. 1 includes language to send 100 percent of any new funding for this program over the FY 2001 appropriation to the local level. This change to current law will result in more funds being sent to the school district and classroom levels.

Subpart 2—Arts Education

H.R. 1 amends the Arts in Education programs found in Title X, Part D, of the Elementary and Secondary Education Act. In updating and improving these programs, the Committee has focused on increasing the involvement of local arts educators and State and local arts organizations, and on simplifying the program by targeting resources to the programs that are providing results. Specifically, the bill continues the Arts Education program at its current funding level; updates congressional findings and eliminates outdated references; eliminates a restrictive consultation provision that has prevented the participation of local organizations in the program; shifts the focus of collaborative efforts to arts educators and State and local arts agencies; requires the Secretary to consult with arts educators and organizations representing the arts when awarding grants; continues participation in the program by the Kennedy Center and VSA arts (formerly Very Special Arts); and re-

quires that federal arts education funds be used only to supplement and not supplant non-federal arts activities. The bill further simplifies and focuses the program by eliminating the unfunded Cultural Partnerships for At-Risk Children and Youth program as well as an outdated appropriations threshold.

Subpart 3—Gifted and Talented Children

H.R. 1 continues the Jacob K. Javits Gifted and Talented Students Education Program, which awards grants to State and local educational agencies, institutions of higher education, and other public and private agencies and organizations to help build a nationwide capability to meet the needs of gifted and talented students in elementary and secondary schools. Since 1989, the Javits Gifted and Talented Program has funded almost 100 grants that supported model programs and practices for educating talented students nationwide. Projects under the program identify gifted and talented students; individualize instruction; involve parents in the education of their children; and expand educational opportunities by collaborating with business, industry, and other organizations.

TITLE IV, PART B—CHARTER SCHOOLS

The Public Charter Schools Program provides three-year competitive grants for the planning, program design and initial implementation of charter schools to those States that have a State charter statute. Charter schools are nonsectarian public schools. The “charter” establishing each school is a written performance contract that provides public support for the school for a specified period of time. The school’s charter gives the school autonomy over its operation and frees the school from regulations that other public schools must follow. In exchange for autonomy, charter schools are held accountable for meeting the terms of their charters including increasing student academic achievement.

TITLE IV, PART C—MAGNET SCHOOLS

The Magnet Schools Assistance Program (MSAP) provides competitive grants to local educational agencies for magnet schools that are implementing school desegregation plans. Magnet schools offer special vocational or academic programs designed to attract students from outside the school’s traditional enrollment area. MSAP grantees receive three-year awards, which cannot exceed \$4 million per year. Funds may be used for planning and promoting academic programs, acquiring instructional equipment, and paying the salaries of fully qualified teachers who conduct programs in magnet schools. However, over the three-year period, a decreasing proportion of the grant may be used for planning activities; 50 percent, 15 percent, and 10 percent respectively.

H.R. 1 reauthorizes the Women’s Educational Equity Act (WEEA). This program promotes gender equity in education and provides financial assistance to enable educational agencies and institutions to comply with Title IX of the Education Amendments of 1972 (which prohibits sex discrimination in educational programs and activities that receive federal financial assistance). WEEA authorizes the Secretary of Education to award two types of grants: to develop and implement gender equity programs; and to provide “support and technical assistance” in areas such as teacher train-

ing and evaluation of exemplary programs, as well as for research and development.

Title V—21st Century Schools

TITLE V, PART A—21ST CENTURY SCHOOLS ACT OF 2001

Title V, Part A of H.R. 1 extends and amends the Safe and Drug-Free Schools and Communities Act; the 21st Century Community Learning Centers Program; and the Gun Free Schools Act.

Title V, Part A brings three major federal laws with a focus on the safety of students and teachers while at school facilities together to form a comprehensive approach to school safety and academic achievement. By bringing the Safe and Drug-Free Schools and Communities Act, the 21st Century Community Learning Centers program and the Gun Free Schools Act together into a single title of ESEA, the Committee is signaling its commitment to programs and activities authorized by this part which will support efforts to prevent the use of illegal drugs, prevent violence, and provide quality before and after school activities for school-aged children in order to foster a safe and drug free learning environment in which students increase their academic achievement.

Subpart 1—Safe Schools

Subpart 1 reauthorizes and reforms the Safe and Drug-Free Schools and Communities Act (SDFSCA). It provides funds to States through a formula based 50 percent on school age population and 50 percent on Title I to assist in the establishment, operation, and improvement of programs of drug and violence prevention in elementary and secondary schools. Subpart 1 continues the current law authorization for Governors to use up to 20 percent of a State's SDFSCA grant to provide competitive grants to local educational agencies, community-based organizations, and other private and public organizations for activities consistent with the goals of the Act. The remainder of funds are distributed by formula grant to local educational agencies. The new formula reflects the Committee's desire—evident throughout H.R. 1—to target federal resources to schools with high proportions of low-income students.

Subpart 2—21st Century schools

Subpart 2 specifically focuses on 21st Century Community Learning Centers programs and provides funds through a formula to the States based 50 percent on school age population and 50 percent on Title I. States will use the federal funds to provide grants on a competitive basis to local educational agencies, community-based organizations, and other private and public organizations to administer before and after school programs for youth.

Subpart 3—National programs

Subpart 3 authorizes national programs to support the goals of Title V, part A including demonstrations and evaluations of innovative programs, information dissemination, and technical assistance.

Subpart 4—Gun possession

Subpart 4 reauthorizes the Gun Free Schools Act, which requires local educational agencies to have a policy in place requiring a one-

year expulsion for any student who possesses a firearm on school property. The law provides flexibility for local schools by allowing the head of an LEA to consider the appropriateness of the expulsion on a case by-case basis. In addition to some minor modifications to the act, H.R. 1 eliminates the section that requires the Secretary to disseminate policy guiding the implementation of the Act and its connection to Individuals with Disabilities Education Act (IDEA).

Subpart 5—General provisions

Subpart 5 contains general provisions, parental consent requirements, prohibited uses of funds, and definitions.

H.R. 1 also requires a greater focus on quality programming by including “Principles of Effectiveness” in Subparts 1 and 2. The principles require any program or activity funded under the Act to be: based upon an assessment of objective data; based upon performance measures established by the LEA; based upon scientifically based research that provides evidence that the program or activity will prevent or reduce drug abuse and violence (there is a waiver for innovative programs with a likelihood of success); and be periodically evaluated with the results used to improve the program or activity.

TITLE V, PART B—ENHANCING EDUCATION THROUGH TECHNOLOGY

Enhancing Education Through Technology consolidates all of the current Title III programs under the Elementary and Secondary Education Act (except for Ready To Learn Television and the Telecommunications Demonstration Project for Mathematics) into a single performance-based technology grant program. These programs include the Technology Literacy Challenge Fund, the Local Innovation Challenge Grants, Regional Consortia, Technology Leadership Activities, Preservice Teacher Training in Technology, Community-Based Technology, and Star Schools. At the federal level, 95 percent of the consolidated funds are provided to the States through a formula based 50 percent on the State’s school age population and 50 percent on Title I. The Secretary may spend the remaining 5 percent on evaluations, technical assistance, and programs of national significance.

At the State level, States may spend 5 percent on activities such as technical assistance and funding innovative programs. From the State to local level, 95 percent of the funds are directed to local educational agencies. Of the total funds going locally, 60 percent is distributed through a State formula based 100 percent on Title I, while the remaining 40 percent is competitively distributed by the State. Funds may be used for increasing access to technology (particularly in high-need schools), improving teacher professional development in technology, and/or promoting innovative State and local initiatives that use technology to increase academic achievement. Enhancing Education Through Technology also maintains the current legal requirement that recipients of funds must have technology in place for the protection of minors, to filter or block obscenity, child pornography, and material that is harmful to minors.

Enhancing Education Through Technology also consolidates the Ready To Learn Television program and the Telecommunications

Demonstration Project for Mathematics under a new subpart entitled Ready To Learn, Ready To Teach. Under this subpart, the Secretary is required to fund the Ready To Learn Television program and may fund the development of digital content and a national telecommunications-based program to improve the teaching of core academic subjects (similar to that of the Telecommunications Demonstration Project for Mathematics).

TITLE V, PART C—CHARACTER EDUCATION

This program awards grants to State educational agencies, local educational agencies, or a consortia of such agencies for the design and implementation of character education programs that can be integrated in State academic content standards and can be carried out in conjunction with other educational reform efforts. Each agency or consortium may contract with outside sources, including institutions of higher education and private and nonprofit organizations (including religious organizations), for assistance with evaluation, developing secular curricula, and integrating secular character education into the curriculum and teaching methods. Each recipient of assistance under this part must take into consideration the views of the parents of students when selecting elements of character that will be taught under the program. Elements of character selected under the program may include the following: trustworthiness, respect, responsibility, fairness, caring, citizenship, and giving.

TITLE V, PART D—SCHOOL COUNSELING

This currently authorized program provides local educational agencies with funding for counseling and educational needs of all students. Authorized activities include expanding counseling services through qualified counselors, providing innovative approaches to increase children's understanding of peer and family relationships, including in service teacher and counselor training and parental involvement, and ensuring team approaches to school counseling.

TITLE V, PART E—MENTORING PROGRAMS

This new program provides assistance to promote mentoring programs for children with greatest need. The program is designed to assist such children in receiving support and guidance from a caring adult, to improve their academic performance and interpersonal relationships among their peers, teachers, other adults, and family members, to reduce dropout rates, and to reduce juvenile delinquency. Eligible entities include local educational agencies, community based organizations and partnership between the two.

Title VI—Impact Aid

Title VI of H.R. 1 makes technical changes to the Impact Aid program that was reauthorized during the 106th Congress. The Impact Aid Reauthorization Act of 2000 was enacted as part of the Floyd D. Spence National Defense Authorization Act for fiscal year 2001. Title VI modifies the new "hold harmless" formula for distributing funds under Section 8002 (payments for federal acquisition of real property) to ensure that school districts of all sizes receive a

fair share of funds under this section; makes minor modifications to the section of the formula benefiting small school districts; makes technical corrections to the construction provisions to clarify Congressional intent; modifies language in Section 8009 (equalized States) to clarify that funds provided to school districts based on their identification as “heavily impacted” would be exempt from State equalization; extends the filing deadline for a school in Colorado; and extends the authorization for Impact Aid through 2006.

Title VI also makes technical corrections to the Impact Aid construction program to correct a misinterpretation of the eligibility requirements for certain grants. Specifically, it clarifies that an LEA is considered to be unable to fund construction needs through bond issues if the assessed value of the taxable property within the LEA is less than \$25 million; clarifies that an LEA is considered to have minimal capacity to fund construction needs through bond issues if the assessed value of the taxable property within the LEA is greater than \$25 million but less than \$50 million, and the LEA has already used at least 75 percent of its existing bonding authority for other construction needs; separates the application process for emergency grants from that of modernization grants; and clarifies that the Secretary is to fund projects that address threats to the health and safety of students or school staff prior to funding grants intended only for school modernization.

TITLE VII, PART A—ACCOUNTABILITY

Part A of Title VII provides rewards for States that make significant progress in academic achievement for students as a whole, for students from low-income families, and for students from major racial and ethnic groups based on the State academic assessments under Title I and a second indicator consisting of the State National Assessment of Educational Progress (NAEP) or another assessment selected by the State; sanctions States that fail to make adequate yearly progress for their disadvantaged students by reducing their administrative funds; provides States With funds to develop annual assessments, or if a State has developed those assessments and standards, to carry out other activities related to ensuring accountability for results in the State’s schools and local educational agencies; and provides bonuses for States that have annual assessments for grades 3 through 8 in place prior to the 2004–2005 school year.

TITLE VII, PART B—FUNDING FLEXIBILITY FOR STATE AND LOCAL EDUCATIONAL AGENCIES

Part B of Title VII of H.R. 1 authorizes States and local educational agencies to transfer their non-Title I formula grant allocations to other federal ESEA formula grant programs. Specifically, it allows States to transfer up to 50 percent of their State activity allocations between programs. Local educational agencies may transfer up to 50 percent of a program’s allocation to other programs. LEAs identified for improvement under Title I can only transfer funds for school improvement activities, up to 30 percent. LEAs in corrective action cannot transfer any funds.

Title VIII—General Provisions

Title VIII of H.R. 1 includes general provisions that affect all Elementary and Secondary Education Act (ESEA) programs. The bill adds several new definitions, moves some definitions from within individual programs into the general provisions and modifies other definitions. Title VIII provides flexibility to combine administrative funds of all ESEA programs, and allows States and school districts to submit single consolidated plans for all ESEA programs. The authority of the Secretary to waive burdensome regulations is continued from current law.

With respect to private school students and staff, authority in current law for such students and staff to receive services under ESEA programs is strengthened. At the same time, H.R. 1 prohibits the federal government from exercising any control over home schools or private schools that do not receive ESEA funds.

Many of the prohibitions placed upon the federal government are continued and strengthened. The Committee has continued and strengthened the prohibition which restricts the federal government from controlling, mandating or directing curriculum. National tests are prohibited, as well as any kind of mandatory national teacher or paraprofessional test or certification. In addition, H.R. 1 ensures that individual assessment results are protected from disclosure to third parties pursuant to the General Education Provisions Act and ensures that no State is required to have academic content standards or achievement standards approved by the federal government. Protections against the establishment of any national database of personally identifiable information are a part of the bill.

With respect to social issues, H.R. 1 prohibits funds from being used to operate a program of contraceptive distribution at schools and prohibits funding of sex education in schools unless such programs are age appropriate and emphasize abstinence.

Two Sense of the Congress provisions are included in the bill—one relating to religious memorials on campus and the other relating to paperwork reduction.

Other provisions authorize the Secretary to reserve funds to carry out program evaluations.

A new provision relating to voluntary school prayer is included in the bill.

Finally, language is included in the general provisions which transfers the authority under the existing Title XIII of ESEA relating to comprehensive regional assistance centers, the national diffusion network, regional math and science consortia, and technology based technical assistance to Title VIII of the ESEA; and transfers the authority of the Regional Technical Support Centers under the existing Subpart 3 of Part A of Title III to Title VIII of ESEA.

TITLE IX, PART A—AMENDMENTS TO OTHER ACTS

Subpart 1—National Education Statistics Act

Subpart 1 of Part A of Title IX amends the National Education Statistics Act to make changes to the National Assessment of Educational Progress (NAEP) to clarify that for purposes of Title VII accountability there is no cost-sharing requirement of the States.

Subpart 1 also authorizes annual State NAEP assessments in reading and mathematics in the fourth and eighth grades.

Subpart 2—Homeless Education

The McKinney-Vento Homeless Assistance Act authorizes formula grants to States, based on State allocations for grants to local educational agencies under Title I, Part A of the Elementary and Secondary Education Act. Grants must be used for State and local programs to provide equal access to a free, public education for homeless children and youth, including a public preschool education, equivalent to that provided to other children and youth. Grants must also be used to establish an Office of Coordinator of Education of Homeless Children and Youth within each State educational agency; to implement professional development activities for school personnel; and to provide each child or youth the opportunity to meet the same State student academic standards that others are expected to meet. H.R. 1 makes several changes to current law to better meet the educational needs of homeless children and youth. Among other things, H.R. 1 requires schools to immediately enroll homeless children and youth, thereby eliminating delays caused by lack of records and other enrollment requirements; ensures that public notice of the educational rights of homeless children and youth are disseminated in school districts; ensures that schools keep children in their school of origin whenever possible and appropriate; prohibits a State receiving funds from segregating a homeless child, either in a separate school or in a separate program within a school, based on that student's status as homeless (this provision contains a grandfather clause that ensures established schools do not lose funding); provides States with greater flexibility to use McKinney-Vento funds for Statewide support and technical assistance activities; and increases the amount of McKinney-Vento funding available to small States.

TITLE IX, PART B—REPEALS

Part B of Title IX of H.R. 1 repeals several ESEA programs including the National Education Goals Panel, the Fund for the Improvement of Education, the Urban Education program, the Physical Education for Progress program, the Coordinated Services program, and the Education Infrastructure program.

COMMITTEE VIEWS

INTRODUCTION TO H.R. 1

Transforming the Federal Role in Education So That No Child is Left Behind

As America enters the 21st Century full of hope and promise, too many of our neediest students are being left behind.

Although education is primarily a State and local responsibility, the federal government is partly at fault for tolerating these abysmal results. The federal government currently does not do enough to reward success and sanction failure in our education system.

Since 1965, when the federal government embarked on its first major elementary-secondary education initiative, federal policy has strongly influenced America's schools. Over the years Congress has

created scores of programs under the Elementary and Secondary Education Act of 1965 that intended to address problems in education without asking whether or not the programs produce results, or knowing their impact on local needs. Yet, after spending billions of dollars on education, we have fallen short in meeting our goals for educational excellence. The academic achievement gap between rich and poor, minorities and non-minorities, is not only wide, but in some cases is growing wider still.

In reaction to these disappointing results, some have decided that there should be no federal involvement in education. Others suggest we merely add new programs into the old system. Surely, there must be another way—a way that points to a more effective federal role. The policies in H.R. 1 are based on the fundamental notion that an enterprise works best when responsibility is placed closest to the most important activity of the enterprise, when those responsible are given greatest latitude and support, and when those responsible are held accountable for producing results. H.R. 1 will accomplish this by granting unprecedented new flexibility to local school districts, demanding results in public education through strict accountability measures, empowering parents, and providing a safety valve for children trapped in failing schools. Specifically, it does the following:

Enhances accountability and demands results

H.R. 1 includes President Bush's rigorous plan for holding State and local school districts that use federal funds accountable for improving student academic achievement.

H.R. 1 requires States and local schools to demonstrate results through annual reading and math assessments for students in grades three through eight. The plan authorizes \$400 million to help States design the tests.

Grants unprecedented local flexibility

H.R. 1 dramatically enhances flexibility for local school districts, giving them the freedom to transfer up to 50 percent of the federal education dollars they receive among an assortment of ESEA programs as long as they demonstrate results. Local school districts do not have to receive permission from the State or the Education Secretary to transfer funds.

This unprecedented new flexibility gives local school districts the freedom to target resources where they're needed most—from class size reduction, to higher teacher salaries, to technology in the classroom—and address needs that often change from one year to the next, since these transfers are not permanent and must be made on an annual basis.

Consolidates duplicative programs

The bill gives States and local schools additional flexibility to improve student performance by consolidating a host of duplicative programs to ensure that State and local officials can meet the unique needs of students.

H.R. 1 eliminates or consolidates 34 federal Elementary and Secondary Education Act (ESEA) programs out of a total of 66, streamlining over 50 percent of the federal K-12 education bureaucracy.

Empowers parents

H.R. 1 requires States and school districts to prepare annual report cards on their schools to better inform parents about the quality of their child's school.

Moreover, it allows parents to remove their child from a low-performing school and send them to a different public school immediately after their school has been identified as failing.

Creates a safety valve for children in failing schools

Before giving parents the option of sending their children to another school, H.R. 1 gives low-performing schools the chance to improve by offering them financial and other technical assistance to improve and increase student academic achievement.

If a school does not make adequate yearly progress after one year, the district must implement certain actions to improve the school, such as replacing certain staff, as well as offer public school choice to all students in the failing school.

H.R. 1 allows parents to use Title I funds to provide supplementary educational services—including tutoring, after school services, and summer school programs—for their children.

Parents will choose from a list of providers that meet certain criteria, including private faith-based providers.

Prohibits national testing

H.R. 1 explicitly prohibits federally sponsored national testing, federally controlled curriculum, as well as any mandatory national teacher test or certification.

Authorizes the President's Reading First initiative

H.R. 1 focuses on effective, proven methods of reading instruction and triples federal literacy funding from the present \$300 million to \$900 million in 2002.

The President proposes to spend \$5 billion over the next five years on reading programs for K–3 children.

Improves teacher quality

H.R. 1 will not fund a separate program that can only be used by school districts for class size reduction. Instead, school districts will have the flexibility to use funds to reduce class sizes by recruiting, hiring, and training teachers, or on professional development.

Makes schools safer

H.R. 1 authorizes the Safe and Drug-Free Schools program, the 21st Century Community Learning Centers Act, and the Gun Free Schools Act—which helps States and local school districts fund drug and violence prevention programs and before- and after-school activities.

As part of the broad effort to make schools safer, H.R. 1 allows teachers to remove violent and persistently disruptive students from the classroom without fear of legal repercussions.

Improves math and science education

H.R. 1 establishes the Math and Science Partnership program to provide grant funds for States to work in conjunction with institu-

tions of higher education in strengthening K–12 math and science education.

Partnerships will focus on strengthening math and science instruction in elementary and secondary schools, and may include such activities as making math and science curricula more rigorous, improving professional development, and attracting math and science majors to teaching.

Protects home schools

Home schools are freed from federal regulations not only in the Elementary and Secondary Education Act (H.R. 1), but also all programs administered through the U.S. Department of Education.

The bill exempts all home schools and those private schools that do not use federal funds from all testing requirements referenced in H.R. 1.

TITLE I, PART A—BASIC PROGRAM

Historical Perspective

Title I, the largest federal Elementary and Secondary Education Act (ESEA) program, provides supplemental educational services to children who are achieving below grade level. From the time it was first enacted in 1965 until the present, taxpayers have provided more than \$120 billion in funding, with the initial investment in 1965 of \$960 million having risen to \$8.6 billion in 2001.

The reach of Title I is broad. Title I provides services to more than 12.5 million students enrolled in 45,000 schools and 13,000 school districts. Fifty-seven percent of all schools receive Title I funds. Ninety-six percent of the highest poverty schools (schools with more than 75 percent of students in poverty) receive Title I funds, an improvement from 79 percent in 1993–94. Funding for low-poverty schools declined from 49 to 36 percent over the same period. Title I grants or services are provided to almost all school districts in the country—approximately 90 percent.

Over its 34-year history, Title I has been confronted with questions about its effectiveness in raising the academic achievement of the students it serves. During its first 30 years (1965–1995), Title I largely functioned as an isolated program with separate services, lower expectations, and different testing requirements. Federal dollars were tied to eligible students, so that federal funds provided supplementary aid only to eligible students rather than general aid to all students. Participants in Title I programs were selected by their test scores and usually remedied through “pull out” programs that typically provided an additional 30 minutes per day in basic skills. Funds were provided based on the number of low scoring students, which created a disincentive to improve scores, for when they did improve, Title I funds were reallocated to other students and schools with lower scores.

The 1993 interim report of the National Assessment of Title I found that it did not provide the services necessary to help at-risk students in high-poverty schools to close their academic achievement gaps with students in low-poverty schools. Studies of Title I also found that expectations were lower for students in high-poverty schools, and that attending high-poverty schools had a negative effect on student achievement. The final report, released in

1997, confirmed the generally negative findings from the interim report:

In the period covered by this study, children in high-poverty schools began school academically behind their peers in low-poverty schools, and were unable to close this gap in achievement as they progressed through school. When assessed against high academic standards, most students failed to exhibit the skill and mastery in reading and mathematics expected for their respective grade levels. Students in high-poverty schools were, by far, the least able to demonstrate the expected levels of academic proficiency. ("Prospects: The Congressionally Mandated Study Educational Growth and Opportunity," Puma et al. 1997, p. iv)

The ESEA reauthorization in 1994 made significant changes to Title I based on the findings in the 1993 interim report of the National Assessment of Title I. The Improving America's Schools Act (IASA) of 1994 reshaped Title I based on a new approach of standards-driven reform, and an emphasis on schoolwide reform instead of pull-out programs. Under the new Title I law, States were required to develop challenging content and performance standards for all students that would be linked to an aligned assessment and accountability system. Students in schools receiving Title I funds would be held to the same standards as students in other schools, eliminating dual accountability systems. In addition to setting high standards, Title I funds were focused on teaching and learning, through upgrading curriculum, accelerating instruction, and providing teachers with professional development to teach to high academic standards.

The latest report of the Congressionally mandated National Assessment of Title I (NATI), released in January 2001, came to mixed conclusions on the progress of student achievement in high-poverty schools. Because the changes in 1994 allowed for more flexible uses of Title I dollars and schoolwide reform, it is challenging to measure the impact of the Title I program on student achievement since it is difficult to disentangle its effect from the impact of State and local reform efforts that the program is designed to support. Using trends in State assessment data and the National Assessment of Educational Progress (NAEP), the report was able to show some progress and some stagnation. On State assessments, it found that three-year trends reported by nine States demonstrated progress in the percentage of students in the highest poverty schools meeting the State standards for proficiency in reading and mathematics. State assessments also demonstrated some progress in narrowing the achievement gap between high and low poverty schools.

NAEP data, however, paint a different picture of student achievement since the 1994 amendments. NATI reports "In contrast to the recent State assessment data, longer-term trends in NAEP scores depict a widening achievement gap between high and low poverty schools from the late 1980s to 1999." The achievement gap is "substantial, equal to several grade levels." Furthermore, it found that "among the lowest-achieving students, NAEP reading

performance as measured by the main NAEP shows no significant change during the 1990s.”

It is difficult to link any of this achievement data to the changes made to Title I in 1994. The 1999 NATI study pointed out that “full implementation [of the 1994 reforms] in classrooms across the country has yet to be accomplished.” Dissemination of information about the 1994 reforms did not reach all schools and school districts. For example, the report *Status of Education Reform in Public Elementary Schools: Principals’ Perspectives*, indicated that most principals in Title I eligible schools were unaware of the standards-based reforms required by the 1994 legislation, and so it is even more difficult to attribute the increase in scores to the 1994 changes in Title I. Though these reports only represent a sample of the studies that have been conducted since 1965, they are reflective of continuing concerns.

At the beginning of the 21st century, 36 years after the enactment of Title I, the effectiveness of Title I in improving the academic achievement of students below grade level remains unclear. In order to ensure that another decade does not go by with widening achievement gaps, H.R. 1, the No Child Left Behind Act of 2001, makes significant improvements to current law. It places a priority on academic accountability and granting flexibility to schools and teachers to make decisions as to how to best meet the needs of disadvantaged students. Final, aligned assessments required by the 1994 reauthorization must be in place, or a State is subject to administrative sanctions; States must annually assess children in reading and math in grades 3 through 8; all groups of students (economically disadvantaged, minority, limited English proficient, and others), not just students in the aggregate, are to show improvement; in order to empower parents with information, States, school districts and schools will issue report cards on the academic achievement of their students with results broken-down so communities can better see where achievement gaps remain or widen; public school choice will be offered to parents of students enrolled in low performing Title I schools; additional help and expertise will be made available to failing schools to help them turn themselves around; economically disadvantaged students in persistently failing schools will have the option of receiving supplemental educational services from a provider of their choice; and schools that continue to fail will be subject to corrective actions, and eventually significant measures such as reconstitution.

Achieving Excellence Through High Academic Standards and Accountability

The structure of H.R. 1, the No Child Left Behind Act of 2001, builds upon the standards-based approach to Title I that was adopted in the 1994 amendments (Improving America’s Schools Act, P.L. 103–382) to Title I. The 1994 changes to the Title I statute required States to develop State content and performance standards by the 1997–98 school year and State assessments aligned to those standards by the 2000–2001 school year. States are now expected to have established challenging content and performance standards, implemented assessments that measure student performance against these standards, hold schools and school systems accountable for the achievement of all students, and align

their Title I programs with these policies. A single accountability system should be in place in each State that applies equally to all students so that all students are held to the same high academic standards.

States are complying with the current ESEA requirements to varying degrees. The reasons for the uneven response, according to the U.S. Department of Education, range from States not being able to easily conform their own policies to federal requirements, to a lack of funding and coordination at the State level, to miscommunication between State and federal officers. As of January 2001, 49 States, as well as Washington, D.C. and Puerto Rico, had met the requirement for developing core content standards in reading and math. Only 28 States had approved performance standards, which are closely related to the development of final State assessments. The U.S. Department of Education is currently reviewing States' final assessment systems, using a peer review process involving experts in standards, assessments and Title I. The peer review process does not directly examine a State's assessment instruments. Some systems have been granted full approval, while others still require improvement. Those States that have made significant progress but will be unable to finalize their systems by the 2000–01 test administration deadline have been granted "timeline waivers." States that are significantly behind and lack a clear plan for meeting the requirement may be required to enter into compliance agreements with the Department that outline how the State will make the changes necessary to comply with the law.

Throughout H.R. 1, the Committee changed references in current law to "content standards" and "performance standards" to "academic content standards" and "academic achievement standards," respectively. The Committee's intent is only to clarify the terms that are used to describe these standards, not to in any way require States to change what they have developed to meet the requirements for these standards under the 1994 amendments.

It is the Committee's view that the intent of this Act is that States adopt standards and assessments that measure academic knowledge of math and reading, as opposed to applied and contextual learning that focus on student workplace skills and competencies. To the extent such research is available, classroom instruction should be based on rigorous, scientifically based research. The bill does not authorize the Secretary to define the term "academic" for the States. States may define the term "academic" as they see fit, or not at all.

Annual Academic Assessments in Reading and Math for Grades 3–8

In accordance with the President's "No Child Left Behind" proposal, Section 1111 requires States to build on their academic standards and assessments and annually assess students in grades three through eight in reading and math. Only standards, not assessments, are required to be developed for science. The purpose of these annual, academic assessments is to empower parents with information about the achievement of their children, as well as to hold schools, districts and States accountable for improving academic achievement. Without assessments, no one can be held accountable for improving student achievement. With annual assess-

ments in reading and math in grades three through eight, there will be more information available to more accurately determine whether a school is providing all of its students with a quality education.

The Committee heard from several witnesses about the importance of measuring student achievement annually. According to Arizona Superintendent of Education Lisa Graham Keegan, who testified at the March 14, 2001 hearing on “Empowering Success: Flexibility and School Choice”:

[T]he Congress is rightly very concerned about whether flexibility will lead to academic gain, or to academic stagnation with no strings attached. There needs to be an accountability system in place that measures student progress from year to year, and shows whether or not each student is progressing adequately toward well defined academic standards. Ideally, our assessments should also let us know how we’re doing as States in relation to one another, and how we as a nation stack up against other countries.

If a State only assesses in a few grades, it is more difficult to diagnose strengths and weaknesses, and to address problems in a particular classroom or grade level within a school. With annual tests, problems can be found before it is too late to fix them and can ensure that resources are directed as effectively as possible.

Mr. Edward Rust, Co-Chairman of the Business Coalition for Excellence in Education, testified before the Education Reform Subcommittee on March 8, 2001, that “we know it from a business standpoint that you have got to measure progress or you will never know whether or nor you are getting close to your goal.” He also testified that,

[T]he Committee for Economic Development’s recent report, entitled *Measuring “at Matters: Using Assessment and Accountability to Improve Student Learning*, points out that tests are a means, not an end, in school reform. Assessment and accountability systems must be a part of the educational plan that provides the data and information necessary to make informed decisions about student progress. Continuous review of assessment systems must be part of school improvement plans. As the report notes, although there are valid concerns about some testing practices, we cannot wait for the “perfect” test. Instead, we must continue to evaluate and improve the existing assessment systems because they provide the best means for charting our progress in improving student achievement. The debate over testing should not be about whether to rely on tests, but how best to improve and use them to enhance educational outcomes.”

Section 1111(b)(4)(G) requires States to develop annual assessments in grades three through eight in reading and math by the 2004–2005 school year. It is the Committee’s view that States would continue to administer assessments developed under Section 1111 prior to the enactment of H.R. 1. In addition to implementing annual assessments in reading and math in grades three through

eight, States would continue to administer reading and math assessments at least once during grades 10–12, as required under current law. The Committee recognizes that the requirement to have assessments in place by 2004–2005 will present numerous challenges to many States, especially those that have not yet met the 1994 assessments requirements. Therefore, the Committee encourages States to seek technical assistance from the U.S. Department of Education, if needed, as soon as possible to ensure that they meet this deadline. Section 1111 (b)(10) requires the Secretary to provide this assistance.

States that fail to meet this deadline will be subject to having a portion of their administrative funds withheld under Section 1111(g). If they do meet the deadline, they may receive a financial bonus in accordance with Section 7103.

Section 1111(b)(4)(F) also requires that State assessments use multiple measures to ensure students are performing academically. H.R. 1 clearly recognizes that States are responsible for designing their assessments. As Mr. Rust noted earlier, “perfect” tests do not yet exist, and high-stakes decisions should not rest solely on one well designed, but potentially fallible, assessment.

Timely and Useful Assessment Data

It is the Committee’s view that in order-for annual assessment data to be an effective accountability tool, school districts and schools should receive assessments results as soon as possible, but no later than the end of the school year. Such assessment data should be provided in a format that is easily accessible. State educational agencies should use assessment data to assist local educational agencies in improving the quality of instruction and identifying areas that need improvement or additional resources to improve student academic achievement. Such assessment data should also be used to improve the instruction and achievement of individual children.

Testing of Students in the English language

Recognizing the many benefits of prompt acquisition of English language skills, the Committee has included language in the bill regarding testing of students in the English language. Section 1111 (b)(4)(H)(iv) would require that all students who have attended schools in the United States for at least three consecutive years be tested in reading and language arts in the English language. Attaining both English proficiency, particularly for reading and language arts tests, and academic proficiency is especially important for the success of limited English proficient students in the early years. However, recognizing that there may be some situations where limited English proficient students may have difficulty mastering the language because of a lack of formal instruction in their native language prior to entering the United States, the local educational agency may extend the three-year time frame mentioned above for one additional year on an individual, case-by-case basis.

Section 1111 (b)(7) requires local educational agencies to annually assess the English proficiency of all LEP students, beginning no later than the 2002–2003 school year.

The Committee strongly believes that in order to ensure that schools and school districts are held accountable for improving aca-

ademic achievement and English language proficiency of limited English proficient and immigrant children, they should be tested each year in the same manner as their English speaking peers. Schools are held accountable for specifically improving the academic achievement of LEP students. States will include English language proficiency in their definition of adequate yearly progress, solely for the purpose of rewards and sanctions. States that fail to improve English language proficiency will be subject to losing twenty percent of their total administrative allocation under ESEA programs.

Adequate Yearly Progress for All Students

The adequate yearly progress provision in Title I of H.R. 1 is central to achieving the President's goal of leaving no child behind. H.R. 1 ensures that States hold school districts accountable for ensuring that schools make real progress each year, and do not have low standards for high-poverty schools. In order for all children to succeed, all schools, including high-poverty schools, are expected to be high quality schools. In order to identify low performing schools, there needs to be a standard definition within the State of what a low performing school is, based on State academic assessments in reading and math and other measures a State may choose to include. Neither current law, nor H.R. 1 specifically defines this for States. It only describes what minimum variables the definition should include, and that the State should expect its students as a whole to make adequate gains each year.

As mentioned earlier in this report, under Title I law, States develop academic content and achievement standards and align their assessments to those standards. Under current law, for purposes of determining the academic progress of Title I students and schools, States develop a definition of "adequate yearly progress" that: (1) is consistent with guidelines established by the Secretary; (2) results in continuous and substantial yearly improvement of each local educational agency and school sufficient to achieve the goal of all children served under this part meeting the State's proficient and advanced levels of performance; and (3) links progress primarily to achievement on the State assessment, but permitting progress to be established in part through the use of other measures. Once a State develops its definition, it then becomes the measure for determining whether Title I school districts and schools are making adequate yearly progress.

H.R. 1 changes current law, in accordance with the President's plan and bipartisan efforts during the 106th Congress, to ensure that Title I schools are identified for help and corrective actions if they aren't helping all children, particularly economically disadvantaged and minority students. Section 1111(b)(2)(C) of H.R. 1 strengthens and clarifies adequate yearly progress requirements to ensure that no child is left behind. Under current law, a school can be deemed as making progress regardless of whether its disadvantaged and ethnic minority students are improving. H.R. 1 specifically requires States to include as part of their definition of adequate yearly progress the achievement of all students, as well as economically disadvantaged students, students from major racial and ethnic minority groups, students with disabilities, and limited English proficient students. Annual achievement objectives are re-

quired to be set for these students in order to ensure continuous and substantial yearly progress. Achievement goals are not required to be set for groups where there are an insufficient number of students to yield statistically significant results or would reveal the identity of individual students.

A State's definition of adequate yearly progress is used to measure progress at the State, district and school level. In order to hold States accountable for ensuring its limited English proficient students are improving their English language proficiency, States are to include a measure of English language proficiency. This indicator is solely for the purpose of State accountability, described in Part A of Title VII, not for measuring the progress of school districts and schools. School districts are required to annually test limited English proficient students, but such tests do not need to be the same Statewide.

According to the first annual School Improvement Report released by the U.S. Department of Education in January 2001, an important factor distinguishing how States define adequate yearly progress is "understanding whether States require schools to reach a threshold about which they will not be identified for improvement, or whether all schools are required to make progress every year." Twelve States use absolute targets, rather than levels of actual progress as the only measure of making adequate yearly progress. The remaining 37 States incorporate some measure of continuous progress in their definitions. H.R. 1 continues the flexibility States have to set definitions with absolute or continuous improvement targets. It only specifies the timeline that States should include in their definition (12 years) in order to ensure that States expect schools to make substantial and continuous progress.

Under H.R. 1 as introduced, States had to include a timeline in their definition of progress such that gains each year would be sufficient to bring all students up to the State's definition of proficient" in ten years. The Chairman's mark changes this timeline to 12 years. States differ in the percentage of students that schools are expected to bring up to the basic or proficient level. According to the Education Commission of the States, 14 States specify that 90–100 percent of students are expected to reach proficiency. States also set different timelines for meeting their performance goals, ranging from six to 20 years. According to the U.S. Department of Education, the modal target is ten years. H.R. 1 strikes a balance by requiring States to include in their definition a timeline that is longer than the target States most frequently set.

H.R. 1 further strengthens accountability by requiring States to not only show progress for all students and to get all students to proficient within 12 years, but to also be closing achievement gaps at the same time. Recent NAEP results in reading showed that while performance improved for non-disadvantaged students, scores dropped for disadvantaged students, thus widening the achievement gap. Title I funds are intended to improve academic achievement for the neediest students and should, at a minimum, be used to close achievement gaps, while still promoting gains for higher-achieving students.

While a State's definition of adequate yearly progress applies to all public schools in the State, only Title I schools are identified for

improvement, corrective action or restructuring, as required by Section 1116, for failing to make adequate yearly progress.

It is the Committee's view that States such as Tennessee, which administers what is known as the Tennessee Value Added Assessment System (TVAAS) and measures school progress by comparing students achievement to their past performance, would not be precluded by the Title I adequate yearly progress requirements and assessment requirements. In fact, the Tennessee system is one that more accurately measures the effects of schools and school systems on the average progress of students for which they are responsible. The Committee encourages States to move towards adopting similar assessments for holding schools and school districts accountable, as well for assessing the performance of teachers.

Mr. Scott (D-VA) offered an amendment in Committee, which passed by a vote of 26-22, to include as part of the definition of adequate yearly progress a measure of drop-out rates, as defined by the National Center for Educational Statistics.

Empowering Parents with Annual State Academic Reports and School Report Cards

In accordance with the President's proposal, Section 1111(h) of the No Child Left Behind Act of 2001 expands upon current provisions of the Elementary and Secondary Education Act, which require schools to collect and report to the public information on the academic quality of Title I schools, in order to empower parents with information about their schools. Reporting this information is crucial to empowering parents to hold schools accountable and getting them involved, and helping fix schools that fail and choose another public school if their child's school fails. Under section 1111 of current law, States must develop State student assessments that will be used to determine the adequate yearly performance of each local educational agency and school. These assessments must enable results to be disaggregated within each State, local educational agency, and school by each major racial and ethnic group, by English proficiency status, by gender, by students with disabilities as compared to nondisabled students, and by economically disadvantaged students as compared to students who are not economically disadvantaged.

In recent years, many States have sought to provide more information to parents and other taxpayers on the quality of individual schools as a means to hold them accountable. According to the Education Commission of the States, 40 States require school districts and/or schools to report academic achievement results to the public. However, many of these reports fail to provide parents with adequate information. A recent study called, "Individual School Report Cards: Empowering Parents and Communities to Hold Schools Accountable," found that most States fail to provide parents with essential information about their children's education. A survey by Education Week found that 91 percent of taxpayers believed that "widely publicized ratings on such things as test scores and graduation rates motivate public school teachers to work harder to improve schools' performance. "However, only 24 percent of these same taxpayers indicated they had ever seen a school report card.

The No Child Left Behind Act of 2001 builds upon current law and the efforts of States and localities to provide parents and tax-

payers helpful information on the quality of public schools. The intent of the No Child Left Behind Act of 2001 is to ensure that information on academic performance of Title I schools is made available to parents and the public at large.

The information included in the annual State report and school district report cards will enable parents, taxpayers, and others to make informed judgments about the quality of education in their communities. This information will also empower parents to choose quality schools for their children. Without data on academic achievement, public school choice holds little promise for parents to find a better education for their children.

State Report Cards

In order to hold schools accountable for improving the performance of all students, State assessment results would be reported to the public disaggregated by major subgroups of students. The information on the report card would be for public schools in the aggregate for the following categories: student achievement on State assessments, by subgroup; comparison of students at basic, proficient, and advanced levels of performance on State assessments; graduation rates; completion of Advanced Placement (AP) courses and passing AP tests; professional qualifications of teachers; and percentages of students not tested.

School District Report Cards

School districts would prepare annual reports for parents and the public on the academic performance of schools in the aggregate in the school district and by school. The school district report cards would include information on: the numbers and percentages of schools identified within the school district as in "school improvement" (low performing) under Title I; in the case of an individual school, whether it has been identified for school improvement and how its students performed on the State assessment compared to the school district and State as a whole; comparisons of students at basic, proficient, and advanced levels of achievement on State assessments; graduation rates; completion of Advanced Placement courses and passing AP tests; professional qualifications of teachers; and percentages of students not tested.

The Committee is aware that some States and school districts will need to make adjustments to be able to report the required information, and accordingly, language has been included to give States and school districts until the beginning of the 2003–2004 school year to first report the information to the public.

In addition to annual State academic reports and school district reports, the No Child Left Behind Act of 2001 expands accountability through a new "parents right to know" provision. Under this provision, local educational agencies must provide parents, upon request, information on the professional qualifications of their child's classroom teacher. Such information must include whether the teacher is teaching under an emergency or other provisional status, and whether their child is being taught by a paraprofessional. Local educational agencies receiving Title I funds must also provide to parents their child's performance on each of the State assessments.

These provisions come amid a growing body of research showing that the quality of the teacher is the number one factor in determining student academic success. In fact, the impact of being taught by an unqualified teacher has been shown to have a lasting negative impact on student achievement. Therefore, the Committee believes parents in schools funded under Title I should have every right to be informed when their child is not being taught by a fully qualified teacher.

The Committee is aware of, and encouraged by, the initiative of some States to establish nonprofit education organizations that maintain websites of academic achievement data, which enable comparisons of the progress of similarly situated schools. For example, in Texas, the Just For Kids nonprofit education organization has posted student performance data since 1998 on a school-by-school basis. Their website allows parents and other members of the community to view and compare, on a longitudinal basis, how schools are performing relative to other schools with similar demographics. In addition, best practices at the successful schools are made available, through the organization, to low performing schools.

Parental Rights and Notification Provisions

Over the past few years, the Committee has heard a growing number of complaints from parents whose children have been placed and retained in bilingual education courses without their permission or knowledge. In many instances, these parents faced great resistance in their efforts to remove their children from such programs.

Since the enactment of the Improving America's Schools Act, Title I, Part A has provided services to limited English proficient children. In fact, the Title I program far outdistances the Bilingual Education Act in the provision of services to limited English proficient children. For 1996–97, a total of 430,724 children received services under the Bilingual Education Act (with some children participating in several programs). At the same time, two million limited English proficient children were served under Title I, Part A. The Committee is concerned that many of the problems related to program participation that have arisen under the Title VII, Bilingual Education Act will emerge under Title I, Part A, as well.

Because of this concern, the Committee has included language in Section 1112(g), as well as under Part A of Title III, requiring local educational agencies to obtain informed parental consent prior to placing a child in an English language instruction program for limited English proficient children. This restriction would not apply to classes, which exclusively, or almost exclusively, use the English language in instruction or where instruction is not tailored for limited English proficient children. The provision does allow LEAs to serve children if a response is not obtained from their parents after written notice and reasonable effort to obtain such consent is made. In such instances, a local educational agency must document, in writing, that it has given such written notice and has made specific efforts to obtain such consent. LEAs must then provide proof of such efforts, in writing, to the parents or guardian of the child at least 10 business days prior to the actual provision of services.

under this part. Such correspondence must include a final notice requesting parental consent for such services.

Section 1112(g) also contains provisions that require the parent or parents of children participating in programs under this Act to be informed of: (1) the reasons for identification of their child as being in need of English language instruction, (2) their child's level of English proficiency and how it was assessed, (3) the status of their child's academic achievement and how the program will assist their child to learn English and meet age-appropriate standards for grade promotion and graduation, (4) what the specific exit requirements are for the program, (5) the expected rate of transition from the program into a classroom that is not tailored for limited English proficient children; and (6) the expected rate of graduation from high school for the program for children in secondary schools.

According to a November 1997, report issued by the United States Commission on Civil Rights, entitled "Equal Educational Opportunity and Nondiscrimination for Students with Limited English Proficiency: Federal Enforcement of Title VI and Lau v. Nichols:"

School districts across the country are experiencing serious tensions between school officials and parents over placement. Many parents of students with limited English proficiency are expressing dissatisfaction with the education their children are receiving. For example, in New York City, Maria Perez, a parent who is fighting her child's placement in the city's bilingual education program recently stated: 'what bothered me was that they place children in bilingual programs and keep them there for years and years. They aren't learning English.' The problems that prevent academic success can and should be addressed by parents working together with school personnel to determine where the problems exist and how they can be solved.

The parental consent provisions in this bill make it very clear that parents should play a major role in determining the placement of their child in an English language instruction program. Schools should not be making decisions regarding the placement of English language learners unless they have reached an agreement on such placement with the child's parents. Parents want their child to learn English as quickly as possible because they know it is essential in order to succeed academically and later in the workplace. They should be able to prevent their child from being placed in a classroom which they do not believe will help them learn English and succeed in school. Parents should also have the ability to remove their child from such a classroom if they believe it is not in their child's best interest. The Committee agrees with the report of the Civil Rights Commission in stating that parents and schools should be working together to make the best possible decisions regarding the education of English language learners.

It is the view of the Committee that parents have the primary responsibility for their children's education. These new changes ensure that the parents of limited English proficient children have the same rights as other parents. At the same time, the Committee does not view these parental consent provisions as a means to deny

limited English proficient children appropriate services, especially when a response from the parent cannot be obtained. In such cases where a response has not been obtained, the Committee believes that limited English proficient children should receive appropriate services without delay.

Ranking and Priority for Grades K–6

Under current law; once Title I funding reaches the school district, all schools with over 75 percent poverty must be served first, in rank order from highest to lowest poverty. This provision is intended to increase the number of high poverty schools that receive Title I funds, and that has been the effect. According to the National Assessment of Title I, Title I funds go to nearly all (95 percent) schools with over 75 percent poverty and nearly 75 percent of Title I funds go to schools with poverty levels of 50 percent or greater. Schools with lower poverty rates are less likely to receive Title I funds. Only 36 percent of schools with 35 percent or less poverty receive these funds.

Once the schools with 75 percent and greater poverty are served, schools below 75 percent poverty are served in rank order from highest to lowest poverty. A school district may not serve a school below 75 percent poverty until all schools above 75 percent poverty are served. However, school districts may choose to serve schools below 75 percent poverty within grade span groupings or within the district as a whole, but regardless of the choice, they must serve these schools in rank order.

Section 1113 of the No Child Left Behind Act would continue the ranking requirements under current law with the modification that school districts, if they wish, may give priority to the elementary grades before serving other schools or grade levels. Essentially, this permissive authority would allow school districts to first serve elementary schools above 75 percent poverty, in rank order, before serving other schools above 75 percent poverty, and serve elementary schools below 75 percent poverty, in rank order, before serving other schools below 75 percent poverty. Given the particular importance of the early years of a child's education, the Committee believes this priority will enable many school districts to more effectively utilize Title I funding in improving student academic achievement.

Schoolwide Programs

Under current law, schools with 50 percent or more poverty may, if they wish, choose to serve all students in the school. These schools are known as "schoolwide programs." Under a schoolwide program, funds could, for example, be used to provide professional development to all of a school's teachers, upgrade instructional technology, or implement new curricula. Schoolwide programs also have the added flexibility of combining federal, State and local education funds to serve the entire school, rather than having to operate many separate federal education programs with multiple sets of rules and regulations. In addition, schoolwide programs utilize a strategic plan. Strategic plans allow Title I services to be considered within the broader context of a school's reform goals, and provide a framework for better integration of Title I within the regular academic program at the school.

In recent years, more and more schools have opted to utilize the schoolwide approach under Title I. According to the National Assessment of Title I, the number of schools implementing schoolwide programs has increased fourfold since 1995 from about 5,000 to 19,227 in 1997–98. Local school principals, teachers and administrators enjoy having the schoolwide option. As of 1997–98, 82 percent of eligible schools were using the schoolwide option and an additional 12 percent were considering implementing schoolwide programs. Forty percent of all Title I schools operated schoolwide programs in 1997–98.

Principals and teachers have found the schoolwide approach offers increased opportunities to support comprehensive efforts to upgrade an entire school, and thereby more effectively help improve the achievement levels of the lowest achieving students. The February 25, 1999, testimony of Ms. Madeleine Manigold before the Subcommittee on Early Childhood, Youth, and Families, noted that Texas schoolwide programs had been particularly successful in improving the academic performance for all students and all groups of students in reading and mathematics. Further, her testimony indicated the achievement gap has been closing at schools utilizing the schoolwide approach at an even greater rate than in the State of Texas as a whole.

The State of Maryland has also had success with schoolwide programs. In Garrett County, through use of the schoolwide approach and an Ed-Flex waiver, two elementary schools have shown achievement on the Comprehensive Test of Basic Skills (also known as TerraNova) well above national averages.

Sections 1114 would continue to authorize the schoolwide approach, and expand it so that schools with 40 percent or more poverty could operate schoolwide programs. The Committee strongly endorses this increased flexibility at the local level and recognizes that many more schools may soon utilize this model for delivering Title I services than with the current 50 percent threshold.

It has come to the attention of the Committee that some schoolwide programs have not been utilizing the authority under current law to combine federal, State, and local education funds to serve the entire school, because of State and local fiscal accounting barriers. The consolidation of funds in order to use all available resources to upgrade the entire educational program in a high-poverty school is an integral component of a “schoolwide” program. Section 1114(b)(1) addresses this concern by making it clear that schools may “consolidate” funds. Current law states that the funds “may be used in combination” with other funds, which is unclear. Section 1114(b)(3)(C) addresses barriers that may discourage schools from consolidating funds by clarifying that schools do not need to conduct separate fiscal accounting by program to demonstrate that the intent and purpose of the programs have been met. The statute does not require separate fiscal accounting records to demonstrate that the intent and purposes of all the programs that contribute funds toward the schoolwide program are met, but documentation is necessary. While the statute does not specify what type of documentation would be acceptable, the Committee anticipates acceptable documentation would include evidence that activities were conducted which address the intent and purposes of the programs. Finally, Section 1111(c)(8)–(9) also addresses

schoolwide accounting barriers to consolidating funds by requiring States and localities to reduce any such barriers that schools may be experiencing.

One of the components of a schoolwide program mentioned in Section 1114 are schoolwide reform strategies. Such strategies may include increasing the amount and quality of learning time, such as extending the school year, before and after school programs and summer programs. The Committee believes that after school, summer enrichment, and gifted and talented programs provide special opportunities for schoolwide improvement and are valuable education reform tools.

With respect to pre-kindergarten services, the Committee wishes to note that the No Child Left Behind Act retains as a component part of a schoolwide program provisions for assisting preschool children in the transition from early childhood programs, such as Head Start, Even Start, or State run preschool programs, to elementary school programs. Specifically, the Committee improves upon these provisions by requiring local educational agencies to coordinate their educational services with those provided by local Head Start agencies, mirroring a provision added to the Head Start Act. In addition, local educational agency plans must describe how local educational agencies will coordinate and integrate services relating to Head Start, Even Start, and other preschool programs, and how Title I funds will be used to support preschool programs for children.

Targeted Assistance Programs

In addition to schoolwide programs, the other major program model for delivery of Title I services is the targeted assistance program. Under a targeted program, Title I services are focused upon the lowest achieving students in the school. For example, students may be “pulled out” of their regular classroom for several hours of more intensive instruction by a specialist teacher each week, or funds may be used to hire a paraprofessional who provides additional assistance to low achieving pupils in their regular classroom. School districts and schools have substantial discretion in determining how they will select pupils to be served by Title I, as long as their methods are applied consistently to all pupils in the grades to be served.

Section 1115 would essentially continue the targeted assistance program intact with a few minor changes. However, one significant change for both schoolwide programs and targeted assistance programs would be the scientifically based research requirement as mentioned below.

Academic Accountability for Title I Schools under Section 1116

In General

The centerpiece of President Bush’s No Child Left Behind education reform plan is academic accountability. His accountability blueprint, which is included in Title I, Part A and Title VII, Part A of H.R. 1, holds States, local educational agencies (LEAs) and schools accountable for ensuring that all students, including disadvantaged students, meet high academic standards. In general, schools that fail to make adequate yearly progress (as defined by

the State) are designated as low performing. The technical term for low performing schools under Title I is “school improvement.” Under the accountability system, schools identified for school improvement will first receive technical assistance and may receive financial assistance to help them improve. Then, if the schools continue to fail to make adequate yearly progress, a series of corrective actions and restructuring measures are required to be taken to help turn the school around and raise the academic achievement of the school.

Funds for Turning Around Low Performing Schools

In order to assist States and school districts in their efforts to turn around low-performing schools, H.R. 1 has created a separate authorization of \$500 million under Section 1002(j) to allocate to States for school improvement in order to make subgrants to local educational agencies. Additionally, the percent of funds States may reserve for school improvement under Section 1003 has been increased from one percent in 2002 and 2003, to three percent for fiscal years 2004–06. In awarding these funds, States are to give priority to those local educational agencies with the lowest achieving schools, have the greatest demonstrated need, and have the strongest commitment to helping schools meet adequate yearly progress requirements.

School Improvement

Section 1116 sets forth the requirements for LEAs to review the academic progress of schools, to identify low performing schools as in need of “school improvement,” to provide technical assistance and potentially financial assistance to such schools, and to undertake corrective actions and restructuring to help improve such schools. According to the first annual “School Improvement Report” of the Department of Education (January 2001), the number of Title I schools States have identified for school improvement has grown from 7,616 in 1996–97 to more than 8,800 in 1998–99.

Section 1116(a) establishes the LEA as the key agency for reviewing the academic progress of schools. Each LEA reviews the test results from reading and math tests under section 1111, as well as other measures, to determine whether each school in the LEA is making adequate yearly progress, as defined by the State. The results of this review are then publicized in the community and disseminated to teachers, staff, parents, and students. If a school is making adequate yearly progress, then no further action is required under this section. If, however, the school is not making adequate yearly progress, then a series of steps to improve the quality of the school must be taken.

Under section 1116(b), a school that fails to make adequate yearly progress for one year, or that was in school improvement status under current law prior to the effective date of the No Child Left Behind Act, is designated for school improvement. This changes current law, which requires that school districts identify schools in need of improvement after two years of failing to make adequate yearly progress. Because of the President’s commitment to turn around low performing schools, his proposal changed the timeline so that schools are identified after one year of failing to make progress in order to provide schools at risk of failure with resources

as soon as possible to improve them as quickly as possible. The Committee did not change the timeline in current law for identifying local educational agencies in need of improvement to avoid triggering an entire school district as needing improvement based on one year of data.

Once a school is designated for school improvement, then the LEA is required to provide public school choice (unless affirmatively prohibited by State law) to all students enrolled in the school not later than the first day of the school year following identification. For example, if a school receives its test scores in May of 2002, then when school starts again in August 2002, public school choice would be available. Providing choice at this early stage in the process will enable parents to quickly take steps to improve the quality of their child's education. LEAs are also required to provide transportation costs, to ensure that choice options are truly available to children in the school that is identified for improvement.

Prior to a school's identification for school improvement in section 1116 (b), the LEA is required to give the school an opportunity to review the data on which the proposed identification is based. Then, if the principal or a majority of the parents of students at the school believe the identification is in error, the principal may provide supporting evidence to the LEA, which shall be considered a final determination is made.

In keeping with current law, the Committee has continued and strengthened requirements that schools identified for school improvement develop an action plan not later than three months after they are identified for improvement. The school's action plan, developed in consultation with parents, school staff, and the LEA, is to cover a two year period and include the following: (1) scientifically based research strategies to strengthen the core academic subjects; (2) policies that will be undertaken to ensure that all groups of students will meet the State's proficient level of achievement in 12 years; (3) assurances that the school will reserve at least 10% of Title I funds to provide high quality professional development that directly addresses the academic problems that resulted in the school improvement designation; (4) a specification of how school improvement funds will be used to remove the school from school improvement status; (5) specific annual goals for progress by each subgroup of students; (6) information on how the school will provide notification to parents about the school's identification for improvement; (7) the respective responsibilities of the school, the LEA and the SEA under the plan, including the technical assistance that will be provided; and (8) as appropriate, extended learning time.

For each school identified for school improvement, the LEA has primary responsibility for providing technical assistance as the school develops the school plan and throughout the duration of the plan. In general, the technical assistance shall: (1) be based on scientifically based research; (2) include assistance in analyzing academic assessment data; (3) provide professional development and instructional strategies that are directed at lifting the school out of school improvement; and (4) include assistance in analyzing and revising the school's budget to focus on activities that will help lift the school out of school improvement. While the LEA has primary responsibility for technical assistance, the assistance may also be

provided by the SEA, institutions of higher education, and other public or private entities.

Recognizing that parents play a vital role in the success of schools, the Committee has taken significant steps to empower parents in the school improvement process. Section 1116(b) requires LEAs to provide parents of students in schools identified for school improvement with an explanation of what school improvement means, how the school compares to other schools in the district, the reasons for the school improvement designation, an explanation of what is being done by the school, how the LEA and the SEA will address low academic achievement, an explanation of how parents can help the school improve, and an explanation of a parent's right to transfer their child to another public school, including a public charter school.

Corrective action

Corrective action is reserved for those schools that have been identified for school improvement and which have still failed to make adequate yearly progress after receiving technical assistance for a year. Unlike current law, where "corrective action" describes the most drastic actions an LEA can take to turn around a low performing school, in H.R. 1, corrective action is the second of three levels of options an LEA must take to improve the failing Title I school. Public school choice would continue to be required to be offered pursuant to the school improvement requirement outlined above. Under corrective action, the LEA is required to provide transportation to the students to enable them to attend a better public school, and the LEA may use up to 15 percent of its Title I allocation to offset these costs. If all public schools to which a student may transfer are designated for school improvement, then the LEA shall, to the extent practicable, establish a cooperative agreement with other neighboring local educational agencies for students to attend public schools outside their own LEA. During the year that public school choice is offered, schools identified for school improvement would receive technical assistance throughout the school year, in an effort to improve their academic achievement. If, after receiving technical assistance for that year the school continued to fail to make adequate yearly progress, then at least one corrective action would be required. Corrective action is also required for schools that have been in school improvement for two years, or in corrective action status (under provisions of current law) as of the effective date of the No Child Left Behind Act.

Corrective actions include such measures as: (1) replacing school staff who are relevant to the failure to make progress; (2) implementing a new curriculum and providing appropriate professional development that is based on scientifically based research; (3) significantly decreasing management authority at the school; (4) appointing outside experts to advise the school; (5) extending the school year or school day; or (6) restructuring the internal organization of the school.

As with identification of a school for school improvement, the LEA is required to publish and disseminate to the public and to the parents of each student enrolled at the school, information regarding corrective actions that are being taken against the school. It is the Committee's desire that by empowering parents with informa-

tion on school quality, parents will be in a better position to make decisions about selecting the best possible schools for their children or helping to turn around their children's schools.

Restructuring

Restructuring is the final and strongest remedy for helping turn around low performing schools. This is a new third category of failing schools. Essentially, restructuring is reserved for schools that continue to fail to make adequate yearly progress even after multiple actions have been taken to help them improve. It is triggered if economically disadvantaged students in a school identified for corrective action fail to make statistically significant progress after being in corrective action for one full year. The rationale for only triggering restructuring if a school fails to make adequate yearly progress and disadvantaged student scores fail to increase by a statistically significant amount is to set a higher threshold that schools must meet in order to be identified for the more severe actions required by restructuring. A school identified for restructuring under this criterion is a school that has failed for three consecutive years. There is also a second condition that triggers restructuring. A school that is identified for corrective action and then fails to make adequate yearly progress for *two* additional years, as described in 1116(b)(7)(A)(ii), will be identified for restructuring, even if its economically disadvantaged students are making statistically significant progress. The rationale for this trigger is to ensure that schools in corrective action that continue to fail to make adequate yearly progress are identified for restructuring, even if their disadvantaged students are making some statistically significant progress. A school identified under this criterion is a school that has failed to make adequate yearly progress for four consecutive years.

Under restructuring, public school choice must be provided to all students at the low performing school along with transportation to attend another school; funds must be made available for the purchase of supplemental educational services for economically disadvantaged students enrolled at the low performing school. And, at least one of the following alternative governance arrangements must be implemented, consistent with State law: (1) reopening the school as a public charter school; (2) replacing the principal and all or most of the school staff that are relevant to the school's failure to make adequate yearly progress; (3) arranging for a private management company to operate the school; or (4) turning the operation of the school over to the State, if permitted by State law and agreed to by the State.

Supplemental educational services represent a refreshing approach to the provision of Title I services. For the first time, Title I dollars would follow the child from the low performing school to a private provider of educational services. These services provide an important "safety valve" for students trapped in failing schools. Specifically, under section 1116(d)(1), low income families that have children attending schools designated for restructuring would have the opportunity to select a private provider to provide supplemental educational services to their children. Parents would select from a list of providers that has been approved by the State educational agency. Once the parents select the provider, the parent

then notifies the LEA of their choice, and the LEA then works out an arrangement to pay for the services, as well as develops a statement of specific performance goals for the student, how the student's progress will be measured, and a timetable for improving the student's academic achievement. Up to 40 percent of a school's Title I allocation may be used to provide these services. In addition, an LEA may use Title IV, Part A funds for this purpose and may use up to 15 percent of its Title I allocation for transportation expenses.

Private school choice was included in section 1116(d)(2) in the Committee substitute to H.R. 1 as one of the required restructuring remedies. However, during Committee consideration of H.R. 1, an amendment offered by Rep. George Miller (D-CA) to strike all references to private school choice passed the Committee. The amendment struck private school choice from section 1116(d)(2) relating to students attending low performing schools, from the use of funds for the Title IV, Part A (Innovative Programs block grant), from Title IV, Part C (School Choice Demonstration Research Project), and from Title V, Part A (Safe Schools for the 21st Century), which would have provided private choice to students who have been victims of crime or who have been attending unsafe public schools.

Under restructuring, as with corrective action, if all public schools to which a student may transfer have been identified for school improvement, then the LEA shall, to the extent practicable, work out a cooperative agreement for students to attend schools in neighboring local educational agencies.

Similarly, as with corrective action, local educational agencies are required under restructuring to provide transportation for public school choice and may use up to 15 percent of their Title I funds for transportation expenses.

Duration of Corrective Action and Restructuring

Corrective actions and restructuring measures are no longer required for school improvement schools once the school makes adequate yearly progress for two consecutive years. As a corollary, the school would no longer be identified for school improvement if such progress has occurred. Additionally, if any school identified for corrective action or restructuring fails to make adequate yearly progress, but children from low income families in the school do make statistically significant educational progress for one year, then the LEA shall place the school in corrective action or continue the school in corrective action.

School Improvement and Corrective Action for Local Educational Agencies (LEAs)

Much like the process involved with LEAs overseeing schools identified for school improvement, SEAs are responsible, under section 1116(c), for overseeing LEAs as a whole and identifying whether the LEA shall be designated as in need of improvement and whether corrective actions should be taken.

As collective bargaining agreements expire, the Committee encourages and expects educators and administrators to negotiate new agreements that are consistent with the requirements of section 1116, especially as that section relates to corrective action and restructuring for failing schools.

Just a few years ago the Committee heard from Ms. Alveda King, the niece of the late Dr. Martin Luther King, Jr., and herself a former public and private school teacher, about the importance of parental choice. She said, "It has been demonstrated that when you implement a choice program, . . . that you empower the parents, the system improves, the schools begin to compete, and that hope arises." It is the Committee's hope that these choice provisions, will indeed empower parents and lead to great improvements in low performing Title I schools.

Incentives for Academic Excellence

Under current law, authority is provided in Title I school support teams and the designation and use of "distinguished educators" to help turn around low performing schools. The No Child Left Behind Act maintains these two concepts but improves upon them through the establishment of the Academic Achievement Awards Program in section 1117A. Under the Committee substitute, States may set aside up to 30 percent of any increases in Title I funding to provide cash awards for Title I schools that have significantly closed the achievement gap or that have exceeded their adequate yearly progress goals. Teachers whose students have consistently made gains in academic achievement in the areas in which the teacher provides instruction may also receive cash awards. The Committee believes that such awards and recognition will help to motivate further gains in academic performance and focus our students, teachers, and schools on success.

Local Control and Flexibility

H.R. 1 significantly expands the existing flexibility in Title I at the local level. The flexibility accorded schools which utilize a schoolwide approach (whereby a school is able to consolidate several different federal education program funds with State and local resources to serve all students at the school) is strengthened by the lowering of the schoolwide poverty eligibility threshold from 50 percent to 40 percent. Section 1114, which provides this authority, will enable more schools to consider utilizing this approach to serve Title I students. Given the growing popularity of the schoolwide approach (over 80 percent of schools eligible to implement a schoolwide program actually utilize such an approach) it can be expected that even more schools will take advantage of this opportunity. Since 1995, the number of schools implementing schoolwide programs has more than tripled, from about 5,000 to approximately 19,227. An explanation of schoolwide programs can be found under the heading of this report entitled "Schoolwide Programs."

Another area where flexibility is maintained is in how a school district or school uses Title I resources. Under current law, Title I funds may be used to employ teachers and teachers' aides, purchase supplemental reading and math instructional services from a third party contractor, purchase computers, conduct professional development activities, and other uses. This flexibility in the use of funds is preserved in H.R. 1.

The Committee would also note that for States that have become Ed-Flex States under the Education Flexibility Partnership Act (P. L. 106-25) or its predecessor, the Education Flexibility Partnership Demonstration Act, waivers may be obtained for many of the provi-

sions of Title I. Ed-Flex recognizes that there may not be one single best way to operate a federal education program. Texas and Maryland, in particular, are two States that have utilized Ed-Flex authority to allow more schools to participate in schoolwide projects and to better target Title I funds to the lowest achieving students. Such waivers as well as waivers under the Secretary's waiver authority in Title VIII of H.R. 1 would remain available to States and school districts under the bill.

Limitations Upon State and Local Administrative Funds

Under current law, States are permitted to set-aside one percent of the Title I funds received under Parts A, C and D by the State for State administrative expenses. The No Child Left Behind Act would allow States to reserve an amount equal to the greater of one percent of the amount it received for such parts in fiscal year 2001, or \$400,000, including any additional funds the State might receive under a separate line item authorization provided in section 1002(i)(2).

A large portion of these federal funds have been used in the past to finance up to 80 percent of the operating expenses of some State educational agencies. While some States have reduced the relative share of federal funds used for this purpose, the Committee believes that at a maximum, no more than 50 percent of the State educational agency's operating expenses should be derived from Title I administrative funds. Section 1002(i)(3) of the No Child Left Behind Act would limit the federal share to no more than State educational agency's share of operating expenses.

At the school district level, no limit is currently placed on the amount that can be used for administrative expenses. The Department of Education's Study of Education Resources and Federal Funding: Preliminary Report, issued in June 1999, shows that about eight percent of Title I funds at the school district level are spent on administrative costs. According to the study, this percentage is greater than any other federal elementary and secondary education formula grant program except the Safe and Drug-Free Schools program. In keeping with the Committee's continuing emphasis upon sending more dollars directly into the classroom, the Committee has limited Title I administrative costs at the school district level to no more than four percent of the district's Title I allocation. This limitation is found in section 1804 of the bill. The Committee has further required, in section 1804, the Secretary of Education to develop a definition of administrative expenses in consultation with others.

Scientifically Based Research

Consistent with the Reading First Act in Part B of Title I, the Committee believes that Title I programs—whether utilizing the schoolwide approach or the targeted approach—should be based on sound scientifically-based research. Dr. Reid Lyon of the National Institute of Child Health and Development (NICHD) in testimony before the full Committee on July 27, 1999, noted that many educationally disadvantaged students continue to fail at mastering reading because the methods of instruction—though touted as “research-based”—are not of the quality and rigor that they should be

in order to bring about improvements in reading achievement. He said,

[G]iven that the term “research-based” implies that the reading programs or approaches have been objectively evaluated to determine for which children the programs are most appropriate, why do so many disadvantaged children continue to founder in reading? One major reason is that the term “research-based” currently means many things to many people, with significant variations in the scientific quality of the research described by the use of the term. For example, some instructional reading programs touted as “research-based” may be based upon mediocre and substantially flawed scientific studies, while other instructional programs are based on studies that meet rigorous scientific criteria for research quality. The problem is that many in the field of education do not recognize the difference. To date, adherence to scientific quality and criteria has not been a strong guiding force in selecting and implementing instructional reading programs and approaches for children eligible for Title I services.

To address this shortcoming, the Committee has included language in the bill, which ensures that the instructional strategies used to provide Title I supplemental educational services must be of high quality and based on scientifically based research. This means the instructional strategies must have resulted from the application of rigorous, systematic, and objective procedures; must employ systematic empirical methods that draw on observation or experiment; involve rigorous data analyses; rely upon measurements or observational methods that provide valid data across evaluators and observers and across multiple measurements and observations; and have been accepted by a peer-reviewed journal or approved by a panel of independent experts through a comparably rigorous, objective, and scientific review.

Empowering Parents

For several years Title I has actively engaged parents in the education of their children through such things as parental compacts and formal parental involvement policies. School-parent compacts, which are developed by parents and school officials, typically outline how parents, the school staff and students will share the responsibility for improving student achievement at the school. Such agreements also serve as the means by which the school and parents build and develop working partnerships to help children achieve to the advanced and proficient levels on a State’s assessments.

Section 1118 would generally continue the existing approach of parental involvement as outlined above, but in a more streamlined fashion. However, the Committee wishes to note that there are several other new provisions in H.R. 1, which would put more power in the hands of parents. As mentioned earlier in this report, some of the most significant parental empowerment provisions in the No Child Left Behind Act are the public school choice options. School districts may use up to 15 percent of Title I funds for transportation in the optional school choice program authorized by Section

1115A. Under current law school districts may not use Title I funds for transportation. Additional school choice options are further described in the portion of this report that addresses academic accountability under Section 1116.

Teachers, Paraprofessionals, and Professional Development

The Title I Follow-Up School Survey (Washington, DC: U.S. Department of Education, 1998) found that approximately 74,600 full time teachers were funded under Title I during the 1997–98 school year, a level that has remained fairly consistent over the past 20 years.

Given that up to half of Title I funds go toward teachers, the Committee has been keenly interested in the quality of these teachers. The U.S. Department of Education's 1999 Study of Education Resources and Federal Funding, showed that in fact all Title I teachers possess a Bachelor's degree, while half have a Master's degree—reflecting the average educational attainment of teachers nationwide. However, while it is known that nationwide, 44 percent of middle schools teacher majored in an academic field, there is not reliable data on the percentage of Title I teachers with a major in an academic field. *Teacher Quality: A Report on the Preparation and Qualifications of Public School Teachers*, January 1999, National Center for Education Statistics.

Although not specifically dealing with Title I teachers, a report by the Education Trust entitled *Good Teaching Matters*, Vol. 3, Issue 2, "Thinking K–16" A publication of the Education Trust," provides data compiled by Richard Ingersoll, a professor at the University of Georgia on the quality of teachers in poor schools. Specifically, he found that while only 15 percent of classes in low poverty schools are taught by teachers lacking a major in their field, fully 25 percent of classes in high poverty schools are taught by such teachers. As the report notes, "the very youngsters who are most dependent on their teachers for content knowledge are systematically taught by teachers with the least content knowledge."

The United States Department of Education's 1999 National Assessment of Title I noted teacher quality as one of the challenges continuing to face Title I.

Along with the evidence that high-achieving high-poverty schools focus attention on challenging standards for all students, comes the reality that many teachers are not prepared to teach to challenging standards. In a 1998 survey, only about one-third of teachers in schools with 60 percent or more poor children believe they are well-equipped to use standards in the classroom. This is particularly noteworthy given evidence that teachers' reported preparedness in both subject matter and instructional strategies had a positive relationship with student gains.

It is the strongly held view of the Committee that each and every teacher hired using these funds be fully qualified to teach. In a series of hearings held over the past three years, the Committee has been provided the most recent findings on the difference that a qualified teacher can make in the academic lives of students.

Given the importance of teacher quality, and the high proportion of federal education dollars used to fund teachers, the No Child

Left Behind Act includes language to ensure that at a minimum, all teachers hired under Title I will meet the teaching requirements within the State they are teaching. Each State receiving Title I dollars will have to have a plan in place to ensure that all teachers are fully qualified not later than December 31, 2005. States will also have to report their progress and the agency's and schools performance in increasing the percentage of classes in core academic areas taught by fully qualified teachers. This not only raises the bar for teachers teaching under Title I, it also represents a signal to school administrators that every effort should be made to avoid assigning a teacher to a class in which the teacher has no academic subject knowledge.

The Committee believes the combination of these minimum education levels, along with the increased information provided to the parents of students being taught by unqualified or underqualified teachers, will have a significant and lasting impact on the quality of instruction under Title I and an increased level of academic achievement among students in Title I schools.

H.R. 1 also incorporates language that requires States to plan for how they will ensure all teachers in the State meet their minimum certification or licensure requirements and will be proficient in the academic subjects in which they teach.

Paraprofessionals

Teacher aides, otherwise referred to as paraprofessionals, have been a fixture of Title I since its inception. In a report prepared for the National Education Association, Paraprofessionals in the Education Workforce, 1995, Anna Lou Pickett, referring to such programs as Title I and Head Start, noted "federal legislation in the 1960's and 70's designed to carry out the War on Poverty provided significant impetus and support for the employment of paraprofessionals."

Given this historical perspective, it may not be surprising that nearly 40 years later, some leading education experts, including those within the U.S. Department of Education, are beginning to openly question whether the use of Title I aides has amounted to simply a jobs program for those within the community. This view is supported by the fact that the use of paraprofessionals is often far greater in urban, and other traditionally higher unemployment, areas.

A Los Angeles Times article ("Title I's \$118 Billion Fails to Close Gap," 1/17/99) highlighted some of the concerns related to the use of paraprofessionals under Title I.

[P]art of the problem, according to high-ranking education officials and other experts, is that schools squander Title I funds on clerical workers and classroom aides who lack the expertise to teach poor students the kind of high-level skills needed to compete with their more affluent peers.

It's pretty significant that half of the instructional staff under Title I were paraprofessionals," said Val Plisko, who supervises independent evaluations for the Education Department's Planning and Evaluation Service. "For children who are most at risk, you want the best-educated, the most knowledgeable, the most effective teachers.

The 1999 National Assessment of Title I noted that there has been a growth of paraprofessionals since 1993, from 65,000 full-time aides to 76,900 in 1997–98. (52,000 of these aides in 1997–98 were in high-poverty schools). It is estimated that up to 25 percent of all Title I funds are used to hire paraprofessionals. “In California, the latest available figures indicate that the ratio of aides to teachers paid for by Title I funds is 4 to 1. At Los Angeles Unified, the nation’s second largest school district, the ratio is about 7 to 1.” (1/17/99 Los Angeles Times)

Nevertheless, some educators see significant value in the use of Title I funds for paraprofessionals when they are properly trained, and utilized effectively by a qualified teacher. However, there is growing evidence that the roles and responsibilities given to paraprofessionals by both teachers and principals, has gone beyond the original intent. Too often paraprofessionals are asked to carry out duties for which they are not qualified.

Currently, under ESEA, paraprofessionals employed with Title I funds must meet three criteria: have the knowledge and skills necessary to assist Title I children in meeting education goals; be within two years of having a diploma or GED (except that paraprofessionals acting as translators have no such requirement); and be under the direct supervision of a teacher.

In fact, most paraprofessionals meet the minimum education requirements under current law. According to the 1999 National Assessment of Title I, 99 percent of paraprofessionals have a high school diploma or GED. However, the educational attainment of paraprofessionals in high-poverty schools is often far below that of their peers in low-poverty schools. Specifically, while 37 percent of paraprofessionals in low-poverty schools have a bachelors’ degree, only ten percent of those in high-poverty Title I schools have a bachelors’ degree. Similarly, while 86 percent of teacher aides in low-poverty schools at the secondary level have a bachelors’ degree, just four percent of their counterparts in high-poverty schools have a bachelor’s degree.

If paraprofessionals were strictly carrying out non-instructional duties, the fact that many have a minimum level of education would not pose a significant problem. However, as noted in the 1999 National Assessment of Title I prepared by the U.S. Department of Education, paraprofessionals under Title I “spend a majority of their time teaching despite their lack of the educational background to do so.” Providing detail as to the extent of this problem, the Assessment noted the following findings: 98 percent of aides were either teaching or helping to teach students; 76 percent of aides spent at least some of this time teaching on their own, without a teacher present; and 46 percent of aides in high-poverty schools spent half or more of this time on their own, without a teacher present.

Given that Title I students are being extensively exposed to paraprofessionals, (often without the direct supervision of a teacher), the Committee is concerned with growing evidence that such trends may be having a negative impact upon student achievement. An article in the *The New Republic* (“The Trouble with Teacher’s Aides,” August 9, 1999) indicated that “A recent Department of Education reanalysis of Title I data from the late ’80s found ‘no positive impact’ for students in classes with teacher aides.”

A press release issued by the Educational Research Service in April 1999, entitled the Unexpected Lessons from the Tennessee Project Star Study provided further evidence of the impact paraprofessionals may have upon student achievement. The study found that classes of 25 students with a full-time teacher aide did not improve student achievement in grades K–3 in reading or math.

In response to these and other concerns over the use of paraprofessionals, the No Child Left Behind Act of 2001 includes provisions to raise the educational level of paraprofessionals and to ensure they are provided with appropriate responsibilities.

First, the language sets a higher threshold of qualifications for paraprofessionals, surpassing that of simply a high school diploma or its equivalent. Specifically, it requires paraprofessionals to have completed either two years of college, an associate's degree, or met a rigorous standard of quality through a formal assessment, have knowledge of and the ability to instruct in reading, writing, or math, or reading readiness, writing readiness, or math readiness. The Committee emphasizes that such assessment shall not simply be met by receipt of a high school degree, or its equivalent.

Secondly, the language sets clear guidelines for duties that paraprofessionals may carry out. The Committee believes that if paraprofessionals are hired under Title I, they should not simply serve in an administrative or child-supervisory capacity. Instead, paraprofessionals should, when qualified, assist primarily in providing instructional services to students. The Committee emphasizes language included under the Act which prohibits paraprofessionals from providing instruction if not working under the direct supervision of a fully qualified teacher. The language goes further with respect to instructional services in the area of reading, a subject in which 88 percent of paraprofessionals assist in providing instruction. Specifically, paraprofessionals may not provide instructional services to students in the area of reading unless the paraprofessional has demonstrated, through a State or local assessment, the ability to effectively carry out instruction in reading, writing, and math. This provision comes amid a growing consensus of the importance that students receive instruction founded upon scientifically based research and from fully qualified teachers.

It is the intent of the Committee that the SEA carefully monitor the quality of the local formal assessment of paraprofessionals to ensure that the assessments are rigorous. The Committee intends that only qualified teachers provide instructional services to Title I students and that instructional services provided by paraprofessionals be restricted to one-on-one tutoring that reinforces and supports the instruction provided by the teacher.

The Committee notes language that has been added to the No Child Left Behind Act prohibiting the Secretary from imposing any mandatory national certification of paraprofessionals.

Finally, in an attempt to stem the continued growth of paraprofessionals hired under Title I, the provisions include a freeze on the hiring of paraprofessionals. The language does however, allow for vacancies created by departing paraprofessionals to be filled. The intent of the Committee is that local educational agencies could fill vacancies caused by the departure of a paraprofessional from a school, but would not be allowed to create "new" vacancies

which would result in an increase in the number of paraprofessionals above what existed before departures. The Act provides an exception to this hiring freeze if the local educational agency is able to demonstrate that all teachers within the local educational agency are fully qualified. In any event, this exception does not waive the minimum qualifications paraprofessionals must meet, as described above and under subsections (b) and (c) of section 1119.

The Committee believes that these provisions, along with the increased information on the quality of paraprofessionals provided through report cards under this Act, will significantly increase the quality of paraprofessionals within Title I schools. During the course of the next several years, the Committee intends to continue to closely examine the role of paraprofessionals to determine if further changes to Title I need to be made in this area.

Professional Development

The Study of Education Resources and Federal Funding 2000 found that for the 1997–98 school year, Title I expenditures on professional development at the district and school levels amounted to \$212 million, 27 percent of all federally funded expenditures for professional development. The study noted that use of Title I funds for professional development was widespread, with 86 percent of district coordinators reporting using at least some portion of their Title I funds for this purpose.

Although widespread, the intensity of professional development provided to Title I teachers appears to be limited. The 1999 National Assessment of Title I found that “55 percent of teachers in high-poverty schools reported spending less than nine hours per year on training in the content areas. Moreover, 70 percent of teachers in high-poverty schools report receiving less than nine hours per year of professional development related to State or district curriculum and performance standards . . .”

With the focus on teacher quality and the increased attention on ensuring fully qualified teachers in every classroom, it can be expected that professional development will constitute a growing proportion of the use of Title I funds in the coming years. In anticipation of this growth, the No Child Left Behind Act of 2001 builds upon current Title I provisions to ensure that professional development under Title I is worthwhile.

The No Child Left Behind Act of 2001 builds upon research that has been proven to have the common characteristics of effective professional development. This research is discussed in detail under the section of this report on Title II. Specifically, under Section 1119A and also under Title II, professional development must: (1) support professional development activities that give teachers, principals, and administrators the knowledge and skills to provide students with opportunity to meet challenging State content standards and student achievement standards; (2) support the recruiting, hiring, and training of fully qualified teachers, including teachers fully qualified through State and local alternative routes; (3) advance teacher understanding of effective instructional strategies based on scientifically based research for improving student achievement; (4) be directly related to the curriculum and content areas in which the teacher provides instruction; (5) be designed to enhance the ability of a teacher to understand and use the State’s

standards for the subject area in which the teacher provides instruction; (6) be tied to scientifically based research demonstrating the effectiveness of such professional development activities or programs in increasing student achievement; (7) be of sufficient intensity and duration (not to include one-day or short-term workshops and conferences) to have a positive and lasting impact; (8) be developed with extensive participation of teachers, principals, parents, and administrators; (9) be designed to give teachers of limited English proficient children the knowledge and skills to provide instruction and appropriate language and academic support services to such children; (10) to the extent appropriate, provide training for teachers and principals in the use of technology; (11) be regularly evaluated for their impact on increased teacher effectiveness and improved student achievement.

With respect to the requirement that the activity “be of sufficient intensity and duration (not to include one-day or short-term workshops and conferences) to have a positive and lasting impact,” the Committee notes that exceptions may be provided if such single activity is a component of a long-term comprehensive professional development plan established by the teacher and the teachers’ supervisor based upon an assessment of their needs, their students’ needs, and the needs of the local educational agency. This provision is based upon the National Eisenhower evaluation which found that traditional types of professional development (such as conferences), are less likely to be associated with positive teacher outcomes, unless they occur over a long time span and involve a significant number of hours.

The Committee believes that with the focus on quality under both Title II of ESEA and the changes made under this Act to Title I, teachers will have the opportunity to participate in high level programs that have a direct impact in not only raising their own skills but also translating those skills into gains in academic achievement of their students.

Participation of Children Enrolled in Private Schools

In general, under current law Title I services are provided to eligible private school children directly by the local educational agency or through a third party contract with the school district. As a part of the process, the local educational agency is required to provide timely and meaningful consultation with private school officials on how the needs of private school children will be identified, what kinds of Title I services will be offered, how and where the services will be provided, how the services will be assessed, the size and scope of the services, and the proportion of funds allocated.

The 1998 Department of Education publication Title I Services for Private School Students under the Reauthorization of ESEA: A Snapshot of Federal Assistance in Transition indicates that there is serious disagreement among public, private, and religious school representatives on the extent to which Title I consultations have been meaningful and timely. Catholic school officials have informed the Committee that in some areas of the country, local educational agencies provide little or no consultation with private school officials, and where consultation does occur, it can hardly be considered meaningful. In written testimony submitted to the Committee on Education and the Workforce on June 10, 1999, Mr. John R.

Clark, Assistant Superintendent for the Diocese of Allentown Pennsylvania and Chairman of the United States Catholic Conference Federal Assistance Advisory Commission told how public and private school officials developed and implemented a specific signoff form by both parties as to the issues on which consultation takes place. This approach has worked well in Pennsylvania and the Committee encourages school districts to consider such an approach.

The Committee has included language in Section 1120(b), which tightens the requirements for “timely and meaningful consultation.” Under H.R. 1, the local educational agency must consult with private school officials not only on how and where the services will be provided, as under current law, but they must also consult on the selection of the contractor that provides the services, in situations where contractors are utilized. In addition, the local educational agency must tell how the Title I services will be assessed, and how the results of that assessment will be used to improve the services to private school children. The consultations must involve not only meetings prior to the school district making a decision on the services, but also throughout the implementation and assessment of the services. Such measures will help ensure that high quality services are provided to private school children. The requirement that the services be assessed and that the district use the results to improve the services should help guard against private schools receiving poor quality services, and having no recourse. The Committee is aware of a situation in Compton, California where several years ago private schools had no choice but to continue to tolerate ineffective and poor quality services for an extended time, prior to the U.S. Department of Education reviewing the situation. Such situations should be less likely with these new provisions in place.

H.R. 1 also provides a phase out over a two year period of the capital expense account for private schools, which had been used to offset the costs, for example, of renting space in “neutral” sites to deliver instruction. With the June 23, 1997 United States Supreme Court decision in *Agostini v. Felton* (521 U.S. 203 (1997)), such rentals are no longer essential to meeting federal constitutional requirements. In *Agostini*, the court abandoned the presumption that placing public employees within religious institutions inevitably leads to either indoctrination, excessive entanglement, or a symbolic union between government and religion. However, the Committee is informed that in some school districts, long-term contracts for the rental of neutral sites for the provision of services continue to exist, and in an effort to address such situations, the Committee has chosen to continue the authorization for capital expenses but only for a two-year period, through 2003.

Title I, Part A Allocation Formulas

H.R. 1 makes minor changes to the Title I Part A formula because the Committee believes that the significant changes made to the formula in the 1994 amendments have not been implemented due to extraordinary hold harmless provisions and lack of funding for the Targeted Grant formula since FY1995. In an effort to break that trend, the Committee has made a change in how new funds are to be distributed which is described below. The Committee is

hopeful that the Appropriations Committees will abide by the authorizing statute so that Title I funds can be distributed to those areas where the most disadvantaged children live so those children who need these educational services the most can receive them.

With respect to the share of Part A funds to be allocated under each of the authorized formulas—Basic, Concentration, and Targeted Grants—the bill provides that an amount equal to the FY 2001 appropriation will be allocated under the Basic and Concentration Grant formulas (and in the same proportions as for FY 2001—85 percent Basic Grants and 15 percent Concentration Grants). Next, any increases in funds over the FY 2001 appropriation for Part A will be allocated under the Targeted Grant formula.

The major provisions of the Basic, Concentration, and Targeted Grant formulas in H.R. 1 are generally the same as under current law. However, the bill does make the following modifications to the current provisions of these formulas. First, a hold harmless rate, of 85 percent of previous year grants, will be applied to Concentration Grants. Currently, the ESEA provides a hold harmless rate of 85–95 percent of previous year grants for Basic and Targeted Grants, but no hold harmless for Concentration Grants. In addition, for the Concentration Grant formula only, H.R. 1 provides that hold harmless amounts would apply to all local educational agencies, including those which do not meet “primary eligibility criteria”—i.e., the 6,500 or 15 percent thresholds for receipt of Concentration Grants; however, this provision would no longer apply if a local educational agency does not meet the eligibility thresholds for four consecutive years.

Third, the expenditure factor used in all of the Title I allocation formulas will be increased for Puerto Rico in stages over the FY 2002–2005 period. As a result, at the end of this period, the Puerto Rico expenditure factor will be at least 85 percent of the minimum expenditure factor applicable to the 50 States and the District of Columbia (for FY 2001, it is 75.1 percent of this minimum). However, this provision will not be implemented if it would result in any State receiving less than its previous year grant under Part A.

Fourth, the bill eliminates a number of provisions that were in effect only for past years and are no longer relevant. Further, some provisions are simplified, updated, and/or clarified, with no substantive amendment.

H.R. 1 deletes provisions for the fourth Title I, Part A allocation formula which is currently authorized, although no funding is provided for it—the Education Finance Incentive Grant formula. It also deletes the current provision for the reservation of \$5 million each year for grants to the freely associated States (Palau, Federated States of Micronesia, and the Republic of the Marshall Islands), which are no longer U.S. territories, replacing it, through 2003 only, with a requirement for a similar amount of each year’s Part A grant to be distributed through a competition among these areas as well as other outlying areas. However, the Committee wants to make clear that the outlying areas (U.S. Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Marianas) will receive their full allotment under the one percent reservation and do not have to compete for their share. The outlying areas, however, are eligible to compete for additional funds under the competition described above.

TITLE I, PART B—READING FIRST; EARLY READING FIRST; EVEN START
AND THE INEXPENSIVE BOOK DISTRIBUTION PROGRAM

Background

Reading First and Early Reading First will provide assistance to States and local educational agencies in establishing reading programs for students in grades kindergarten through 3 that have the highest number of students who cannot read, on the latest scientific research in reading instruction. Funds will be used for professional development, diagnostic assessments, and instructional materials to effectively teach the essential components of reading instruction in the classroom. Students who can read fluently are more likely to develop a lifelong love of books, and be successful in school.

The Reading Deficit

In April of 2001 the National Assessment of Educational Progress (NAEP) statistics once again sounded out the alarm: “63 percent of African Americans, 58 percent of Hispanic Americans, 60 percent of children living in poverty, and 47 percent of children in urban schools scored ‘below basic’ in reading.” There are many adults who have already been left behind as reported by the National Adult Literacy Survey which found that nearly one half of the American population have some significant limitation in their reading skills.

Americans have almost become numb to such startling statistics. How can it be that a nation that has such vast financial resources dedicated to educating its children could allow so many to be left behind because they have not learned to read? At the dawn of the 21st century, with technology available for instant global communication, why are so many children not mastering a skill as basic as reading?

This issue is not new to the body politic. For the last third of the 20th century billions of dollars were appropriated by Congress to improve reading instruction. It is estimated that nearly three quarters of the \$130 billion of Title I funds have been used to attempt to improve reading instruction, and yet student’s reading scores have remained flat since 1972 when the NAEP began collecting such statistics.

The private sector pumps millions of dollars into communities to encourage reading through programs like Book It!, sponsored by Pizza Hut, and HOSTS, designed to offer one-on-one tutoring in reading to struggling students. For example HOSTS encourages parental involvement in reading with their children, and their programs have dramatically improved students’ reading levels. There are many other dedicated Americans who help adults in organizations like Literacy Volunteers of America, Laubach Literacy, and scores of other private sector programs and corporations which seek to do the same. Yet, even with all this attention to reading, the problem of illiteracy worsens every year. The Committee recognizes that the love of books and the wealth of information that can be found in community and school libraries can only be accessed when children learn to read with fluency and ease. Providing books to children from disadvantaged backgrounds through early learning and child-care programs, preschools, Head Start Centers and

throughout a student's school years by including interesting books to read as part of the instructional materials available to them, will help them establish a solid foundation for formal reading instruction.

Reading First and Early Reading First

Under H.R. 1, 80 percent of the funds under Reading First will be allocated to States in five-year grants. There is a limitation that funds be allocated to areas where there are the highest percentages of children in kindergarten through grade three who are reading below grade level or whose families have incomes below the poverty line; or which have been designated an empowerment zone or enterprise community; or which have schools in school improvement (section 1203(c)(4)). Twenty percent of the funds are awarded to States as competitive grants that will be available to schools that have made the most progress in reducing the number of students who can't read proficiently (section 1205).

A peer review panel as defined in section 1204(c)(2) will review all grants submitted by States to determine whether their professional development programs, diagnostic assessment and screening tools, and instructional materials meet the standards of scientifically based reading research and include all the essential components of reading instruction. The Panel will submit its recommendations to the Secretary for his consideration.

States will submit annual progress reports to the Secretary to identify those schools and local educational agencies that report the largest gains in reading achievement, based on valid assessments of reading proficiency. The essential components of reading instruction, defined in section 1209(2), can be taught in many diverse ways, but to become successful readers, students need to be taught each component effectively.

Reading First is Grounded on Nearly a Half Century of Reading Research

There are at least six major research reports on reading instruction that have been funded and released by the federal government over the past two decades. These reports cite findings on which researchers have reached consensus. 1985—*Becoming A Nation of Readers*; 1990—*Beginning to Read: Thinking and Learning About Print*; 1998—*Reading: A Research-Based Approach* (National Institute For Child Health and Human Development); 1998—*Preventing Reading Difficulties in Young Children* (National Research Council); 1998—*Every Child Reading: An Action Plan of the Learning First Alliance*. The findings of these reports come from quantitative, scientifically based reading research as defined in section 1209(6), and represent a consensus on the essential components of reading instruction.

2000—Report of the National Reading Panel

The National Reading Panel staff reviewed more than 100,000 research studies on reading since 1966, from which the panel identified 6007 that were scientifically valid. The findings of a careful analysis of those studies indicated that the following five instructional components are essential for effective reading instruction: phonemic awareness; systematic phonics instruction; oral reading for fluency; vocabulary development; and comprehension strategies.

Listed below are the essential components of reading instruction as defined in section 1209(2), and identified as such by the National Reading Panel and upon which the Reading First and Early Reading First programs are based.

Phonemic Awareness

Correlated studies have identified phonemic awareness, as one of the best predictors of how well children will learn to read during the first two years of instruction. Results of experimental studies led the Panel to conclude “phonemic awareness training was the cause of improvement in students’ phonemic awareness, reading, and spelling following training.”

Systematic Phonics Instruction

The Panel reaffirmed previous findings: “Systematic phonics instruction produces significant benefits for students in kindergarten through sixth grade and for children having difficulty learning to read. The ability to read and spell words was enhanced in kindergartners who received systematic beginning phonics instruction. First graders who were taught phonics skills systematically were better able to decode and spell, and they showed significant improvement in their ability to comprehend text.”

Oral Reading to Build Fluency

The Panel found that, “fluent readers are able to read orally with speed, accuracy, and proper expression. Oral reading fluency is another critical factor necessary for reading comprehension.”

Vocabulary Development

The Panel found that “vocabulary should be taught both directly and indirectly. Repetition and multiple exposures to vocabulary items are important. Learning in rich contexts, incidental learning, and use of computer technology all enhance the acquisition of vocabulary.”

Comprehension

The Panel identified three prominent research themes on the development of reading comprehension skills: “comprehension is a complex skill that depends on vocabulary development; it is an active process that requires intentional and thoughtful interaction between text and reader; and teacher preparation is intimately linked to students’ achievement in comprehension.”

The Research is Conclusive

Although knowledge will continue to expand, we now have enough information to help almost all children learn to read, write, speak, and spell accurately and fluently. Dr. Benita Blachman (1996) in a chapter, “Preventing Early Reading Failure,” in *Learning Disability: Lifelong Issues*, explains: “The good news is that there have been scientific breakthroughs in our knowledge about the development of literacy. Direct, systematic instruction about the alphabetic code is not routinely provided in kindergarten and first grade, despite the fact that, given what we know at the moment, this might be our most powerful weapon in the fight against illiteracy.”

Common Beliefs Not Supported by Scientifically Based Reading Research

Dr. Louisa Moats has succinctly outlined some of the most prevalent principles that are fundamental to whole language or balanced instruction in reading in: *Whole Language Lives On: The Illusion of "Balanced" Reading Instruction*. "Learning to read is not natural. The alphabetic principle is not learned simply from exposure to print. Context is not the primary factor in word recognition." Instructional materials or tutorial programs that persist in including these unproven practices should not be eligible for funding under the Reading First or Early Reading First programs.

Professional Development and Instructional Materials

In section 1203(8)(d)(1) States may use up to 15 percent of their formula grant funds for professional development. To eliminate the reading deficit, these findings need to become a part of routine elementary teacher pre-service education and in-service professional development. For this reason, the Committee has structured the Reading First and Early Reading First programs to provide both of these opportunities, at the State level, for reading teachers to become informed on how to teach the essential components of reading instruction. States like California, Texas, Georgia and Virginia have already developed excellent programs for reading teachers. There are summer institutes such as the Greenwood Institute in Putney, Vermont, where teachers can gain the knowledge of reading instruction that is based on the latest research. The most important objective is to provide reading teachers with the background in the alphabetic principle that is fundamental to the English language, and how to teach that principle to beginning readers.

Instructional materials may be purchased under section 1203(c)(7)(A)(ii) and are critical to the success of Reading First. It is important that instructional programs include all the essential components of reading instruction. Some students need intensive instruction to learn decoding skills; others may come to school with these skills already mastered. Still other students may have a deficiency in spoken vocabulary, or lack the ability to read fluently. Care should be taken to review text materials to make sure that the approach to reading instruction is based on the latest valid, scientific research in reading instruction.

Diagnosing and Measuring Student Progress in Reading

It is the Committee's view that objective diagnosis and measurement of student progress in the essential elements of reading instruction is necessary, but the determination of what assessment instruments to use should be left to States and local schools. Most research based reading instruction already includes regular assessment instruments to measure student progress in improving their reading skills. Funds to purchase rigorous diagnostic reading and screening assessment tools in section 1203(c)(7)(A)(i) are included in Reading First Grants because the Committee believes that without an accurate diagnosis and assessment of a student there is no way to determine what skills are missing and still need to be taught, and when a student has gained the ability to read independently, fluently, and with comprehension.

Limited English Proficient Students Learn to Read

At a field hearing in Bradenton, Florida, the Committee heard from Bertha Zapata, a reading teacher in Broward Elementary School, Tampa, Florida. Most students in her class speak little or no English and the majority are Hispanic and Asian. By the end of one year, the majority of her students are speaking, reading and writing English. Ms. Zapata told the Committee: "It is not magic. It is not because all these children are extremely bright, though many of them are. It is because the method that I have been using to teach non-English speaking children since 1994 incorporates the essential components of reading instruction to help them become accurate spellers, fluent readers, and accomplished writers."

In a letter to the Committee a first grade bilingual teacher wrote: "I teach first grade in San Jacinto Elementary school. I have 45 students in my class, few of the parents of these children speak English, and one third of them have at least one parent in jail. I teach entirely in English. I began supplementing my regular classroom curriculum with a book I got from the library titled Phonics Pathways, and after only four months all of my first-graders read at grade level." This story is repeated over and over in schools all across America.

Specific Learning Disabilities

It is estimated that effective reading instruction, that includes the essential components of reading instruction, could prevent as many as 70 percent, or more than 1.5 million students, from developing a severe reading disability and therefore having to be identified as learning disabled (section 1203(c)(7)(ii)(II)(cc) under the Individuals with Disabilities Education Act (IDEA). This kind of remarkable success has been documented in research projects conducted over the past thirty years and funded by the federal government. The Committee notes that some children may need eye screening or eyeglasses to make sure students have no physiological impediment to learning to read.

External Evaluation of Reading First

The Committee believes that it is essential that an external evaluation of the Reading First program be conducted. Objectivity is often lost when agencies evaluate the programs they administer. The Committee believes that the ability to reform or modify federal programs is most effectively done when an external evaluation is conducted. The Reading First program gives the Secretary of Education the funds and the authority to order this External Evaluation of Reading First in section 1206. The cost and effort required to conduct this review is substantial, but its results would offer the Congress a roadmap for continuing or revising or changing these vital programs for the better in the future.

Early Reading First Develops Important Pre-Reading Skills

The purpose of subpart 2 is to improve pre-reading skills in children ages 3 through 5, particularly children from low income families, in high-quality oral language and literature-rich environments. Through scientific research, much has been learned about the way children learn to read, and the strong foundation that is important before children are given formal reading instruction in

kindergarten and first grade. Child-care centers, public and private, and Head Start centers can help. In addition to caring for the emotional and social needs of children under their care, they can encourage and promote cognitive development activities along with professional development for teachers and staff based on scientific research in reading.

Children who have poor beginning reading skills are less likely to develop better reading skills through their school careers. Early Reading First is specifically designed to help them reverse that trend. There are several generalizations about reading instruction that should be taken into account by pre-school and child-care teachers. For example, if children can correctly identify letters of the alphabet before they enter kindergarten, it is more likely they will learn to read words in school faster than children who do not possess this knowledge. Experimental findings consistently confirm that children's knowledge of the alphabet is a "strong predictor" of their later progress in learning to read words accurately, quickly and automatically. Professional development and instructional activities should include an understanding of semiotic concepts, a term to describe the general theory of signs and symbols that represent written language, comprised of syntactics, semantics and pragmatics.

One of the optional uses of funds, section 1222(e)(2) in the Early Reading First initiative, is to provide access to scientific, research-based screening tools. One such screening tool is the National Center for Learning Disabilities Get Ready to Read! early literacy program. This allows teachers to screen four-year-olds to determine their familiarity with pre-reading concepts and provide parents, early childhood teachers and caregivers with research-based information about how to build young children's pre-reading skills.

William F. Goodling Even Start Family Literacy Programs

The Even Start Program has been transferred and re-designated under Title I, Part B, subpart 3. H.R. 1 extends and modifies the Even Start Family Literacy Programs until 2006 to reflect the ESEA authorization cycle. During the 106th Congress the Literacy Involves Families Together Act was enacted into law. Family literacy maintains its place as an important tool for educators and parents to utilize in ensuring children and families are able to read. The National Center for Family Literacy continues to provide quality assistance to school districts requesting such services.

Inexpensive Book Distribution Program

The Inexpensive Book Distribution Program is operated under a single, noncompetitive award to Reading is Fundamental, Inc. (RIF). It supports, through subcontracts, local private nonprofit groups or organizations, or public agencies that distribute inexpensive books to children with the objective of motivating children to read. Federal funds pay for up to 75 percent of the cost of books, except that the federal share for programs serving children of migrant and seasonal farm workers is 100 percent. Contractors are to give priority to programs that serve a substantial number or percent of children with special needs, such as children with disabilities, low-income children, and children at risk of school failure.

The Committee has made several minor changes to the Inexpensive Book Distribution Program to improve its ability to operate in low-income and rural communities where it is often difficult to obtain local support.

The first change to the program would allow subcontractors operating programs in low-income communities to use other federal dollars in order to meet the non-federal share of the cost of the program. However, federal dollars could not be used for more than 50 percent of the non-federal share used to meet the cost of acquiring and distributing books. The Committee believes it is important that local communities demonstrate their support of the Inexpensive Book Distribution Program by paying a portion of the cost of the program. The Committee acknowledges there may be instances where local communities support the Inexpensive Book Distribution Program, but have limited resources. In such instances this legislation would permit Reading is Fundamental (the federal grantee) to waive, in whole or in part, the cost sharing requirement for a local program if the subcontractor demonstrates that it would not otherwise be able to participate in the program.

In addition, the Committee understands that there are instances where local private nonprofit groups or organizations operating local programs have difficulty in obtaining local financial support for the Inexpensive Book Distribution Program. This generally happens because there is only a small amount of funding available for a limited period of time. The Committee bill allows Reading is Fundamental to enter into multi-year subcontracts with small local sub-grantees in order to provide them with additional leverage in seeking local commitments. This legislation would not permit such agreements in instances where it would undermine the finances of the national program. It is the hope of the Committee that this provision will help ensure the operation of the Inexpensive Book Distribution Program in small, rural communities or other communities that have difficulty obtaining support for the program.

TITLE I, PART C—EDUCATION OF MIGRATORY CHILDREN

Title I, Part C, of the ESEA, program for the children of migrant workers, was created to assist migrant children in overcoming problems associated with multiple moves which interrupted their education and prevented them from performing well in school. The program serves migrant children ages 3–21, as well as emancipated youth and formerly migrant children. Most migrant programs are administered by local educational agencies (LEAs) and operate during the summer months as well as the regular school year.

The children of migrant workers are some of the most vulnerable children in schools throughout the United States. Migrant children at greatest risk are those whose education is interrupted as they follow their parents along the migrant stream. According to the Department of Education, for 1996–97 States reported approximately 580,000 Migrant Education Program participants, including 475,000 served during the regular school year and 285,000 served in the summer program.

H.R. 1 extends the Title I, Part C, program serving the needs of migrant children and makes modest changes directed at improving services to this at-risk population. The dropout rate for migrant students is very high. The additional academic assistance they re-

ceive under this Act is often the determining factor in whether or not they stay in school and graduate.

Of key interest to the Committee has been the ability of States to rapidly transfer student records in the absence of the costly Migrant Student Records Transfer System (MSRTS). MSRTS was eliminated in 1994 as a part of the Improving America's Schools Act because it was found to be ineffective in completing its primary responsibility of transferring student records. Changes to this Act during the 103rd Congress directed the Secretary to pursue alternative strategies for the effective and efficient transfer of student records. Report language also encouraged States to develop agreements on transferring credits from one school to another. In the absence of MSRTS, the Department of Education found that most States and school districts have relied on mail, telephone and fax to transfer records for migrant students. Although 19 States have some type of electronic system in place, many of these systems are used for maintaining, rather than transferring, student records.

The Committee believes the transfer of student records is key to the ability of schools to adequately serve the educational needs of migrant students. If basic, essential information regarding a child's grades, test scores, and vaccination records are not transferred in an efficient manner, a child may be subjected to additional vaccinations and be incorrectly placed in a classroom above or below their actual academic abilities.

As such, the Committee has modified the Title I, Part C, Migrant Education Program to require the Secretary to assist States in developing effective methods for the transfer of student records and in determining the number of migratory children in each State. The Secretary is also required to work with States in order to determine the minimum data elements for records to be maintained and transferred when funds under this part are used for record transfer. The Secretary is further required to assist States in linking their records systems for the purpose of electronic maintenance and transfer.

In addition, the Committee has included language in H.R. 1 to require a local educational agency receiving assistance under this Part to make student records available at no cost to another local educational agency requesting such records in order to meet the needs of a migratory child. The Committee wants to make it very clear that the timely transfer of student records is an important element of the Migrant Education Program. It expects States and local educational agencies to work together to ensure that student records are transferred as quickly as possible through the most effective possible means. It would further encourage States and local educational agencies to develop effective means of electronically transferring student records. The Committee believes that an additional focus on the electronic transfer of student records is vitally important to ensure that migrant children have access to a high quality education.

The Committee has also adopted language for simplifying the formula for distributing funds to the States. Under current law, counts of migrant students are based on estimates and full-time equivalents (FTES) of these children. Current law requires either a burdensome collection of data or the continued use of increasingly dated FTE adjustment factors based on 1994 data. Under H.R. 1,

a State's child count would be based on the number of eligible children, aged 3 through 21, residing in the State during the previous year, plus the number of children who received services in summer or intersession programs provided by the State. This approach is easier to understand and administer, minimizes the data-collection burden on the States, and encourages the identification and recruitment of eligible children. Only funding appropriated for this program over and above the amount appropriated for fiscal year 2001 will be distributed based on the new formula.

The Committee has also modified the Title I, Part C, program for migrant children to eliminate the requirement that States develop both a comprehensive service delivery plan and a program application. Key elements of the plan have been incorporated into the application requirements. This streamlining should reduce the paperwork burden on the States. The bill also provides States with greater flexibility in determining the activities to be provided with funds under this Part as long as they are first used to meet the identified educational needs of migratory children. Over the years since the enactment of the Migrant Education Program, the number of migrant students graduating from high school has increased dramatically. However, these graduation rates still lag significantly behind that of the general population. The Committee believes these changes will allow States and local schools to better meet the needs of this population and insure they receive the best possible education.

TITLE I, PART D—NEGLECTED AND DELINQUENT YOUTH

The Title I, Part D, program provides formula grants to States for neglected and delinquent children being educated in State agency programs. These programs serve neglected and delinquent children and youth in institutions or community day programs, as well as those who are in adult correctional facilities. Funds are allocated to States on a formula based primarily on the number of children and youth in their State agency program who are enrolled in a regular program of instruction operated by the agency for at least 20 hours a week for children and youth, or 15 hours a week if the participant is in an adult correctional facility. There is also a Subpart 2 program for local educational agencies (LEAs), funded with allocations from the Title I, Part A, program for districts with high numbers or percentages of children in locally operated correction facilities. Funds are provided to LEAs for meeting the educational needs of youth returning from correctional facilities, and for meeting the unique educational needs of students at risk of dropping out.

The Committee believes that far too many youth who spend time in correctional facilities do not graduate from high school. According to the Department of Education, one-third of 16 and 17 year olds do not return to school after their release from a correctional facility, and one-third of the enrolled 16 and 17 year olds dropped out within 10 months. It is the view of the Committee that many of these students would stay in school and graduate if they received quality educational support during their incarceration and assistance in transitioning back into the school environment.

To address these concerns, the Committee has made several changes to Subpart 1 and Subpart 2 of current law. Specifically, in

Subpart 1, the Committee has increased from 10 percent to 15 percent the reservation of funding for each State agency to support projects that facilitate the transition of children from State-operated institutions to local educational agencies. The Committee believes that transition assistance plays a key role in determining whether or not delinquent youth will succeed in school and graduate.

During the last reauthorization, a new Subpart 2 was added to Part D to address the academic needs of youth in local correctional facilities. Its creation was based on evidence that children in local correctional facilities who were counted for the purpose of generating funds in Title I, Part A, were in most instances not receiving services from Title I. Programs operated under this new Subpart are to address the academic needs of such youth while they are incarcerated and upon return to their local school. The portion of the program operated in local schools is intended to provide support to delinquent youth that are transitioning back into the regular school setting and to provide assistance to other youth at risk of dropping out.

Concerns have been raised that the school portion of the Subpart 2 program has more often than not become a dropout prevention program that does not focus on assisting youth returning from correctional facilities. The Committee believes that other at-risk youth would benefit from the types of programs operated for delinquent youth under Subpart 2. However, it is the view of the Committee that programs under this Subpart should serve at-risk youth secondarily to serving youth returning from correctional facilities. As such, the language in Subpart 2 has been revised to focus on the provision of services to youth returning from correctional facilities. If participating schools are able to serve other at-risk students at the same time, they may do so. The Committee has also modified the Subpart 2 program to allow the use of funds for several new activities, including curriculum-based youth entrepreneurship education, peer mediation, and mentoring.

To be successful, it is the view of the Committee that curriculum-based youth entrepreneurship education programs must include organized academic materials that are sequentially based and which have been field tested and based on sound educational practices. Additionally, such programs must have a demonstrated record of empowering disadvantaged youth with math and other analytical skills. There is growing evidence that innovative organizations and institutions working to instill entrepreneurial behavior, through classroom and practical experiences, are highly effective in teaching some youth. Through such programs, students learn the basic skills required of entrepreneurs and gain a greater understanding of the relationship between academic subjects and the business world.

In addition, mentoring programs have proven to be highly effective in assisting at risk and delinquent children to overcome academic and other problems by providing them with a strong adult role model. The Committee believes mentors, including senior volunteers, are highly effective in helping these youth.

Delinquent youth are a high-risk population and the Committee believes they can turn to further involvement in criminal activities if they are not provided the support they need to stay in school and

turn their lives around. The purpose of Subpart 2 is to insure they receive the assistance they need to graduate and lead productive lives.

TITLE I, PART E—EVALUATIONS AND DEMONSTRATIONS

Section 1501—Evaluations

Section 1501 authorizes the Secretary to conduct evaluations and assessments, collect data, and carry out other activities that support the Title I programs and provide information useful to those who would support the activities that are essential for the Title I programs.

H.R. 1 amends current law to ensure that the assessments and evaluations of programs funded under Title I look at the role of public school choice programs, comprehensive school models, and schoolwide programs in improving the academic achievement of students in Title I schools.

It is the Committee's view that the Secretary will continue the Department of Education's work already started on the Title I assessment and evaluation to the extent that it meets the requirements of this part. It is not the Committee's intent that the Secretary discontinue all of the department's current efforts. However, these efforts should be modified as necessary to comply with this part, and to follow the recommendations of the U.S. General Accounting Office (GAO) report on the longitudinal evaluation to ensure that future reports are of a high quality and useful for improving the Title I program.

GAO examined the Longitudinal Evaluation of School Change and Progress (LESCP) and found that it had limitations that will restrict researchers' ability to draw strong conclusions from the data, especially regarding Title I or standards based reform. It is the Committee's view that future evaluations should ensure that their purposes are clear and that whenever possible, produce findings that can be generalized to Title I schools taken as a whole. The GAO study found that because the LESCPC used a smaller, non-representative sample, it suffered from design limitations that would "restrict its ability to fully satisfy any of the three potential purposes . . . envisioned by [the Department of] Education, contractors and panel members."

It is the Committee's view that the Secretary should ensure that the Independent Review Panel is composed of individuals with knowledge of Title I and other ESEA programs. However, in order to ensure that Title I evaluations meet the highest standards of methodological rigor, in Subsection (d) of Part F, a simple majority of individuals on the panel should represent fields other than education. It is also the Committee's view that while the panel should include practitioners, as the purpose of the panel is technical in nature, such individuals should be limited to no more than one third of the panel.

The final evaluations should be submitted to outside reviewers, as required under subsection (d)(3), so that Congress and taxpayers will have an independent source of information as to the quality of the evaluations conducted by the Secretary.

Section 1502—Demonstrations of Innovative Practices

It is the Committee's view that the Secretary should have the ability to demonstrate innovative educational practices. H.R. 1 streamlines language in current law and eliminates references to programs and practices that have been repealed.

Section 1503—Ellender-Close Up Fellowship Program

This program, administered by the private non-profit Close Up Foundation, provides financial aid to enable low income students, their teachers, recent immigrants, and children of migrant parents to come to Washington, DC, to study the operations of the three branches of government. Activities include attending seminars on government and current events, and meeting with government leaders. H.R. 1 changes the name of the Allen J. Ellender Fellowship Program to the Ellender-Close Up Fellowship Program to better reflect the role of the Close Up Foundation in the program.

The Close Up Foundation is the nation's largest non-profit (501(c)(3)), non-partisan citizenship education organization. Since its founding in 1970, Close Up has worked to promote responsible and informed participation in the democratic process through a variety of educational programs. Close Up's mission is built on the belief that textbooks and lectures alone are not enough to help students understand the democratic process and make it work. Students need a "close up" experience in government. Close Up's national, State, and local government studies programs strengthen participants' knowledge of how the political process works, increases their awareness of major national and international issues, and motivates them to become actively involved in the world around them. Each year, more than 25,000 students, teachers, and other adults take part in Close Up's programs in Washington, D.C. Since the inception of its Washington-based programs in 1971, the Close Up Foundation has welcomed more than 500,000 students, educators, and other adults to the nation's capital.

Section 1504—Dropout Reporting

An amendment offered by Mr. Scott (D-VA) was adopted in Committee by a vote of 26–22, that creates a new Section 1504 of Part E. This section requires State educational agencies receiving funds under Title I to report to the National Center of Education Statistics (NCES) on the dropout rate of students in the State as defined in NCES's annual survey known as the Common Core of Data.

TITLE I, PART F—COMPREHENSIVE SCHOOL REFORM

The Comprehensive School Reform program (CSR) was first funded in FY 1998 as part of the Departments of Labor, Health and Human Services, and Education Appropriations Act (P.L. 105–78). The language in the appropriations bill in 1998 did not specifically amend Title I of the Elementary and Secondary Education Act. Rather the program was included in narrative, paragraph-style text in the conference report of the appropriations legislation. In H.R. 1 the Committee has incorporated the policy from that legislation into a categorical grant program included in the statutory text of Title I, Part F. The Committee has created a new part of Title I for this program because in general, federal education pro-

grams should not be funded apart from authorizing language to ensure that federal dollars are used effectively.

In order to improve the quality of the entire school, CSR provides financial incentives for schools to develop a plan to implement comprehensive reforms based upon reliable research and effective practices. These reforms emphasize core academic subjects and parental involvement, and are called “comprehensive” because they are intended to affect all aspects of school operations, including curriculum and instruction, school organization, professional development and resource use, instead of improving certain school functions independently of others. The intent is to provide schools with another means by which they may ensure that all children in a school meet State academic achievement standards.

The Committee is aware that schools throughout the country are implementing a number of preexisting comprehensive reform models. While no one model fits all school situations, schools are encouraged to consider the positive aspects of existing design models with a proven track record or new approaches grounded in scientific research and effective practices. The Committee is aware that some States have attempted to limit schools to certain comprehensive school reform models or approaches. States should allow schools to select any model that is based on scientific research and effective practices and otherwise meets the requirements of this part.

Nearly 6,000 schools, serving more than two million students, have in recent years adopted and begun to implement “research-based” comprehensive reforms intended to improve student achievement. As this trend has continued to grow, so too has the demand by local educators to gain a better understanding of which programs are most suited to their unique circumstances and needs. To better enable schools to implement “research-based” comprehensive reforms, H.R. 1 authorizes the Secretary to reserve two percent of funds made available under this part to support initiatives that accomplish this goal. One such entity is the Education Quality Institute (EQI). The goal of EQI, an independent, non-profit organization, is to assist local schools in these efforts by providing the support and tools necessary to critically evaluate, adopt, and implement research-based programs more effectively. To accomplish this, the EQI is developing a process that “raises the bar” for independently reviewing the existing evidence based on educational programs claiming to be research-based or research-proven. EQI will widely disseminate these findings along with descriptive information on programs and decision making tools leading to the selection and implementation of more effective school improvement. In addition, EQI will offer technical assistance to State education officials, district- and school-based administrators, school staff, and others so that they can more effectively conduct needs assessments, identify potential solutions, and evaluate the quality of evidence provided to them by program developers.

The Committee has also made changes to the State application requirements in subsection (c) to require States to ensure that schools are selecting comprehensive school providers that have the capacity to provide high quality technical assistance over the three-year reform period. This change refines CSR to ensure the quality

of these reform efforts while maintaining the ability of schools to choose from a broad and growing number of providers.

It is the Committee's view that it is no longer necessary to prioritize CSR funds for local educational agencies that plan to use the funds in schools in need of improvement, corrective action, or restructuring under Section 1116. Many high-poverty Title I schools can benefit from CSR before they are identified for improvement. Therefore States may give priority either to local educational agencies that are in need of improvement, or to local educational agencies that demonstrate a commitment to assist schools to ensure that programs are well implemented and sustained.

The Committee clarified that local educational agencies that apply for grants should ensure that schools implement models grounded in scientifically based research and effective practices. Additionally, the Committee added language that requires schools to implement models that have a strong evidentiary basis for significantly improving academic achievement. Specifically, the components of effective schoolwide reform are as follows: (1) utilization of innovative strategies and proven methods of learning, teaching and school management that are based on scientifically based research and effective practices; (2) integration of a comprehensive design for effective school functioning; (3) provision of high quality and continuous professional development; (4) inclusion of measurable goals for student performance and benchmarks for meeting such goals; (5) support by teachers, administrators and other professional staff; (6) provision for the meaningful involvement of parents; (7) use of high quality external technical support; (8) inclusion of a plan for the evaluation of the implementation of school reforms and student results achieved; (9) identification of how other resources will be used to coordinate services to support and sustain the school reform effort; and (10) a demonstration of how the comprehensive reform model has been found, through rigorous field experiments, to improve academic performance or that the model to be used otherwise has a strong evidentiary basis for significantly improving academic performance.

TITLE I, PART G—RURAL EDUCATION

Each year, many rural school districts forgo federal funding because they lack the enrollment, financial resources, and poverty data needed to compete against larger school districts for federal education programs. Rural school districts find it particularly difficult to fully benefit from federal funds because the unique needs of rural school districts are not addressed in federal formula programs. Generally, current federal education formulas do not adequately address the needs of small, rural school districts because the formulas do not allow sufficient revenue to substantially support education reform efforts designed to improve academic achievement. These school districts lie in remote areas distant from commercial centers, making it particularly difficult for teachers and administrators to utilize consortia, pooled resources, and technical assistance. Rural school districts also have unique technology and communications infrastructure challenges due to their remote locations. In addition, rural school districts cannot adequately compete for federal grants since they lack resources and do not have access to specialists in federal grant writing as do larger school dis-

tricts. H.R. 1 provides rural school districts with increased flexibility and funding to enhance academic achievement and addresses the unique needs of those districts that cannot compete for federal education grants because they do not have adequate resources.

Title I, Part G of the No Child Left Behind Act of 2001, a combination of H.R. 692, the Rural Education Initiative Amendments Act of 2001, introduced by Rep. Tom Osborne (R-NE) and H.R. 1148, the Low-Income and Rural School Program, introduced by Rep. Van Hilleary (R-TN), addresses the unique problems associated with the education of students in rural school districts. Specifically, this program addresses the different needs of: (1) small, rural school districts; and (2) low-income, rural school districts. Under Subpart 1, eligible LEAs would be able to combine funding under various formula grant programs to support local or State-wide education reform efforts intended to improve the academic achievement of elementary and secondary school students and the quality of instruction provided for these students. Under Subpart 2, eligible LEAs could use funds for such things as: educational technology; professional development; technical assistance; and teacher recruitment and retention. This program is authorized at \$300 million for fiscal year 2002 and such sums as may be necessary for each of fiscal years 2003 through 2006 to be equally distributed between Subparts 1 and 2.

TITLE I, PART H—GENERAL PROVISIONS OF TITLE I

The general provisions of Title I relate to all parts of Title I.

Under section 1801 of Part H of Title I, the Secretary is authorized to issue such regulations as are necessary to ensure reasonable compliance with Title I, and is authorized to establish a negotiated rulemaking process on a minimum of three key issues: (1) accountability; (2) implementation of assessments; and (3) use of paraprofessionals. The authority to issue regulations is a continuation of authority in current law, the authority is a slight modification of current law which had allowed for negotiated rulemaking on schoolwide programs and standards and assessments. Negotiated rulemaking gives interested parties an opportunity to be involved in negotiations and discussions on the text of regulations issued by the Department of Education.

In addition, the Committee has continued the authority for each State to have a Committee of Practitioners to advise the State in carrying out its responsibilities under Title I.

Provisions in current law, section 1603(c), relating to a 1 percent set-aside for State administrative expenses have been transferred to section 1002 of Title I, Part A.

With respect to local administrative expenses, the Committee has included a new provision which limits local educational agency administrative expenses to no more than four percent of the funds they receive under Title I, Part A, thereby ensuring that at least 96 percent of the school district's Title I, Part A funds are used for classroom activities or related services.

The Committee has made it absolutely clear that nothing in this Act affects home schools. In addition, the Committee made changes to ensure that private schools that do not receive ESEA funds are not affected either. H.R. 1 includes three rules of construction relating to home schools, private schools, and the privacy of assess-

ment results. First, home schools and students who are home schooled do not receive any funds or services under the Elementary and Secondary Education Act. Accordingly, to be clear about the non-applicability of ESEA to home schools, the Committee has included language in section 1805 which clarifies that nothing in Title I is intended to affect home schools, nor are home schooled students required to take any of the assessments referenced in Title I. Similarly, nothing in Title I is intended to affect private schools that do not receive ESEA funds or services under Title I, nor are students at private schools that do not receive funds or services required to participate in any assessments in Title I. Similar provisions to each of these latter two rules of construction are also included in the General Provisions of Title VIII.

With respect to individual assessments, students and their parents will have the protections provided in section 444 of the General Education Provisions Act for test results that become part of the education records of the student. While this would be the case through the independent application of Section 444 apart from mentioning it in H.R. 1, the Committee has chosen to give emphasis to the protections through a cross reference. Under section 444 of the General Education Provisions Act, a student's education records may not be disclosed to third parties unless parental consent is given.

TITLE II, PART A—TEACHER QUALITY TRAINING AND RECRUITING FUND

Title II of the No Child Left Behind Act of 2001 is based upon three principles: teacher excellence, smaller classes, and local choices. It will provide a major boost to schools in their efforts to establish and support a high quality teaching force. The No Child Left Behind Act of 2001 consolidates and streamlines the Eisenhower Professional Development program and the Class Size Reduction program into a single program to provide States and local schools additional flexibility in the use of these funds, in exchange for increased accountability by demonstrating that student achievement is increasing. Using these funds, local officials will have the support and flexibility necessary to improve academic achievement through such initiatives as providing high quality training for teachers and reducing class size.

The Committee notes that efforts to improve academic achievement take many forms. There is no single solution or program to accomplish this. Indeed, for every school there are different approaches that are appropriate to their particular circumstances. H.R. 1 reflects this reality and provides the flexibility to local school districts in how these funds may be directed. However, the No Child Left Behind Act of 2001 encourages schools to focus upon efforts, such as improving teacher quality and class size reduction, that have been scientifically proven to lead to academic success, while not imposing any one-size-fits-all approach dictated from Washington upon schools on how to carry out such efforts.

Teacher Quality

The importance of teacher quality was consistently highlighted by the many witnesses testifying before the Committee on Education and the Workforce during the 106th Congress. It was made clear that teacher quality, above all other factors within schools, is

the most important determinate of student academic achievement. Dr. Sandra Horn, University of Tennessee, Value Added Research and Assessment Center in Knoxville, Tennessee, provided one such example. In her remarks, she stated:

“In the past few years, the team at the University of Tennessee Value-Added Research and Assessment Center (UT-VARAC) has examined the effects of class size, class heterogeneity, past achievement levels of students, building change, and several other factors on the academic growth of students. Although several of the factors studied affect student gains to some degree, in every case, the effect of the teacher has been found to be far and away the most important determinant of student academic growth. Effects of ineffective teachers are cumulative and very large and can be seen years after a student moves on to other teachers. There is no evidence that effective teachers can ever rectify the retardation of academic growth that occurred under a previous poor teacher. And there is evidence that teacher assignment patterns may indeed be perpetuating and sustaining the achievement gap between white students and minority students.”

The impact of quality teachers was also highlighted in a report issued by The Education Trust, entitled, “Good Teaching Matters—How Well-Qualified Teachers Can Close the Gap.” Among the findings highlighted in the report were those from a large-scale study in Texas conducted by Ronald Ferguson of Harvard University. His study “found that teacher quality—as measured by education, experience, and test scores on initial teacher licensing exams—has more impact on student achievement (explained some 43 percent of the variance) than any other single factor, including family income and parent education.”

Based on the same work outlined by Dr. Horn, the Education Trust report also noted that Dr. William Sanders of the University of Tennessee found that “students who scored at roughly the same level on mathematics tests in third grade were separated by differences of as much as 50 percentage points on sixth grade tests depending on the quality of the teachers to whom they were assigned. Scoring differences of this magnitude can represent the difference between placement in the ‘remedial’ and ‘accelerated’ tracks.”

Last year, a consortium of research groups, including the Rand Corporation, released a study, entitled, “Class Size Reduction in California: The 1998–99 Evaluation Findings,” that reviewed California’s multi-billion dollar class size reduction program. The researchers found slight academic gains from the program, but at a very high cost in terms of compromising teacher quality. Specifically, while 98.2 percent of K–3 teachers in schools evaluated were ‘fully credentialed teachers’ in 1995, this percentage plummeted to just 86.6 percent by 1999. The report also found that during the same period, 4th and 5th grade teachers with full credentials dropped from 98.7 percent to 85.6 percent. Even in the upper grades, the percentage of qualified teachers dropped from around 98 percent to just over 90 percent. The impact of declining teacher quality was found to be the greatest in low-income schools, where the percentage of qualified teachers dropped from 97 percent to 78 percent.

The Committee notes that under H.R. 1, local officials have significant flexibility in determining the best approaches to improving teacher quality and improving student academic achievement. Accordingly, the Committee recognizes that reducing class size can also be an effective tool for school reform, if implemented properly. Rigorous, peer reviewed scientific research, especially Tennessee's longitudinal STAR (Student-Teacher Achievement Ratio) study and Wisconsin's SAGE (Student Achievement Guarantee in Education) program, has shown reduced class sizes with qualified teachers to be effective in substantially raising student achievement, particularly for poor and minority students. These gains have been observed primarily in the early grades. Furthermore, follow-up research of the STAR study has shown class-size reduction to have a lasting effect well into high school, resulting in higher academic performance, higher graduation rates, and a greater likelihood that students will take steps to prepare for college.

Even in California, where implementation problems clearly weakened the benefits of class-size reduction by lowering the teacher quality in the State, the evaluation found that students overall showed slight, but significant, academic gains two years in a row, and these gains were found to persist after the students returned to larger classes.

Given the clear importance of teacher quality, it is crucial that initiatives at the federal, State, and local levels help produce high quality teachers. Many other factors need to be examined in an effort to impact and improve teacher quality. A large percentage of the 2.8 million public school teachers currently in the classroom will be there for many years to come. Therefore, we cannot ignore the need to ensure that existing teachers have the skills and knowledge necessary to provide opportunities for every child to succeed academically. H.R. 1 recognizes this fact and promotes activities at the federal, State, and local levels to address quality ranging from the hiring and recruiting of new teachers to efforts to help teachers once they enter the classroom.

Authorized State Activities

Under H.R. 1, States are authorized to retain up to five percent of funds for State activities. Among other things, authorized State activities include: Reforming teacher certification, recertification, or licensure requirements; expanding, establishing, or improving alternative routes to State certification for teachers; carrying out programs that include support during the initial teaching and leadership experience, such as mentoring programs; assisting local educational agencies and schools in effectively recruiting and retaining highly qualified and effective teachers and principals; reforming tenure systems; developing professional development programs for principals; and developing teacher advancement initiatives that emphasize multiple career paths and pay differentiation.

States like Texas have already made great progress in implementing reforms related to teacher preparation programs and certification. Dr. Pamela Tackett, Executive Director of the Texas State Board for Educator Certification, testified before the Committee on Education and the Workforce during the 106th Congress and provided an overview of their efforts. Recognizing that Texas faced over 43,000 vacant teacher positions, and an attrition rate

among teachers of approximately 32 percent after three years, Texas is pursuing an effort to support new teachers with mentors and on-going training. These efforts are based on model induction programs in several Texas schools which resulted in a 95 percent retention rate among beginning teachers after three years. However, despite the need for Texas to find more teachers, they are not lowering their standards in order to increase the number of teachers. In fact, Texas is one of the few States that has implemented tough standards for teacher preparation programs. In order to be certified, these institutions are held accountable for the performance of their teacher candidates in taking the State's certification examinations. These examinations are also being strengthened to ensure teacher candidates are able to demonstrate specific knowledge and skills in the subjects in which they plan to teach.

Math and Science Partnerships

Although the *No Child Left Behind Act of 2001* consolidates funds from the Eisenhower Professional Development program into a larger grant to States and localities, it maintains some of the best aspects of this program. One example is the emphasis that H.R. 1 places on math and science activities funded through partnerships which include State educational agencies, institutions of higher education and high need local educational agencies.

The purpose of the math and science partnerships program is to improve the achievement of students in the areas of mathematics and science. Activities that can be undertaken include encouraging States, institutions of higher education, and local educational agencies to participate in programs that focus on education and training of mathematics and science teachers; encouraging institutions of higher education to assume greater responsibility for improving mathematics and science teacher education; and bringing mathematics and science teachers together with scientists, mathematicians, and engineers to expand content knowledge and research in science and mathematics.

The Committee notes the findings from the "National Evaluation of the Eisenhower Professional Development Program," conducted by the American Institutes of Research. The evaluation found professional development sponsored through institutions of higher education to be more effective than district-sponsored activities. The study noted that these programs "are more likely to focus on content, to provide more opportunities for active learning, to be more connected to teachers' other experiences, and to involve a greater number of hours, and to occur over a longer time span."

Under H.R. 1, States, working in conjunction with State agencies for higher education, must award at least 15 percent, but not more than 20 percent, of the funds (at the discretion of the State) on a competitive basis to eligible partnerships for math and science programs. Required participants of the eligible partnerships must include at least: (1) a State educational agency; (2) a mathematics or science department of a private independent or State-supported public institution of higher education; and (3) a high need local educational agency. In addition, partnerships may include: (1) another institution of higher education or the teacher training department of such institution; (2) additional local educational agencies, public charter schools, elementary or secondary schools; (3) a busi-

ness; or (4) a nonprofit organization of demonstrated effectiveness including a museum or research institution.

The Committee notes that science education ought to reflect the scientific process and be object-oriented, experiment centered, concept-based; and should involve students in scientific inquiry and analysis. Students should learn the basic theories and operations of mathematics, as well as develop the understanding that numeric systems have intrinsic properties that can represent objects and systems in real life and that the basic principles of mathematics can be applied in solving real world problems. Mathematics and science education can and often should include the study of engineering and technology. Engineering education, reflecting the realities of real world design, should involve hands-on projects and require students to understand and make trade-offs based upon evidence. Students should learn technology as a tool to solve problems and a process by which people adapt the natural world to suit their own purposes. Computers represent a particularly useful form of technology, enabling students and teachers to acquire and tabulate data, model systems, visualize phenomena, communicate and organize information, and collaborate with others in powerful new ways. A background in the basics of information technology is essential for success in the modern workplace and the modern world.

Local uses of funds

Recognizing that the most important decisions in education occur at the local level, H.R. 1 provides the majority of its funds directly to local educational agencies, and allows considerable flexibility in how these funds are used. Local educational agency allotments would have to be equal to funding received under the Eisenhower Professional Development program and the Class Size Reduction program. 80 to 85 percent of the funds (at the discretion of the State and based on the amount reserved for math and science partnerships) are sent to local educational agencies by formula (80 percent based on poverty and 20 percent based on population) for local uses of funds. Among other things, local uses of funds include: Initiatives to assist recruitment of principals and fully qualified teachers; initiatives to promote retention of highly qualified teachers and principals; programs and activities that are designed to improve the quality of the teacher force; teacher opportunity payments; professional development activities designed to improve the quality of principals, including developing leadership academies for principals and superintendents; teacher advancement initiatives that emphasize multiple career paths and pay differentiation; and hiring fully qualified teachers in order to reduce class size.

Given the flexibility provided under H.R. 1, local educational agencies and schools will have the opportunity to use these funds for reforms and innovative projects aimed at increasing teacher quality and student academic achievement.

One such area involves alternative certification programs. These programs provide opportunities for experienced professionals from other fields to enter teaching without having to go through the traditional schools of education. Dr. C. Emily Feistritzer, President, National Center for Education Information, testified before the Committee on Education and the Workforce during the 106th Congress on the benefits of these programs and key characteristics of

the best programs. Specifically, she noted the successful efforts in New Jersey, Texas, and California, where alternative route programs have had a significant impact on the recruitment and retention of highly qualified individuals for teaching. She noted, "all three of these States report that teachers certified through their alternative routes perform as well, and, in some cases, better, on certification examinations as their counterparts who completed traditional teacher education programs." Dr. Feistritz also provided the specific characteristics of highly effective alternative teacher certification programs. Specifically, she noted they have "a strong academic coursework component; they are field-based programs, meaning that individuals get into classrooms early in their training; teacher candidates work with a qualified mentor teacher; candidates usually go through their program in cohorts, not as isolated individuals; most of these programs are collaborative efforts among State departments of education, whose responsibility it is to license teachers, colleges and universities that historically have had the responsibility for educating and training teachers, and school districts who actually hire teachers." The Committee urges States and localities to promote these characteristics in any alternative certification program supported with funds under this Title.

H.R. 1 gives local educational agencies the flexibility to use funds to help recruit, reward and retain the most qualified teachers. The area of recruitment is becoming especially important as more and more of the nation's top graduates from education institutions never end up in the classroom. Instead, they are pursuing other careers, which may offer more competitive salaries. Under the No Child Left Behind Act of 2001, local funds may be used to set up incentive programs to enable schools to attract these types of new teachers. The ability to implement differential pay programs with funds from H.R. 1 is important if schools are to find and retain teachers in areas such as math and science, where competition from the private sector has made it especially difficult for schools to hire these individuals.

Ensuring the best teachers stay in the classroom is also important. Increasing retention through mentoring and induction programs are just some examples of the types of activities schools will have the flexibility to implement under H.R. 1. However, if the best teachers are to be justly rewarded, schools need to establish systems which effectively recognize those teachers having the greatest impact on student academic achievement, including those having a firm grasp of the subject areas in which they teach. To this end, the No Child Left Behind Act of 2001 permits schools to consider approaches such as testing teachers and merit-based systems focused on rewarding teachers whose students excel.

Under H.R. 1, teachers will be empowered to play a role in the decisions made regarding professional development activities provided by local educational agencies. If a State determines that professional development programs funded by a local educational agency fail to meet requirements for professional development activities, the State must notify such agency that technical assistance is available to help meet those requirements. If the local educational agency fails to meet requirements for professional development activities for two consecutive years, then such agency must direct these funds through Teacher Opportunity Payments (TOPs)

directly to the teachers themselves. In addition, local educational agencies may choose to use all of their professional development funds through the TOPs program.

Teacher Opportunity Payments allow a teacher, or a group of teachers (within the school or district), to have the ability to have direct access to these funds for use toward a professional development program of his or her choice. For example, a group of teachers may decide to put their funds toward a program at an institution of higher education that has proven it can provide exceptional training for the effective teaching of State math standards. However, such a program would have to meet the quality standards set forth in the legislation.

The TOPs program also recognizes that many schools have comprehensive reform plans in place, such as schools that have implemented a school-wide program, that are a school-improvement school working under a school improvement plan, or have enacted a Comprehensive School Reform Demonstration program. In many of these schools, the actions of all teachers may be tied to a particular reform model, such as Success For All, and in these schools, individual teacher professional development is an important component of the whole school. In light of these and other school-based reform efforts, the TOPs program requires teachers to regularly consult with their principal, both on the activity to be selected, and throughout the training, to ensure the TOPs program provides benefits for both the teacher individually, and the school as a whole.

Under the TOPs program, local educational agencies must provide notice regarding the availability of funds to all teachers within the schools identified by the agency. The Committee highlights the provision which will ensure that the principals of these schools actively recruit for TOPs, those teachers who are either not fully certified in their subject areas or who are otherwise in need of assistance to ensure the academic success of their students. In the event the local educational agency does not have adequate funding to meet the demands of all teachers seeking this assistance, the TOPs program provides a priority to assist those teachers who need such training the most.

The TOPs program is based upon the belief that teachers are often in the best position to determine their particular professional development needs. The Committee has learned that too often professional development is selected without the participation of teachers, and as a result, leads to programs that fail to provide the maximum benefit to these teachers. The time available to teachers and the resources needed for professional development are too limited resulting in widespread mediocrity in the quality of programs provided to teachers. The TOPs program gives more authority to teachers and ensures quality in the professional development programs. The Committee also notes the increased accountability given to teachers across the country in improving the academic achievement of their students. If this is the case, it simply makes sense to also provide them with the ability and opportunity to attend professional development programs which they know will best help them meet this new level of accountability.

Professional Development for Teachers

The relationship between high quality professional development and student achievement has been the focus of extensive research. Dr. Jane Butler Kahle, Condit Professor of Science Education at Miami University in Oxford Ohio, testified before a joint hearing with the Committee on Science during the 106th Congress, and provided an overview of the leading research in this area. She noted results from a systemic initiative in Ohio, which found that teachers participating in sustained professional development, when compared to those who had not, had students with higher test scores. For example, she noted, "African-American girls in classes of teachers with sustained professional development scored nine percent higher on the science achievement test than did their peers in classrooms of teachers who had not participated."

While some professional development can lead to higher student achievement, it is clear that not all professional development leads to such results. Dr. Kahle also noted the work of Dr. D.H. Monk, which concluded that "additional coursework in specific areas (e.g., the number and kinds of science and mathematics courses) has a positive effect on student learning, while additional coursework by teachers in unrelated subjects has no, or a negative, effect on student learning." Dr. Kahle concluded that "short-term, finite programs usually do not result in improved content knowledge for teachers, or changed teaching practice, or enhanced student learning."

The No Child Left Behind Act of 2001 builds upon research that has been proven to have the common characteristics of effective professional development. Specifically, under Title II, professional development must: (1) ensure that all teachers teaching within the State are fully qualified not later than December 31, 2005; (2) support professional development activities that give teachers, principals, and administrators the knowledge and skills to provide students with the opportunity to meet challenging State academic content standards and student academic achievement standards; (3) support the recruiting, hiring, and training of fully qualified teachers, including teachers fully qualified through State and local alternative routes; (4) advance teacher understanding of effective instructional strategies based on scientifically based research for improving student achievement; (5) be directly related to the curriculum and content areas in which the teacher provides instruction; (6) be designed to enhance the ability of a teacher to understand and use the State's standards for subject areas in which the teacher provides instruction; (7) be tied to scientifically based research demonstrating the effectiveness of such professional development activities or programs in increasing student achievement; (8) be of sufficient intensity and duration (not to include 1-day or short term workshops and conferences) to have a positive and lasting impact; (9) be developed with extensive participation of teachers, principals, parents, and administrators; (10) be designed to give teachers of limited English proficient children the knowledge and skills to provide instruction and appropriate language and academic support services to such children; (11) to the extent appropriate, provide training for teachers and principals in the use of technology; and (12) be regularly evaluated for their impact on increased teacher effectiveness and improved student achievement.

With respect to the requirement that the activity “be of sufficient intensity and duration (not to include 1-day or short term workshops and conferences) to have a positive and lasting impact,” the Committee notes that exceptions may be provided if such activity is a component of a long-term comprehensive professional development plan established by the teachers and the teachers’ supervisor based upon an assessment of their needs, their students’ needs, and the needs of the local educational agency. This provision is based upon the national Eisenhower evaluation which found that traditional types of professional development (such as conferences), are less likely to be associated with positive teacher outcomes, unless they occur over a long time span and involve a significant number of hours. The Committee does not expect such exceptions to be the norm, however.

The 1994 reauthorization of the Eisenhower Professional Development Program provided an important push toward increasing the accountability of professional development. Specifically, it outlined the characteristics of high quality professional development and stressed that local schools only fund those activities with such characteristics. A report of the National Evaluation of the Eisenhower Program found reasons to be optimistic, while at the same time highlighted the realities of how much more needs to be done in this area. Testifying before the Committee on Education and the Workforce during the 106th Congress, Dr. Beatrice F. Birman, from the American Institutes for Research (AIR), stated the following regarding the overall quality of professional development under the Eisenhower program: “While on average, districts may have improved some features of their professional development activities since the last reauthorization, the national evaluation’s survey of district Eisenhower coordinators indicates that the features of Eisenhower-funded professional development activities vary substantially across districts.” She went on to discuss how short-term, one-day workshops are still the norm in some districts, and that just over half of teachers in district level programs “reported that participation enhanced their knowledge and skills in curriculum content.” This evaluation has assisted the Committee in raising the awareness of the need to increase the quality of programs assisted with these federal funds. H.R. 1 helps promote the improvement of these programs by setting clear guidelines and requirements for professional development programs.

Troops to Teachers and Transition to Teaching

Despite the fact that as many as two million new teachers may be needed in the next decade, many skilled individuals are prevented from entering the teaching profession because they do not have the time or resources to get a formal education degree or teaching certification. The Troops to Teachers program was designed in 1993 as a partial response to this problem, facilitating the placement of qualified military personnel in classrooms across the country by matching them with school districts that need more instructors, and by providing a stipend as they undergo training and certification. A 1998 National Center for Education Statistics study found that more than 60 percent of Troops-to-Teachers participants were rated by administrators as “among the best,” “well

above average,” or “above average.” H.R. 1 updates and continues the Troops to Teachers program.

In addition, H.R. 1 reauthorizes the Transition to Teaching program. The purpose of this program is to address the need of high-need local educational agencies for highly qualified teachers based on the model of the successful Troops to Teachers program. The Transition to Teaching program aims to recruit, prepare, place, and support career-changing professionals who have knowledge and experience that will help them become high quality teachers. Funds under this program can be used for recruiting; training stipends, and other financial incentives for program participants; assisting institutions of higher education or other providers of teacher training to tailor their training to meet the particular needs of professionals who are changing their careers to teaching; and placement activities for program participants.

TITLE II, PART B—NATIONAL WRITING PROJECT

H.R. 1 authorizes the National Writing Project, which encompasses a network of 161 sites at universities in 47 States. The National Writing Project provides intensive training to teachers in the area of writing. These teachers then return to their schools, where they pass along their knowledge to other teachers. The Committee notes the useful results of the National Writing Project and the fact that it provides a cost-effective mechanism by which to disseminate good teacher practices. In fact, the Project has been found to raise seven dollars for every federal dollar of support. Further, it has been reported to serve over 100,000 teachers every year at a cost of just 80 cents per participant hour.

TITLE II, PART C—CIVIC EDUCATION

H.R. 1 authorizes the Education for Democracy Act. Specifically, the purposes of this program are (1) to improve the quality and student knowledge of civics and government education by educating students about the history and principles of the Constitution of the United States, including the Bill of Rights; (2) to foster civic competence and responsibility; and (3) to improve the quality of civic and economic education through cooperative exchange programs with emerging democracies throughout the world.

This program supports the Center for Civic Education and its education program that encourages instruction on the principles of our Constitutional democracy; the history of the Constitution and the Bill of Rights; congressional hearings simulations; and annual competitions of simulated congressional hearings for secondary school students. It also authorizes the National Council on Economic Education to conduct Cooperative Education Exchange programs that provide curricula and teacher training programs in civics education and economic education, developed in the U.S., for educators in emerging democracies.

The Committee believes that the Center for Civic Education has operated these programs effectively and encourages the Department to continue to utilize the Center for these and other related initiatives.

TITLE II, PART D—TEACHER LIABILITY PROTECTION

Research confirms that teachers have a tremendous impact on student achievement, particularly for low-income students. Yet, in too many cases, teachers are not working in an environment conducive to learning. Violence is a threat for some, while others lack the authority they need to maintain discipline in the classroom.

Between 1993 and 1997, teachers were victims of 1,771,000 nonfatal crimes at school, including 1,114,000 thefts and 657,000 violent crimes. Nearly 65 percent of public school teachers charge that discipline is a “serious” problem in their schools, and about 88 percent think that academic achievement would improve “substantially” if persistent troublemakers were removed from classes.

The problem of enforcing discipline has been compounded by the increasing incidence of lawsuits. In the last two years alone, almost one-third of all high school principals reported being involved in lawsuits or out-of-court settlements, compared with only nine percent ten years ago. And 99 percent of principals say their policy on reporting bad behavior has been modified because of liability costs and concerns.

To help teachers enforce discipline and shield them from meritless and frivolous lawsuits, H.R. 1 contains language to shield teachers, principals, and school board members acting in their official capacity from federal liability arising out of their efforts to maintain discipline in the classroom, as long as they do not engage in reckless or criminal misconduct.

Title III—Education of Limited English Proficient and Immigrant Children; Indian and Alaska Native Education

TITLE III, PART A—EDUCATION OF LIMITED ENGLISH PROFICIENT AND IMMIGRANT CHILDREN

Today there are an estimated four million limited English proficient children in the United States, with only nine percent served under federal Bilingual Education Act programs. The majority of these children are located in five States—California, Texas, New York, Florida, and Illinois. Limited English proficient children are present in almost half of the nation’s school districts (46 percent). Most of these children are served in local, State, and other federal programs that address, at least in part, their special educational needs. The most recent estimate is that States spend at least \$690 million on limited English proficient children for bilingual education and English as a Second Language training. The Elementary and Secondary Education Act (ESEA) Title I program for educationally disadvantaged students is reported to reach 2.1 million limited English proficient children (in 1997–1998 LEP children made up 17 percent of Title I eligible children).

The recurring question is how the federal government can best help local schools and school districts provide the best possible education for these children to ensure they obtain the English language and academic skills they need to succeed. At the present time, under the existing competitive grant program, the U.S. Department of Education decides which schools are in greatest need of assistance and provides funding to local schools and other eligible organizations based on the quality of their applications for as-

sistance. However, since funding for special alternative projects is limited to 25 percent of available funds, the opportunities for funding are severely limited for school districts and other entities that are not seeking funds for transitional bilingual education programs. The structure of the current Bilingual Education Act not only limits alternatives available to local schools, it ignores the fact that States and local schools and communities have a better sense of the needs of local schools with respect to the education of limited English proficient children. States can more closely monitor increases in populations of limited English proficient children in its school districts and can respond more quickly to requests for assistance.

It is the view of the Committee that the existing Bilingual Education Act is in need of reform. Of growing concern is the fact that nationally a large number of Hispanic students do not complete high school. In 1988, 54.4 percent of Hispanic students graduated from high school. In 1996, 55.2 percent of Hispanic students graduated. Considering that almost three-fourths of limited English proficient children speak Spanish, the Committee has great concern that graduation rates for this population of students have not increased considerably between 1988 and 1996. The "federal" approach has been tried for many years, and still dropout rates are far too high for this population of students. The Committee believes limited English proficient children should have the same opportunities for success as other students and that they should be held to the same high academic standards. It is time to let parents, States and local communities determine how to best educate these students.

During the past two Congresses, the Committee and Subcommittee on Early Childhood, Youth and Families held several hearings examining the effectiveness of the Bilingual Education Act. Witnesses at these hearings expressed the need for reform of the current bilingual education programs. Witnesses, including parents, expressed particular concerns about current law practices related to the focus on transitional bilingual education and a lack of parental involvement in deciding whether or not their children should participate in programs structured for limited English proficient children. Celia M. Ruiz, a partner in a law firm representing schools in California on a wide range of civil rights and education law issues, stated in her testimony at a Subcommittee hearing in the 105th Congress:

The school districts I represent today believe that local autonomy is key to meeting the needs of limited English proficient children. We believe that there is more than one way to do that, and that no single approach can serve the needs of all children in our State. Moreover, we trust our local officials to exercise wisely the flexibility and discretion we give them to develop and implement unique and appropriate solutions to the unique needs our communities face. It is for that reason that we reject the efforts of some, in our State and federal departments of education, to externally mandate their preferred "solutions" to diverse and inherently local problems.

The Committee also took note that in June 1998 the State of California voters, by a margin of 61 percent to 39 percent, approved in a referendum an end to bilingual education programs. They instead chose to focus programs for limited English proficient children on teaching children English. This is a clear indication that States have a strong interest in the education of limited English proficient children and that the federal government should not dictate to the States on how best to serve the needs of these students.

By turning decisions on bilingual education over to local schools and States and strengthening parental consent provisions, the Committee believes that decisions will be made by those individuals closest to the children who are in a position to best understand their educational needs.

Formula Grant vs. Competitive Grant Program

The Committee believes a formula grant to the States will best address many of the concerns about current law practices. It will provide States maximum flexibility in deciding where the greatest needs exist for this type of assistance. At the same time, it will focus funds on teaching children and youth English as quickly as possible to allow them to transition into classrooms where instruction is not tailored for LEP children, instead of keeping them isolated from their English-speaking peers.

The formula grant contained in H.R. 1 is focused on supporting State and local programs in the development, implementation, expansion or enhancement of English language instruction programs.

Consolidation of Programs

The Emergency Immigrant Education Act was developed to provide funds to the States to assist in the education of immigrant students who have been in the United States for less than three years. Information on recent program expenditures indicates more than half of the funds have been used on English language instruction or other bilingual education services. Given this, and the fact that there is likely to be a substantial amount of overlap among students served under this program and the Bilingual Education Act, the Committee has combined these two programs in H.R. 1, the No Child Left Behind Act of 2001. The Committee continues to support programs to help meet the educational needs of immigrant children and youth and encourages States to continue providing special services to them. This is one of the primary uses of funds under this Act.

The Committee also does not wish to restrict the types of instructional programs carried out by States and eligible entities. In fact, this bill makes it very clear that such decisions are to be made at the local level, as long as they are consistent with State law. Critics of this proposal have stated that it will eliminate bilingual education altogether. Nothing could be further from the truth. H.R. 1 contains language providing that nothing in this Act shall be construed as requiring a State or a local educational agency to establish, continue or eliminate any particular type of instructional program for limited English proficient children.

H.R. 1 also provides much greater flexibility than current law with respect to the types of instruction provided to English lan-

guage learners. There are no restrictions on the types of instructional programs that can be funded. In fact, an eligible entity could decide to operate transitional bilingual programs for children who are unable to read and write in their native language, and English as a Second Language or structured immersion programs for children who are able to succeed with a moderate level of assistance.

Research on the effectiveness of different methods of instruction has produced a variety of results. There is no clear evidence that any one method of instruction is superior in teaching children English. As such, the Committee believes the federal government should not endorse one practice over another, as is the case with respect to the current Bilingual Education Act. In addition, the Committee does not believe the focus of this legislation should be on the retention of a child's native language. The focus should be on the attainment of the English language and academic proficiency that is the cornerstone for such children to achieve academic success. While there is agreement that fluency in more than one language is a benefit, this clearly is not a function of the federal government. States and local schools and communities have the responsibility for making decisions regarding foreign language programs offered in schools or programs to help children retain their native language. In addition, the role of parents in retaining native language fluency for their children is critical.

The current Emergency Immigrant Education Program is a formula grant program under which States determine which local school districts are in need of assistance and fund projects in such schools. There is no reason to believe States will not be able to make similar determinations if the Bilingual Education Act becomes a formula grant program. It is simply a matter of whether or not we want to continue to allow the federal bureaucracy to make important decisions regarding the education of limited English proficient children or to turn these decisions over to States and local schools and communities.

Parental Consent

The Committee heard from parents and other concerned individuals regarding the placement of their children in bilingual education courses without their permission or knowledge. Parents have also complained that schools have been unwilling to remove their children from such classes upon their request.

According to the United States Commission on Civil Rights report entitled, "Equal Educational Opportunity and Nondiscrimination for Students with Limited English Proficiency: Federal Enforcement of Title VI and *Lau v. Nichols*":

School districts across the country are experiencing serious tensions between school officials and parents over placement. Many parents of students with limited English proficiency are expressing dissatisfaction with the education their children are receiving. For example, in New York City, Maria Perez, a parent who is fighting her child's placement in the city's bilingual education program recently stated: 'What bothered me was that they place children in bilingual programs and keep them there for years and years. They aren't learning English.' The problems that prevent academic success can and should be ad-

dressed by parents working together with school personnel to determine where problems exist and how they can be solved.

The parental consent provisions in H.R. 1 make it very clear that parents should play a major role in determining the placement of their children in English language instruction programs. Schools should not be making decisions regarding the placement of English language learners without exhausting all available means to reach an agreement on such placement with the children's parents. Parents want their children to learn English as quickly as possible because they know it is essential in order to succeed academically and in life. They should be able to prevent their children from being placed in classrooms that they do not believe will help them learn English and succeed in school. Parents should also have the ability to remove their children from such classrooms immediately if they believe it is not in their children's best interest. The Committee agrees with the report of the Civil Rights Commission, parents and schools should be working together to make the best possible decisions regarding the education of English language learners.

For instance, Mr. George Louie, who testified before the Subcommittee on Early Childhood, Youth and Families during the 105th Congress, spoke of his experiences with his son. Mr. Louie's son, Travell, was born and raised in the United States. Yet, he told the Subcommittee that his son was placed in a Chinese bilingual classroom in Oakland, California without his consent or knowledge. He told of over 75 calls he made to school officials. He also met with the administrative assistant to the superintendent and the general counsel in an attempt to have his son removed from this program. According to Mr. Louie: "Their initial response was, 'We will transfer your kid to another school district.'" This was not a satisfactory resolution to the problem for Mr. Louie, who was living on disability and could not afford to take his child on public transportation to another school. At the time the hearing was held on February 18, 1998, Travell was still in a Cantonese bilingual class.

In another instance, Ms. Martha Bujanda, the former director of a community outreach program at the University of Dallas and a former bilingual education student, testified before the Subcommittee on Early Childhood, Youth and Families in the 106th Congress about numerous parents who had children in bilingual education classes. She told of how many of these parents were surprised to learn that their children were not being taught exclusively in English and not attaining English language skills. When they discovered that removing their children from such specialized classes was possible most were intimidated by the thought of having to go to their children's school and formally sign a written request stating their desire to remove their child from the bilingual education program since they themselves did not speak fluent English. She specifically stated that "Even in those rare cases where parents were willing to be proactive with school administrators about this issue, they were often discouraged by guidance counselors and teachers, or were made to feel like outcasts for wishing to place their children in mainstream classes." She went on to discuss how she assisted a parent in removing her seventh grade boy from the bilingual education program at his middle

school, "What I thought would be a relatively easy task, turned into a two and half-hour situation. Disregarding the mother's wishes, the boy's homeroom teacher, guidance counselor, and principal attempted to convince them both that it was in the boy's best interest to remain in the program instead of attending mainstream classes in English."

Accounts such as these pointed out to the Committee the need for greater parental involvement in decisions regarding the education of children who are English language learners.

To this end, H.R. 1 contains provisions that require the parent or parents of children participating in programs under this Act to be informed of: (1) the reasons for identification of their child as being in need of English language instruction, (2) their child's level of English proficiency and how it was assessed, (3) the status of their child's academic achievement and how the program will assist their child to learn English and meet age-appropriate standards for grade-promotion and graduation, (4) what the specific exit requirements are for the program, (5) the expected rate of transition from the program into a classroom that is not tailored for limited English proficient children; and (6) the expected rate of graduation from high school for the program for children in secondary schools.

H.R. 1 specifies that local educational agencies must make a reasonable and substantial effort to obtain informed parental consent prior to the placement of a child in an English language instruction program for LEP children. The bill further provides specific provisions for situations when parental consent is not obtained by requiring LEAs to maintain a written record that includes the date, manner, and specific efforts made to obtain such consent. Such proof of effort must be in an understandable form and mailed or delivered to the parent or parents, including a final request for parental consent for such services, of a child prior to placing the child in an English language instruction program for LEP children. H.R. 1 provides similar provisions for children who have not been identified as limited English proficient prior to the beginning of the school year.

The bill also requires that schools honor a parental request to have their child removed from a bilingual education program immediately should the parent or parents decide they no longer wish their child to participate in such a program. Finally, H.R. 1 provides that schools must allow the parents of limited English proficient children to select the method of English language instruction their child will receive if more than one method is offered.

It is the view of the Committee that parents have the primary responsibility for their children's education. These new changes ensure that the parents of limited English proficient children have the same rights as other parents. In such cases where a response cannot be obtained, the Committee believes limited English proficient children should receive appropriate services without delay.

Testing of English Language Learners and Accountability

H.R. 1 provides that States receiving funds under this program are required to assess LEP students in English who have attended school in the United States for three or more consecutive school years in reading or language arts. However, it does permit a local educational agency to use assessments in another language and

form if they are likely to yield more accurate and reliable information on what students know and can do for one additional year. Such determinations are to be made on a case-by-case basis. The Committee is concerned that there will not be an accurate picture of the progress made by limited English proficient children if they are not tested in the English language.

Further, testing these children will allow local school districts to determine the progress of limited English proficient children in mastering the English language. It will also allow local educational agencies to determine where they may need to improve assistance programs for these children if test scores indicate that children are not making adequate progress towards English language proficiency. The whole point of education programs for English language learners, by whatever method, is to assimilate limited English proficient children into the mainstream of society and the regular education population. Testing children permits schools to monitor whether or not there is any improvement in the child's English language proficiency and provide them with any additional support they may require.

In addition, H.R. 1 holds States and local educational agencies accountable for transitioning limited English proficient children out of specialized programs and into classrooms where instruction is not tailored for limited English proficient children. As stated above, the bill requires States to test all LEP children in English after three years that the student is attending school in the U.S. and if LEP children do not meet adequate yearly progress or are not English proficient after such time, the State may lose up to 20 percent of their total ESEA administrative funds.

The Committee strongly believes that in order to ensure that programs for the education of limited English proficient and immigrant children are serving their intended purpose States should be held accountable for results. Holding States and local school districts accountable for ensuring that LEP children are becoming proficient in English not only ensures that the program is serving its intended purpose, but also ensures that LEP children are becoming proficient in English and therefore are better equipped to have successful and rewarding academic careers.

State and Local Use of Funds

In an effort to best serve the needs of limited English proficient children, H.R. 1 drives 95 percent of available funds to the local level, to be used by eligible entities to provide assistance to children who are limited English proficient. States can use the remaining funds for a variety of activities, although the amount that can be spent on administration is limited to two percent.

In restructuring the Bilingual Education Act, the Committee eliminated the direct funding of professional development programs. However, the Committee recognizes that there is a need for additional teachers and other professionals who are trained to provide services for limited English proficient children. As such, H.R. 1 provides that States can use funds for professional development activities that assist personnel in meeting State and local certification requirements for English language instruction and other activities that provide such personnel with the skills and knowledge necessary to educate LEP children. States can also use funds to

provide scholarships and fellowships to students who agree to teach limited English proficient children once they graduate. In addition, local grantees may use funds to provide professional development to classroom teachers, principals, administrators and other school or community-based personnel to improve the instruction and assessment of limited English proficient children.

States are also permitted to use funds to provide bonuses to subgrantees whose performance has been exceptional in terms of the speed with which children attain English language proficiency. The Committee believes such bonuses will encourage local subgrantees to work even harder to ensure that limited English proficient children are taught English as quickly as possible.

Further, H.R. 1 allows States to use funds to provide other forms of assistance to local educational agencies (LEAs) that do not receive a subgrant under this Act. A growing number of schools are faced with educating limited English proficient children. Many of these LEAs have little or no experience in how to provide quality educational services to children who do not speak English. The Committee feels it is important to provide States the flexibility to use funds to provide assistance to these LEAs, be it technical assistance or curriculum materials. The Committee also encourages States to link LEAs with little or no experience in educating limited English proficient children with schools which provide quality services to these children so they can share information and ideas on how to best address the needs of these children. While the focus of this legislation is on providing assistance to LEAs with large numbers of LEP children, the Committee does not want to overlook the needs of smaller LEAs, where the education of these children is just as important as it is in larger school districts.

In addition to professional development, local entities requesting funds under this Act may use funds to upgrade program objectives and effective instructional strategies, improve the instruction of LEP children by providing for the acquisition or development of education technology or instructional materials, access to and participation in electronic networks for materials, training and communications, and incorporation of such resources in curricula and programs, developing tutoring programs, and providing family literacy services. States are also permitted to fund other activities that assist in the education of eligible children and youth.

Evaluations and Reporting Requirements

In order to follow the progress of the Education of Limited English Proficient and Immigrant Children program, H.R. 1 requires eligible entities that receive a subgrant from a State to provide the State with an evaluation every two years that indicates: (1) the programs and activities conducted by the entity, (2) the progress made by students in learning the English language, (3) the number and percentage of students in the programs and activities attaining English language proficiency by the end of each school year, and (4) the progress made by students in meeting challenging State academic content and achievement standards.

Such evaluations will be used by the States to determine if students served by the program are attaining English proficiency and are meeting challenging State academic content and achievement standards and have achieved a working knowledge of the English

language to permit them to perform well in English in a classroom not tailored to limited English proficient children. These evaluations must assess: (1) oral language proficiency in kindergarten, (2) oral language proficiency, including speaking and listening skills in first grade, (3) both oral language proficiency, including speaking and listening skills, and reading and writing skills in grades 2 and higher, and (4) the attainment of challenging State student academic achievement standards.

Based on these evaluations, H.R. 1 further requires States to report every two years to the Secretary a report on the programs and activities undertaken by the State as to the effectiveness of such programs and activities in improving the education of limited English proficient children.

The Committee firmly believes that in order to ensure that federal programs serve their intended purpose, measures must be in place to assess a program's successes and failures. Requiring States to evaluate and report to the U.S. Secretary of Education on the effectiveness of programs designed to provide services to LEP children in their State, ensures that States will closely monitor the progress of such programs in meeting their intended goals.

Changing the Name of the Office

Currently the name of the office within the Department of Education responsible for the Bilingual Education Act is the Office of Bilingual Education and Minority Languages Affairs. The Committee believes the name of the office should reflect the primary purpose of the program. It has, therefore, renamed the office, the Office of Educational Services for Limited English Proficient Children. Since the primary purpose of this legislation is to provide English language learners with the English language skills they need to perform well in school, the Committee believes renaming the office is appropriate and consistent with the intent of this Act.

TITLE III, PART B—INDIAN AND ALASKAN NATIVE EDUCATION

Background and Committee Views

Programs designed to enhance the educational opportunities for native populations are administered by both the Department of Education under the Elementary and Secondary Education Act (ESEA) of 1965 and the Bureau of Indian Affairs (BIA). Title III, Part B, of the No Child Left Behind Act of 2001 updates and improves these programs as follows.

Department of Education Programs

Programs administered by the Department of Education are designed to provide financial support to reform and improve elementary and secondary school programs that serve American Indian students; improve and enrich the quality of education for Indian students; research and evaluate information on the effectiveness of Indian education programs; and improve educational opportunities for adult Indians. The majority of the funds are distributed under a formula based on the number of Native American children in the LEA or BIA funded schools. For FY 1999, awards were made to 1,120 LEAs, 84 BIA grant/contract schools, and 70 BIA operated schools, and served 460,782 students in 41 States. In addition, the

department administers a number of competitive grant programs to provide supplemental education for Alaska Native children and adults.

In updating and improving these programs, the Committee focused on improving student academic achievement, targeting resources to the programs that are providing the best results, greatly increasing the flexibility of the programs at the local level, reducing the administrative burden placed on participating entities, increasing the amount of aid that actually reaches the classroom, and increasing the emphasis placed on family literacy services for the affected populations. The centerpiece of the Committee's efforts is flexibility coupled with accountability for results. Specifically, the Committee included a new provision allowing LEAs which receive formula grants under Title III, Part B, to commingle all of the federal funding they receive for educating Indian children, regardless of which agency provides it, into one coordinated, comprehensive program to meet the specific needs of Indian children. LEAs that choose to do this will submit a single plan describing how they intend to consolidate funding, and specifying the student academic achievement goals that they will meet. The Committee intends that these entities be given the maximum flexibility in implementing their plans, and expects the Secretary and the head of any affected agency to give applicants their fullest cooperation. The Committee is hopeful that the flexibility provided will allow LEAs to reduce administrative costs while improving educational services to Indian children. Additionally, the Committee has provided increased flexibility in counting eligible children for funding purposes to BIA funded schools. This is consistent with our efforts to reduce administrative burdens placed on grant recipients.

The Committee has also eliminated four unfunded programs under Part B. These programs include: Fellowships for Indian Students; Indian Gifted and Talented programs; Grants to Tribes for Administrative Planning and Development; and Special Programs Relating to Adult Education. In taking this action, the Committee recognizes that none of these programs have been funded since FY 1995, and that two of them have never been funded. This action is consistent with the Committee's philosophy of focusing resources on the programs which are providing the best results, and consistent with its responsibility to set priorities for the Appropriations Committee. The Committee notes that the services that would be provided under these programs to Indian youth and adults are currently funded through other authorities, including parts of this Act, the Higher Education Act, and through programs administered by the Bureau of Indian Affairs (BIA).

The Committee has made significant reforms to programs for Alaska Natives. Specifically, the Committee has consolidated the three competitive grant programs serving Alaska Natives into a single, more efficient and flexible program to improve services.

In an effort to ensure that more of the money provided reaches the classroom and serves the intended students, the Committee has limited recipients of funding under Title III, Part B, to using not more than 5 percent of the funding for administrative costs. This is consistent with the philosophy that a minimum of 95 percent of federal education funds should reach the classroom.

The Committee has also eliminated the Native Hawaiian specific programs formerly authorized under Title IX, Part B, of the Elementary and Secondary Education Act. This action is consistent with attempts to reduce duplication of effort and focus scarce federal resources on those in greatest need. The Committee's rationale for repealing these programs is the fact that similar assistance is available to all students, including Native Hawaiians, under programs such as Title I, the Gifted and Talented program, Even Start, Special Education, the Higher Education Act, and other, broader authorities. Unlike other indigenous populations, Native Hawaiians have a trust, established by the last Hawaiian princess, which exists solely to educate Native Hawaiian children. The Bishop Trust is currently one of the largest charitable trusts in the world, valued in excess of \$ 10 billion, and holds approximately 8 percent of all land in the State of Hawaii as well as a 10 percent share of Goldman Sachs. The Committee urges the Trust to redouble its efforts to educate Native Hawaiian children. The Committee also believes that these children should be given the same opportunities afforded to all of our children under the programs authorized in this and other acts.

Family Literacy Services

Family literacy is a very effective method of stopping the cycle of illiteracy. It not only builds on the literacy skills of parents, but it insures their children will have every opportunity to succeed in school. Family literacy programs throughout the United States assist parents in obtaining the literacy and other skills they need to get a job, reduce their dependence on public assistance, and most importantly, to be their child's first and most important teacher. Family literacy strengthens families. Recognizing this, the Committee has included family literacy services as an allowable use of funds under formula and competitive grant programs authorized under Title III, Part B. The Committee was pleased to recognize the success of the Family and Child Education (FACE) program operated by the Bureau of Indian Affairs. Language included in this legislation makes it clear that family literacy is a use of funds in BIA operated programs. The Committee encourages the BIA to expand the number of family literacy programs in order to ensure positive outcomes for children and their parents.

Bureau of Indian Affairs Programs

The Committee is encouraged that progress continues to be made among Indian students at schools funded by the BIA. The Committee is pleased to note that the tribes and tribal organizations continue to take increased control of the schools that serve their children through contract or grant arrangements with the bureau. The Committee recognizes that, if given the chance, these entities, working with the parents of Indian children, will do a far better job of improving student academic achievement than any federal agency. The Committee is also pleased with the continued growth in attendance at institutions of higher education of Indian students. It is estimated that current postsecondary enrollments are in excess of 130,000. In considering this legislation, the Committee has acted to increase local control of education, and to shift respon-

sibility and authority for education to tribes and tribal organizations.

Currently, bureau funded schools are generally required to meet rigid educational standards established by the bureau. In an attempt to increase local control, this legislation allows schools that choose to do so to become accredited by a tribal, State or regional accrediting body and meet the standards of accreditation rather than those imposed by the bureau. The Committee has modified the section on standards in recognition of the fact that bureau-funded schools have made substantial progress in the last twenty years in their educational programs. In contrast to 1978, when the Committee first acted on this topic and fewer than 2 percent of bureau-funded schools met accreditation standards, today, practically all schools exceed such standards.

The Committee has also included a provision such that if the criteria with respect to accreditation are observed, the local school board and the administrator may choose the standards to be applied. Standards are required to be at least those necessary to meet State standards of the State or region in which the school is located. This does not mean that these standards must be the State or regional standards; rather, State or regional standards would be used as a floor.

In addition, this legislation makes it clear that tribal entities may improve and expand educational programs at bureau funded schools using their own resources. The No Child Left Behind Act of 2001 gives tribes a greater say in repair and maintenance priorities; allows tribes to contract for training services; increases tribal authority to pick service providers for purchasing supplies; and gives tribes and local school boards more flexibility in making school staffing decisions. BIA inspectors will also be required to get a second opinion from an independent source (with tribal input) before fully and finally closing a BIA funded school for health and safety violations.

In keeping with the philosophy of parental choice and local control, the Committee has included a provision to give tribes and parents of eligible students the choice of which bureau funded school their children attend. In carrying out this provision, the Committee expects the bureau's full cooperation in assuring that funding follows the child.

The Committee remains concerned that, despite Congressional direction, the bureau has never established a Division of Budget Analysis within the Office of Indian Education Programs. This legislation mandates the creation of this entity within one year of the date of enactment of the No Child Left Behind Act of 2001. Some are concerned that the bureau's budget requests may not be sufficient to provide a quality education for Native American students. Therefore, in addition to the creation of the Budget Division, the Committee has provided that the Comptroller General examine the funding of these schools in relationship to other comparable facilities, and examine the criteria used by the bureau in developing its budget for education programs.

The Committee has taken a number of actions to modify the school boundaries provisions. All such actions are intended to assure that schools take a proactive stance on identifying and pro-

viding services to all Indian students in their geographic service area.

Finally, the Committee greatly increased the consultation required throughout these Acts. In considering future changes to Indian education programs, the Committee expects that the bureau will take into account the full range of views of all interested parties, and will engage in a consultative process prior to taking action.

TITLE IV, PART A—INNOVATIVE PROGRAMS

Subpart 1—State and Local Innovative Programs

Innovative Education Program Strategies (Title VI under current law) is the most flexible program contained within the Elementary and Secondary Education Act. It is the only formula program that allows recipients to use funds to benefit any and all student populations, in any and all schools. This program is the “innovation money” needed to help schools implement broad based accountability plans that are essential for education reform.

There is ample evidence to demonstrate that this program is meeting the unique needs of States and local school districts as they implement innovative education reform efforts to improve student academic achievement. Pursuant to the requirements of the statute, the Title VI National Steering Committee conducted an evaluation of the effectiveness of Title VI for FY 1998. Forty-four States participated in the survey. The national compilation of survey data summarizes the impact of Title VI on over 19.1 million students in 5,247 public school districts and nearly 1.4 million students in private nonprofit schools. The survey, Title VI Evaluation of Effectiveness, National Summary, 1998, notes that public school districts, as well as private nonprofit schools, allocated the majority of their Title VI funds for library services and materials (including media materials). The second highest use of funds was for computer software and hardware for instructional use. The greatest benefit provided by the flexibility of Title VI at the local level is the ability to use funds to meet locally identified needs without the restrictions inherent in most other federal education programs.

In an effort to increase local control and flexibility of funds under the Innovative Education Program Strategies, H.R. 1 adds additional “uses of funds” to current law to broaden the scope of the program for local educational agencies.

Professional Development

The bill provides for professional development activities and the hiring of teachers, including activities carried out in accordance with Title II that give teachers, principals, and administrators the knowledge and skills necessary to provide students with the opportunity to meet challenging State or local academic content standards and student academic achievement standards. Local educational agencies will now have the flexibility to focus on initiatives they believe will improve both teacher quality and student academic achievement, such as programs to recruit principals and fully qualified teachers; initiatives to promote retention of highly qualified teachers and principals; programs to improve the quality of the teacher force; teacher opportunity payments; professional de-

velopment activities to improve the quality of principals; teacher advancement initiatives that promote professional growth and emphasize differential pay.

Community Service

The No Child Left Behind Act of 2001 provides for community service programs that train and mobilize young people to measurably strengthen their communities through nonviolence, responsibility, compassion, respect, and moral courage. The Committee recognizes the accomplishments of the Do Something organization in engaging students in community-building activities in urban, rural, and suburban school districts around the country. Do Something is a national nonprofit organization that inspires young people to believe that change is possible, and trains, funds, and mobilizes them to be leaders who measurably strengthen their communities. The Committee believes that the inclusion of increased community service opportunities within the Elementary and Secondary Education Act will help to strengthen schools and communities across the nation.

Youth Entrepreneurship Education

H.R. 1 provides for curriculum-based youth entrepreneurship education programs with demonstrated records of empowering disadvantaged youth with applied math, entrepreneurial, and other analytical skills. To be successful, it is the view of the Committee that curriculum-based youth entrepreneurship education programs should include organized academic materials that are sequentially based and which have been field-tested and based on sound educational practices. There is growing evidence that innovative organizations and institutions working to instill entrepreneurial behavior through classroom and practical experiences highly effective in teaching some youth.

Financial Literacy Education

The No Child Left Behind Act of 2001 provides for activities to promote consumer, economic, and personal finance education. Such activities include disseminating and encouraging the best practices for teaching the basic principles of economics and promoting the concept of achieving financial literacy through the teaching of personal financial management skills, including the basic principles involved with earning, spending, saving, and investing.

In order to succeed in our dynamic American economy, young people must obtain the skills, knowledge, and experience necessary to manage their personal finances and obtain general financial literacy. Yet, despite the critical importance of financial literacy to young people, the average student who graduates from high school lacks basic skills in the management of personal financial affairs. A nationwide survey conducted in 1997 by the Jump\$tart Coalition for Personal Financial Literacy, examined the financial knowledge of 1,509 high school seniors. On average, survey respondents answered only 57 percent of the questions correctly and only five percent of the respondents received a "C" grade or better. A similar survey conducted in the spring of 2000 found financial skills declining among 12th graders, with an average of only 52 percent of the questions answered correctly. As a result, many State educational

leaders have recognized the importance of providing a basic financial education to students and have begun integrating financial education into State educational standards.

Mental Health Services

Subpart 1 of Title IV, Part A allows States and local educational agencies to use these funds to expand and improve school-based mental health services, including early identification, assessment, and direct individual or group counseling services provided to students, parents, and school personnel by qualified school-based mental health services personnel. The Committee recognizes that LEAs may find that school-based mental health services are a necessary and appropriate component of improving student learning experiences and outcomes.

In addition to expanding and improving school-based mental health services, the Committee notes that local educational agencies may use funds for eating disorder prevention, awareness, treatment, and education programs. These types of programs can be an effective way to improve the education, health, and well being of students at-risk or suffering from eating disorders.

The Committee also recognizes the continuing advancements in brain science and its application to learning. Consequently, it is the Committee's view nothing in this Subpart shall be construed as limiting or preventing schools or local education agencies to use funds under this Subpart to implement scientifically based research programs that assesses and develop the specific intellectual abilities of students to help them learn more effectively in order to meet State academic achievement standards.

Subpart 2—Arts Education

The Arts Education program (Title X, Part D under current law) supports student competency in the arts by encouraging the integration of arts education into elementary and secondary school curricula. In its deliberations, the Committee has focused on increasing the involvement of local arts educators and State and local arts organizations, and on targeting resources to the programs that are providing results. H.R. 1 updates and improves the program in a number of ways.

The Committee bill continues the Arts Education program at its current funding level. It updates the congressional findings with respect to arts education. In addition, H.R. 1 eliminates a number of outdated references to "Goals 2000," "National Education Goals," and "national efforts," and instead focuses the program on improving school-based programs using State academic standards.

Encouraging Local Participation and Increasing Local Control

The Committee bill maintains the current list of eligible entities, and retains most of the current allowable uses of funds. However, consistent with the Committee's philosophy of increasing local involvement and local control, the focus of collaborative activities allowed under the Act has been shifted away from specific federal agencies and specifically named organizations, to arts educators and arts organizations including State and local arts agencies.

While this legislation does not specifically mention the purchase of instruments or other supplies, H.R. 1 allows local flexibility, and

the Committee believes such purchases are allowable in the event that local schools choose to use program funds in this way.

H.R. 1 eliminates a restrictive special rule which has had the effect of limiting involvement by individuals and local organizations, and replaces it with a requirement that the Secretary consult with arts educators (including professional arts education associations), and organizations representing State and local arts agencies involved in arts education when making grants.

In taking these actions, the Committee highlights the importance of consultation with the individuals and entities that have the primary responsibility and accountability for delivering a quality education in the arts. The Committee notes that there are currently four professional associations representing arts educators: MENC: the National Association for Music Education; the National Art Education Association; the American Alliance for Theater Education; and the National Dance Education Organization. The Committee believes that the Secretary, grant recipients, and ultimately America's children will benefit from this consultative process.

Simplification and Flexibility

H.R. 1 eliminates an outdated funding threshold that required in any year that appropriations for the Arts Education program are below \$9 million, all appropriated funds are to be spent on programs operated by the Kennedy Center and VSA arts. In taking this action, it is not the intent of the Committee to increase or reduce federal funding to any specific entity. Rather, the Committee's goal is to simplify the Act and increase flexibility by eliminating a provision that is no longer necessary or even in effect. The Committee notes that funding for Arts Education has exceeded the \$9 million threshold in each of the four prior fiscal years. During that same time, combined funding under the program for the Kennedy Center and VSA arts has also grown beyond the \$9 million threshold.

The Committee eliminated the Cultural Partnerships for At-Risk Children and Youth program. This program was created as a separate Subpart 2 during the last reauthorization of the ESEA, but has never been funded. This action is consistent with the Committee's philosophy of targeting resources to the programs that are providing the best results, as well as with its responsibility to set priorities for the Appropriations Committee.

Leveraging Funds

Finally, the Committee bill includes a new provision stating that funds provided under this program must be used to supplement and not to supplant non-federal funds used for arts education programs. This provision was added after consultation with arts educators who expressed concern that a few providers might reduce their own efforts if or when federal funding became available. It is the intent of the Committee that initiatives provided for under this program should complement the ongoing efforts of schools and school districts across the country.

Subpart 3—Gifted and Talented Children

H.R. 1 continues the Jacob K. Javits Gifted and Talented program (Title X, Part B under current law). The Committee recog-

nizes that ongoing research, model projects, and exemplary programs are a necessary foundation for quality gifted and talented education programming. The Committee also acknowledges the importance of identifying gifted and talented students who may not be identified and served through traditional assessment methods; mentoring programs; modifications to curriculum; acceleration; distance learning programs; dual enrollment; teacher education; and other educational activities designed to meet the needs of gifted and talented students.

TITLE IV, PART B—PUBLIC CHARTER SCHOOLS PROGRAM

The Public Charter Schools Program provides three-year competitive grants for the planning, program design and initial implementation of charter schools to those States that have a State charter statute. Charter schools are nonsectarian public schools. The “charter” establishing each school is a written performance contract that provides publicly funded support for the school for a specified period of time. The school’s charter gives autonomy over its operation and frees the school from regulations that other public schools must follow. In exchange for autonomy, charter schools are held accountable for meeting the terms of their charters including increasing student academic achievement. Currently, 37 States, the District of Columbia and the Commonwealth of Puerto Rico have passed laws authorizing charter schools.

The Committee strongly believes that charter schools embody the principles of freedom and accountability, and empower parents with the ability to seek out the best education possible for their children. By allowing parents to make decisions concerning their child’s education, they encourage parental involvement. Not only do charter schools encourage academic achievement and parental involvement in their own schools, but they also help traditional public schools to improve. As a result of their freedom to innovate, charter schools provide a valuable source for determining what reforms should be replicated at other schools.

Since the 105th Congress passed the Charter Schools Expansion Act of 1998 (P.L. 105–278), which authorizes the Public Charter Schools program through FY 2004, the Committee also believes that only five noteworthy modifications are in order. First, H.R. 1 clarifies that the definition of a charter school is, among other things, a public school that admits students on the basis of a lottery or in another non-discriminatory manner consistent with State law, if more students apply for admission than can be accommodated.

Second, the bill adds new language prohibiting local educational agencies from deducting funds for administrative fees or expenses from a subgrant awarded to an eligible applicant. The Committee notes that State educational agencies may reserve not more than 5 percent of grants for administrative expenses associated with the grant program. States may use these funds for technical assistance to eligible applicants and operating charter schools either directly, or indirectly, through grants or contracts with charter school resource centers, charter school associations or other charter school support organizations. In some States, eligible applicants and schools have found it beneficial to pool a portion of their grants or subgrants to purchase or provide technical assistance or other serv-

ices provided by charter school support organizations. In both cases, the Committee believes the Department should be responsive to States and schools wishing to exercise such discretion.

Third, H.R. 1 clarifies that an eligible applicant is the actual charter school or school planning group. Applicants must notify their sponsor or prospective sponsor of their interest and submit an application, but a potential sponsor's approval is not needed for an application to be considered. In some States, districts are delaying, preventing or discouraging planning groups and approved schools from applying for planning and start-up grants. The Committee wishes to discourage such action and believes that the Department should be responsive to States wishing to exercise discretion and flexibility in awarding planning grants to charter school developers, without reducing their overall eligibility for start-up grants once the schools actually open.

Fourth, Mr. Hoekstra (R-MI) successfully offered an amendment in Committee, which clarifies that upon written parental consent, a charter school or traditional public school must transfer a student's records to a private school if that student transfers from a charter school or a traditional public school to a private school.

Finally, H.R. 1 removes outdated language authorizing a multi-year study of charter schools that has already been completed, leaving in place general authority to provide for additional evaluations or studies pertaining to charter schools. The Committee recommends that such evaluations or studies include an examination of the extent to which charter schools receive federal funding for which they are eligible. The Committee also notes that the Secretary may use national activities funding to provide information and technical assistance to charter schools, either directly by the Department or indirectly, through State educational agencies, charter school resource centers, charter school associations or other charter school support organizations.

TITLE IV, PART C—MAGNET SCHOOLS ASSISTANCE; WOMEN'S EDUCATIONAL EQUITY

Subpart 1—Magnet schools assistance

The Magnet Schools Assistance Program (MSAP) provides competitive grants to local educational agencies (LEAs) for magnet schools that are designed to reduce, eliminate, or prevent minority group isolation in elementary and secondary schools, and to provide strengthened academic or vocational programs for students. Magnet schools utilize a special curriculum intended to attract students of different races. In order to be eligible for a MSAP grant, a LEA must be participating in a court ordered or voluntary desegregation plan.

The Committee has made a number of revisions to the Magnet Schools Assistance Program, while keeping the basic structure intact. These revisions include an additional emphasis on student academic achievement and a renewed focus on serving magnet schools.

Specifically, H.R. 1 reinstates the program's commitment to student academic achievement by stressing the need to reduce minority group isolation in elementary and secondary schools, and by strengthening the applications and requirements section in relation

to student academic achievement. In addition, the bill allows MSAP funds to be spent on professional development.

As for renewing the program's focus on magnet schools, the bill eliminates two outdated priorities and repeals the Innovative Programs. However, any grant recipient that has an agreement in effect under the Innovative Programs will continue to receive funds through the end of the applicable grant cycle.

Subpart 2—Women's Educational Equity Act

H.R. 1 reauthorizes the Women's Educational Equity Act. This program promotes gender equity in education and provides financial assistance to enable educational agencies and institutions to comply with Title IX of the Education Amendments of 1972 (which prohibits sex discrimination in educational programs and activities that receive federal financial assistance). The program promotes educational equity for women through competitive grants to public agencies, private non-profits, individuals, and through dissemination of materials by a national equity resource center. H.R. 1 authorizes the Secretary of Education to award two types of grants: (1) to develop and implement gender equity programs; and (2) to provide "support and technical assistance" in areas such as teacher training and evaluation of exemplary programs, as well as for research and development.

Title V—21st Century Schools

TITLE V, PART A—SUPPORTING VIOLENCE AND DRUG PREVENTION AND ACADEMIC ENRICHMENT

The Committee held several hearings during the 106th Congress regarding the Safe and Drug-Free Schools and Communities Act and the 21st Century Community Learning Centers Act. These hearings examined the drug and violence prevention needs of our nation's youth, both during school hours and out-of-school hours. Predictably, the Committee found that drug and violence prevention needs across the country varied, as did the successes and shortcomings of drug and violence prevention programs.

Current research shows that youth drug use and violence remains a significant societal problem. Additionally, drug use by youth increases the likelihood that a child will be delinquent, engage in high-risk sexual activity, drop out of high school, and commit theft, violence, and vandalism. Drug use among rural youth is higher than that of youth in large urban centers, and many of these rural youth abuse serious drugs, including methamphetamine and cocaine. The National Center on Addiction and Substance Abuse at Columbia University (CASA) issued in January, 2000 a report, entitled *No Place to Hide: Substance Abuse in Mid-Size Cities and Rural America*, which found that eighth graders living in rural areas are 104 percent more likely to use amphetamines and 50 percent more likely to use cocaine, than eighth graders in urban areas. According to the CASA report, the health, social service, and law enforcement agencies in rural communities are less equipped to deal with youth drug use than their counterparts in urban areas, which already have established drug prevention systems.

Regarding youth violence, schools may be one of the safest places for youth to be, but students continue to report that violence,

gangs, and drugs are prevalent in some schools (National Center on Education Statistics, Indicators of School Crime and Safety, 2000). If students are using drugs, committing violent acts, or are in fear of these behaviors, then they cannot focus their attention on maximizing their academic performance and their future opportunities. While the purpose of schools remains academic, schools clearly must also respond to the safety needs of students and communities. Drug and violence prevention programs and activities are increasingly necessary.

This is not to imply that the Committee believes schools have the sole responsibility for preventing youth drug use and violence. In fact, studies point to the role of the family as the most important factor in preventing youth drug use and violence. The National Longitudinal Study of Adolescent Health (1997) found that drug and violence prevention programs that incorporate “protective factors” tend to reduce drug use and violence. Protective factors include a student feeling connected to parents and family, having parents present at key times of the day, having high educational expectations, feeling part of the school, and having high esteem. The good news is that this comprehensive survey of adolescent youth found that the benefits of these protective factors reached beyond drug and violence prevention to preventing such behaviors as suicide and sexual activity among youth.

Promoting Coordination of Programs Under the Safe and Drug-Free Schools and Communities Act and the 21st Century Community Learning Centers Act

The Safe and Drug-Free Schools and Communities Act was created as the nation recognized that it needed a concentrated and united effort to prevent a generation from being lost to drugs and violence. Congress created the act to assist local schools in their efforts to ensure that every student attends a drug-free and safe school, with the ultimate goal to help students raise their academic performance and achievement.

Originally designed as a school-use facilities program for individuals of all ages, the 21st Century Community Learning Centers Act has evolved rapidly into an after-school program with goals similar to those of the Safe and Drug-Free Schools Act—youth drug and violence prevention. This transformation occurred in large measure due to the Department of Education’s—during the Clinton Administration—absolute priority on “activities that offer significant expanded learning opportunities for children and youth in the community and that contribute to reduced drug use and violence.”

However, the interconnectedness of youth drug and violence prevention and after school activities is not new. In a hearing before the Subcommittee on Early Childhood, Youth and Families on February 10, 2000, Dr. Marianne Kugler, Program Officer of the C.S. Mott Foundation, stated,

During the Depression, Mr. Mott noticed the many youth who spent their time on street comers and in vacant lots playing ball, smoking, and sometimes getting into serious trouble. At a suggestion from the then-Assistant Superintendent, Dr. Manley, Mr. Mott gave his first small community school grants to encourage schools to stay open

after regular hours so that these youth would have somewhere to go.

The Committee believes the interconnectedness between youth drug and violence prevention and after school activities must not be ignored. The Committee acknowledges the findings of reports such as the Departments of Education and Justice's Safe and Smart: Making After-School Hours Work for Kids (June, 1998), that notes: "First and foremost, after-school programs keep children of all ages safe and out of trouble. The after-school hours are the time when juvenile crime hits its peak, but through attentive adult supervision, quality after-school programs can protect our children."

The report also points out that "school-age children and teens who are unsupervised during hours after school are far more likely to use alcohol, drugs, and tobacco, engage in criminal and other high-risk behaviors, receive poor grades, and drop out of school than those children who have the opportunity to benefit from constructive activities supervised by responsible adults."

Through its decision to bring the Safe and Drug-Free Schools and Communities Act and the 21st Century Community Learning Centers Act into the same title of the Elementary and Secondary Education Act, the Committee seeks to encourage State and local government officials, school administrators and teachers, community and religious organizations, and parents and students to work together to develop a unified approach to youth drug and violence prevention and education efforts and to improve the quality of these federally supported efforts. Only by coordinating activities and defining goals can the full benefits of federal funding be realized.

Safe and Drug-Free Schools and Communities Act

Title V of H.R. 1 maintains the federal funding formula for the Safe and Drug-Free Schools and Communities Act. The bill provides separate authorizations for the States and for the Secretary of Education; \$475,000,000 and \$60,000,000 in FY 2002 respectively. The States receive funds through a formula grant based 50 percent on the school age population of each State and 50 percent based on the amount each State receives under Title I, Part A. Of the funds a State receives, the bill provides that up to 20 percent may be reserved by the governor to fund competitive grants to local educational agencies, community-based organizations, other public entities and private organizations who operate drug and violence prevention programs. Unlike current law, governors will no longer be required to spend a portion of their funds for law enforcement education partnerships such as Project Drug Abuse Resistance Education (DARE). While maintaining such programs as an allowable use of State funds, the Committee seeks to increase the flexibility of States and governors to fund programs they expect to be successful for their populations.

H.R. 1 also authorizes the State to reserve up to one percent of the federal grant for administrative expenses and four percent for State activities including planning, development, and implementation of capacity building, technical assistance, evaluation, program improvement services, and activities promoting the coordination of services among local educational agencies as well as data collection.

The remainder of the funds must be sent to local educational agencies by formula. The formula reflects the Committee's desire—evident throughout H.R. 1—to target federal resources to schools with high proportions of low income students. The Committee does not intend to imply that drug abuse and violence are only persistent at such schools. Instead the Committee seeks to assist local educational agencies that tend to have more difficulty accumulating financial resources than more affluent areas.

The State-to-local formula is based 60 percent on Title I funds and 40 percent on population. In order to receive funds, a local educational agency must submit an application to the State which includes a detailed explanation of the LEA's drug and violence prevention plan, including how it will support academic achievement, be coordinated with other drug and violence prevention programs, and be targeted to serve the schools and children with the greatest needs for drug and violence prevention programs. The Committee has also asked local educational agencies to develop performance indicators tied to the Principles of Effectiveness (see below) to ensure that programs funded under this part produce results. Local educational agencies will also be required to have a student code of conduct policy in place in order to receive a grant.

The funds received by the local educational agencies may be used for a variety of drug and violence prevention activities (up to one percent may be used for local administrative expenses). Authorized activities include drug and violence prevention programs tailored to the academic and developmental level of the targeted children; prevention training for parents and school personnel; law enforcement and security activities; mental health services; activities that reduce truancy, suspensions, and expulsions; and emergency intervention services following traumatic crisis events. Additionally, the Committee has included language which will promote public information about the safety of local schools and allow those students trapped in unsafe schools to attend another public school which is safe. Specifically, States are required to develop, in consultation with a representative sample of local educational agencies, a State-wide definition of "persistently dangerous schools". Students who attend schools that meet the definition of "persistently dangerous schools" must be allowed to transfer to a safe public school. The local educational agency must also cover reasonable transportation and tuition costs for students who exercise the option of transferring. In addition to students who attend "persistently dangerous schools," any student who is the victim of a violent criminal offense while their school would also have the right to attend another safe public school.

Mental Health Services

The Committee has done much to address the mental health needs of youth. The Committee believes that the primary purpose of schools is to further student academic achievement and that schools should not be held responsible for providing mental health services. Nevertheless, the Committee does recognize that some schools and communities may find it appropriate and necessary to provide mental health services to students. This is a local choice and not a requirement to be imposed upon schools. In order to assist youth in need of mental health services, the Committee has

maintained the provision allowing funds to be used for counseling services. To address the growing mental health needs of youth, the Committee has added a provision allowing funds to be used to expand and improve school based mental health services. Effective mental health services help to reduce classroom disruptions, deter students from delinquent behavior, and help students avoid distraction from learning. These provisions fit nicely with the counseling provisions in Title V, Part A (the Fund for the Improvement of Education) that support best practices in elementary and secondary school counseling demonstration projects.

The Committee included a definition of school-based mental health services providers in Title V. While some have called for the federal government to set a national professional qualifications standard for school-based mental health services providers, the Committee does not find that appropriate. Instead, the Committee prefers to allow State law to determine what professional qualifications are necessary to provide school-based mental health services. Leaving this decision to State law will allow local communities to provide the appropriate range of services for youth by appropriate providers.

21st Century Community Learning Centers Act

The 21st Century Community Learning Centers Act has proven to be one of the most popular programs among school administrators and educators. The flexibility in focus, funding, and administrative requirements allow those with the greatest understanding of community needs to design programs that meet those needs. While the Committee did receive testimony which raised some questions about the program, the vast majority of 21st Century programs are popular and effective. The Principles of Effectiveness (see below) included in this Subpart are likely to improve results further.

The 21st Century program was created as a grant program administered directly by the U.S. Department of Education. Local educational agencies wishing to receive a grant applied directly to Washington. This detached process has the potential to reduce the quality of programs and, despite legislative direction, skew the distribution of funds among the 50 States as well as among rural, suburban, and urban populations. In order to drive decision-making processes back to States and local communities, the Committee charges States with distributing funds under this Subpart through competitive grant programs run by State educational agencies. The Committee would encourage Congressional appropriators to allow States to administer grants and would discourage the continued practice of earmarking funds for specific grantees in annual appropriations legislation. Only by allowing all applicants to compete fairly, without the intervention of Congress in the application process, can we ensure that quality programs will be supported.

The Committee wants to acknowledge significant contributions by the private sector to this program. For example, the Charles S. Mott Foundation in Flint, Michigan has invested significant financial resources in providing technical assistance and training to grantees and prospective grantees under this program. The Committee encourages continued and additional private sector support for this program.

The Committee also provides additional flexibility to the competitive grant process and to grant recipients in operating their programs. Under current law, the Department of Education is allowed to make grants only to local educational agencies. H.R. 1 authorizes grants to “community-based organizations, and other public entities and private organizations” as well as local educational agencies. Under H.R. 1, States will also have the authority to determine the length of the grant as long as it exceeds three years, but is not more than five. Under current law, all grants are three year grants. Finally, States will be authorized to require grant recipients to match the State grant. The Committee has included limits on what a State can require a grantee to contribute, which protects grantees with limited resources or who propose to serve communities with significant need. Significantly, under no circumstances may a State discriminate against a grant applicant because of the applicant’s inability to provide matching funds. The matching fund requirement will allow States, in some circumstances, to enhance the resources supporting local programs.

Maintained in the 21st Century Community Learning Centers program is its emphasis on community consultation and involvement. H.R. 1 strongly encourages meaningful consultation with the community over the needs that should be addressed by the 21st Century program. Included as part of this effort should be consultation with business, school and community officials.

Grant recipients will also find additional flexibility in the 21st Century Community Learning Centers program under H.R. 1. Grantees will have more flexibility in designing their programs to meet local needs. Under current law, grantees are required to include at least four different activities enumerated in the law in their programs. While the intent was to ensure that the programs met a variety of community needs, the Committee believes the changes made by H.R. 1 will better focus programs on needs they can properly address.

Under H.R. 1, grant recipients will be required to simply establish or expand community learning centers that provide extended learning opportunities and additional recreational activities to students. In order to provide direction to grant recipients, the Committee has included a variety of authorized activities including remedial education activities; math, science, arts, entrepreneurial, or technology education activities; recreational activities; mentoring and tutoring services; expanded library hours; programs that promote parental involvement; and programs that provide assistance to students who have been truant, suspended, or expelled. The authorized activities included in the legislation are not intended to be an exhaustive list of allowable uses under the 21st Century Community Learning Centers program. Any program that provides extended learning opportunities to students, meets community needs, and is focused on academic activities that help children meet State academic content standards are encouraged and allowed.

Principles of Effectiveness

The Committee included in H.R. 1 “Principles of Effectiveness” to guide the implementation of programs in the Safe and Drug-Free Schools and Communities Act and the 21st Century Community Learning Centers Act. These principles are similar to those being

implemented through Department guidance for the Safe and Drug-Free Schools and Communities Act since 1998. The Principles of Effectiveness establish a basic set of considerations for a school or community to make when determining their needs under Title V programs. First, the school or community must assess the problems among youth, the current prevention strategies targeting youth, and the academic achievement of youth. Second, the Principles call for any program or activity to be based on performance measures for a drug free and safe learning environment or ensuring the availability of quality extended learning opportunities. Third, each program or activity must be based on scientifically based research that provides evidence that the program will have effective outcomes. Finally, the program or activity must undergo a periodic evaluation of effectiveness.

The Principles of Effectiveness promote best practices in programs and activities funded under this Title. Codifying these principles is essential to encouraging improvements in the program quality. In its request for public comment on July 16, 1997, the Department of Education gave a very succinct rationale for why the Principles should be adopted. It wrote, "The administration also has a responsibility to promote the most effective possible use of these limited resources, which in many instances are the only funds available to local schools to address their youth drug and violence problems."

The definition of scientifically based research requires that a program satisfy several elements of quality research, including that the program be tested through "rigorous, systematic, and objective procedures to obtain valid knowledge relevant to youth drug and violence prevention activities and programs." The definition of scientifically based research and the rigorous, but attainable, standard it sets are essential to ensuring program quality under Title V, and will have the greatest impact on improving the quality of these programs implemented in local schools and communities.

While some may be concerned that this definition sets a standard that all but a few programs will fail, the evidence is to the contrary. In just one project, "Science-based Practices in Substance Abuse Prevention: A Guide," developed by the Center for Substance Abuse Prevention (CSAP) in the Substance Abuse and Mental Health Services Administration, at least 75 programs of youth drug and violence prevention, including before and after school activities, were found to meet the high standards of "scientifically based research." These are not the only programs that fit this standard. In another project, CSAP reviewed program outcomes and evaluations in order to determine whether the program is worthy of inclusion in the National Registry of Effective Prevention Programs. The Committee concludes that schools and communities should not be concerned about a lack of quality model programs.

The Committee also recognizes that innovation in youth drug and violence prevention programs and activities must be encouraged and supported. For this reason, the Committee included a waiver to the scientifically based research requirement. Grantees may apply to the State for a waiver of the scientifically based research requirement "to allow for innovative activities or programs that demonstrate substantial likelihood of success." The Committee intends that waivers be used to encourage the development of new

approaches to youth drug and violence prevention. While a State should provide waivers to worthy programs, it should also require that programs receiving waivers undergo scientifically based research evaluation in order to judge the quality of the program in future funding applications.

The Committee believes that consideration of factors presented in studies such as the National Longitudinal Study of adolescent Health can greatly assist local schools in their development of innovative approaches to youth drug and violence prevention. That study, cited in the *Journal of the American Medical Association* of September 10, 1997 (pp. 823–32), provides information on the characteristics of students who successfully avoid drugs and violence and the characteristics of those who do not. This scientifically based study is nation-wide and ongoing, ensuring an up-to-date, comprehensive view of the health of our nation's youth. Schools can use information such as this when they consider the needs of their students and how to design the best prevention program for their students.

The Safe and Drug-Free Schools and Communities Act programs and activities have a history of questionable effectiveness. To begin with, the Act has suffered from a lack of program evaluation. The General Accounting Office, reporting on the lack of evaluation information in October of 1997, stated that the "lack of uniform information on [Safe and Drug-Free Schools and Communities Act] program activities and effectiveness may, however, create a problem for federal oversight." (Safe and Drug-Free Schools: Balancing Accountability with State and Local Flexibility. GAO/HEHS-98-3)

Other researchers have found that the Act has been poorly implemented. An evaluation of Safe and Drug-Free Schools and Communities Act programs found that few schools implemented programs proven effective through research, and that few had even evaluated the effectiveness of the programs they were using (E. Suyapa Silvia and Judy Thorne, *School-based Drug Prevention Programs: A Longitudinal Study in Selected School Districts*, Research Triangle Institute, Research Triangle Park, NC, 1997). The reasons found for not implementing quality programs include lack of sufficient funds, heavy marketing of poor prevention activities, and lack of adequate teacher training to properly implement programs.

National Activities

The Committee purposefully rewrote the Secretary's national programs authority from the current Safe and Drug Free Schools and Communities Act. In Title V, the Secretary's program authority is narrowly focused on those activities for which States and local educational agencies have reported needing assistance. These activities must fall within scientifically based evaluations of prevention programs, assistance in dissemination of drug and violence prevention information, and technical assistance to States, local educational agencies, and other grant recipients.

Throughout H.R. 1, the Committee has sent a greater percentage of funds and more program authority down to the local level. Title V is certainly no different. The Committee believes that the federal government can provide assistance in youth drug and violence prevention, but the responsibility for establishing prevention programs and setting priorities for prevention programs should remain at the

local level. This philosophy supports a locally created drug and violence prevention effort, rather than a nationally driven agenda and related initiatives.

H.R. 1 takes a constructive approach toward preventing hate crimes and prejudice and intolerance. It allows local funds to be used for promoting positive behaviors in students.

Specifically, it allows funds to be used for activities and programs regarding character education, including teaching honesty, citizenship, courage, justice, respect, personal responsibility, and trustworthiness. Additionally, funds may be used to develop education programs that prevent school-based crime, including preventing crimes motivated by hate. In addition, the Committee specifically prohibits any programs or publications that abridge or infringe upon the constitutionally protected rights of free speech, religion, and equal protection.

Gun Free Schools Act

The Committee retains the current Gun Free Schools Act requirements. Current law requires a State that receives federal ESEA funds to have a State law requiring local educational agencies to expel for a year a student who brings a gun to school. H.R. 1 makes minor changes to the Gun Free Schools Act. It eliminates the section that requires the Secretary to disseminate policy guiding the implementation of the Act and its connection to the Individuals with Disabilities Education Act (IDEA). Additionally, it codifies the current practice of exempting home schools from the Act, by stating, "The term "school" does not include a home school, regardless of whether a home school is treated as a private school under State law." Finally, the Committee has incorporated the suggested clarifications included in a report on the implementation of the Gun Free Schools Act by the U.S. Department of Education's Office of the Inspector General.

Definitions

It has been brought to the Committee's attention that some schools believe they cannot use current Safe and Drug Free Schools and Communities Act funds for activities to prevent the use of inhalants. This is a mistaken belief. The Committee intends that schools continue to have the ability to use Title V funds for activities to prevent the use of inhalants. Communities across the nation are facing a growing problem of youth using inhalants. Because they are uncontrolled, common household products, inhalants are easily accessible by youth. Coupling this with the lack of knowledge of the deadly effects of inhalant use results in a dangerous situation. The Committee urges schools and communities to add inhalant use to their drug and violence prevention programs and activities.

Second, the Committee has included in the term "drug and violence prevention" a reference to before and after school activities and continuing education activities. These are "educational activities for individuals of all ages in the community that operate with a goal of drug and violence prevention in the school or community." The Committee notes that this definition is key to understanding how it intends before and after school programs and continuing

education activities to operate in the context of drug and violence prevention.

Third, the Committee wishes to clarify that the term “school personnel” includes school bus drivers because it includes “other support staff who are employed by a school or who perform services for the school on a contractual basis.” Student drug use and violence is not confined to the school building, and can easily occur while students are on the school bus traveling to and from school. The Committee encourages schools to include school bus drivers in their drug and violence prevention strategies and training.

Wrong and Harmful Message

The Committee has become aware that some local schools, in implementing their drug prevention activities, are not conveying the message that “the use of drugs is wrong and harmful.” For instance, the Committee has reviewed an article published February 26, 2000 in the San Diego Union-Tribune reporting that a program funded under the Safe and Drug-Free Schools and Communities Act teaches that “drugs are likely to remain a part of American culture and the key measure of success of any drug education program should be a reduction in drug problems, not abstinence.” The Committee strongly disagrees with this perspective. Students need clear and consistent messages that teach them to resist drug use because the use of drugs is wrong and harmful. Students are not well served by confusing messages. To remedy this situation, the Committee has included in the governor’s application and the local educational agency application a requirement to provide an assurance that drug prevention programs and activities funded under the Safe and Drug-Free portion of Title V convey a “clear and consistent message that the use of drugs is wrong and harmful.”

Parental Consent

H.R. 1 also requires a local educational agency, upon written notification from a student’s parent, to withdraw the student from any program or activity funded under the Safe and Drug-Free part of Title V. Under the amendment, the local educational agency must make reasonable efforts to inform parents of the content of non-classroom instruction funded under Title V. The Committee believes that with the variety of activities a school can implement under Title V, including services such as mental health services, that it is wise to ensure that parents are aware of the services a child receives and has the option of withdrawing their child from such programs.

TITLE V, PART B—ENHANCING EDUCATION THROUGH TECHNOLOGY

The Committee firmly believes that technology can be a powerful means for improving student academic achievement. In fact, States and local school districts are already experimenting with promising technology programs—everything from online research to distance learning. The Committee believes that such innovation should be encouraged by the federal government and bolstered by federal funding. However, the Committee also believes that technology is not a means unto itself, and that it needs to be fully integrated into the curriculum in order to increase student academic achievement.

According to the General Accounting Office, there are 35 federal programs spread across eight federal agencies that may be used as a source of support for telecommunications and information technology in schools and libraries. Unfortunately, despite the significant increase in the number of educational technology programs, little has been learned as to what works and what doesn't. Moreover, according to a recent survey by the National Center for Education Statistics, only 20 percent of American teachers feel prepared to use new computer applications and know how to integrate them into their teaching and classrooms.

Great strides have been made to ensure that schools have access to technology and the Internet, but clearly more needs to be done, especially in the most disadvantaged communities. Similarly, as technology has begun to play a larger role in schools, more attention has been paid to the fact that teachers need to be given proper training in how to best use technology in teaching. National, State and local educational technology efforts have begun shifting in the direction of preparing teachers in using this new tool, but as the Web-Based Commission and others have pointed out, more needs to be done.

To help further the effort to integrate technology into teaching, make sure teachers know how to use technology in their teaching, and increase access to technology, the Committee has made several significant changes to the current technology programs under the Elementary and Secondary Education Act (ESEA).

Increasing Flexibility at the Local Level

One of the most noteworthy changes is the consolidation of all the existing ESEA technology programs (except for Ready-To-Learn Television and the Telecommunications Program for Mathematics) into a single performance-based grant program that sends more money directly to schools. These consolidated programs include the Technology Literacy Challenge Fund, the Local Innovation Challenge Grants, Regional Consortia, Technology Leadership Activities, Preservice Teacher Training in Technology, Community-Based Technology, and Star Schools. With a single performance-based technology program, schools will no longer have to submit multiple grant applications to obtain education technology funding. In addition, the funds will no longer be segmented so that comprehensive education technology strategies will be easier to implement.

With the funds provided under this title, schools will have the ability to focus on projects and initiatives which best meet their particular needs within a framework established by States. This recognizes the fact that every school district is at a very different level in its use of technology in the classroom. While some schools have just begun to acquire computers, others will choose to focus these funds solely on ensuring teachers have the skills and support necessary to effectively use technology. The Committee believes the flexibility provided under the Enhancing Education Through Technology initiative is significant because it recognizes these differing needs.

Improving Student Academic Achievement

The Committee believes that if technology is properly integrated into the classroom, it can greatly enhance the degree to which cur-

ricula and instruction are engaging and individualized. This type of integration provides real-time and real-world content and exploration, and promotes student collaboration and problem solving. It also encourages students to become technologically literate, a crucial skill in the 21st Century.

For example, in 1990, West Virginia implemented the first stages of the Basic Skills/Computer Education (BS/CE) program. Their success is often cited as the primary example of how technology—when implemented with the right focus—may have the potential to improve student academic achievement.

A 1999 study commissioned by the Milken Exchange on Education Technology, entitled “The West Virginia Story: Achievement gains from a Statewide comprehensive instructional technology program,” found several positive aspects of the BS/CE initiative. In particular, the study found that “the more students participated in BS/CE, the more their test scores rose on the Stanford 9.” The report also found the, “BS/CE was more cost effective in improving student achievement than (1) class size reduction from 35 to 20 students, (2) increasing instructional time, and (3) cross age tutoring programs.” One of the main reasons cited for West Virginia’s success was the program, “clearly articulated goals focused upon increased student achievement in reading, mathematics and composition.”

Enhancing Education Through Technology draws from the success in States like West Virginia by ensuring the first and foremost focus of these funds is to implement technology for the purpose of improving student academic achievement. Specifically, States and local school districts receiving these funds must include in their plans a description of how funds will be used to improve student academic achievement. In addition, State and local funds may be used for developing and implementing enhanced performance measurement systems in order to determine the effectiveness of technology in improving student academic achievement.

The Committee also recognizes the ability of schools to use these funds for projects that focus on core academic subjects, along with components that may include practical applications of those subjects. This Part also includes funds for the Secretary of Education to conduct a much needed independent, long-term study, utilizing scientifically based research methods and control groups, on the effectiveness of the uses of educational technology on improving student academic achievement. The Committee urges the Department to consult with appropriate agencies, such as the National Science Foundation, in conducting this evaluation.

Increasing Access to Technology

The nationwide increase in access to technology has been significant. In 1994, just 35 percent of schools had Internet access but, by 1999, this had risen to 95 percent. This high percentage held true even in schools where more than 70 percent of the children received free or reduced price school lunch. During this same period, the percentage of instructional rooms with Internet access increased from just three percent to 63 percent. Additionally, the student-per-computer ratio dropped from 12 to just nine. However, in both of these indicators, schools in the highest poverty areas were far less likely to have computers in every room (just 39 percent)

and the student-per computer ratio remained relatively high at 16 to one (National Center for Education Statistics, "Internet Access in U.S. Public Schools and Classrooms 1994–99," February 2000).

These figures indicate that although there have been tremendous gains over the past several years in expanding access to technology, students in the poorest school districts are still lagging far behind the national average. It is for this reason that the Enhancing Education Through Technology initiative's new performance-based grant program targets funds to those schools with the greatest need.

At the federal level, 95 percent of the consolidated funds are provided to the States through a formula based 50 percent on the State's school age population and 50 percent on Title I. The Secretary may spend the remaining five percent on evaluations, technical assistance, and programs of national significance. At the State level, States may spend five percent on activities such as providing technical assistance and funding innovative programs. From the remainder of the State's allocation, 95 percent of the funds are to be directed to local educational agencies. Of the total funds going locally, 60 percent is distributed through a State formula based 100 percent on Title I, while the remaining 40 percent is competitively distributed by the State. Funds may be used for increasing access to technology (particularly in high-need schools), improving teacher professional development in technology, and/or promoting innovative State and local initiatives that use technology to increase student academic achievement. Under the current program, nearly 42 percent of funds are awarded through a grant process by the Secretary as opposed to a formula for all States.

This targeting of funds is a departure from the current practices under the two major ESEA technology grant programs. A recent GAO study (U.S. General Accounting Office, GAO/HEHS-00-55, *Education Discretionary Grants: Awards Process Could Benefit from Additional Improvements*, March 2000), reported that of 20 current grants under the Technology Innovation Challenge Grant program, none had been reported as being awarded to grantees with greater than 51 percent poverty. In addition, the Department of Education reported in its recent program performance report, that only 27 States reported awarding 66 percent or more of their FY 97 funds under the Technology Literacy Challenge Fund (TLCF) to districts they designated as high-poverty (U.S. Department of Education Volume II—Individual Programs: 1999 Performance Reports and 2001 Plans, March 2000, Washington, D.C.). The Enhancing Education Through Technology initiative will ensure more funds get to the schools that are most in need of obtaining and using education technology.

Using Technology to Increase Access to Rigorous Coursework

An important use of funds under this program is to give students access to the highest quality teachers and courses possible, regardless of where in the State the students live. Using distance-learning technology, many communities are already reaching beyond the walls of their local schools to tap the best talent and curriculum the State has to offer. The Enhancing Education Through Technology initiative recognizes the impact this is having around the

country, but also the potential to reach even more students, and makes funds available under this part for such technology.

Students may be limited in their choice of course offerings due to geographic remoteness, or simply a lack of resources at their school to offer challenging courses. In this age of advanced technology and interconnectivity, no child should have to settle for not having access to advanced placement (AP) courses or advanced mathematics, science, or other courses simply because they live in a remote or rural community, or in a poor school district. Often, lack of access to these rigorous courses can determine the likelihood of going on to college. Distance learning technology can bring in the best teachers and courses from any part of the State, and help schools. The Committee encourages the use of computers, video conferencing technology, and other distance learning technology to increase access for all students to the best teachers and curriculum a State has to offer.

Enhancing Professional Development in Technology for Teachers

The Committee believes that the teachers themselves must feel comfortable with the technology at hand, and until they do, further expenditures in technology are, by and large, misplaced. For this reason, under the Enhancing Education Through Technology initiative, local school districts are required to use at least 20 percent of their funds from a given grant, to provide—

. . . sustained and intensive, high-quality professional development, based on scientifically based research, in the integration of advanced technologies (including emerging technologies) into curriculum and in using those technologies to create new learning environments . . . which effectively prepare students to meet challenging State academic content and student academic achievement standards.

Protecting Students From Harmful Material on the Internet

The Committee strongly believes that it would be irresponsible not to require blocking or filtering technology if a local educational agency or school chooses to use ESEA funds for Internet access under this part. The goal of this particular part is to provide technology to schools in order to improve student academic achievement, not to expose students to pornographic images and other harmful materials.

Therefore, the Enhancing Education Through Technology initiative maintains the current legal requirement that recipients of funds must have technology in place for the protection of minors, to filter or block obscenity, child pornography, and material that is harmful to minors. For adults, recipients of funds must have in place technology to filter or block obscenity and child pornography. It also allows ESEA technology funds to be used for the purchase of blocking or filtering technology.

Ready To Learn, Ready To Teach

During the mark up of H.R. 1 in Committee, Mr. Fletcher (R-KY) successfully offered an amendment, co-sponsored by Mrs. Roukema (R-NJ) and Mr. Wu (D-OR), to restore the “Ready To Learn Television” program under a new Subpart in Title V entitled

“Ready To Learn, Ready To Teach.” The Ready To Learn Television program authorizes the Secretary to award grants to or enter into contracts or cooperative agreements with nonprofit entities (including public telecommunications entities) to develop, produce, and distribute educational and instructional television programming and support materials for preschool and elementary school children and their parents.

Under this Subpart, the Secretary is required to fund the Ready To Learn Television program and may also fund the development of digital content and a national telecommunications-based program to improve the teaching of core academic subjects (similar to that of the Telecommunications Demonstration Project for Mathematics). The amendment also includes new language, which ensures that an eligible entity must have the capacity to negotiate contracts in a manner that returns to the program an appropriate share of any ancillary income from the sales of any program-related products.

TITLE V, PART C—CHARACTER EDUCATION

With the growing concern for the safety of students and teachers in our schools, many have looked to character education in the schools as a solution. Making appropriate and good choices in life relies upon a strong character, yet some children do not get much guidance or support for character development. Supporting the ethical, social, and emotional development of children will help to create better schools and a more compassionate and responsible society.

Research indicates that character education can help to improve behavior and academic achievement. A University of Illinois study of four schools using the “Positive Action” character development program found that the average number of incidents requiring disciplinary referral dropped by 74 percent after one year, and achievement scores improved by an average of 28 percentage points. Standardized test scores of students exposed to the “Responsive Classroom” program, which emphasizes good character, increased 22 percent on average, versus just three percent for students not participating in the program. A 1997 study demonstrated that students trained in “Second Step,” a character-based violence prevention program, used less physical aggression and engaged in more pro-social interactions than peers who were not exposed to the character curriculum.

Although character education has traditionally been a component of American education, the number of schools specifically teaching it has increased over the past few years. More than 70 percent of States support character education through federally funded pilot programs or legislative measures. Federal funding for character development programs totaled about \$9 million in grants for States or districts for fiscal year 2001. In addition, current federal regulations limit the number of States that can receive grants each year to 10.

H.R. 1 removes the limit of 10 character education grants per year and the maximum award of \$1 million to States, and instead authorizes the Secretary to make up to five-year grants to States, LEAS, or consortia of educational agencies for the design and implementation of character education programs. Under current law,

character education programs are authorized as part of a group of programs under the Fund for the Improvement of Education. H.R. 1 authorizes character education as a separate, stand-alone program at \$25 million (nearly tripling the amount of current funding).

Specifically, H.R. 1 authorizes the Secretary of Education to award grants to State educational agencies, local educational agencies, or a consortia of such agencies for the design and implementation of character education programs that can be integrated in State academic content standards and can be carried out in conjunction with other educational reform efforts. Each agency or consortium may contract with outside sources, including institutions of higher education and private and nonprofit organizations (including religious organizations), for assistance with evaluation, developing secular curricula, and integrating secular character education into the curriculum and teaching methods. H.R. 1 ensures that decisions about character education and curriculum are made at the local level and involves individuals who have daily contact with students. In developing local character education programs, each recipient of assistance must take into consideration the views of the parents of students when selecting elements of character that will be taught under the program. Elements of character selected under the program may include the following: trustworthiness, respect, responsibility, fairness, caring, citizenship, and giving.

The Committee supports the efforts of President Bush to improve the academic achievement of our nation's youth and his plan for improving our student's character. As Governor Bush noted in 1999, "Yes, we want our children to be smart and successful. But even more, we want them to be good and kind and decent. Yes, our children must learn how to make a living. But even more, they must learn how to live, and what to love. 'Intelligence is not enough,' said Martin Luther King, Jr. 'Intelligence plus character—that is the true goal of education.'"

TITLE V, PART D—ELEMENTARY AND SECONDARY COUNSELING PROGRAMS

During Committee consideration Mrs. Roukema offered an amendment, which was adopted, to reauthorize the Elementary School Counseling Program, currently located in Title X of ESEA. The amendment authorized such sums as necessary to carry out the program in which the U.S. Department of Education makes grants directly to local educational agencies to increase the access of students to qualified school-based mental health professionals.

TITLE V, PART E—MENTORING PROGRAMS

During Committee consideration, Mr. Osborne offered a "Mentoring for Success" amendment, which was adopted, to encourage schools and communities to be involved in the formation of mentoring programs. The amendment creates a new federal program for competitive grants from the U.S. Department of Education to local educational agencies, community-based organizations, or partnerships of the two. All the funding goes to the local level for local decision-making.

Research proves that mentoring works. Evaluation research completed by Public/Private Ventures scientifically demonstrated what most of us know through experiences—that mentoring dramatically improves the lives of children. Youth with mentors are 46% less likely to begin using illegal drugs, 52% less likely to skip school, and 33% less likely to get into fights. Students with mentors reported greater confidence in their performance at school and better relationships with their families. In the United States, about 14 million youth under 18 are defined as “at risk” of getting into trouble and in need of a caring adult in their lives. However, today there are only approximately 500,000 youths in mentoring relationships.

Title VI—Impact Aid

During the 106th Congress, the Impact Aid Reauthorization Act of 2000 was enacted as part of the Floyd D. Spence National Defense Authorization Act for fiscal year 2001. Substantial changes were made to the Impact Aid program in this reauthorization act. However, after the bill was enacted into law (P.L. 106–398) new data and information was received that revealed some of the changes implemented did not serve their fully intended purpose. H.R. 1 includes the technical changes needed to correct these oversights as well as technical corrections to the Impact Aid construction program.

Technical Changes to Section 8002 (Payments for Federal Acquisition of Real Property)

As enacted in the 106th Congress, the bill established a new “hold harmless” formula for distributing funds to eligible school districts. Recipients of funds under Section 8002 supported this formula change. After enactment, the U.S. Department of Education received information that more recent assessments indicated that the new formula would not provide the intended equitable distribution of funds. Therefore, the Committee has included a small modification to current law that will ensure that school districts of all sizes receive a fair share of funds under Section 8002.

The formula in Section 8002(h) [Payments With Respect To Fiscal Years when there are Insufficient Appropriations] provides a foundation formula that will insure that small-rural school districts are not unfairly discriminated against when pro-rating funds under subsection (h). In both the second tier of the formula that distributes a portion of funds to 1995 recipients, and in the second half 4(B) of the last tier that distributes a portion of funds to all recipients, payments are based upon the proportion that a district’s assessed value of its federal property is to the “total eligible national assessed value of the eligible federal property” of all eligible districts. Because tax assessment practices differ substantially among localities and States, and because the equalizing effect of a locality’s tax rate for different types of property is not taken into account in these elements of the foundation formula, the formula is likely to result in an inequitable distribution of Section 8002 funds.

H.R. 1 addresses this issue by changing the formula (in the final tier only) to base these proportions on a district’s Section 8002 maximum amount, which reflects both the assessed value of the eligible federal property and the local real property tax rate for cur-

rent expenditures, rather than only upon the assessed value of the eligible federal property. This will ensure that 75 percent of the new money will be distributed under the same philosophy used in the base Section 8002 program which uses both property assessment plus the local tax rate when determining a district's maximum payment.

Other Technical Changes to the Impact Aid Program

H.R. 1 also includes other minor technical changes to the Impact Aid Reauthorization Act of 2000. These include minor modifications to the section of the formula benefiting small school districts; and modifications to Section 8009 (equalized States) to clarify that funds provided to school districts based on their identification as "heavily impacted" would be exempt from State equalization. H.R. 1 also extends the authorization for the Impact Aid program through FY 2006 to make it conform to the other titles of the Elementary and Secondary Education Act.

Technical Changes to the Impact Aid Construction Program

Title VI of H.R. 1 also makes technical corrections to the Impact Aid construction program to correct a misinterpretation of the eligibility requirements for certain grants made by the Department of Education. Specifically, it clarifies that an LEA is considered to be unable to fund construction needs through bond issues if the assessed value of the taxable property within the LEA is less than \$25 million. This ensures that federally impacted LEAs with the greatest need can qualify for the full cost of repairs to correct emergency situations that threaten the health or safety of their students. H.R. 1 also clarifies that an LEA is considered to have minimal capacity to fund construction needs through bond issues if the assessed value of the taxable property within the LEA is greater than \$25 million but less than \$50 million, and the LEA has already used at least 75 percent of its existing bonding authority for other construction needs. This will allow federally impacted LEAs with low bonding capacity that are making an effort to meet their own construction needs to qualify for some federal funding to address health or safety needs within their schools. Title VI also separates the application process for emergency grants from that of modernization grants, and clarifies that the Secretary is to fund projects that address threats to the health and safety of students or school staff prior to funding grants intended only for school modernization. These provisions will improve the application process and ensure that scarce federal funds are targeted to LEAs with the greatest need for assistance.

Title VII—Flexibility and Accountability

Part A—State Accountability for Improving Academic Achievement

The Committee views this Part as critical to the effective implementation of the President's plan because it provides for real and significant consequences for success or failure. These rewards and sanctions are designed to change the long and anti-productive trend in federal programs of rewarding failure and ignoring success. Under Title VII, Part A, the rewards are neither too easy to get, nor so powerful as to give the federal government excessive

sway over State decision-making. Likewise, the sanctions are not easily applied, or so punitive that reform and improvement are impaired. Both the rewards and sanctions are designed to fit within the overall context of the bill and to support a productive relationship between the federal government and the States.

Rewards

Part A of Title VII provides rewards for States that make significant progress in academic achievement for students primarily based on State academic assessment results. Reward funds are allocated to States based on the progress of students from low-income families and from racial or ethnic minority groups, for students as a whole and for limited English proficient students. In order to receive a reward, progress on State assessments must be confirmed by a second indicator consisting of the National Assessment of Educational Progress (NAEP) or another assessment selected by the State.

The Committee believes the ability of the State to choose an assessment other than NAEP as a confirmation of State assessment results is key to allowing States flexibility in achieving the goals of the bill. The alternative assessment must meet, however, strict criteria that ensures it will be valid, reliable, and able to produce results that can be both disaggregated and expressed in terms of the achievement levels described in Title I.

Under Title VII of H.R. 1, NAEP assessments (or an alternative, independent assessment selected by the State) would be administered annually in reading and mathematics in fourth and eighth grade to serve as a “second snapshot” of how the State is doing academically. As Mark Musick, Chairman of the National Assessment Governing Board, which administers NAEP, told the Committee at a hearing on March 8, 2001, “this is about seeing if achievement in America is moving in the same direction. This is about confirming that gaps are closing, particularly the ethnic and the socioeconomic student achievement gaps.” The “first snapshot,” or measure of how students in the State are doing academically, would be the annual State assessments in reading and mathematics developed under Title I, Part A. If a State is making significant progress on the Title I, Part A assessments and the “second snapshot” assessment (NAEP or the independent assessment), as well as making progress in improving the English proficiency of students with limited English proficiency, then the State would be eligible for a financial reward from the Secretary of the Department of Education. The Committee emphasizes that rewards are provided when both indicators show progress. The “second snapshot” cannot, by itself, provide the basis for rewards even though it may show increases in academic achievement. In addition, the Secretary may take into account other considerations in determining the size of the reward, such as graduation rates and the percentage of students who take Advanced Placement (AP) or International Baccalaureate (IB) courses and pass exams associated with the AP and IB classes.

It is the Committee’s view that the “confirmation” of State assessment results with NAEP or an independent assessment is not to be a complex statistical process, but rather a simple comparison that the average person would agree with by simply looking at the

direction of student academic achievement gains on both assessments.

While the rewards are primarily based on a State's progress as compared to its own past performance, the Secretary is granted some discretion to grant larger awards to States based on population, as well as the relative amount of progress a State has made.

A State that receives an award from the Secretary under this part is required to then provide awards to public elementary or secondary schools in the State that made the most significant progress in raising student academic achievement. The schools, once they have received the award from the State, may use the funds for any educational purpose allowed by State law.

NAEP and the Independent Assessment

The National Assessment of Educational Progress (NAEP) is a series of random sample tests commonly referred to as the "Nation's Report Card," which measures the academic progress of elementary and secondary students in the United States. NAEP consists of tests of students in grades four, eight, and 12 in reading, writing, science, mathematics and other subjects. The NAEP tests are voluntary and administered to a representative sample of students. By design, no student takes an entire test and accordingly there are no individualized test results.

The Committee recognizes the concerns of those who fear that the second snapshot test, and the use of State NAEP especially, will lead to a national test or curriculum. Although the President proposed in his No Child Left Behind initiative that NAEP alone be used for the purpose of confirming State assessment results for rewards and sanctions and shining a spotlight on States' progress in narrowing achievement gaps, the Committee has provided States with the option to select an alternative assessment that meets certain criteria. Many States, school districts and other groups such as the Business Coalition for Excellence in Education support using NAEP alone for purposes of the "second snapshot." The Committee heard from Lisa Graham Keegan, Superintendent of Instruction in Arizona, who testified before the Committee on March 14, 2001, that "in Arizona, we do have a lot of confidence in the standards on which NAEP is based. We've been using it for years, you all use it in your statistics all the time. For the moment, it's quite strong . . . So we would recommend using it as sort of a sunshine instrument."

However, the Committee heard from many who opposed the use of NAEP alone, and thus H.R. 1 allows States to select an independent assessment other than NAEP for purposes of confirming their State assessment results. The criteria for such a test is included in Section 1111(c) as well as this part. These criteria are designed to ensure that States select a high quality test that is not specifically designed to match their standards. Specifically, the independent assessment must (1) be administered annually; (2) yield high quality data that are valid and reliable; (3) meet widely recognized professional and technical standards, including specific and rigorous test security procedures; (4) be developed by an entity independent from each State and local government agency in the State in a manner that protects against any conflict of interest; (5) have no test questions that are identical to the test questions used

by the assessment used to meet the State assessment requirements under section 1111; (6) provide results in such a form that they may be expressed in terms of achievement levels that are consistent with the achievement levels (basic, proficient, and advanced) set forth in section 1111; (7) provide results in such a form that they may be disaggregated, at a minimum, according to income level and major racial and ethnic group; and (8) be administered to all students or to a representative sample of students in the 4th and 8th grades Statewide, with a sample size that is sufficiently large to produce statistically significant estimates of Statewide student achievement.

The Committee encourages States to select an independent assessment or NAEP to provide a rigorous assessment of student progress in that State. The purpose of the second assessment is to encourage States to set high standards and academic achievement and therefore States should select an assessment with that goal in view.

It is not the Committee's intent that this legislation would reduce participation in the national NAEP assessment, or other subject areas assessed by NAEP.

Sanctions

Section 7102 provides sanctions for States that fail to make adequate yearly progress for their disadvantaged students and students from racial and ethnic minority groups. If the State declines on both the annual State assessments under Section 1111 and the second indicator (NAEP or the alternative assessment) for two consecutive years, then the State would be subject to a 30 percent reduction in the amount of funds that it may reserve for administrative purposes. States receiving a sanction do not lose these funds. Instead of spending the funds on administrative purposes the funds must be reallocated to local educational agencies for school improvement purposes under Section 1116.

If a State continues to fail to make adequate yearly progress on their Title I, Part A assessments and the second indicator for the two years following the initial failure of two consecutive years outlined above, then the Secretary may further reduce a State's administrative funds up to an additional 45 percent.

Again, the Committee would emphasize that the State must fail to improve on both the annual State assessments required under Title I, Part A and the second indicator (NAEP or the alternative assessment) to be sanctioned under this Part.

Furthermore, in order to hold States accountable for the important goal of improving English language proficiency, there are additional sanctions. If a State fails to meet the adequate yearly progress required under Title I, Part A for limited English proficient (LEP) students for two consecutive years, or the State fails to meet the acquisition of English language proficiency required under Title I, Part A for LEP students for two consecutive years, then the State is subject to an additional 20 percent reduction in administrative funds.

Development of State Standards and Assessments

Section 7103 directs the Secretary to provide States with funds to develop the annual assessments required under Title I, Part A,

or if a State has developed those assessments, to carry out other activities related to ensuring accountability for results in the State's schools and local educational agencies, including the costs of administering such assessments. States that have already developed their annual assessments may also use these funds to improve the quality of their assessments, and are encouraged to do so by the Committee.

This section was amended in Committee by Mr. Schaffer (R-CO) to clarify that while States may enter into partnerships with other States, such partnerships are not required. Partnerships, while encouraged by the Committee as a means of saving costs and developing higher quality assessments, are not required. Mr. Schaffer's amendment also makes it clear that H.R. 1 provides funds for States to strengthen the capacity of local educational agencies and schools to provide all students the opportunity to increase educational achievement. The bill does not authorize the Secretary to require States to provide educational facilities, instructional materials, or curriculum to all students.

In addition, the Secretary is authorized to provide bonuses for States that have annual assessments for grades 3 through 8 in place prior to the 2004–2005 school year. Section 7104 authorizes \$40 million for these bonuses for fiscal year 2002.

Funding

Under H.R. 1, the expenses of NAEP for purposes of Title VII accountability would be covered 100 percent from federal resources. In addition, the costs of the alternative, independent assessment that may be selected instead of NAEP would be offset. Sixty-nine million dollars are authorized for such purposes. If the alternative assessment is chosen, funds would be provided to offset the cost of administering such an assessment, provided such costs do not exceed the cost the State would incur if it had used NAEP. The Secretary is authorized under Section 7101 to develop a methodology for allocating funds to States that select an independent assessment instead of the NAEP.

Section 7104 also authorizes 400 million dollars for fiscal year 2002 to allocate funds for States to develop their assessments, as described in Section 7103. Because test development costs are somewhat independent of the population of a State, 50 percent of these funds are to be divided equally among the States. The other 50 percent is to be allocated on the basis of population.

TITLE VII, PART B—FUNDING FLEXIBILITY FOR STATE AND LOCAL EDUCATION AGENCIES

Part B of Title VII grants States and local educational agencies unprecedented flexibility to target federal dollars to meet State and local priorities. It dramatically enhances flexibility for local school districts, giving them the freedom to make spending decisions with up to 50 percent of the federal education dollars they receive, as long as they demonstrate results. Under current law, federal rules frequently can prevent States and local school districts from spending federal dollars as effectively as possible to meet the unique needs of students.

This funding flexibility option is based on a little-used provision in current law. Under current law, if a State educational agency

approves, the unneeded funds provision in Section 14206 of Title XIV of ESEA of 1965 allows school districts to shift a percentage of funding from one ESEA program to another in any fiscal year. In order to be granted permission to shift these funds, a school district must demonstrate that the funds are not needed for their original purposes. Up to five percent of these programs' funds may be shifted to any of these programs:

Title I, Part C (Education of Migratory Children)

Title II (Eisenhower Professional Development program)

Title III, Subpart 2 of Part A (Technology Innovation Challenge Grants)

Title IV, Subpart I of Part A (Safe and Drug-Free Schools, Grants to LEAS)

Title VI (Innovative Education Program Strategies)

Five percent may also be transferred into, but not out of, Title I, Part A (Grants to LEAS).

The unneeded funds provision is too limited to provide useful flexibility to school districts or States. In September 1998, the GAO reported that the "unneeded funds" option is "often unavailable and seldom used." In their survey of 50 State educational agencies, only half reported that they allowed local school districts to take advantage of this provision. Even when it was offered, it was rarely used. Districts took advantage of this option in only one third of the States that allowed them to do so. One State (not named by GAO) did make use of this provision, with more than ten percent of its districts exercising the provision.

The Committee has heard from school districts around the country that they want meaningful flexibility in using their federal dollars. The unneeded funds provision is insufficient because it only allows a small percentage to be transferred, which for all but the largest school districts means that a very small amount of money is flexible. Limiting this option to a small amount of funds provides little in the way of an incentive to school districts to jump through the appropriate bureaucratic hoops to shift funds from one account to another. Five percent is simply too little to make a difference. In addition, States are not given the option of shifting State activity dollars, even though they are free to consolidate administrative funds from different programs.

Several groups representing people involved in education at the local level have been supportive of this flexibility provision in the past, including the: American Association of School Administrators, the Association of Educational Service Agencies, the Council of the Great City Schools, the National Association of Secondary School Principals, the National School Boards Association, and the Rural Education Association. In a May 7, 2001, letter supporting H.R. 1 sent to Members of Congress, the American Association of School Administrators wrote that the bill "offers substantial flexibility at the LEA level that will have an enormous effect on the ability for individual districts to respond to what is needed . . . [b]y allowing the LEA to shift money around according to their needs, they are able to maintain the most appropriate education for their students in need." Their support is extremely significant, as they represent the people on the front lines who have to administer these federal programs. Clearly, it is those closest to the schools that see the need and the value of transferability.

The State and Local Transferability Act in H.R. 1 provides meaningful flexibility to States and local school districts by significantly increasing the percentage that they may transfer from one program to another. SEAs may transfer up to 50 percent of their State activity dollars into another program. LEAs may transfer up to 50 percent from one program to another without SEA permission. Title I remains protected.

State Transferability

In H.R. 1, States are permitted to transfer up to 50 percent of their State activities funds between formula grant programs (i.e. formula grant to the State). These programs are:

- Title II (Teachers)
- Title IV, Part A (Innovative Programs)
- Title V, Part A (Safe and Drug Free Schools and 21st Century Schools)
- Title V, Part B (Technology)

Title I funds would not be transferable to non-Title I programs, but non-Title I funds may be transferred into Title I programs.

This provision provides States with flexibility that they currently only have with their federal administrative dollars, giving them the freedom to target resources and focus on State priorities, such as accountability and testing, teacher quality, or school safety.

It is the Committee's intent that only the non-administrative portion of the funds explicitly set aside for use at the State level by the statute could be transferred under this authority, not funds that are required by the statute to be allocated to local educational agencies. States transferring these funds must modify their consolidated plans to reflect the transfer of funds.

Local Transferability

Local educational agencies may transfer up to 50 percent out of a program's fiscal year allocation, to another program or programs, without requesting permission from the State. By allowing school districts to transfer a portion of funds without the permission of their State, the Act provides them with flexibility to tailor their federal dollars to their needs while still meeting the specific program requirements of each federal program.

H.R. 1 permits school districts identified as being in need of improvement to transfer 30 percent of their federal funds rather than 50 percent, and only for the purpose of funding school improvement activities. Schools identified for corrective action and restructuring under Section 1116 may not transfer funds.

School districts may transfer funds from one of the following federal formula grant programs to another:

- Title II (Teachers)
- Title IV, Part A (Innovative Programs)
- Title V, Part A (Safe and Drug Free Schools)
- Title V, Part B (Technology-formula portion only)

Because the 21st Century Community Learning Centers program is a competitive grant program within States, local educational agencies would not be able to transfer those funds.

Title I funds would not be transferable to non-Title I programs, but non-Title I funds may be transferred into Title I. This grants local school districts the flexibility to target additional resources, if

they so choose, to meet the needs of the most disadvantaged students.

A local educational agency can make more than one transfer out of a single federal program without requesting State permission, as long as the total amount of the funds transferred does not constitute more than 50 percent of the total amount allocated to them for a fiscal year. Such transfers would allow school districts to focus resources on federal programs that most effectively address their most pressing needs. This threshold applies to the total amount transferred out of one program regardless of the amount of a single transfer.

It is the Committee's intent that, whenever a State or local educational agency intends to transfer funds to or from a program that has a provision requiring consultation with appropriate private school officials, the provision requiring such consultation shall apply to the transfer of such funds in accordance with Section 8503(c).

As provided in the unneeded funds provision in current law, State and local school districts may transfer funds from the above programs into any part of Title I, but no funds can be transferred out of Title I into another program. States and school districts would be free to allocate transferred funds to supplement any aspect of their Title I program activities. The purpose of this provision is to protect funding for Title I programs. However, by allowing transfers into Title I, it also grants local educational agencies the flexibility to focus their limited federal resources on meeting the needs of disadvantaged students and meeting State and Title I accountability requirements.

When funds are transferred to another program, they assume the identity of the program to which they were transferred, and are governed by the requirements of that program. However, LEAs must continue to meet the requirements of all federal programs with the remaining funds that are not transferred to another program.

Title VIII—General Provisions

Title XIV of current law of the Elementary and Secondary Education Act (ESEA) contains general provisions that affect all federal K-12 education programs. These general provisions are modified and moved to Title VIII of the ESEA under H.R. 1. The general provisions are divided into several parts: Part A—Definitions; Part B—Flexibility in the Use of Administrative and Other Funds; Part C—Coordination of Programs and Consolidated State and Local Plans and Applications; Part D—Waivers; Part E—Uniform Provisions; Part F—Sense of the Congress; and Part G—Evaluations.

TITLE VIII, PART A—DEFINITIONS

The Committee has added several new definitions to the list of defined terms for the ESEA programs, modified other definitions, and moved some definitions from various individual programs into the general provisions.

Definitions which have been moved to the general provisions from individual programs or which are new to the general provisions include "child with a disability," "effective schools program,"

“essential components of reading instruction,” “family literacy services,” “fully qualified” in reference to teachers, “limited English proficient student,” “Native American and Native American Language,” “reading,” “rigorous diagnostic reading and screening assessment tools,” and “scientifically based research.” Definitions which appear in the general provisions of current law and which have been modified include “covered program” “outlying area,” “parent,” and “technology.”

TITLE VIII, PART B—FLEXIBILITY IN THE USE OF ADMINISTRATIVE AND OTHER FUNDS

Under current law, section 14201 of ESEA, a State may consolidate its administrative funds from Title I of the ESEA, the Eisenhower professional development program, the technology programs, the Safe and Drug-Free Schools program, and the Innovative Education Program Strategies grants, and apply the consolidated funds to the State’s costs of administering this group of programs, rather than applying each funding source only to the administrative costs for that one program.

According to a study prepared for the Department of Education and entitled *Living in Interesting Times: Early State Implementation of New Federal Education Laws*, only nine States have completely consolidated their administrative funds, and many State administrators appear to be confused as to what extent, if at all, administrative funds have been consolidated in their States. However, for States that have consolidated administrative funds, they have found the experience to be a positive one. Consolidation has eliminated the requirement of tracking time and effort of personnel assigned to individual federal education programs. Collaboration across federal education programs has also increased. In many cases, consolidated administrative funds have made it easier for States to fund salaries, fringe benefits, and training and conference expenses.

While the provision in current law is a positive one, the Committee finds no sound reason why the authority to combine administrative funds at the State level should not be extended to all ESEA programs. Section 8201 would extend such authority to all ESEA programs for which funds are authorized to be used for administration at the State level.

Similarly, current law section 14203 allows for consolidation of funds for local administration for certain ESEA programs. As with State administrative funds, the Committee has included language in section 8203 allowing all ESEA administrative funds at the local level to be combined. A 1998 General Accounting Office report on the usefulness of federal flexibility provisions found the current law provision, in practice, to be frequently unavailable and seldom used by local educational agencies (LEAs). In GAO’s survey of State educational agencies, about one third reported that they did not allow LEAs to combine administrative funds. It is the Committee’s understanding that in some States, a barrier to the use of this option is the State or State educational agency’s failure to establish an additional fiscal account line for managing these combined funds. This is largely an implementation problem. Accordingly, the Committee would strongly encourage States to take all necessary steps,

including the modification of accounting procedures, to make this option available to LEAs.

TITLE VIII, PART C—COORDINATION OF PROGRAMS; CONSOLIDATED
STATE AND LOCAL PLANS AND APPLICATIONS

In general, to receive funding for most federal education programs, States and LEAs must submit plans or applications to either the State or federal government. These plans or applications typically describe how the funds will be used, certify that federal procedures will be followed, and provide assurances that the funds will be spent in accordance with the purpose or purposes of the program.

Section 14302 of current law gives States the option of consolidating State plans or applications that they submit to the United States Department of Education for specified ESEA education programs. This means that a State educational agency, in consultation with the Governor, may submit one plan that covers two or more of the specified programs. In similar fashion, section 14305 gives LEAs the option of consolidating local plans or applications that they submit to the State. As with the provisions on consolidated administrative funds, the Committee has expanded and rewritten current law sections 14302 and 14305 as sections 8302 and 8305 to allow all ESEA programs to be included in a single State or LEA plan. Consolidated plans eliminate bureaucratic paperwork requirements, promote greater coordination between programs, and in general, give States and localities the flexibility they need to better administer federal education resources. As with consolidation of administrative funds, States that have used consolidated plans have found the benefits to be quite positive. In Virginia, for example, the use of a single consolidated plan has allowed funding for cross program planning, eliminated the need to track personnel time and effort in individual programs, and eliminated the need to develop separate program plans.

It is the view of the Committee that all States must allow all LEAs to submit consolidated plans. The statute requires this in current law section 14305 (section 8305 in H.R. 1). On February 16, 1999, Carlotta Joyner of the General Accounting Office (GAO) sent then-Secretary of Education Richard Riley a memo concerning several States that may not have been implementing these flexibility provisions. GAO reported in its memo that in a survey of 50 State educational agencies, ten States reported that they require LEAs to submit separate plans for at least one of the programs covered under the law, in order to receive federal program dollars. Under ESEA, though, States may require LEAs to submit consolidated plans, but they cannot require them to submit separate plans for each of these covered programs. As a result, school districts in these States are not able to take advantage of the reductions in paperwork requirements that have been available under current law for several years. Consequently, in an effort to address this problem, H.R. 1 clearly states in section 8305 that States cannot require local educational agencies to submit separate plans for each federal program. The Committee strongly recommends that the Secretary communicate this to States so LEAs can take advantage of this flexibility.

Part C of the general provisions also includes a new provision on consolidated reporting. Section 8303 gives the Secretary authority to establish procedures for allowing a State educational agency, in consultation with the Governor, to submit consolidated annual reports on ESEA programs. This bill language reinforces efforts already underway at the Department to use a single report in lieu of separate individual annual reports.

TITLE VIII, PART D—WAIVERS

The general authority of the Secretary of Education to waive statutory and regulatory requirements of federal K–12 education programs is found in Part D, section 14401, of the current ESEA. Under H.R. 1, this waiver authority is found in section 8401. The basic concept behind waiver authority is that States and LEAs may have a better way of implementing federal education programs and this authority enables them to do so. For too many years, the federal government has had a top-down, one-size-fits-all approach to education that has proven itself flawed. In recognition of this fact, Congress has begun to provide more flexibility to States and LEAs via the waiver process. Generally, the Title VIII waiver authority in H.R. 1 allows the Secretary to consider requests from States and LEAs for waivers of any statutory or regulatory requirement with several exceptions. The Committee has continued the waiver authority and made minor conforming changes so that the Secretary's waiver authority is generally consistent with the waiver authority granted to States under the Education Flexibility Partnership Act (P.L. 106–25).

Under current law, the Secretary may not waive statutory or regulatory requirements relating to the following: (1) allocation or distribution of funds to State educational agencies, local educational agencies, or other recipients of ESEA funds; (2) maintenance of effort; (3) comparability of services; (4) use of federal funds to supplement, not supplant non-federal funds; (5) equitable participation of private school students and teachers; (6) parental participation and involvement; (7) applicable civil rights requirements; (8) charter school requirements; (9) prohibitions regarding State aid and the use of funds for religious worship or instruction. In section 8401(c)(9) the Committee has added to the list of things that cannot be waived. The prohibitions that are included are: prohibition on funds being used to develop or distribute materials or operate programs or courses of instruction directed at youth that are designed to encourage sexual activity, whether homosexual or heterosexual; prohibition on funds being used to distribute or to aid in the distribution by any organization of legally obscene materials to minors on school grounds; prohibition on funds being used to provide sex education or HIV prevention education in schools unless such instruction is age appropriate and emphasizes the health benefits of abstinence; and prohibition on funds being used to operate a program of contraceptive distribution in schools.

TITLE VIII, PART E—UNIFORM PROVISIONS

Part E includes what is commonly referred to as the “uniform provisions.” These provisions include maintenance of effort, the participation by private school students and teachers in ESEA programs, prohibitions against funds being used for religious worship

or instruction, rules of construction relating to home schools and private schools, prohibitions against federal control or endorsement of curriculum, prohibitions against the federal government requiring States to have academic content standards or achievement standards approved or certified by the federal government, privacy protections for individual assessment results, and prohibitions relating to sex education and contraceptive distribution, and other matters.

With respect to the uniform provisions, the Committee wishes to make clear that the intent of this Act is that the standards and assessments mentioned in the Act measure academic knowledge of math and reading, as opposed to applied and contextual learning that focus on student workplace skills and competencies. To the extent such research is available, classroom instruction should be based on rigorous scientifically based research. The bill does not authorize the Secretary to define the term “academic” for the States. States may define the term “academic” as they see fit, or not at all.

The Committee has made several significant changes to current law. The Committee has included language on private school consultations with school district officials that is parallel to the language in Title I Part A (Improving the Academic Performance of Disadvantaged Students). In general, LEAs are required to consult with private school officials when arranging for the provision of equitable services under ESEA programs to private school students and staff. However, Catholic school officials have informed the Committee that in some areas of the country, public school districts provide little or no consultation with private officials.

To help address these concerns, H.R. 1 requires LEAs to consult with private school officials not only on how and where the services will be provided, as under current law, but also on the selection of the contractor that provides the services, in situations where contractors are utilized. In addition, the LEA must tell how the services will be assessed, and how the results of that assessment will be used to improve the services to private school children. The consultations must involve not only meetings prior to the public school district making a decision on the services, but also throughout the implementation and assessment of the services. Such measures will help ensure that high quality services are provided to private school children.

The bill also makes an additional clarifying change to private school participation and bypass provisions under Title VIII. The change would add the word “entity” to such provisions. The Committee does not intend for the addition of this word to change how section 1309(1)(B) is implemented relative to local operating agencies.

Earlier this year, the Committee heard from many organizations representing private schools and home schools who expressed concerns that the bill be clear that its requirements should not apply home schools, nor should the requirements apply to private schools if private schools do not receive ESEA funds or services. Accordingly, the Committee has made absolutely clear that the requirements do not apply to home schools nor to private schools that do not receive ESEA funds or services. The bill language that clarifies these points is found in sections 8508 and 8509.

During mark-up of H.R. 1, Rep. Pete Hoekstra (R-MI) offered an amendment which further strengthened the home school protections. The amendment passed by voice vote. The amendment modified section 8508 to ensure that regardless of whether a home school is treated as a home school or private school under State law, a home school is not be affected by the ESEA. In addition, students who are home schooled are not required to participate in the assessments referenced in the ESEA. The amendment also strengthened section 8511 by clarifying that nothing in the ESEA nor in any other act administered by the Department of Education is to be construed as authorizing any federal control over any private, religious or home school.

The Committee has also heard from many individuals who are concerned that individual assessment results be protected from disclosure to third parties. Section 8510 protects the privacy of assessment results by reiterating the applicability of the parental consent and other requirements of General Education Provisions Act to individual assessment results that become a part of a student's education records.

The Committee has included new language on school prayer protections. Current law states that any State or school district that has been found by a federal court to have willfully violated a court order with respect to school prayer is ineligible to receive ESEA funds. Sadly, this law erects several hurdles in the paths of students who wish to exercise their right to pray at school. First, current law requires one to have first gone to federal court and previously obtained an order against a school district or State. Second, one must additionally prove in court that a State or school district has willfully violated the order, before the State or school district would be subject to losing education funds. This framework is flawed. It provides a remedy only after a student has been compelled to go to court two times—once to get an initial court order and the second time to show there has been a violation of the court order. This puts a burden upon students who are simply trying to exercise a basic constitutional right.

The Committee has replaced the school prayer provision from current law with a simple provision in Section 8512 which requires, as a condition for receipt of funds under ESEA, that a LEA certify in writing to the Secretary of Education that no policy of the agency prevents or otherwise denies participation in constitutionally protected prayer in public schools. Nothing in this provision is to be construed as affecting or altering the Equal Access Act.

During the mark-up of the No Child Left Behind Act of 2001, an amendment was offered by Rep. Bob Schaffer (R-CO) to make clarifying changes to Title I (Improving the Academic Performance of the Disadvantaged), Title VII (Accountability) and Title VIII (General Provisions). With respect to Title VIII's general provisions, the amendment makes clear that under section 8514, officers and employees of the federal government are prohibited from mandating, directing, or controlling any curriculum, programs of instruction or allocation of State and local resources. The amendment passed by voice vote.

The Committee has added new language in Section 8515 which ensures that regulations may be promulgated by the Secretary only to the extent that such regulations are necessary to ensure compli-

ance with specific requirements and assurances required under the ESEA. This provision is consistent with language that has been included separately in individual education programs in recent years. It is included here to cover all elementary and secondary programs.

Section 8516 requires the Secretary to report to Congress on how the Secretary will go about ensuring that audits comply with changes in H.R. 1.

Section 8517 of the bill ensures that under no circumstances may the federal government require any States to have their academic standards approved or certified by the federal government. This further ensures the autonomy and control of States over their academic standards.

The Committee has added new language in Section 8518 prohibiting the endorsement or approval of any curriculum by the U.S. Department of Education. A few years ago, pursuant to authority under federal law, the Secretary of Education identified as “exemplary” and “promising” several questionable math programs that had been supported by the National Science Foundation. These programs were referred to as “fuzzy math,” in part, because they adhered to a philosophy of math that minimized essential computational skills, were not based on sound scientific research, and promoted lower levels of proficiency in mathematics. Section 8518 will protect against any federal funds being used to endorse, approve or sanction any curriculum.

Decisions about school curricula have been and continue to be local decisions. The federal government must take care not to have its heavy hand override State, local or parental choice in curricula, or use its influence or imprimatur to pressure State and local schools to implement national math standards.

Section 8519 clarifies that nothing in H.R. 1 gives authority for any kind of development of a national database of personally identifiable information on individuals involved in studies or data collection efforts. This has been a concern in recent years and accordingly, the Committee has made abundantly clear that there is no authority in ESEA for the Department to develop national databases of personally identifiable information.

Section 8520 is a severability clause. It provides that if any provision of the legislation is held invalid, then the remainder of the legislation shall be unaffected.

TITLE VIII, PART F—SENSE OF CONGRESS

Part F of Title VIII includes a Sense of Congress on Paperwork Reduction, a Sense of Congress regarding memorials on campus, a prohibition on any kind of mandatory national certification of teachers and paraprofessionals, and a prohibition on national tests.

With respect to the Sense of Congress on Paperwork Reduction, many superintendents, principals, and teachers continue to spend significant time in filling out paperwork for federal education programs, and accordingly, the Committee has included a statement of Congress on this matter.

The Committee has also included a Sense of Congress provision in Section 8604 regarding religious memorial services and religious memorials located on school campuses. The language was prompted by the circumstances surrounding the courageous actions of Cassie Bernall at Columbine High School in Littleton, Colorado, a few

years ago. The Committee bill states that Congress does not find religious services or religious memorials that are located on campus to honor others that may have been slain on campus to be objectionable. This statement sends a clear signal that Members of Congress believe schools and communities should be free to honor their classmates through a religious service or memorial erected on campus.

The Committee clarifies in section 8602 that the Secretary of Education is prohibited from using any federal funds to plan, develop, implement or administer any kind of mandatory national teacher or paraprofessional test or certification. This provision sends a clear message that such certifications and tests are within the authority of State and local governments, and not the federal government.

Finally, the Committee has included a prohibition on national tests to make clear that under no circumstances is H.R. 1 intended to grant any authority to the federal government to develop, implement or administer any national test. The new tests in reading and math in grades 3–8 authorized in Title I, Part A of H.R. 1 are to be developed by States, not the federal government. This prohibition on national tests is included in section 8603 and complements existing prohibitions in the General Education Provisions Act that were enacted into law a few years ago.

TITLE VIII, PART G—EVALUATIONS

Part G of H.R. 1 continues the authority of the Secretary to carry out evaluations and studies of the effectiveness of programs under the ESEA using up to one half or one percent of the amount appropriated for such programs.

Part G also transfers the authority for Title XIII programs (Comprehensive Regional Assistance Centers, the National Diffusion Network, the Eisenhower Regional Mathematics and Science Education Consortia, and the Technology Based Technical Assistance) of ESEA to Title VIII. It is the intent of the Committee that these programs will be addressed more fully during the reauthorization of the Office of Educational Research and Improvement.

TITLE IX, PART A, SUBPART I—NATIONAL EDUCATION STATISTICS ACT (NESA)

Title IX, Part A, Subpart 1, section 901 of H.R. 1 includes conforming changes to section 411 of the National Education Statistics Act (NESA). Section 411 of NESA provides the authority under current law for the National Assessment of Educational Progress (NAEP), which is a series of random sample tests commonly referred to as the “Nation’s Report Card” which measures the academic progress of elementary and secondary students in the United States. NAEP consists of tests of students in grades 4, 8, and 12 in reading, writing, science, mathematics and other subjects.

The NAEP tests are voluntary and administered to a representative sample of students. By design, no student takes an entire test and there are no individualized test results. Results are provided in the aggregate for the nation as a whole and on a State-by-State basis.

With respect to the rewards and sanctions under Title VII, section 411 of the National Education Statistics Act is amended by

section 901 of H.R. 1 to specifically authorize the annual use of NAEP reading and mathematics assessments in fourth and eighth grades. Section 411 is also amended to delete the requirement that States are to pay for a share of the expenses of NAEP. The expenses of NAEP, as well as the expenses of the alternative independent assessments (if a State chooses this approach in lieu of NAEP), would be provided for through federal appropriations with no required State share. For a more detailed discussion of rewards and sanctions, see the Committee views for Title VII, Part A of this report.

TITLE IX, PART A, SUBPART 2—HOMELESS EDUCATION

H.R. 1 reauthorizes the McKinney-Vento Homeless Education Assistance Improvements Act of 2001. The McKinney-Vento Homeless Education Assistance Act currently requires that States provide estimates of the number of homeless children and youth in their States and information about their access to education and related services. This provision has resulted in widely varying data in both quality and quantity. The lack of a uniform method of data collection has resulted in unreliable national data. H.R. 1 eliminates the requirement that the State homeless coordinator estimate the number of homeless children in the State and the number of homeless children served by the program. Under H.R. 1, this responsibility is placed under the authority of the Secretary who shall, either directly or through grants, contracts, or cooperative agreements, periodically collect and disseminate data and information on the number and location of homeless children and youth; the education and related services such children and youth receive; and the extent to which such needs are being met. The result of these changes to the McKinney-Vento Homeless Education Assistance Act will enable a more reliable and uniform data collection method that will help guide Congress in making accurate funding decisions.

Many homeless children and youth are forced to wait days and even weeks before they can enroll in school because they do not have the necessary paperwork required for enrollment such as proof of residency, previous academic records, birth certificates, and other documentation.

According to the FY 1997 Department of Education Report to Congress (issued in 1999), States reported that lack of school records and birth certificates were among the most frequent reasons for homeless children and youth not attending school. In addition, the report noted that lack of documentation is among the reasons that 45 percent of homeless children and youth were not attending school on a regular basis during their homelessness. H.R. 1 directs schools to immediately enroll a homeless child even if they are unable to produce the documents normally required for enrollment. In cases where a homeless child does not have immunization records, the enrolling school shall promptly refer his or her parent or guardian to the homeless liaison to assist in obtaining immunizations or immunization records.

Homeless liaison personnel have played a key role in establishing relations between families, schools, shelters, and other homeless service agencies. H.R. 1 requires local educational agencies to designate a homeless liaison responsible for ensuring that homeless children are regularly attending school and are receiving equitable

access to high-quality education and support services. The liaison can be a federal programs coordinator, Title I coordinator, or other program staff.

Many homeless children are forced to change schools because shelters or other temporary living accommodations are not located in the same school district as their school, or because they lack transportation. Forty-one percent of homeless students attend two different schools, and 28% attend three or more schools in a single year. This mobility puts children at great risk for academic failure. In response to these findings, H.R. 1 directs local educational agencies to continue homeless children's education in their school of origin, to the extent feasible, unless the parent or guardian wishes otherwise, for the duration of homelessness.

Nationwide, the lack of transportation is one of the most pervasive barriers to enrollment and success in school for homeless children and youth. According to the FY 1997 Department of Education Report to Congress (issued in 1999), the lack of transportation to or from temporary residences was the most frequent reason given by States as to why homeless children and youth did not attend school. Forty States listed transportation as a major need to be addressed to ensure the individual academic success of a homeless child or youth. H.R. 1 directs State and local educational agencies to ensure that transportation is provided to the school of origin, at the request of the parent or guardian (or, in the case of an unaccompanied youth, the request of the liaison). H.R. 1 will enhance access to education, as well as educational continuity.

Lack of awareness about the McKinney-Vento Homeless Education Assistance Act often prevents homeless families and youth from obtaining education, and from knowing who to contact for help with school enrollment and other education issues. H.R. 1 improves dissemination of information about the educational rights of homeless students by requiring school districts to disseminate public notice in schools, family shelters, soup kitchens, and other locations where students receive services. The Committee also instructs the Secretary of Education to create a public notice of the educational rights of homeless children and youth and disseminate this notice to other federal agencies, programs, and grantees, including Head Start grantees, health care for the homeless grantees, emergency food and shelter grantees, and homeless assistance programs administered by the Department of Housing and Urban Development.

The Office of State Coordinator for the Education of Homeless Children and Youth oversees all local educational agencies in a State, including those that do not receive McKinney-Vento Homeless Education Assistance Act funds. These LEAs are often in need of technical assistance and support in order to respond to the needs of their homeless students. Some States have responded to the need to provide Statewide technical assistance and support to all school districts by creating Statewide initiatives. These initiatives have had great success in expanding the reach of McKinney-Vento funds and increasing support for the enrollment and school success of homeless children Statewide. In order to successfully implement Statewide initiatives, the Committee provides States more flexibility in the reservation of funds for such activities.

Lack of clarity about who is considered homeless for the purposes of this subtitle have prevented many students in certain homeless situations (for example, students living in doubled-up arrangements due to lack of shelter space or other accommodations, motels, etc.) from enrolling and attending school. H.R. 1 incorporates previously existing federal guidance on definitions of homelessness in order to clarify eligibility for this subtitle. The Committee also defines “enroll” as the right to attend classes and fully participate in school programs. This definition will help to eliminate the practice of “enrolling” homeless students in school, but not actually allowing them to attend class until paperwork is provided.

H.R. 1 contains language that prohibits a State receiving funds under the McKinney-Vento Homeless Education Assistance Act from segregating a homeless child, either in a separate school or in a separate program within a school, based on that student’s status as homeless. However, this provision contains a grandfather clause that ensures established schools do not lose funding.

TITLE IX, PART B—REPEALS

Part B of Title IX of H.R. 1 repeals the following statutes and programs: (1) Part A (National Education Goals Panel) and Part C (Authorization of Appropriations) of Title II of the Goals 2000: Educate America Act; (2) Title VI (International Education Program) of the Goals 2000: Educate America Act; (3) Title XVII of Public Law 106–65 (Troops-to-Teachers Program Act of 1999); (4) Title IX (Native American Education, Native Hawaiians, and Alaska Native Education) of the Elementary and Secondary Education Act; (5) Title X, Part A (Fund for the Improvement of Education) of the Elementary and Secondary Education Act; (6) Title X, Part B (Gifted and Talented) of the Elementary and Secondary Education Act; (7) Part C of Title X (Charter Schools) of the Elementary and Secondary Education Act; (8) Part D of Title X (Arts in Education) of the Elementary and Secondary Education Act; (9) Part F of Title X (Civics Education) of the Elementary and Secondary Education Act; (10) Part I of Title X (21st Century Community Learning Centers) of the Elementary and Secondary Education Act; (11) Part J of Title I (Urban and Rural Education) of the Elementary and Secondary Education Act; (12) Part L of Title X (Physical Education for Progress) of the Elementary and Secondary Education Act; (13) Title XI (Coordinated Services) of the Elementary and Secondary Education Act; and (14) Title XII (Education Infrastructure) of the Elementary and Secondary Education Act.

The Committee notes that some of the programs that are repealed have been consolidated into other programs, some have been rewritten and continued elsewhere under the revised structure of the Elementary and Secondary Education Act, and some have been eliminated altogether. H.R. 1 eliminates or consolidates 34 federal Elementary and Secondary Education Act (ESEA) programs out of a total of 66, streamlining nearly 50 percent of the federal K–12 education role.

DEAR CHAIRMAN STUMP:

This letter is to confirm our agreement regarding H.R. 1, "No Child Left Behind Act of 2001," which was considered by the Committee on Education and the Workforce on May 2, 3, and 9, 2001. I thank you for working with me, specifically regarding the amendments the Committee included in H.R. 1, regarding Troops to Teacher programs, specifically the new Title II, Part A, Subpart 4

of the Elementary and Secondary Education Act as included in the bill as introduced and in Section 201 of the Committee reported bill, which are within the jurisdiction of the Committee on Armed Services and the Committee on Education and the Workforce.

While these provisions are within the jurisdiction of the Committee on Armed Services, I appreciate your willingness to work with me in moving H.R. 1 forward without the need for a sequential referral to your Committee. I agree that this procedural route should not be construed to prejudice the jurisdictional interest and prerogatives of the Committee on Armed Services on these provisions or any other similar legislation and will not be considered as precedent for consideration of matters of jurisdictional interest to your Committee in the future.

I thank you for working with me regarding this matter. Your letter and this response will be included in the Committee report to accompany H.R. 1. If you have questions regarding this matter, please do not hesitate to call me.

Sincerely,

JOHN BOEHNER, *Chairman.*

COMMITTEE ON ARMED SERVICES,
Washington, DC, May 11, 2001.

Hon. JOHN BOEHNER,
*Chairman, Committee on Education and the Workforce,
House of Representatives, Washington, DC.*

DEAR JOHN: In recognition of the desire to expedite floor consideration of H.R. 1, the No Child Left Behind Act of 2001, the Committee on Armed Services agrees to waive its right to consider this legislation. H.R. 1, as introduced and as ordered reported by the Committee on Education and the Workforce on May 9, 2001, contains subject matter that falls within the legislative jurisdiction of the Committee on Armed Services pursuant to rule X of the Rules of the House of Representatives. Specifically, section 201 of the committee reported bill, which, in part, amends the Elementary and Secondary Education Act of 1965 regarding the Troops-to-Teachers program, is within the jurisdiction of this Committee.

The Committee on Armed Services takes this action with the understanding that the Committee's jurisdiction over the provisions in question is in no way diminished or altered, and that the Committee's right to the appointment of conferees during any conference on the bill remains intact.

Sincerely,

BOB STUMP, *Chairman.*

COMMITTEE ON EDUCATION AND THE WORKFORCE,
Washington, DC, May 9, 2001.

Hon. MICHAEL G. OXLEY,
*Chairman, Committee on Financial Services,
House of Representatives, Washington, DC.*

DEAR CHAIRMAN OXLEY: This letter is to confirm our agreement regarding H.R. 1, "No Child Left Behind Act of 2001," which was considered by the Committee on Education and the Workforce on May 2, 3, and 9, 2001. I thank you for working with me, specifi-

cally regarding the amendments the Committee included in H.R. 1 to the McKinney-Vento Homeless Education Assistance Improvements Act, specifically Subpart 2 of Part A of Title IX, which are within the jurisdiction of the Committee on Financial Services and the Committee on Education and the Workforce.

While these provisions are within the jurisdiction of the Financial Services Committee, I appreciate your willingness to work with me in moving H.R. 1 forward without the need for a sequential referral to the Committee on Financial Services. I agree that this procedural route should not be construed to prejudice the jurisdictional interest and prerogatives of the Committee on Financial Services on these provisions or any other similar legislation and will not be considered as precedent for consideration of matters of jurisdictional interest to your Committee in the future.

I thank you for working with me regarding this matter. Your letter and this response will be included in the Committee report to accompany H.R. 1. If you have questions regarding this matter, please do not hesitate to call me.

Sincerely,

JOHN BOEHNER, *Chairman.*

COMMITTEE ON FINANCIAL SERVICES,
Washington, DC, May 9, 2001.

Hon. JOHN BOEHNER,
*Chairman, Committee on Education and the Workforce,
Rayburn House Office Building, Washington, DC.*

DEAR JOHN: I am writing regarding H.R. 1, the "No Child Left Behind Act of 2001" which was ordered reported by the Committee on Education and the Workforce today. As you know, the legislation includes provisions amending the McKinney-Vento Homeless Education Assistance Improvements Act. Clause 1(g) of rule X of the Rules of the House of Representatives grants the Committee on Financial Services jurisdiction over public and private housing and urban development. Accordingly, amendments to that Act fall within the jurisdiction of both the Committee on Financial Services and the Committee on Education and the Workforce.

Because of your willingness to consult with the Committee on Financial Services on this matter, and the need to move this legislation expeditiously, I will waive consideration of the bill by the Financial Services Committee. By agreeing to waive its consideration of the bill, the Financial Services Committee does not waive its jurisdiction over H.R. 1. In addition, the Committee on Financial Services reserves its authority to seek conferees on any provisions of the bill that are within the Financial Services Committee's jurisdiction during any House-Senate conference that may be convened on this legislation. I ask your commitment to support any request by the Committee on Financial Services for conferees on H.R. 1 or related legislation.

I request that you include this letter and your response as part of your committee's report on the bill. Thank you for your assistance in this matter.

Sincerely,

MICHAEL G. OXLEY, *Chairman.*

STATEMENT OF OVERSIGHT FINDINGS AND RECOMMENDATIONS OF
THE COMMITTEE

In compliance with clause 3(c)(1) of rule XIII and clause (2)(b)(1) of rule X of the Rules of the House of Representatives, the Committee's oversight findings and recommendations are reflected in the body of this report.

NEW BUDGET AUTHORITY AND CONGRESSIONAL BUDGET OFFICE
COST ESTIMATE

With respect to the requirements of clause 3(c)(2) of rule XIII of the House of Representatives and section 308(a) of the Congressional Budget Act of 1974 and with respect to requirements of 3(c)(3) of rule XIII of the House of Representatives and section 402 of the Congressional Budget Act of 1974, the Committee has received the following cost estimate for H.R. 1 from the Director of the Congressional Budget Office:

CONGRESSIONAL BUDGET OFFICE,
Washington, DC, May 14, 2001.

Hon. JOHN A. BOEHNER,
*Chairman, Committee on Education and the Workforce,
House of Representatives, Washington, DC.*

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the enclosed cost estimate for H.R. 1, the No Child Left Behind Act of 2001.

If you wish further details on this estimate, we will be pleased to provide them. The CBO staff contact is Donna Wong.

Sincerely,

BARRY B. ANDERSON,
(For Dan L. Crippen, Director).

Enclosure.

H.R. 1—No Child Left Behind Act of 2001

Summary: Programs under the Elementary and Secondary Education Act of 1965 (ESEA) were authorized through 2000 under the General Education Provisions Act (GEPA). Programs were authorized in 2001 by the Consolidated Appropriations Act (Public Law 106-554). H.R. 1 would reauthorize these programs through 2006. It would also reauthorize parts of the Stuart B. McKinney Act, the Goals 2000: Educate America Act, and the National Education Statistics Act.

CBO estimates that authorizations under the bill relative to current law would total approximately \$23 billion in 2002 and about \$135 billion over the 2002–2006 period, assuming that annual levels are adjusted to keep pace with inflation when specific annual authorizations are not provided. (Without such inflation adjustments, the authorization total would be about \$132 billion over the 2002–2006 period.) CBO estimates that appropriations of the authorized levels would result in additional outlays of \$99 billion over the 2002–2006 period, relative to estimated spending under current law, if inflation adjustments are included (and about \$98 billion without inflation adjustments).

Enacting the bill would not affect direct spending or receipts; therefore, pay-as-you-go procedures would not apply.

The programs reauthorized in this bill would provide grants to state and local education agencies and tribal governments to assist specific populations of students in meeting state performance standards. The bill contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act (UMRA). Any costs incurred by state, local, or tribal governments would result from complying with conditions of aid.

Estimated cost to the Federal Government: The estimated budgetary impact of H.R. 1 is shown in Table 1. The costs of this legislation fall within budget function 500 (education, training, employment, and social services).

¹ The 2001 level is the amount appropriated for that year.

Note:—Components may not sum to totals because of rounding.

Basis of estimate: H.R. 1 would authorize funding through 2006 for various programs created under ESEA. These programs would generally be reauthorized at specific levels for 2002 and for such sums as may be necessary for 2003 through 2006. Some programs would be authorized at such sums as may be necessary in all years. For these programs, CBO assumes continued funding at their 2001 levels, adjusted for projected inflation in the top panel of Table 1, and without such inflation adjustments in the bottom half of Table 1. In Table 1, spending under current law includes advance appropriations of \$8.7 billion in 2002 for program year 2001–2002. In addition, Impact Aid and Charter Schools are authorized under current law through 2003.

CBO estimates that H.R. 1 would increase authorized levels by \$22.8 billion in 2002 and by \$134.9 billion over the 2002–2006 period assuming that “such sums” amounts provided after 2002 are adjusted for inflation. If the authorized amounts are appropriated, outlays would increase relative to current law by \$1.3 billion in the first year and by \$99.4 billion over the five-year period. (Without inflation adjustments, the increased authorizations would result in outlays of \$98 billion over the five years.)

Table 2 presents CBO's estimates with inflation adjustments for the various components of each title under H.R. 1. CBO's estimate of authorized levels is generally the authorized amount for 2002 with those amounts inflated in later years. (The authorizations for some programs are specified after 2002.) For most existing programs that H.R. 1 would reauthorize, the estimated outlays reflect CBO's current spendout rate assumptions. For new programs or significant revisions to existing programs, an explanation of CBO's estimate is provided below. Because most education programs operate on a forward-funded basis, spending in the first year is consistently slow across most programs, with variation in spending patterns in the subsequent years.

Title I—Improving the Academic Performance of the Disadvantaged

Title I of H.R. 1 would reauthorize and revise programs currently authorized under parts A, B, C, D, and E of Title I of ESEA. It also would introduce new programs for student assessments and reading initiatives. H.R. 1 would authorize a total of \$14.3 billion for 2002 for all programs under Title I. CBO estimates the total funding for Title I for the 2002–2006 period would be \$86.9 billion, assuming adjustments for inflation, with resulting outlays of \$63.2 billion over those five years.

¹The 2001 level is the amount appropriated for that year.²Less than \$500,000.³The Charter Schools and Impact Aid programs are currently authorized until 2003. Table 2 shows only new authorizations. See text for a description of total authorizations.

Note.—Components may not sum to totals because of rounding.

Part A—Basic Program. H.R. 1 would reauthorize the Basic, Concentration, and Targeted Grant Programs currently authorized under Part A of Title I, phase out the capital expense account, add new requirements for states to develop more specific standards and assessments, and require states to report annually on the results of the assessments.

The bill would authorize \$11.5 billion for 2002, \$13 billion for 2003, \$14.5 billion for 2004, \$16 billion for 2005, and \$17.2 billion for 2006 for basic and concentration grants under Part A. The comparable funding for the 2001–2002 academic year is \$8.6 billion.

H.R. 1 also would authorize \$10 million in 2002 for additional state administration grants and \$500 million in 2002 for the Assistance for Local School Improvement program. States would use

the funds to assist local educational agencies (LEAs) and schools which are in school improvement status.

H.R. 1 would continue the authorization of the capital expense account. This account funds costs associated with ensuring that Title I services to private-school children are administered in neutral settings. In response to the 1997 Supreme Court ruling that overturned this requirement, H.R. 1 would phase out funding over two years, authorizing \$6 million annually for 2002 and 2003. The funding level for 2001 is also \$6 million.

The bill would amend Part A of Title I to include more specific standards and assessment requirements for state plans. H.R. 1 would require states to include performance indicators in their plans as well as sanctions and rewards for LEAs. State progress would be measured by each state according to its state plan. It also would require states to assess all students annually in grades 3 through 8 in mathematics and reading, and measure the outcomes of the assessments against the state content and student performance standards established in the state plans, beginning no later than school year 2005–2006.

The bill also would require that states produce annual report cards on student achievement performance at each proficiency level on the state assessments. It would also require states to administer assessments under either the National Assessment of Education Progress (NAEP) or another academic assessment to affirm the quality of state assessments.

In addition, H.R. 1 would establish penalties for states failing to meet the deadlines for creating standards and a system for measuring progress. States that fail to meet the deadlines outlined in the bill would have 25 percent of their funds for both state administration and activities withheld in each year until the Secretary of Education determines the state meets those requirements.

Part B—Student Reading Skills Improvement Grants. H.R. 1 would reauthorize funding for the Even Start Literacy program, currently Part B in Title I of ESEA, and the Inexpensive Book Distribution Program, currently authorized under Part E of Title X of ESEA, and create two new reading programs—the Reading First program and the Early Reading First program.

H.R. 1 would authorize \$900 million in 2002 for the Reading First program. The Reading First program replaces the Reading Excellence program, which is currently authorized under Part C of Title II of ESEA. The Reading Excellence program is funded at \$286 million in 2001. The Reading First program would first provide formula grants to states. States would award grants competitively to LEAs. The program would allow states to apply for grants if funds remain. The Reading Excellence program uses a two-tier competitive grant structure, which has resulted in slow spending in the first two years relative to formula grant or one-tier competitive grant programs. CBO estimates that spending for the Reading First program would be at a rate comparable to spending for other formula grants to states with competitive grants to LEAs.

H.R. 1 also would create a new program for pre-school reading programs. The Early Reading First program would provide competitive grants to LEAs or private organizations to develop and provide pre-school reading programs. H.R. 1 would authorize \$75 million for the Early Reading First program.

The bill would authorize \$250 million for the Even Start program, the same amount that was appropriated for 2001.

Finally, H.R. 1 would authorize such sums as may be necessary for 2002 through 2006 for the Inexpensive Book Distribution Program. CBO assumes funding of \$24 million in 2002 based on the 2001 funding adjusted for inflation.

Part C—Education of Migratory Children. H.R. 1 would authorize \$420 million in 2002 to continue to fund grants to support the needs of children of migrant workers, currently authorized under Part C of Title I. Funding in 2001 for the Migrant Education program is \$380 million.

Part D—Neglected or Delinquent Youth. H.R. 1 would authorize \$50 million in 2002 to reauthorize grants for education programs for neglected or delinquent youth, compared with the 2001 funding level of \$46 million.

Part E—Federal Evaluations and Demonstrations. H.R. 1 would authorize \$9 million in 2002 for a national assessment of activities authorized under Title I including the implementation of state standards, assessments, and accountability systems.

The bill also would authorize such sums as may be necessary for 2002 through 2006 for Federal Demonstrations of Innovative Practices. CBO assumes continued funding of about \$2 million a year.

H.R. 1 also would reauthorize funding for the Allen J. Ellender Fellowship Program. It would authorize such sums as may be necessary for 2002 through 2006. CBO assumes continued funding of about \$2 million a year.

Part F—Comprehensive School Reform. H.R. 1 would authorize \$260 million in 2002 to provide grants to states and subgrants to LEAs for comprehensive school reform. The program received \$210 million in 2001.

Part G—Rural Education Flexibility and Assistance. H.R. 1 would create a new Rural Education program to replace the Urban and Rural Education Assistance Program, currently authorized under Part J of Title X of ESEA. The bill would authorize the program at \$300 million in 2002, of which \$150 million would be distributed to LEAs for a Rural Education Flexibility formula grant program, and \$150 million for a Rural Education Assistance program.

The flexibility program would allow LEAs to use the additional funds to carry out several different activities authorized by ESEA. The Rural Education Assistance program would allocate funds to small and low-income rural schools for initiatives to improve student academic achievement including teacher professional development, teacher recruitment, educational technology, and parental involvement. The Urban and Rural Education Assistance Program was not funded in 2001.

Title II—Preparing, Training, and Recruiting Quality Teachers

Title II would authorize a total of \$3.7 billion for 2002 for several initiatives that address teacher hiring, recruitment, and professional development. CBO estimates that implementing this title would cost \$19.1 billion over the 2002–2006 period.

Teacher Quality Training and Recruiting Fund State Grants and Mathematics and Science Partnerships. H.R. 1 would authorize a

total of \$3.6 billion to fund both a formula grant to states and the Math and Science Partnership Program. The State Grants program would fund many activities previously authorized under the Eisenhower Professional Development and Class Size Reduction programs, both of which would be discontinued. The combined funding level in 2001 is \$1.9 billion under the Eisenhower Professional Development and the Class Size Reduction programs. CBO assumes a spending rate consistent with the rate of spending for other new formula grant programs.

The Math and Science Partnerships program would replace the existing Eisenhower Regional Mathematics and Science Education Consortia currently authorized in Title XIII, Part C. The Mathematics and Science Partnerships program would provide grants to partnerships of states, local institutions, and institutions of higher education to offer summer and distance education workshops for math and science teachers, establish recruitment strategies, and provide other career development activities.

Troops-to-Teachers. H.R. 1 would authorize \$50 million in 2002 to fund the Troops-to-Teachers program administered by the Department of Defense. The program assists former members of the armed forces to obtain certification or licensure as elementary school teachers, secondary school teachers, or vocational or technical teachers. The program was authorized in 2001 by the Consolidated Appropriations Act (Public Law 106-554) and funding in 2001 was \$3 million.

National Writing Project. H.R. 1 also would reauthorize the National Writing Project currently authorized in Title X, Part K, and set funding at such sums as may be necessary in 2002 through 2006. CBO assumes funding will continue at the 2001 level adjusted for inflation, or \$10 million in 2002 and \$53 million over the 2002-2006 period.

Cooperative Civic Education and Economic Exchange Programs. H.R. 1 would combine the Civic Education and International Education programs, reauthorize both as Cooperative Civic Education and Economic Exchange programs, and set funding at such sums as may be necessary in 2002 through 2006. CBO assumes funding would continue at the combined funding level of \$12 million in 2002, with a five-year total of \$65 million.

The bill would also reauthorize the We the People Program, currently administered by the Center for Civic Education, providing a separate authorization at such sums as may be necessary. Funding in 2001 was provided as a set-aside within the Civic Education program of \$9.85 million. With inflation, CBO estimates the 2002 authorization would be \$10.1 million, and the five-year total would be \$52 million.

*Title III—Education of Limited English Proficient Children;
Indian and Alaska Native Education*

H.R. 1 would authorize \$903 million for programs in English language instruction, and programs for Indian and Alaska Native education. CBO estimates that implementing this title would cost \$4.7 billion over the 2002-2006 period.

Part A—Education of Limited English Proficient and Immigrant Children. H.R. 1 would authorize \$750 million to fund formula grants to states for English language and academic instructional

programs. The block grants would fund programs currently authorized under the Bilingual Education program in Title VII of ESEA. The Bilingual Education Program, Foreign Language Assistance Program, and the Emergency Immigrant Education programs would be eliminated. The total of funding for all three programs in 2001 is \$460 million.

Part B—Indian and Alaska Native Education. H.R. 1 would reauthorize Indian and Alaska Native Education programs currently authorized under Title IX of ESEA. For 2002, the bill would authorize \$100 million for Indian Education grants and \$25 million for special programs and projects to improve educational opportunities for Indian children and national research activities. Indian Education grants were funded at \$93 million in 2001 and special programs and national activities were funded at \$23 million in 2001.

H.R. 1 would authorize \$15 million for 2002 for Alaskan Native Education, the same amount appropriated for 2001.

Bureau of Indian Affairs (BIA) Programs. The Bureau of Indian Affairs within the Department of the Interior also provides educational assistance to Native Indian children. Most BIA programs are permanently authorized at such sums as may be necessary under the Snyder Act of 1921 (Public Law 65–85). CBO assumes continued funding of these programs at their 2001 levels adjusted for inflation. This funding, which totals an estimated \$3.2 billion over the 2002–2006 period, is unaffected by H.R. 1 and is not included in the totals presented in Tables 1 and 2.

H.R. 1 would establish a minimum funding level for administrative cost grants to BIA-run schools. CBO estimates this provision would increase costs by approximately \$1 million in each of the five years.

The Early Childhood Development Program and the Tribal Departments of Education are not permanently authorized. H.R. 1 would reauthorize both of these programs through 2006, with specified levels for 2002 of \$10 million for the Early Childhood Development program and \$2 million for the Tribal Departments of Education. The Early Childhood Development program received \$12 million in 2001 and Tribal Departments received \$2 million in 2001.

Title IV—Promoting Informed Parental Choice and Innovative Programs

Title IV would authorize \$645 million in 2002 for several programs previously authorized under other titles of ESEA. Programs authorized under Title IV include State and Local Innovative Education Programs, Arts in Education, Gifted and Talented, Charter Schools, School Choice Research and Demonstration Educational Opportunity Fund, Magnet Schools, and Women’s Educational Equity. CBO estimates that implementing this title would cost \$4 billion over the 2002–2006 period.

State and Local Innovative Education Programs. H.R. 1 also would authorize \$450 million to continue the Innovative Education Program. The program is currently authorized under Title VI of ESEA. This program is funded at \$385 million in 2001.

Arts in Education. The bill would authorize an estimated \$29 million in 2002 for the Arts in Education program currently authorized under ESEA. Funding in 2001 was \$28 million.

Gifted and Talented. H.R. 1 would authorize an estimated \$8 million in 2002 for competitive grants to states for programs that identify and challenge gifted and talented students under the Gifted and Talented program currently authorized under Title X, Part B of ESEA. Funding in 2001 was \$8 million.

Charter Schools. The bill would reauthorize the Charter School program, currently authorized through 2003 under the Charter School Expansion Act (Public Law 105–278). H.R. 1 would authorize \$225 million for 2002 and extend the authorization through 2006. Funding in 2001 was \$190 million.

Magnet Schools Assistance. H.R. 1 would reauthorize \$125 million for 2002 to continue the Magnet Schools Assistance program currently authorized under Part A of Title V. Funding in 2001 is \$110 million.

Women's Educational Equity. Finally, the bill would authorize \$3 million in 2002 for the Women's Educational Equity program. Funding in 2001 was also \$3 million.

Title V—21st Century Schools

H.R. 1 would authorize a total of \$2.6 billion in 2002 for Safe Schools state grants, 21st Century Community Learning Centers, School Safety national programs, Enhancing Education Through Technology, Character Education, Elementary and Secondary School Counseling, and mentoring programs. CBO estimates that implementing this title would cost \$13.3 billion over the 2002–2006 period.

Safe Schools. The bill would authorize \$475 million in 2002 for the Safe Schools state grant program currently authorized as the Safe and Drug Free Community Program under Title IV of ESEA. In 2001, total funding for the Safe and Drug Free Community Program and the Safe and Drug Free Community Coordinator Initiative was \$489 million.

21st Century Community Learning Centers. H.R. 1 would authorize \$900 million in 2002 for the 21st Century Community Learning Centers program, currently authorized under Part I of Title X. The program was funded at \$846 million in 2001.

National Programs. The bill would authorize \$60 million in 2002 for national programs, which are currently funded at \$155 million.

Enhancing Education Through Technology. H.R. 1 would authorize a total of \$1.0 billion in 2002 for formula block grants to states to provide assistance to states and localities in implementing innovative technology initiatives. The Enhancing Education Through Technology program would replace many smaller programs currently authorized under Title III of ESEA including the Literacy Challenge Fund, Innovative Challenge Fund, National Leadership, Technology Leadership, Teacher Training, Community-Based Centers, and Star Schools. The combined funding level in 2001 is \$856 million for those programs. CBO assumes that the rates of spending for this program would be similar to other formula grant programs.

Ready To Learn—Ready To Teach. H.R. 1 would combine the Ready to Learn Television program and the Telecommunication

Demonstration Project for Math, reauthorize the program as the Ready To Learn—Ready To Teach program, and authorize \$24.5 million in 2002.

Character Education. H.R. 1 would reauthorize the Character Education program, currently authorized as part of the Fund for the Improvement of Education by Title X of ESEA. The bill would authorize \$25 million for 2002. Funding in 2001 is \$8.2 million.

Elementary and Secondary School Counseling Programs. The bill would reauthorize the Elementary and Secondary School Counseling programs currently authorized under Title X of ESEA (also as part of the Fund for the Improvement of Education), H.R. 1 would create a separate authorization and would authorize such sums as may be necessary for 2002. The program was funded at \$30 million in 2001 and CBO assumes funding would continue at the 2001 level adjusted for inflation. Thus, CBO estimates funding for the programs in 2002 would be \$31 million.

Mentoring Programs. H.R. 1 would create a new competitive grant program to fund LEAS, nonprofit organizations and other agencies or partnerships that create personal mentorship programs for high-need children. It would authorize \$50 million in 2002 and such sums as may be necessary for each of the fiscal years 2003 through 2006. CBO assumes that spending would occur at rate consistent with other competitive grant programs.

Title VI—Impact Aid

Impact Aid programs were reauthorized in 1999 under the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2000 (Public Law 106–398). That law authorized appropriations through 2003. Title VI would authorize \$150 million in 2002 for construction and also extend all Impact Aid authorizations through 2006 to match other programs reauthorized by this bill. CBO estimates that implementing this title would cost \$3.9 billion over the 2002–2006 period.

Title VII—Accountability

H.R. 1 would authorize a total of \$509 million in 2002 for development and administration of state standards and assessments, administration of assessments under the National Assessment of Educational Progress (NAEP) and independent assessments, and achievement awards for states. CBO estimates that implementing this title would cost \$2.6 billion over the 2002–2006 period.

Achievement in Education Awards. H.R. 1 would authorize \$40 million in 2002 for a new Education Award program that would allow the Secretary of Education to award grants to states that make significant progress in overall student achievement, economically disadvantaged students' achievement, and the English proficiency of non-English proficient students. H.R. 1 would also authorize the Secretary to award bonus payments to states that complete the development of state assessments in advance of the deadline. States would make awards to schools that make the most progress in the state.

The bill also would establish penalties for states based on state assessment results. States that fail to make yearly progress for two consecutive years could have their administrative funds reduced up to 30 percent. States that fail to make progress in subse-

quent years could have up to 75 percent of their administrative funds reduced. CBO expects that this provision would not significantly change spending.

Development of State Standards and Assessments. H.R. 1 would authorize \$400 million in 2002 for the development and administration of state standards and assessments described in title I of this bill.

Grants for Independent Assessments and Administration of State Assessments Under NAEP. The bill also would authorize \$69 million for states to administer assessments of fourth and eighth grade reading and mathematics under NAEP, and to offset the cost of independent assessments described in title I of this bill.

Funding Flexibility for State and Local Education Agencies. H.R. 1 would allow states to transfer up to 50 percent of non-administrative funds between the Teacher Quality, State and Local Innovative Programs, Safe Schools, 21st Century Community Learning Centers, and Enhancing Education Through Technology programs. H.R. 1 would also allow states to transfer fund from these programs into its allocation under title I of this bill. CBO expects that this provision would not significantly change spending.

Title VIII—General Provisions

Flexibility and Coordination. H.R. 1 would allow state educational agencies to consolidate funds for administration of programs. It also would allow state educational agencies to submit a consolidated state plan or application for each of the programs in which the state participates or applies. CBO anticipates that these provisions would have no budgetary effect.

Title IX—Miscellaneous Provisions

The bill would authorize a total of \$60 million in 2002 for education for homeless children and youth and such sums as may be necessary for 2003 through 2006. CBO estimates that implementing this title would cost \$312 million over the 2002–2006 period.

Homeless Education. H.R. 1 would amend and reauthorize Subtitle B of Title VII of the Stewart D. McKinney Homeless Assistance Act, authorizing \$60 million for education for homeless children and youth in 2002. The appropriation for 2001 was \$35 million.

Repeals. H.R. 1 would repeal Parts A and C of Title II, and Title VI of the Goals 2000: Educate America Act; the Troops to Teachers Act of 1999; Titles IX, XI, XII, and XIV of ESEA; and Parts A, B, C, D, F, G, I, J, and L of Title X of ESEA; and sections 13001 and 13002 of Title XIII of ESEA.

Programs that would be repealed in H.R. 1 that do not have similar activities authorized elsewhere in the bill include:

- Native Hawaiian Education (Part B of Title IX),
- Fund for Improvement of Education (Part A of Title X, except counseling services),
- Urban Education (Subpart 1 of Part J of Title X),
- Physical Education for Progress (Part L of Title X),
- Coordinated Services (Title XI),
- School Facilities Infrastructure Improvement Act (Title XII),
- and

National Education Goals Panel (Parts A and C of Title II of Goals 2000).

Pay as you go considerations: None.

Estimated impact on state, local, and tribal governments: The bill would reauthorize certain sections of the Elementary and Secondary Education Act of 1965 and would authorize about \$23 billion in grants to state and local education agencies and tribal governments to support their efforts in 2002 to improve educational opportunities and performance for specific populations of students. The bill contains no intergovernmental mandates as defined in UMRA. In general, any costs to state, local, or tribal governments as a result of enactment of this bill would be incurred voluntarily, as conditions of aid.

Estimated impact on the private sector: The bill contains no private-sector mandates as defined in UMRA.

Estimate prepared by: Federal costs: Donna Wong; impact on state, local, and tribal governments: Susan Sieg Tompkins; impact on the private sector: Nabeel Alsalam.

Estimate approved by: Peter H. Fontaine, Deputy Assistant Director for Budget Analysis.

STATEMENT OF GENERAL PERFORMANCE GOALS AND OBJECTIVES

In accordance with clause (3)(c) of House rule XIII, the goals of H.R. 1 are to transform the federal role in education and advance our nation's education priorities. The bill reauthorizes the Elementary and Secondary Education Act of 1965 and fundamentally reforms the Act by increasing accountability for student performance, focusing on what works, reducing bureaucracy, increasing flexibility, and empowering parents. Key components of the legislation include: (1) closing the achievement gap through high State academic standards, annual State academic assessments, and consequences for schools that fail to teach; (2) promoting parental empowerment through reports to parents on the performance of States and schools, assisting charter schools, expanding public school choice, and allowing students in failing schools to receive supplementary educational services from a provider of their parent's choice; (3) improving literacy by focusing on reading in the early grades and early childhood reading instruction; (4) expanding freedom to teach and learn by increasing flexibility in Title I and reducing duplicative and excessive programs and regulations; (5) rewarding success and sanctioning failure by providing financial rewards for States that improve academic achievement and narrow the achievement gap, and reducing federal funds to States that fail to demonstrate results; (6) improving teacher quality by ensuring that all students are taught by fully qualified teachers, encouraging professional development based on research, and strengthening math and science education; and (7) making schools safer by protecting teachers from frivolous lawsuits, promoting school safety, allowing students to escape unsafe schools, and supporting character education. The Committee expects the Department of Education to comply with H.R. 1 and implement the changes to the law in accordance with these stated goals.

CONSTITUTIONAL AUTHORITY STATEMENT

Under clause 3(d)(1) of rule XIII of the Rules of the House of Representatives, the Committee must include a statement citing the specific powers granted to Congress in the Constitution to enact the law proposed by H.R. 1. The Committee believes that the amendments made by this bill to the Elementary and Secondary Education Act are within Congress' authority under Article I, section 8, clause 1 of the Constitution.

COMMITTEE ESTIMATE

Clauses 3(d)(2) of rule XIII of the Rules of the House of Representatives requires an estimate and a comparison by the Committee of the costs that would be incurred in carrying out H.R. 1. However, clause 3(d)(3)(B) of that rule provides that this requirement does not apply when the Committee has included in its report a timely submitted cost estimate of the bill prepared by the Director of the Congressional Budget Office under section 402 of the Congressional Budget Act.

CHANGES IN EXISTING LAW MADE BY THE BILL, AS REPORTED

In compliance with clause 3(e) of rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italics, existing law in which no change is proposed is shown in roman):

**ELEMENTARY AND SECONDARY EDUCATION ACT OF
1965**

SECTION 1. TABLE OF CONTENTS.

This Act may be cited as the "Elementary and Secondary Education Act of 1965".

**TITLE I—HELPING DISADVANTAGED
CHILDREN MEET HIGH STANDARDS**

[SEC. 1001. DECLARATION OF POLICY AND STATEMENT OF PURPOSE.**[(a) STATEMENT OF POLICY.—**

[(1) IN GENERAL.—The Congress declares it to be the policy of the United States that a high-quality education for all individuals and a fair and equal opportunity to obtain that education are a societal good, are a moral imperative, and improve the life of every individual, because the quality of our individual lives ultimately depends on the quality of the lives of others.

[(2) ADDITIONAL POLICY.—The Congress further declares it to be the policy of the United States to expand the program authorized by this title over the fiscal years 1996 through 1999 by increasing funding for this title by at least \$750,000,000 over baseline each fiscal year and thereby increasing the percentage of eligible children served in each fiscal year with the intent of serving all eligible children by fiscal year 2004.

[(b) RECOGNITION OF NEED.—The Congress recognizes that—

[(1) although the achievement gap between disadvantaged children and other children has been reduced by half over the past two decades, a sizable gap remains, and many segments of our society lack the opportunity to become well educated;

[(2) the most urgent need for educational improvement is in schools with high concentrations of children from low-income families and achieving the National Education Goals will not be possible without substantial improvement in such schools;

[(3) educational needs are particularly great for low-achieving children in our Nation's highest-poverty schools, children with limited English proficiency, children of migrant workers, children with disabilities, Indian children, children who are neglected or delinquent, and young children and their parents who are in need of family-literacy services;

[(4) while title I and other programs funded under this Act contribute to narrowing the achievement gap between children in high-poverty and low-poverty schools, such programs need to become even more effective in improving schools in order to enable all children to achieve high standards; and

[(5) in order for all students to master challenging standards in core academic subjects as described in the third National Education Goal described in section 102(3) of the Goals 2000: Educate America Act, students and schools will need to maximize the time spent on teaching and learning the core academic subjects.

[(c) WHAT HAS BEEN LEARNED SINCE 1988.—To enable schools to provide all children a high-quality education, this title builds upon the following learned information:

[(1) All children can master challenging content and complex problem-solving skills. Research clearly shows that children, including low-achieving children, can succeed when expectations are high and all children are given the opportunity to learn challenging material.

[(2) Conditions outside the classroom such as hunger, unsafe living conditions, homelessness, unemployment, violence, inadequate health care, child abuse, and drug and alcohol abuse can adversely affect children's academic achievement and must be addressed through the coordination of services, such as health and social services, in order for the Nation to meet the National Education Goals.

[(3) Use of low-level tests that are not aligned with schools' curricula fails to provide adequate information about what children know and can do and encourages curricula and instruction that focus on the low-level skills measured by such tests.

[(4) Resources are more effective when resources are used to ensure that children have full access to effective high-quality regular school programs and receive supplemental help through extended-time activities.

[(5) Intensive and sustained professional development for teachers and other school staff, focused on teaching and learning and on helping children attain high standards, is too often not provided.

[(6) Insufficient attention and resources are directed toward the effective use of technology in schools and the role tech-

nology can play in professional development and improved teaching and learning.

[(7) All parents can contribute to their children's success by helping at home and becoming partners with teachers so that children can achieve high standards.

[(8) Decentralized decisionmaking is a key ingredient of systemic reform. Schools need the resources, flexibility, and authority to design and implement effective strategies for bringing their children to high levels of performance.

[(9) Opportunities for students to achieve high standards can be enhanced through a variety of approaches such as public school choice and public charter schools.

[(10) Attention to academics alone cannot ensure that all children will reach high standards. The health and other needs of children that affect learning are frequently unmet, particularly in high-poverty schools, thereby necessitating coordination of services to better meet children's needs.

[(11) Resources provided under this title can be better targeted on the highest-poverty local educational agencies and schools that have children most in need.

[(12) Equitable and sufficient resources, particularly as such resources relate to the quality of the teaching force, have an integral relationship to high student achievement.

[(d) STATEMENT OF PURPOSE.—The purpose of this title is to enable schools to provide opportunities for children served to acquire the knowledge and skills contained in the challenging State content standards and to meet the challenging State performance standards developed for all children. This purpose shall be accomplished by—

[(1) ensuring high standards for all children and aligning the efforts of States, local educational agencies, and schools to help children served under this title to reach such standards;

[(2) providing children an enriched and accelerated educational program, including, when appropriate, the use of the arts, through schoolwide programs or through additional services that increase the amount and quality of instructional time so that children served under this title receive at least the classroom instruction that other children receive;

[(3) promoting schoolwide reform and ensuring access of children (from the earliest grades) to effective instructional strategies and challenging academic content that includes intensive complex thinking and problem-solving experiences;

[(4) significantly upgrading the quality of instruction by providing staff in participating schools with substantial opportunities for professional development;

[(5) coordinating services under all parts of this title with each other, with other educational services, and, to the extent feasible, with health and social service programs funded from other sources;

[(6) affording parents meaningful opportunities to participate in the education of their children at home and at school;

[(7) distributing resources, in amounts sufficient to make a difference, to areas and schools where needs are greatest;

[(8) improving accountability, as well as teaching and learning, by using State assessment systems designed to measure

how well children served under this title are achieving challenging State student performance standards expected of all children; and

[(9) providing greater decisionmaking authority and flexibility to schools and teachers in exchange for greater responsibility for student performance.

[SEC. 1002. AUTHORIZATION OF APPROPRIATIONS.

[(a) LOCAL EDUCATIONAL AGENCY GRANTS.—For the purpose of carrying out part A, other than section 1120(e), there are authorized to be appropriated \$7,400,000,000 for fiscal year 1995 and such sums as may be necessary for each of the four succeeding fiscal years.

[(1) IN GENERAL.—Except as provided in paragraph (3), each State may reserve for the proper and efficient performance of its duties under subsections (c)(5) and (d) of section 1116, and section 1117, one-half of 1 percent of the funds allocated to the State under subsections (a), (c), and (d), of section 1002 for fiscal year 1995 and each succeeding fiscal year.

[(2) MINIMUM.—The total amount that may be reserved by each State, other than the outlying areas, under this sub-

section for any fiscal year, when added to amounts appropriated for such fiscal year under section 1002(f) that are allocated to the State under subsection (b), if any, may not be less than \$200,000. The total amount that may be reserved by each outlying area under this subsection for any fiscal year, when added to amounts appropriated for such fiscal year under section 1002(f) that are allocated under subsection (b) to the outlying area, if any, may not be less than \$25,000.

[(b) ADDITIONAL STATE ALLOCATIONS FOR SCHOOL IMPROVEMENT.—From the amount appropriated under section 1002(f) for any fiscal year, each State shall be eligible to receive an amount that bears the same ratio to the amount appropriated as the amount allocated to the State under this part (other than section 1120(e)) bears to the total amount allocated to all States under this part (other than section 1120(e)).

[PART A—IMPROVING BASIC PROGRAMS OPERATED BY LOCAL EDUCATIONAL AGENCIES

[Subpart 1—Basic Program Requirements

[SEC. 1111. STATE PLANS.

[(a) PLANS REQUIRED.—

[(1) IN GENERAL.—Any State desiring to receive a grant under this part shall submit to the Secretary a plan, developed in consultation with local educational agencies, teachers, pupil services personnel, administrators, other staff, and parents, that satisfies the requirements of this section and that is coordinated with other programs under this Act, the Goals 2000: Educate America Act, and other Acts, as appropriate, consistent with section 14306.

[(2) CONSOLIDATION PLAN.—A State plan submitted under paragraph (1) may be submitted as part of a consolidation plan under section 14302.

[(b) STANDARDS AND ASSESSMENTS.—

[(1) CHALLENGING STANDARDS.—(A) Each State plan shall demonstrate that the State has developed or adopted challenging content standards and challenging student performance standards that will be used by the State, its local educational agencies, and its schools to carry out this part, except that a State shall not be required to submit such standards to the Secretary.

[(B) If a State has State content standards or State student performance standards developed under title III of the Goals 2000: Educate America Act and an aligned set of assessments for all students developed under such title, or, if not developed under such title, adopted under another process, the State shall use such standards and assessments, modified, if nec-

essary, to conform with the requirements of subparagraphs (A) and (D) of this paragraph, and paragraphs (2) and (3).

[(C) If a State has not adopted State content standards and State student performance standards for all students, the State plan shall include a strategy and schedule for developing State content standards and State student performance standards for elementary and secondary school children served under this part in subjects as determined by the State, but including at least mathematics and reading or language arts by the end of the one-year period described in paragraph (6), which standards shall include the same knowledge, skills, and levels of performance expected of all children.

[(D) Standards under this paragraph shall include—

[(i) challenging content standards in academic subjects that—

[(I) specify what children are expected to know and be able to do;

[(II) contain coherent and rigorous content; and

[(III) encourage the teaching of advanced skills;

[(ii) challenging student performance standards that—

[(I) are aligned with the State's content standards;

[(II) describe two levels of high performance, proficient and advanced, that determine how well children are mastering the material in the State content standards; and

[(III) describe a third level of performance, partially proficient, to provide complete information about the progress of the lower performing children toward achieving to the proficient and advanced levels of performance.

[(E) For the subjects in which students will be served under this part, but for which a State is not required by subparagraphs (A), (B), and (C) to develop, and has not otherwise developed such standards, the State plan shall describe a strategy for ensuring that such students are taught the same knowledge and skills and held to the same expectations as are all children.

[(2) YEARLY PROGRESS.—

[(A) Each State plan shall demonstrate, based on assessments described under paragraph (3), what constitutes adequate yearly progress of—

[(i) any school served under this part toward enabling children to meet the State's student performance standards; and

[(ii) any local educational agency that received funds under this part toward enabling children in schools receiving assistance under this part to meet the State's student performance standards.

[(B) Adequate yearly progress shall be defined in a manner—

[(i) that is consistent with guidelines established by the Secretary that result in continuous and substantial yearly improvement of each local educational agency and school sufficient to achieve the goal of all children served under this part meeting the State's

proficient and advanced levels of performance, particularly economically disadvantaged and limited English proficient children; and

[(ii) that links progress primarily to performance on the assessments carried out under this section while permitting progress to be established in part through the use of other measures.

[(3) ASSESSMENTS.—Each State plan shall demonstrate that the State has developed or adopted a set of high-quality, yearly student assessments, including assessments in at least mathematics and reading or language arts, that will be used as the primary means of determining the yearly performance of each local educational agency and school served under this part in enabling all children served under this part to meet the State's student performance standards. Such assessments shall—

[(A) be the same assessments used to measure the performance of all children, if the State measures the performance of all children;

[(B) be aligned with the State's challenging content and student performance standards and provide coherent information about student attainment of such standards;

[(C) be used for purposes for which such assessments are valid and reliable, and be consistent with relevant, nationally recognized professional and technical standards for such assessments;

[(D) measure the proficiency of students in the academic subjects in which a State has adopted challenging content and student performance standards and be administered at some time during—

[(i) grades 3 through 5;

[(ii) grades 6 through 9; and

[(iii) grades 10 through 12;

[(E) involve multiple up-to-date measures of student performance, including measures that assess higher order thinking skills and understanding;

[(F) provide for—

[(i) the participation in such assessments of all students;

[(ii) the reasonable adaptations and accommodations for students with diverse learning needs, necessary to measure the achievement of such students relative to State content standards; and

[(iii) the inclusion of limited English proficient students who shall be assessed, to the extent practicable, in the language and form most likely to yield accurate and reliable information on what such students know and can do, to determine such students' mastery of skills in subjects other than English;

[(G) include students who have attended schools in a local educational agency for a full academic year but have not attended a single school for a full academic year, however the performance of students who have attended more than one school in the local educational agency in any academic year shall be used only in determining the progress of the local educational agency;

[(H) provide individual student interpretive and descriptive reports, which shall include scores, or other information on the attainment of student performance standards; and

[(I) enable results to be disaggregated within each State, local educational agency, and school by gender, by each major racial and ethnic group, by English proficiency status, by migrant status, by students with disabilities as compared to nondisabled students, and by economically disadvantaged students as compared to students who are not economically disadvantaged.

[(4) SPECIAL RULE.—Assessment measures that do not meet the requirements of paragraph (3)(C) may be included as one of the multiple measures, if a State includes in the State plan information regarding the State's efforts to validate such measures.

[(5) LANGUAGE ASSESSMENTS.—Each State plan shall identify the languages other than English that are present in the participating student population and indicate the languages for which yearly student assessments are not available and are needed. The State shall make every effort to develop such assessments and may request assistance from the Secretary if linguistically accessible assessment measures are needed. Upon request, the Secretary shall assist with the identification of appropriate assessment measures in the needed languages through the Office of Bilingual Education and Minority Languages Affairs.

[(6) STANDARD AND ASSESSMENT DEVELOPMENT.—(A) A State that does not have challenging State content standards and challenging State student performance standards, in at least mathematics and reading or language arts, shall develop such standards within one year of receiving funds under this part after the first fiscal year for which such State receives such funds after the date of enactment of the Improving America's Schools Act of 1994.

[(B) A State that does not have assessments that meet the requirements of paragraph (3) in at least mathematics and reading or language arts shall develop and test such assessments within four years (one year of which shall be used for field testing such assessment), of receiving funds under this part after the first fiscal year for which such State receives such funds after the date of enactment of the Improving America's Schools Act of 1994 and shall develop benchmarks of progress toward the development of such assessments that meet the requirements of paragraph (3), including periodic updates.

[(C) The Secretary may extend for one additional year the time for testing new assessments under subparagraph (B) upon the request of the State and the submission of a strategy to correct problems identified in the field testing of such new assessments.

[(D) If, after the one-year period described in subparagraph (A), a State does not have challenging State content and challenging student performance standards in at least mathematics and reading or language arts, a State shall adopt a set of

standards in these subjects such as the standards and assessments contained in other State plans the Secretary has approved.

[(E) If, after the four-year period described in subparagraph (B), a State does not have assessments, in at least mathematics and reading or language arts, that meet the requirement of paragraph (3), and is denied an extension under subparagraph (C), a State shall adopt an assessment that meets the requirement of paragraph (3) such as one contained in other State plans the Secretary has approved.

[(7) TRANSITIONAL ASSESSMENTS.—(A) If a State does not have assessments that meet the requirements of paragraph (3) and proposes to develop such assessments under paragraph (6)(B), the State may propose to use a transitional set of yearly statewide assessments that will assess the performance of complex skills and challenging subject matter.

[(B) For any year in which a State uses transitional assessments, the State shall devise a procedure for identifying local educational agencies under paragraphs (3) and (7) of section 1116(d), and schools under paragraphs (1) and (7) of section 1116(c), that rely on accurate information about the academic progress of each such local educational agency and school.

[(8) REQUIREMENT.—Each State plan shall describe—

[(A) how the State educational agency will help each local educational agency and school affected by the State plan develop the capacity to comply with each of the requirements of sections 1112(c)(1)(D), 1114(b), and 1115(c) that is applicable to such agency or school; and

[(B) such other factors the State deems appropriate to provide students an opportunity to achieve the knowledge and skills described in the challenging content standards adopted by the State.

[(c) OTHER PROVISIONS TO SUPPORT TEACHING AND LEARNING.—Each State plan shall contain assurances that—

[(1)(A) the State educational agency will implement a system of school support teams under section 1117(c), including provision of necessary professional development for those teams;

[(B) the State educational agency will work with other agencies, including educational service agencies or other local consortia, and institutions to provide technical assistance to local educational agencies and schools to carry out the State educational agency's responsibilities under this part, including technical assistance in providing professional development under section 1119 and technical assistance under section 1117; and

[(C)(i) where educational service agencies exist, the State educational agency will consider providing professional development and technical assistance through such agencies; and

[(ii) where educational service agencies do not exist, the State educational agency will consider providing professional development and technical assistance through other cooperative agreements such as through a consortium of local educational agencies;

[(2) the State educational agency will notify local educational agencies and the public of the standards and assessments developed under this section, and of the authority to operate schoolwide programs, and will fulfill the State educational agency's responsibilities regarding local educational agency improvement and school improvement under section 1116, including such corrective actions as are necessary;

[(3) the State educational agency will provide the least restrictive and burdensome regulations for local educational agencies and individual schools participating in a program assisted under this part;

[(4) the State educational agency will encourage the use of funds from other Federal, State, and local sources for schoolwide reform in schoolwide programs under section 1114;

[(5) the Committee of Practitioners established under section 1603(b) will be substantially involved in the development of the plan and will continue to be involved in monitoring the plan's implementation by the State;

[(6) the State will coordinate activities funded under this part with school-to-work, vocational education, cooperative education and mentoring programs, and apprenticeship programs involving business, labor, and industry, as appropriate; and

[(7) the State educational agency will encourage local educational agencies and individual schools participating in a program assisted under this part to offer family literacy services (using funds under this part), if the agency or school determines that a substantial number of students served under this part by the agency or school have parents who do not have a high school diploma or its recognized equivalent or who have low levels of literacy.

[(d) PEER REVIEW AND SECRETARIAL APPROVAL.—

[(1) IN GENERAL.—The Secretary shall—

[(A) establish a peer review process to assist in the review and recommendations for revision of State plans;

[(B) appoint individuals to the peer review process who are representative of State educational agencies, local educational agencies, teachers, and parents;

[(C) following an initial peer review, approve a State plan the Secretary determines meets the requirements of subsections (a), (b), and (c);

[(D) if the Secretary determines that the State plan does not meet the requirements of subsection (a), (b), or (c), immediately notify the State of such determination and the reasons for such determination;

[(E) not decline to approve a State's plan before—

[(i) offering the State an opportunity to revise its plan;

[(ii) providing technical assistance in order to assist the State to meet the requirements under subsections (a), (b), and (c); and

[(iii) providing a hearing; and

[(F) have the authority to disapprove a State plan for not meeting the requirements of this part, but shall not have the authority to require a State, as a condition of approval of the State plan, to include in, or delete from, such

plan one or more specific elements of the State's content standards or to use specific assessment instruments or items.

[(2) WITHHOLDING.—The Secretary may withhold funds for State administration and activities under section 1117 until the Secretary determines that the State plan meets the requirements of this section.

[(e) DURATION OF THE PLAN.—

[(1) IN GENERAL.—Each State plan shall—

[(A) remain in effect for the duration of the State's participation under this part; and

[(B) be periodically reviewed and revised by the State, as necessary, to reflect changes in the State's strategies and programs under this part.

[(2) ADDITIONAL INFORMATION.—If the State makes significant changes in its plan, such as the adoption of new State content standards and State student performance standards, new assessments, or a new definition of adequate progress, the State shall submit such information to the Secretary.

[(f) LIMITATION ON CONDITIONS.—Nothing in this part shall be construed to authorize an officer or employee of the Federal Government to mandate, direct, or control a State, local educational agency, or school's specific instructional content or student performance standards and assessments, curriculum, or program of instruction, as a condition of eligibility to receive funds under this part.

[(g) SPECIAL RULE.—If the aggregate State expenditure by a State educational agency for the operation of elementary and secondary education programs in the State is less than such agency's aggregate Federal expenditure for the State operation of all Federal elementary and secondary education programs, then the State plan shall include assurances and specific provisions that such State will provide State expenditures for the operation of elementary and secondary education programs equal to or exceeding the level of Federal expenditures for such operation by October 1, 1998.

[SEC. 1112. LOCAL EDUCATIONAL AGENCY PLANS.

[(B) periodically be reviewed and revised, as necessary, to reflect changes in the local educational agency's strategies and programs.

[(e) STATE APPROVAL.—

[(1) IN GENERAL.—Each local educational agency plan shall be filed according to a schedule established by the State educational agency, except that a local educational agency shall have not more than one year after the date of enactment of the Improving America's Schools Act of 1994 to have such plan provisionally approved by the State educational agency and not more than two years after the date of enactment of such Act to have such plan finally approved by the State educational agency.

[(2) APPROVAL.—The State educational agency shall approve a local educational agency's plan only if the State educational agency determines that the local educational agency's plan will enable schools served under this part to substantially help all children served under this part meet the standards expected of all children described in section 1111(b)(1).

[SEC. 1113. ELIGIBLE SCHOOL ATTENDANCE AREAS.

[(a) DETERMINATION.—

[(1) IN GENERAL.—A local educational agency shall use funds received under this part only in eligible school attendance areas.

[(2) ELIGIBLE SCHOOL ATTENDANCE AREAS.—For the purposes of this part—

[(A) the term “school attendance area” means, in relation to a particular school, the geographical area in which the children who are normally served by that school reside; and

[(B) the term “eligible school attendance area” means a school attendance area in which the percentage of children from low-income families is at least as high as the percentage of children from low-income families in the local educational agency as a whole.

[(3) RANKING ORDER.—If funds allocated in accordance with subsection (c) are insufficient to serve all eligible school attendance areas, a local educational agency shall—

[(A) annually rank, without regard to grade spans, such agency’s eligible school attendance areas in which the concentration of children from low-income families exceeds 75 percent from highest to lowest according to the percentage of children from low-income families; and

[(B) serve such eligible school attendance areas in rank order.

[(4) REMAINING FUNDS.—If funds remain after serving all eligible school attendance areas under paragraph (3), a local educational agency shall—

[(A) annually rank such agency’s remaining eligible school attendance areas from highest to lowest either by grade span or for the entire local educational agency according to the percentage of children from low-income families; and

[(B) serve such eligible school attendance areas in rank order either within each grade-span grouping or within the local educational agency as a whole.

[(5) MEASURES.—The local educational agency shall use the same measure of poverty, which measure shall be the number of children ages 5 through 17 in poverty counted in the most recent census data approved by the Secretary, the number of children eligible for free and reduced priced lunches under the Richard B. Russell National School Lunch Act, the number of children in families receiving assistance under the State program funded under part A of title IV of the Social Security Act, or the number of children eligible to receive medical assistance under the Medicaid program, or a composite of such indicators, with respect to all school attendance areas in the local educational agency—

[(A) to identify eligible school attendance areas;

[(B) to determine the ranking of each area; and

[(C) to determine allocations under subsection (c).

[(6) EXCEPTION.—This subsection shall not apply to a local educational agency with a total enrollment of less than 1,000 children.

[(7) WAIVER FOR DESEGREGATION PLANS.—The Secretary may approve a local educational agency's written request for a waiver of the requirements of subsections (a) and (c), and permit such agency to treat as eligible, and serve, any school that children attend with a State-ordered or a court-ordered school desegregation plan or a plan that continues to be implemented in accordance with a State-ordered or court-ordered desegregation plan, if (A) the number of economically disadvantaged children enrolled in the school is at least 25 percent of the school's total enrollment; and (B) the Secretary determines on the basis of a written request from such agency and in accordance with such criteria as the Secretary establishes, that approval of that request would further the purposes of this part.

[(b) LOCAL EDUCATIONAL AGENCY DISCRETION.—

[(1) IN GENERAL.—Notwithstanding subsection (a)(2), a local educational agency may—

[(A) designate as eligible any school attendance area or school in which at least 35 percent of the children are from low-income families;

[(B) use funds received under this part in a school that is not in an eligible school attendance area, if the percentage of children from low-income families enrolled in the school is equal to or greater than the percentage of such children in a participating school attendance area of such agency; and

[(C) elect not to serve an eligible school attendance area or eligible school that has a higher percentage of children from low-income families if—

[(i) the school meets the comparability requirements of section 1120A(c);

[(ii) the school is receiving supplemental funds from other State or local sources that are spent according to the requirements of section 1114 or 1115; and

[(iii) the funds expended from such other sources equal or exceed the amount that would be provided under this part.

[(2) SPECIAL RULE.—Notwithstanding paragraph (1)(C), the number of children attending private elementary and secondary schools who are to receive services, and the assistance such children are to receive under this part, shall be determined without regard to whether the public school attendance area in which such children reside is assisted under paragraph (1).

[(c) ALLOCATIONS.—

[(1) IN GENERAL.—A local educational agency shall allocate funds received under this part to eligible school attendance areas or eligible schools, identified under subsection (a) or (b), in rank order, on the basis of the total number of children from low-income families in each area or school.

[(2) SPECIAL RULE.—(A) Except as provided in subparagraph (B), the per pupil amount of funds allocated to each school attendance area or school under paragraph (1) shall be at least

125 percent of the per pupil amount of funds a local educational agency received for that year under the poverty criteria described by the local educational agency in the plan submitted under section 1112, except that this paragraph shall not apply to a local educational agency that only serves schools in which the percentage of such children is 35 percent or greater.

[(B) A local educational agency may reduce the amount of funds allocated under subparagraph (A) for a school attendance area or school by the amount of any supplemental State and local funds expended in that school attendance area or school for programs that meet the requirements of section 1114 or 1115.

[(3) RESERVATION.—A local educational agency shall reserve such funds as are necessary under this part to provide services comparable to those provided to children in schools funded under this part to serve—

[(A) where appropriate, eligible homeless children who do not attend participating schools, including providing educationally related support services to children in shelters;

[(B) children in local institutions for neglected or delinquent children; and

[(C) where appropriate, neglected and delinquent children in community day school programs.

[SEC. 1114. SCHOOLWIDE PROGRAMS.

[(a) USE OF FUNDS FOR SCHOOLWIDE PROGRAMS.—

[(1) IN GENERAL.—A local educational agency may use funds under this part, in combination with other Federal, State, and local funds, in order to upgrade the entire educational program in a school described in subparagraph (A) or (B) if, for the initial year of the schoolwide program, the school meets either of the following criteria:

[(A) For the school year 1995–1996—

[(i) the school serves an eligible school attendance area in which not less than 60 percent of the children are from low-income families; or

[(ii) not less than 60 percent of the children enrolled in the school are from such families.

[(B) For the school year 1996–1997 and subsequent years—

[(i) the school serves an eligible school attendance area in which not less than 50 percent of the children are from low-income families; or

[(ii) not less than 50 percent of the children enrolled in the school are from such families.

[(2) STATE ASSURANCES.—(A) A local educational agency may start new schoolwide programs under this section only after the State educational agency provides written information to each local educational agency in the State that demonstrates that such State agency has established the statewide system of support and improvement required by subsections (c)(1) and (e) of section 1117.

[(B) A school that desires to initiate a schoolwide program under this section prior to the establishment of the statewide system of support and improvement required in subsections

(c)(1) and (e) of section 1117 shall demonstrate to the local educational agency that such school has received high quality technical assistance and support from other providers of assistance such as comprehensive technical assistance centers, regional laboratories, institutions of higher education, educational service agencies, or other local consortia.

[(3) IDENTIFICATION.—(A) No school participating in a schoolwide program shall be required to identify particular children under this part as eligible to participate in a schoolwide program or to provide supplemental services to such children.

[(B) A school participating in a schoolwide program shall use funds available to carry out this section only to supplement the amount of funds that would, in the absence of funds under this part, be made available from non-Federal sources for the school, including funds needed to provide services that are required by law for children with disabilities and children with limited English proficiency.

[(4) SPECIAL RULE.—(A) Except as provided in subsection (b), the Secretary may, through publication of a notice in the Federal Register, exempt schoolwide programs under this section from statutory or regulatory provisions of any other noncompetitive formula grant program administered by the Secretary, or any discretionary grant program administered by the Secretary (other than formula or discretionary grant programs under the Individuals with Disabilities Education Act), to support schoolwide programs, if the intent and purposes of such other programs are met.

[(B) A school that chooses to use funds from such other programs shall not be relieved of the requirements relating to health, safety, civil rights, gender equity, student and parental participation and involvement, services to private school children, maintenance of effort, comparability of services, uses of Federal funds to supplement, not supplant non-Federal funds, or the distribution of funds to State or local educational agencies that apply to the receipt of funds from such programs.

[(5) PROFESSIONAL DEVELOPMENT.—Each school receiving funds under this part for any fiscal year shall devote sufficient resources to effectively carry out the activities described in subsection (b)(1)(D) in accordance with section 1119 for such fiscal year, except that a school may enter into a consortium with another school to carry out such activities.

[(b) COMPONENTS OF A SCHOOLWIDE PROGRAM.—

[(1) IN GENERAL.—A schoolwide program shall include the following components:

[(A) A comprehensive needs assessment of the entire school that is based on information on the performance of children in relation to the State content standards and the State student performance standards described in section 1111(b)(1).

[(B) Schoolwide reform strategies that—

[(i) provide opportunities for all children to meet the State's proficient and advanced levels of student performance described in section 1111(b)(1)(D);

[(ii) are based on effective means of improving the achievement of children;

[(iii) use effective instructional strategies, which may include the integration of vocational and academic learning (including applied learning and team teaching strategies), that—

[(II) include strategies for meeting the educational needs of historically underserved populations, including girls and women;

[(iv)(I) address the needs of all children in the school, but particularly the needs of children who are members of the target population of any program that is included in the schoolwide program, which may include—

[(aa) counseling, pupil services, and mentoring services;

[(cc) services to prepare students for the transition from school to work, including the formation of partnerships between elementary, middle, and secondary schools and local businesses, and the integration of school-based and work-based learning; and

[(dd) incorporation of gender-equitable methods and practices; and

[(II) address how the school will determine if such needs have been met; and

[SEC. 1115. TARGETED ASSISTANCE SCHOOLS.

[(a) IN GENERAL.—In all schools selected to receive funds under section 1113(c) that are ineligible for a schoolwide program under section 1114, or that choose not to operate such a schoolwide program, a local educational agency may use funds received under this part only for programs that provide services to eligible children under subsection (b) identified as having the greatest need for special assistance.

[(b) ELIGIBLE CHILDREN.—

[(1) ELIGIBLE POPULATION.—(A) The eligible population for services under this part is—

[(i) children not older than age 21 who are entitled to a free public education through grade 12; and

[(ii) children who are not yet at a grade level where the local educational agency provides a free public education, yet are of an age at which such children can benefit from an organized instructional program provided in a school or other educational setting.

[(B) From the population described in subparagraph (A), eligible children are children identified by the school as failing, or most at risk of failing, to meet the State's challenging student performance standards on the basis of multiple, educationally related, objective criteria established by the local educational agency and supplemented by the school, except that children from preschool through grade two shall be selected solely on the basis of such criteria as teacher judgment, interviews with parents, and developmentally appropriate measures.

[(2) CHILDREN INCLUDED.—(A)(i) Children who are economically disadvantaged, children with disabilities, migrant children or limited English proficient children, are eligible for services under this part on the same basis as other children selected to receive services under this part.

[(c) COMPONENTS OF A TARGETED ASSISTANCE SCHOOL PROGRAM.—

[(1) IN GENERAL.—To assist targeted assistance schools and local educational agencies to meet their responsibility to provide for all their students served under this part the opportunity to meet the State's student performance standards in subjects as determined by the State, each targeted assistance program under this section shall—

[(A) the coordination of resources provided under this part with other resources to enable the children served to meet the State content standards and State student performance standards; and

[(B) reviewing, on an ongoing basis, the progress of participating children and revising the targeted assistance program, if necessary, to provide additional assistance to enable such children to meet the State's challenging student performance standards, such as an extended school

year, before- and after-school, and summer, programs and opportunities, training for teachers regarding how to identify students that require additional assistance, and training for teachers regarding how to implement student performance standards in the classroom.

[(d) ASSIGNMENT OF PERSONNEL.—To promote the integration of staff supported with funds under this part and children served under this part into the regular school program and overall school planning and improvement efforts, public school personnel who are paid with funds received under this part may—

[(1) assume limited duties that are assigned to similar personnel who are not so paid, including duties beyond classroom instruction or that do not benefit participating children, so long as the amount of time spent on such duties is the same proportion of total work time as prevails with respect to similar personnel at the same school;

[(2) participate in general professional development and school planning activities; and

[(3) collaboratively teach with regular classroom teachers, if such collaborative teaching directly benefits participating children.

[(e) SPECIAL RULES.—

[(1) SIMULTANEOUS SERVICE.—Nothing in this section shall be construed to prohibit a school from serving students served under this section simultaneously with students with similar educational needs, in the same educational settings where appropriate.

[(2) COMPREHENSIVE SERVICES.—If health, nutrition, and other social services are not otherwise available to eligible children in a targeted assistance school and such school, if appropriate, has engaged in a comprehensive needs assessment and established a collaborative partnership with local service providers, and if funds are not reasonably available from other public or private sources to provide services under this part, then a portion of the funds provided under this part may be used as a last resort to provide such services, including—

[(A) the provision of basic medical equipment, such as eyeglasses and hearing aids;

[(B) compensation of a coordinator; and

[(C) professional development necessary to assist teachers, pupil services personnel, other staff, and parents in identifying and meeting the comprehensive needs of eligible children.

[(3) PROFESSIONAL DEVELOPMENT.—Each school receiving funds under this part for any fiscal year shall devote sufficient resources to effectively carry out the professional development activities described in subparagraph (G) of subsection (c)(1) in accordance with section 1119, for such fiscal year, except that a school may enter into a consortium with another school to carry out such activities.

[SEC. 1115A. SCHOOL CHOICE.

[(a) CHOICE PROGRAMS.—A local educational agency may use funds under this part, in combination with State, local, and private funds, to develop and implement choice programs, for children eli-

gible for assistance under this part, which permit parents to select the public school that their children will attend.

[(b) CHOICE PLAN.—A local educational agency that chooses to implement a school choice plan shall first develop a comprehensive plan that includes assurances that—

[(1) all eligible students across grade levels will have equal access to the program;

[(2) the program does not include schools which follow a racially discriminatory policy;

[(3) describe how the school will use resources under this part and from other sources to implement the plan;

[(4) describe how the school will provide individual student assessment results, including an interpretation of such results, to the parents of a child who participates in the assessment required by section 1111(b)(3);

[(5) the plan will be developed with the involvement of the community to be served and individuals who will carry out the plan, including teachers, principals, and other staff, parents, and, if the plan relates to a secondary school, students from the school;

[(6) the plan will be made available to parents and the public;

[(7) the program will not include schools that do not receive funds under this part;

[(8) the program will not use funds under this part to pay for transportation costs;

[(9) both the sending and receiving schools agree to the student transfer; and

[(10) such local educational agency will comply with the other requirements of this part.]

SEC. 1001. FINDINGS; STATEMENT OF PURPOSE; AND RECOGNITION OF NEED.

(a) *FINDINGS.—Congress finds the following:*

(1) *The Constitution of the United States reserves to the States and to the people the responsibility for the general supervision of public education in kindergarten through the twelfth grade.*

(2) *States, local educational agencies and schools should be given maximum flexibility in exchange for greater academic accountability, and be given greater freedom to build upon existing innovative approaches for education reform.*

(3) *The best education decisions are made by those who know the students and who are responsible for implementing the decisions.*

(4) *Educators and parents should retain the right and responsibility to educate their pupils and children free of excessive regulation by the Federal Government.*

(5) *The Supreme Court has regarded the right of parents to direct the upbringing of their children as a fundamental right implicit in the concept of ordered liberty within the 14th Amendment to the Constitution, as specified in Meyer v. Nebraska, 262 U.S. 390 (1923), and Pierce v. Society of Sisters, 268 U.S. 510 (1925).*

(6) *Schools that enroll high concentrations of children living in poverty face the greatest challenges, but effective educational*

strategies based on scientifically based research can succeed in educating children to high academic standards.

(7) High-poverty schools are much more likely to be identified as failing to meet State academic standards for satisfactory progress. As a result, these schools are generally the most in need of additional resources and technical assistance to build the capacity of these schools to address the many needs of their students.

(8) The educational progress of children participating in programs under this title is closely associated with their being taught by a highly qualified staff, particularly in schools with the highest concentrations of poverty, where paraprofessionals, uncertified teachers, and teachers teaching out of field frequently provide instructional services.

(9) Congress and the public would benefit from additional data evaluating the efficacy of the Elementary and Secondary Education Act of 1965.

(10) Schools operating programs assisted under this part must be held accountable for the educational achievement of their students, when those students fail to demonstrate progress in achieving high academic standards, local educational agencies and States must take significant actions to improve the educational opportunities available to them.

(b) PURPOSE AND INTENT.—The purpose and intent of this title are to ensure that all children have a fair and equal opportunity to obtain a high-quality education.

(c) RECOGNITION OF NEED.—The Congress recognizes the following:

(1) Educational needs are particularly great for low-achieving children in our Nation's highest-poverty schools, children with limited English proficiency, children of migrant workers, children with disabilities, Indian children, children who are neglected or delinquent, and young children who are in need of reading assistance and family literacy assistance.

(2) Despite more than 3 decades of Federal assistance, a sizable achievement gap remains between minority and non-minority students, and between disadvantaged students and their more advantaged peers.

(3) Too many students attend local schools that fail to provide them with a quality education, and are given no alternatives to enable them to receive a quality education.

(4) States, local educational agencies, and schools need to be held accountable for improving the academic achievement of all students, and for identifying and turning around low-performing schools.

(5) States and local educational agencies need to ensure that high quality academic assessments, accountability systems, teacher preparation and training, curriculum, and instructional materials are aligned with challenging State academic standards so that students, teachers, parents, and administrators can measure progress against common expectations for student academic achievement.

(6) Federal education assistance is intended not only to increase pupil achievement overall, but also more specifically and importantly, to help ensure that all students, especially the dis-

advantaged, meet challenging academic achievement standards. It can only be determined if schools, local educational agencies, and States are reaching this goal if student achievement results are reported specifically by disadvantaged and minority status.

(3) STATE APPLICATIONS.—Each State educational agency that desires to receive funds under this subsection shall submit an application to the Secretary at such time, and containing such information as the Secretary shall reasonably require, except that such requirement shall be waived if a State educational agency has submitted such information as part of its State plan under this part. Each State plan shall describe how such funds will be allocated to ensure that the State educational agency and local educational agencies comply with school improvement, corrective action, and restructuring requirements of section 1116.

(4) *LOCAL EDUCATIONAL AGENCY GRANTS.*—A grant to a local educational agency under this subsection shall be—

(1) the relative allocations it made to those agencies for that fiscal year under subpart 2 of part A; or

(2) section 1126(c).

PART A—IMPROVING BASIC PROGRAMS OPERATED BY LOCAL EDUCATIONAL AGENCIES

Subpart 1—Basic Program Requirements

SEC. 1111. STATE PLANS.

(a) PLANS REQUIRED.—

(1) IN GENERAL.—Any State desiring to receive a grant under this part shall submit to the Secretary, by March 1, 2002, a plan, developed in consultation with local educational agencies, teachers, principals, pupil services personnel, administrators (including administrators of programs described in other parts of this title), other staff, and parents, that satisfies the requirements of this section and that is coordinated with other programs under this Act, the Individuals with Disabilities Education Act (20 U.S.C. 1400 et seq.), the Carl D. Perkins Vocational and Technical Education Act of 1998 (20 U.S.C. 2301 et seq.), the Head Start Act (42 U.S.C. 9831 et seq.), and the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11431 et seq.).

(2) CONSOLIDATED PLAN.—A State plan submitted under paragraph (1) may be submitted as part of a consolidated plan under section 8302.

(b) ACADEMIC STANDARDS, ACADEMIC ASSESSMENTS, AND ACCOUNTABILITY.—

(1) CHALLENGING ACADEMIC STANDARDS.—

(A) Each State plan shall demonstrate that the State has adopted challenging academic content standards and challenging student academic achievement standards that will be used by the State, its local educational agencies, and its schools to carry out this part, except that a State shall not be required to submit such standards to the Secretary.

(B) The academic standards required by subparagraph (A) shall be the same academic standards that the State applies to all schools and children in the State.

(C) *The State shall have such academic standards for all public elementary and secondary school children, including children served under this part, in subjects determined by the State, but including at least mathematics, reading or language arts, and science (beginning in the 2005–2006 school year), which shall include the same knowledge, skills, and levels of achievement expected of all children.*

(D) *Academic standards under this paragraph shall include—*

(i) challenging academic content standards in academic subjects that—

(I) specify what children are expected to know and be able to do;

(II) contain coherent and rigorous content; and

(III) encourage the teaching of advanced skills; and

(ii) challenging student academic achievement standards that—

(I) are aligned with the State's academic content standards;

(II) describe 2 levels of high performance (proficient and advanced) that determine how well children are mastering the material in the State academic content standards; and

(III) describe a third level of performance (basic) to provide complete information about the progress of the lower performing children toward achieving to the proficient and advanced levels of performance.

(E) *For the subjects in which students will be served under this part, but for which a State is not required by subparagraphs (A), (B), and (C) to develop, and has not otherwise developed such academic standards, the State plan shall describe a strategy for ensuring that students are taught the same knowledge and skills in such subjects and held to the same expectations as are all children.*

(F) *Nothing in this part shall prohibit a State from revising any standard adopted under this part before or after the date of enactment of the No Child Left Behind Act of 2001.*

(2) **ACCOUNTABILITY.**—

(A) **IN GENERAL.**—*Each State plan shall demonstrate that the State has developed and is implementing a state-wide State accountability system that has been or will be effective in ensuring that all local educational agencies, public elementary schools, and public secondary schools make adequate yearly progress as defined under subparagraph (B). Each State accountability system shall—*

(i) be based on the academic standards and academic assessments adopted under paragraphs (1) and (4) and take into account the performance of all public school students;

(ii) be the same as the accountability system the State uses for all public schools or all local educational agencies in the State, except that public schools and

local educational agencies not participating under this part are not subject to the requirements of section 1116; and

(iii) include rewards and sanctions the State will use to hold local educational agencies and public schools accountable for student achievement and for ensuring that they make adequate yearly progress in accordance with the State's definition under subparagraph (B).

(B) ADEQUATE YEARLY PROGRESS.—*Each State plan shall demonstrate, based on academic assessments described under paragraph (4), what constitutes adequate yearly progress of the State, and of public schools and local educational agencies in the State, toward enabling all public school students to meet the State's student academic achievement standards, while working toward the goal of narrowing the achievement gaps in the State, local educational agency, and school.*

(C) DEFINITION.—*"Adequate yearly progress" shall be defined by the State in a manner that—*

(i) applies the same high academic standards of academic performance to all public school students in the State;

(ii) measures the progress of public schools and local educational agencies based primarily on the academic assessments described in paragraph (4);

(iii) measures the student dropout rate, as defined for the Common Core of Data maintained by the National Center for Education Statistics established under section 403 of the National Education Statistics Act of 1994 (20 U.S.C. 9002);

(iv) includes separate annual numerical objectives for continuing and significant improvement in each of the following (except that disaggregation of data under subclauses (II) and (III) shall not be required in a case in which the number of students in a category is insufficient to yield statistically reliable information or the results would reveal individually identifiable information about an individual student):

(I) The achievement of all public school students.

(II) The achievement of—

(aa) economically disadvantaged students;

(bb) students from major racial and ethnic groups;

(cc) students with disabilities; and

(dd) students with limited English proficiency;

(III) solely for the purpose of determining adequate yearly progress of the State, the acquisition of English language proficiency by children with limited English proficiency;

(v) at the State's discretion, may also include other academic measures such as promotion, completion of college preparatory courses, and high school completion (and for individual local educational agencies and schools, the acquisition of English language proficiency

by children with limited English proficiency), except that inclusion of such other measures may not change which schools or local educational agencies would otherwise be subject to improvement or corrective action under section 1116 if the discretionary indicators were not included; and

(vi) includes a timeline that—

(I) uses as a baseline year the year following the date of enactment of the No Child Left Behind Act of 2001;

(II) establishes a target year by which all members of each group of students described in subclauses (I) and (II) of clause (iii) shall meet or exceed the State's proficient level of academic performance on the State academic assessment used for the purposes of this section and section 1116, except that the target year shall not be more than 12 years from the baseline year; and

(bb) indicates an annual minimum amount by which the percentage of students who meet the proficient level among each group of students described in subclauses (I) and (II) of clause (iii) shall increase, such that the minimum increase for each group is equal to or greater than 100 percent minus the percentage of the group meeting the proficient level in the baseline year divided by the number of years from the baseline year to the target year established under clause (I).

(D) **ANNUAL IMPROVEMENT FOR SCHOOLS.**—For a school to make adequate yearly progress under subparagraph (A), not less than 95 percent of each group of students described in subparagraph (C)(iii)(II) who are enrolled in the school are required to take the academic assessments, consistent with section 612(a)(17)(A) of the Individuals with Disabilities Education Act (20 U.S.C. 1412(a)(17)(A)) and paragraph (4)(G)(ii), on which adequate yearly progress is based.

(E) **PUBLIC NOTICE AND COMMENT.**—Each State shall ensure that in developing its plan, it diligently seeks public comment from a range of institutions and individuals in the State with an interest in improved student achievement and that the State makes and will continue to make a substantial effort to ensure that information under this part is

(3) *STATE AUTHORITY.*—If a State educational agency provides evidence, which is satisfactory to the Secretary, that neither the State educational agency nor any other State government official, agency, or entity has sufficient authority, under State law, to adopt curriculum content and student academic achievement standards, and academic assessments aligned with such academic standards, which will be applicable to all students enrolled in the State's public schools, then the State educational agency may meet the requirements of this subsection by—

(A) adopting academic standards and academic assessments that meet the requirements of this subsection, on a statewide basis, limiting their applicability to students served under this part; or

(B) adopting and implementing policies that ensure that each local educational agency in the State which receives grants under this part will adopt curriculum content and student academic achievement standards, and academic assessments aligned with such standards, which meet all of the criteria in this subsection and any regulations regarding such standards and assessments which the Secretary may publish, and which are applicable to all students served by each such local educational agency.

(4) *ACADEMIC ASSESSMENTS.*—Each State plan shall demonstrate that the State has implemented a set of high-quality, yearly student academic assessments that include, at a minimum, academic assessments in mathematics, and reading or language arts, that will be used as the primary means of determining the yearly performance of the State and of each local educational agency and school in enabling all children to meet the State's challenging student academic achievement standards. Such assessments shall—

(A) be the same academic assessments used to measure the performance of all children;

(B) be aligned with the State's challenging content and student academic achievement standards and provide coherent information about student attainment of such standards;

(C) be used for purposes for which such assessments are valid and reliable, and be consistent with relevant, recognized professional and technical standards for such assessments;

(D) for the purposes of this part, be scored to ensure the performance of each student is evaluated solely against the State's challenging academic content standards and not relative to the score of other students;

(E) except as otherwise provided for grades 3 through 8 under subparagraph (G), measure the proficiency of students in, at a minimum, mathematics and reading or lan-

guage arts, and be administered not less than once during—

- (i) grades 3 through 5;

(H) provide for—

(i) the participation in such assessments of all students;

(ii) the reasonable adaptations and accommodations for students with disabilities defined under 602(3) of the Individuals with Disabilities Education Act (20 U.S.C. 1401(3)) necessary to measure the achievement of such students relative to State content and State student academic achievement standards;

(iv) notwithstanding clause (iii), the academic assessment (using tests written in English) of reading or language arts of any student who has attended school in the United States (not including Puerto Rico) for 3 or more consecutive school years, except if the local educational agency determines, on a case-by-case individual basis, that academic assessments in another language and form would likely yield more accurate and reliable information on what such students know and can do, the local educational agency may assess such students in the appropriate language other than English for 1 additional year;

(I) include students who have attended schools in a local educational agency for a full academic year but have not attended a single school for a full academic year, except that the performance of students who have attended more than 1 school in the local educational agency in any academic year shall be used only in determining the progress of the local educational agency;

(J) produce individual student reports to be provided to parents, which include academic assessment scores, or

other information on the attainment of student academic achievement standards; and

(K) enable results to be disaggregated within each State, local educational agency, and school by gender, by each major racial and ethnic group, by English proficiency status, by migrant status, by students with disabilities as compared to nondisabled students, and by economically disadvantaged students as compared to students who are not economically disadvantaged.

(5) SPECIAL RULE.—Academic assessment measures in addition to those in paragraph (4) that do not meet the requirements of such paragraph may be included as additional measures, but may not be used in lieu of the academic assessments required in paragraph (4). (2) *CONSENT.*—

(A) *AGENCY REQUIREMENTS.*—

(i) *INFORMED CONSENT.*—For a child who has been identified as limited English proficient prior to the beginning of a school year, each local educational agency that receives funds under this part shall make a reasonable and substantial effort to obtain informed parental consent prior to the placement of a child in an English language instruction program for limited English proficient children funded under this part if the program does not include classes which exclusively or almost exclusively use the English language in instruction.

(ii) *WRITTEN CONSENT NOT OBTAINED.*—If written consent is not obtained, the local educational agency

shall maintain a written record that includes the date and the manner in which such informed consent was sought, including the specific efforts made to obtain such consent.

(iii) *PROOF OF EFFORT.*—Notice, in an understandable form, of specific efforts made to obtain written consent and a copy of the written record required in clause (ii) shall be mailed or delivered in writing to a parent, parents, or guardian of a child prior to placing the child in a program described in clause (i) and shall include a final request for parental consent for such services. After such notice has been mailed or delivered in writing, the local educational agency shall provide appropriate educational services.

(iv) *SPECIAL RULE APPLICABLE DURING SCHOOL YEAR.*—For those children who have not been identified as limited English proficient prior to the beginning of the school year, the local educational agency shall make a reasonable and substantial effort to obtain parental consent under this clause. For such children, the agency shall document, in writing, its specific efforts made to obtain such consent prior to placing the child in a program described in clause (i). After such documentation has been made, the local educational agency shall provide appropriate educational services to such child. The proof of documentation shall be mailed or delivered in writing to a parent or parents of the child in a timely manner and shall include information on how to have their child immediately removed from the program upon their request. Nothing in this clause shall be construed as exempting a local educational agency from complying with the notification requirements of subsection (g)(1) and the consent requirements of this paragraph.

(3) *PARENTAL RIGHTS.*—A parent or the parents of a child participating in an English language instruction program for limited English proficient children assisted under this part shall—

(A) select among methods of instruction, if more than one method is offered in the program; and

(B) have the right to have their child immediately removed from the program upon their request.

(4) *RECEIPT OF INFORMATION.*—A parent or the parents of a limited English proficient child who is identified for participation in an English language instruction program for limited English proficient children assisted under this part shall receive, in a manner and form understandable to the parent or parents, the information required by this subsection. At a minimum, the parent or parents shall receive—

(A) timely information about English language instruction programs for limited English proficient children assisted under this part;

(B) if a parent or parents of a participating child so desires, notice of opportunities for regular meetings for the

purpose of formulating and responding to recommendations from the parent or parents; and

(C) procedural information for removing a child from a program for limited English proficient children.

(5) BASIS FOR ADMISSION OR EXCLUSION.—Students shall not be admitted to, or excluded from, any federally-assisted education program on the basis of a surname or language-minority status.

SEC. 1113. ELIGIBLE SCHOOL ATTENDANCE AREAS.

(a) DETERMINATION.—

(1) IN GENERAL.—A local educational agency shall use funds received under this part only in eligible school attendance areas.

(2) ELIGIBLE SCHOOL ATTENDANCE AREAS.—For the purposes of this part—

(A) the term “school attendance area” means, in relation to a particular school, the geographical area in which the children who are normally served by that school reside; and

(B) the term “eligible school attendance area” means a school attendance area in which the percentage of children from low-income families is at least as high as the percentage of children from low-income families in the local educational agency as a whole.

(3) LOCAL EDUCATIONAL AGENCY DISCRETION.—

(A) IN GENERAL.—Notwithstanding paragraph (2), a local educational agency may—

(i) designate as eligible any school attendance area or school in which at least 35 percent of the children are from low-income families;

(ii) use funds received under this part in a school that is not in an eligible school attendance area, if the percentage of children from low-income families enrolled in the school is equal to or greater than the percentage of such children in a participating school attendance area of such agency;

(iii) designate and serve a school attendance area or school that is not eligible under subsection (b), but that was eligible and that was served in the preceding fiscal year, but only for 1 additional fiscal year; and

(iv) elect not to serve an eligible school attendance area or eligible school that has a higher percentage of children from low-income families if—

(I) the school meets the comparability requirements of section 1120A(c);

(II) the school is receiving supplemental funds from other State or local sources that are spent according to the requirements of section 1114 or 1115; and

(III) the funds expended from such other sources equal or exceed the amount that would be provided under this part.

(B) SPECIAL RULE.—Notwithstanding subparagraph (A)(iv), the number of children attending private elementary and secondary schools who are to receive services, and the

assistance such children are to receive under this part, shall be determined without regard to whether the public school attendance area in which such children reside is assisted under subparagraph (A).

(b) RANKING ORDER.—If funds allocated in accordance with subsection (f) are insufficient to serve all eligible school attendance areas, a local educational agency—

(1) shall annually rank from highest to lowest according to the percentage of children from low-income families in each agency's eligible school attendance areas in the following order—

(A) eligible school attendance areas in which the concentration of children from low-income families exceeds 75 percent; and

(B) all remaining eligible school attendance areas in which the concentration of children from low-income families is 75 percent or lower either by grade span or for the entire local educational agency;

(2) shall, within each category listed in paragraph (1), serve schools in rank order from highest to lowest according to the ranking assigned under paragraph (1);

(3) notwithstanding paragraph (2), may give priority, within each such category and in rank order from highest to lowest subject to paragraph (4), to eligible school attendance areas that serve children in elementary schools; and

(4) not serve a school described in paragraph (1)(B) before serving a school described in paragraph (1)(A).

(c) LOW-INCOME MEASURES.—In determining the number of children ages 5 through 17 who are from low-income families, the local educational agency shall apply the measures described in paragraphs (1) and (2) of this subsection:

(1) ALLOCATION TO PUBLIC SCHOOL ATTENDANCE AREAS.—The local educational agency shall use the same measure of poverty, which measure shall be the number of children ages 5 through 17 in poverty counted in the most recent census data approved by the Secretary, the number of children eligible for free and reduced priced lunches under the Richard B. Russell National School Lunch Act (42 U.S.C. 1751 et seq.), the number of children in families receiving assistance under the State program funded under part A of title IV of the Social Security Act, or the number of children eligible to receive medical assistance under the Medicaid program, or a composite of such indicators, with respect to all school attendance areas in the local educational agency—

(A) to identify eligible school attendance areas;

(B) to determine the ranking of each area; and

(C) to determine allocations under subsection (f).

(2) ALLOCATION FOR EQUITABLE SERVICE TO PRIVATE SCHOOL STUDENTS.—

(A) CALCULATION.—A local educational agency shall have the final authority, consistent with section 1120 to calculate the number of private school children, ages 5 through 17, who are low-income by—

(i) using the same measure of low-income used to count public school children;

(ii) using the results of a survey that, to the extent possible, protects the identity of families of private school students and allowing such survey results to be extrapolated if complete actual data are not available; or

(iii) applying the low-income percentage of each participating public school attendance area, determined pursuant to this section, to the number of private school children who reside in that attendance area.

(B) COMPLAINT PROCESS.—Any dispute regarding low-income data on private school students shall be subject to the complaint process authorized in section 8505.

(d) EXCEPTION.—This section (other than subsections (a)(3) and (f)) shall not apply to a local educational agency with a total enrollment of less than 1,500 children.

(e) WAIVER FOR DESEGREGATION PLANS.—The Secretary may approve a local educational agency's written request for a waiver of the requirements of subsections (a) and (f), and permit such agency to treat as eligible, and serve, any school that children attend under a desegregation plan ordered by a State or court or approved by the Secretary, or such a plan that the agency continues to implement after it has expired, if—

(1) the number of economically disadvantaged children enrolled in the school is not less than 25 percent of the school's total enrollment; and

(2) the Secretary determines on the basis of a written request from such agency and in accordance with such criteria as the Secretary establishes, that approval of that request would further the purposes of this part.

(f) ALLOCATIONS.—

(1) IN GENERAL.—A local educational agency shall allocate funds received under this part to eligible school attendance areas or eligible schools, identified under subsection (b) in rank order on the basis of the total number of children from low-income families in each area or school.

(2) SPECIAL RULE.—(A) Except as provided in subparagraph (B), the per-pupil amount of funds allocated to each school attendance area or school under paragraph (1) shall be at least 125 percent of the per-pupil amount of funds a local educational agency received for that year under the poverty criteria described by the local educational agency in the plan submitted under section 1112, except that this paragraph shall not apply to a local educational agency that only serves schools in which the percentage of such children is 35 percent or greater.

(B) A local educational agency may reduce the amount of funds allocated under subparagraph (A) for a school attendance area or school by the amount of any supplemental State and local funds expended in that school attendance area or school for programs that meet the requirements of section 1114 or 1115.

(3) RESERVATION.—A local educational agency shall reserve such funds as are necessary under this part to provide services comparable to those provided to children in schools funded under this part to serve—

(A) homeless children who do not attend participating schools, including providing educationally related support services to children in shelters and other locations where children may live;

(B) children in local institutions for neglected children; and

(C) if appropriate, children in local institutions for delinquent children and neglected or delinquent children in community day school programs.

(4) **SCHOOL IMPROVEMENT RESERVATION.**—In addition to the funding a local educational agency receives under section 1003(b), a local educational agency may reserve such funds as are necessary under this part to meet such agency's school improvement responsibilities under section 1116, including taking corrective actions under paragraphs (6) and (7) of section 1116(b).

(5) **FINANCIAL INCENTIVES AND REWARDS RESERVATION.**—A local educational agency may reserve such funds as are necessary under this part to provide financial incentives and rewards to teachers who serve in schools eligible under subsection (b)(1)(A) and identified for improvement under section 1116(b)(1) for the purpose of attracting and retaining qualified and effective teachers.

SEC. 1114. SCHOOLWIDE PROGRAMS.

(a) **PURPOSE.**—The purpose of a schoolwide program under this section is—

(1) to enable a local educational agency to consolidate funds under this part with other Federal, State, and local funds, to upgrade the entire educational program in a high poverty school; and

(2) to help ensure that all children in such a school meet challenging State academic standards for student achievement, particularly those children who are most at-risk of not meeting those standards.

(b) **USE OF FUNDS FOR SCHOOLWIDE PROGRAMS.**—

(1) **IN GENERAL.**—A local educational agency may consolidate funds under this part, together with other Federal, State, and local funds, in order to upgrade the entire educational program of a school that serves an eligible school attendance area in which not less than 40 percent of the children are from low-income families, or not less than 40 percent of the children enrolled in the school are from such families.

(2) **IDENTIFICATION OF STUDENTS NOT REQUIRED.**—

(A) **IN GENERAL.**—No school participating in a schoolwide program shall be required to identify particular children under this part as eligible to participate in a schoolwide program or to provide supplemental services to such children.

(B) **SUPPLEMENT FUNDS.**—A school participating in a schoolwide program shall use funds available to carry out this section only to supplement the amount of funds that would, in the absence of funds under this part, be made available from non-Federal sources for the school, including funds needed to provide services that are required by

law for children with disabilities and children with limited English proficiency.

(3) **EXEMPTION FROM STATUTORY AND REGULATORY REQUIREMENTS.**—

(A) **EXEMPTION.**—*Except as provided in subsection (c), the Secretary may, through publication of a notice in the Federal Register, exempt schoolwide programs under this section from statutory or regulatory provisions of any other noncompetitive formula grant program administered by the Secretary (other than formula or discretionary grant programs under the Individuals with Disabilities Education Act, except as provided in section 613(a)(2)(D) of such Act), or any discretionary grant program administered by the Secretary, to support schoolwide programs if the intent and purposes of such other programs are met.*

(B) **REQUIREMENTS.**—*A school that chooses to use funds from such other programs shall not be relieved of the requirements relating to health, safety, civil rights, student and parental participation and involvement, services to private school children, maintenance of effort, uses of Federal funds to supplement, not supplant non-Federal funds, or the distribution of funds to State or local educational agencies that apply to the receipt of funds from such programs.*

(C) **RECORDS.**—*A school that consolidates funds from different Federal programs under this section shall not be required to maintain separate fiscal accounting records, by program, that identify the specific activities supported by those particular funds as long as it maintains records that demonstrate that the schoolwide program, considered as a whole addresses the intent and purposes of each of the Federal programs that were consolidated to support the schoolwide program.*

(4) **PROFESSIONAL DEVELOPMENT.**—*Each school receiving funds under this part for any fiscal year shall devote sufficient resources to effectively carry out the activities described in subsection (c)(1)(D) in accordance with section 1119A for such fiscal year, except that a school may enter into a consortium with another school to carry out such activities.*

(III) *include strategies for meeting the educational needs of historically underserved populations;*

(iii)(I) *address the needs of all children in the school, but particularly the needs of low-achieving children and those at risk of not meeting the State student academic achievement standards who are members of the target population of any program that is included in the schoolwide program; and*

(2) *PLAN.—Any eligible school that desires to operate a schoolwide program shall first develop (or amend a plan for such a program that was in existence on the day before the effective date of the No Child Left Behind Act of 2001), a comprehensive plan for reforming the total instructional program in the school that—*

(2) *CHILDREN INCLUDED.*—(A)(i) *Children with disabilities, migrant children, and children with limited English proficiency are eligible for services under this part on the same basis as other children.*

(ii) *Funds received under this part may not be used to provide services that are otherwise required by law to be made available to such children but may be used to coordinate or supplement such services.*

(4) the program will include charter schools and any other public school and shall not include a school that is or has been identified as a school in school improvement or is or has been in corrective action for the past 2 consecutive years; and

(5) such local educational agency will comply with the other requirements of this part.

(c) *TRANSPORTATION.*—Transportation services or the costs of transportation may be provided by the local educational agency, except that such agency may not use more than a total of 15 percent of its allocation under this part for such purposes.

[SEC. 1116. ASSESSMENT AND LOCAL EDUCATIONAL AGENCY AND SCHOOL IMPROVEMENT.

[(a) LOCAL REVIEW.—Each local educational agency receiving funds under this part shall—

[(1) use the State assessments described in the State plan;

[(2) use any additional measures or indicators described in the local educational agency's plan to review annually the progress of each school served under this part to determine whether the school is meeting, or making adequate progress as defined in section 1111(b)(2)(A)(i) toward enabling its students to meet the State's student performance standards described in the State plan;

[(3) publicize and disseminate to teachers and other staff, parents, students, and the community, the results of the annual review under paragraph (2) of all schools served under this part in individual school performance profiles that include statistically sound disaggregated results as required by section 1111(b)(3)(I); and

[(4) provide the results of the local annual review to schools so that the schools can continually refine the program of instruction to help all children served under this part in those schools meet the State's student performance standards.

[(b) DESIGNATION OF DISTINGUISHED SCHOOLS.—Each State educational agency and local educational agency receiving funds under this part shall designate distinguished schools in accordance with section 1117.

[(c) SCHOOL IMPROVEMENT.—

[(1) IN GENERAL.—A local educational agency shall identify for school improvement any school served under this part that—

[(A) has been in program improvement under section 1020 of the Elementary and Secondary Education Act of 1965 (as such section was in effect on the day preceding the date of enactment of the Improving America's Schools Act of 1994), for at least two consecutive school years prior to such day;

[(B) has not made adequate progress as defined in the State's plan under section 1111(b)(2)(A)(i) for two consecutive school years, except that—

[(i) this subparagraph shall not apply to a school if almost every student in such school is meeting the State's advanced level of performance; or

[(ii) in the case of a targeted assistance school, such school may be reviewed on the progress of only those students that have been or are served under this part; or

[(C) has failed to meet the criteria established by the State through the State's transitional procedure under section 1111(b)(7)(B) for two consecutive years.

[(2) REQUIREMENT.—(A) Each school identified under paragraph (1) shall—

[(i) in consultation with parents, the local educational agency, and the school support team, develop or revise a school plan in ways that have the greatest likelihood of im-

proving the performance of participating children in meeting the State's student performance standards; and

[(ii) submit the plan or revised plan to the local educational agency for approval.

[(B) Before identifying a school for school improvement under paragraph (1), the local educational agency shall provide the school with an opportunity to review the school-level data, including assessment data, on which such identification is based. If the school believes that such identification for school improvement is in error for statistical or other substantive reasons, such school may provide evidence to the local educational agency to support such belief.

[(C) During the first year immediately following such identification, the school shall implement such school's plan or revised plan.

[(3) PROFESSIONAL DEVELOPMENT.—(A) Each school identified under paragraph (1) shall, as part of the school plan under paragraph (2), improve the skills of its staff by providing effective professional development activities. A school shall demonstrate such school's compliance with this paragraph by—

[(i) devoting to such activities, over two consecutive years, an amount equivalent to at least 10 percent of the funds received by the school under this part during one fiscal year; or

[(ii) otherwise demonstrating that such school is effectively carrying out professional development activities.

[(B) A school may use funds from any source to meet the requirements of this subsection.

[(C) Decisions about how to use the funds made available under this part which the school makes available for professional development shall be made by teachers, principals, and other school staff in that school.

[(4) TECHNICAL ASSISTANCE.—(A) For each school identified under paragraph (1), the local educational agency shall provide technical or other assistance as the school develops and implements such school's plan or revised plan, such as a joint plan between the local educational agency and school that addresses specific elements of student performance problems and that specifies school and local educational agency responsibilities under the plan, and waivers or modifications of requirements of local educational agency policy or regulation that impede the ability of the school to educate students.

[(B) Such technical assistance may be provided directly by the local educational agency, through mechanisms authorized under section 1117, or with the local educational agency's approval, by an institution of higher education, a private nonprofit organization, an educational service agency, a comprehensive regional assistance center under part A of title XIII, or other entities with experience in helping schools improve achievement.

[(5) CORRECTIVE ACTION.—(A) Except as provided in subparagraph (C), after providing technical assistance pursuant to paragraph (4) and taking other remediation measures, the local educational agency may take corrective action at any time against a school that has been identified under paragraph (1),

but, during the third year following identification under paragraph (1), shall take such action against any school that still fails to make adequate progress.

[(B)(i) Corrective actions are those, consistent with State and local law, determined and made public and disseminated by the local educational agency, which may include—

[(I) withholding funds;

[(II) interagency collaborative agreements between the school and other public agencies to provide health, counseling, and other social services needed to remove barriers to learning;

[(III) revoking authority for a school to operate a schoolwide program;

[(IV) decreasing decisionmaking authority at the school level;

[(V) making alternative governance arrangements such as the creation of a public charter school;

[(VI) reconstituting the school staff; and

[(VII) authorizing students to transfer, including transportation costs, to other public schools served by the local educational agency.

[(ii) Notwithstanding clause (i), corrective actions taken pursuant to this part shall not include the actions described in subclause (I), (III), (IV), (VI), or (VII) of clause (i) until the State has developed assessments that meet the requirements of subparagraph (C) of section 1111(b)(3).

[(C) Prior to implementing any corrective action, the local educational agency may refrain from such corrective action for one additional year to the extent that the failure to make progress can be attributed to extenuating circumstances as determined by the local educational agency.

[(D) A school that is no longer operating its schoolwide program due to a corrective action may not resume operation of such a program until the local educational agency determines that the school has adequately reformed its schoolwide program plan to enable the school to make adequate progress toward meeting the State's challenging student performance standards.

[(2) ADDITIONAL FUNDS.—If additional funds become available for making payments under sections 1124, 1124A, and 1125 for such fiscal year, allocations that were reduced under paragraph (1) shall be increased on the same basis as they were reduced.

[(c) HOLD-HARMLESS AMOUNTS.—

[(1) IN GENERAL.—For fiscal year 1995, notwithstanding subsection (b) and without regard to amounts available for delinquent children under subpart 2 of part D, the amount made available to each local educational agency under such section 1005 shall be at least 85 percent of the amount such local educational agency received for the preceding year under such section 1005.

[(2) FISCAL YEAR 1996.—Notwithstanding subsection (b) and without regard to amounts available for delinquent children under subpart 2 of part D, for fiscal year 1996 the total amount made available to each local educational agency under each of sections 1124 and 1124A for any fiscal year shall be at least 100 percent of the total amount such local educational agency was allocated under such sections (or their predecessor authorities) for the preceding fiscal year.

[(3) FISCAL YEARS 1997–1999.—For fiscal years 1997 through 1999, notwithstanding subsection (b) and without regard to amounts available for delinquent children under subpart 2 of part D, the amount made available to each local educational agency under each of sections 1124 and 1125 shall be at least 95 percent of the previous year's amount if the number of children counted for grants under section 1124 is at least 30 percent of the total number of children aged 5 to 17 years, inclusive, in the local educational agency, 90 percent of the previous year amount if this percentage is between 15 percent and 30 percent, and 85 percent if this percentage is below 15 percent. For fiscal years 1997 and 1998, in calculating grants on the basis of population data for counties, the Secretary shall apply the hold-homeless percentages in the preceding sentence to counties. For fiscal years 1996 through 1998, if the Secretary's allocation for a county is not sufficient to meet the hold-harmless requirements of this paragraph for every local educational agency within that county, then the State educational agency shall reallocate funds proportionately from all other local educational agencies in the State that are receiving funds in excess of the hold-harmless amounts specified in this paragraph.

[(d) RATABLE REDUCTIONS.—

[(1) IN GENERAL.—If the sums made available under this part for any fiscal year are insufficient to pay the full amounts that all States are eligible to receive under subsection (c) for such year, the Secretary shall ratably reduce such amounts for such year.

[(2) ADDITIONAL FUNDS.—If additional funds become available for making payments under subsection (c) for such fiscal year, amounts that were reduced under paragraph (1) shall be increased on the same basis as such amounts reduced.

[(e) DEFINITION.—For the purpose of this section and sections 1124 and 1125, the term State means each of the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico.

[SEC. 1124. BASIC GRANTS TO LOCAL EDUCATIONAL AGENCIES.

[(a) AMOUNT OF GRANTS.—

[(1) GRANTS FOR LOCAL EDUCATIONAL AGENCIES AND PUERTO RICO.—The grant which a local educational agency in a State is eligible to receive under this subpart for a fiscal year shall (except as provided in section 1126), be determined by multiplying the number of children counted under subsection (c) by 40 percent of the amount determined under the next sentence. The amount determined under this sentence shall be the average per pupil expenditure in the State except that—

[(A) if the average per pupil expenditure in the State is less than 80 percent of the average per pupil expenditure in the United States, such amount shall be 80 percent of the average per pupil expenditure in the United States; or

[(B) if the average per pupil expenditure in the State is more than 120 percent of the average per pupil expenditure in the United States, such amount shall be 120 percent of the average per pupil expenditure in the United States.

[(2) BASIS FOR CALCULATING GRANTS.—For fiscal years 1995 through 1998, grants shall be calculated by the Secretary on the basis of the number of children counted under subsection (c) for counties, and State educational agencies shall suballocate county amounts to local educational agencies, in accordance with regulations published by the Secretary. In any State in which a large number of local educational agencies overlap county boundaries, the State educational agency may apply to the Secretary for authority during any particular fiscal year to make the allocations under this part (other than section 1124A) directly to local educational agencies without regard to the counties. If the Secretary approves an application of a State educational agency for a particular year under this subparagraph, the State educational agency shall provide assurances that—

[(A) such allocations will be made using precisely the same factors for determining a grant as are used under this part;

[(B) such allocations will be made using alternative data approved by the Secretary that the State determines best reflects the distribution of children in poor families and is adjusted to be equivalent in proportion to the number of children determined in accordance with subsection (c); or

[(C) such allocations will be made using data that the State educational agency submits to the Secretary for approval that more accurately target poverty.

In addition, the State educational agency shall provide assurances that a procedure will be established through which local educational agencies dissatisfied with the determinations made by the State educational agency may appeal directly to the Secretary for a final determination. Beginning in fiscal year 1999, grants shall be calculated by the Secretary on the basis of population data compiled for local educational agencies, unless the

Secretary and the Secretary of Commerce determine that use of the updated population data would be inappropriate or unreliable taking into consideration the recommendations of the study to be conducted by the National Academy of Sciences. If the Secretary and the Secretary of Commerce determine that some or all of the data referred to in this paragraph are inappropriate or unreliable, the Secretaries shall jointly issue a report setting forth their reasons in detail. In years when grants are calculated by the Secretary on the basis of local educational agency data, for each local educational agency serving an area with a total population of at least 20,000 persons, the grant under this section shall be the amount determined by the Secretary. For local educational agencies serving areas with total populations of fewer than 20,000 persons, the State educational agency may either—

[(i) distribute to such local educational agencies grants under this section equal to the amounts determined by the Secretary; and

[(ii) use an alternative method, approved by the Secretary, to distribute the share of the State's total grants under this section that is based on local educational agencies with total populations of fewer than 20,000 persons. Such an alternative method of distributing grants under this section among a State's local educational agencies serving areas with total populations of fewer than 20,000 persons shall be based upon population data that the State educational agency determines best reflect the current distribution of children in poor families among the State's local educational agencies serving areas with total populations of fewer than 20,000 persons. If a local educational agency serving an area with total population of less than 20,000 persons is dissatisfied with the determination of its grant by the State education agency, then such local educational agency may appeal this determination to the Secretary. The Secretary must respond to this appeal within 45 days of receipt.

[(3) PUERTO RICO.—For each fiscal year, the Secretary shall determine the percentage which the average per pupil expenditure in the Commonwealth of Puerto Rico is of the lowest average per pupil expenditure of any of the 50 States. The grant which the Commonwealth of Puerto Rico shall be eligible to receive under this section for a fiscal year shall be the amount arrived at by multiplying the number of children counted under subsection (c) for the Commonwealth of Puerto Rico by the product of—

[(A) the percentage determined under the preceding sentence; and

[(B) 32 percent of the average per pupil expenditure in the United States.

[(4) DEFINITION.—For purposes of this subsection, the term “State” does not include Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, and Palau.

[(b) MINIMUM NUMBER OF CHILDREN TO QUALIFY.—Subject to the succeeding sentence, a local educational agency shall be eligible for a basic grant for a fiscal year under this subpart only if the

number of children counted under subsection (c) in the school district of such local educational agency is at least 10. Beginning in fiscal year 1996, no local educational agency shall be eligible for a grant under this section if the number of children counted for grants under this section is equal to 2 percent or less of the total school age population in the local educational agency. For fiscal years 1996 through 1998, grants not made as a result of applying the preceding sentence shall be reallocated by the State educational agency to other eligible local educational agencies in the State in proportion to the distribution of other funds under this section.

[(c) CHILDREN TO BE COUNTED.—

[(1) CATEGORIES OF CHILDREN.—The number of children to be counted for purposes of this section is the aggregate of—

[(A) the number of children aged 5 to 17, inclusive, in the school district of the local educational agency from families below the poverty level as determined under paragraph (2);

[(B) the number of children aged 5 to 17, inclusive, in the school district of such agency from families above the poverty level as determined under paragraph (5); and

[(C) the number of children aged 5 to 17, inclusive, in the school district of such agency in institutions for neglected and delinquent children (other than such institutions operated by the United States), but not counted pursuant to subpart 1 of part D for the purposes of a grant to a State agency, or being supported in foster homes with public funds.

[(2) DETERMINATION OF NUMBER OF CHILDREN.—For the purposes of this section, the Secretary shall determine the number of children aged 5 to 17, inclusive, from families below the poverty level on the basis of the most recent satisfactory data, described in paragraph (3), available from the Department of Commerce. For fiscal year 1999 and beyond, the District of Columbia and the Commonwealth of Puerto Rico shall be treated as individual local educational agencies. If a local educational agency contains two or more counties in their entirety, then each county will be treated as if such county were a separate local educational agency for purposes of calculating grants under this part. The total of grants for such counties shall be allocated to such a local educational agency, which local educational agency shall distribute to schools in each county within such agency a share of the local educational agency's total grant that is no less than the county's share of the population counts used to calculate the local educational agency's grant.

[(3) POPULATION UPDATES.—In fiscal year 1997 and every 2 years thereafter, the Secretary shall use updated data on the number of children, aged 5 to 17, inclusive, from families below the poverty level for counties or local educational agencies, published by the Department of Commerce, unless the Secretary and the Secretary of Commerce determine that use of the updated population data would be inappropriate or unreliable, taking into consideration the recommendations of the study to be conducted by the National Academy of Sciences. If the Secretary and the Secretary of Commerce determine that

some or all of the data referred to in this paragraph are inappropriate or unreliable, they shall jointly issue a report setting forth their reasons in detail. In determining the families which are below the poverty level, the Secretary shall utilize the criteria of poverty used by the Bureau of the Census in compiling the most recent decennial census, in such form as those criteria have been updated by increases in the Consumer Price Index for all urban consumers, published by the Bureau of Labor Statistics.

[(4) STUDY.—(A) The Secretary of Education shall, within 30 days after the date of enactment of the Improving America's School's Act of 1994, contract with the National Academy of Sciences (hereafter in this section referred to as the "Academy") to study the program to produce intercensal poverty data for small geographic areas and certain age cohorts being developed by the Bureau of the Census.

[(B) In conducting its study, the Academy shall consider such matters as—

[(i) the methodology used to produce and publish intercensal poverty data, and possible alternative methods to improve the usefulness of the data for Federal program purposes;

[(ii) the availability of alternative indicators of poverty for small geographic areas, against which the poverty data produced and published by the Bureau of the Census could be compared;

[(iii) the reliability of the poverty data produced and published by the Bureau of the Census, particularly for less populous geographic areas;

[(iv) the reliability of intercensal poverty data produced and published by the Bureau of the Census, as compared over time to similar data produced by the Bureau of the Census during the most recent decennial census; and

[(v) the usefulness of poverty data produced and published by the Bureau of the Census for Federal programs that allocate funds to State and sub-State areas based, in whole or in part, on such data.

[(C) The Academy shall submit to the Secretary and the Secretary of Commerce, as well as to the Committee on Education and Labor and the Committee on Post Office and Civil Service of the House of Representatives and the Committee on Labor and Human Resources and the Committee on Governmental Affairs of the Senate—

[(i) not later than 18 months after the date on which a contract is entered into under subsection (a), and not later than every 18 months thereafter, such interim reports on the Academy's activities under this Act that the Academy deems appropriate, including a detailed statement of the Academy's findings and conclusions with respect to any poverty data which the Bureau of the Census publishes and produces, within 90 days of such publication; and

[(ii) not later than December 31, 1998, a final report which shall include a more detailed statement of the Academy's findings and conclusions with respect to the use of any intercensal poverty data produced and published by

the Bureau of the Census as the basis for allocating Federal funds under this Act.

[(D) Of the funds appropriated under section 1002(f) of this Act, the Secretary shall use such sums as are necessary in each of fiscal years 1995, 1996, 1997, 1998, and 1999 to carry out the provisions of this paragraph.

[(5) OTHER CHILDREN TO BE COUNTED.—For purposes of this section, the Secretary shall determine the number of children aged 5 to 17, inclusive, from families above the poverty level on the basis of the number of such children from families receiving an annual income, in excess of the current criteria of poverty, from payments under a State program funded under part A of title IV of the Social Security Act; and in making such determinations the Secretary shall utilize the criteria of poverty used by the Bureau of the Census in compiling the most recent decennial census for a family of 4 in such form as those criteria have been updated by increases in the Consumer Price Index for all urban consumers, published by the Bureau of Labor Statistics. The Secretary shall determine the number of such children and the number of children of such ages living in institutions for neglected or delinquent children, or being supported in foster homes with public funds, on the basis of the caseload data for the month of October of the preceding fiscal year (using, in the case of children described in the preceding sentence, the criteria of poverty and the form of such criteria required by such sentence which were determined for the calendar year preceding such month of October) or, to the extent that such data are not available to the Secretary before January of the calendar year in which the Secretary's determination is made, then on the basis of the most recent reliable data available to the Secretary at the time of such determination. The Secretary of Health and Human Services shall collect and transmit the information required by this subparagraph to the Secretary not later than January 1 of each year.

[(6) ESTIMATE.—When requested by the Secretary, the Secretary of Commerce shall make a special updated estimate of the number of children of such ages who are from families below the poverty level (as determined under subparagraph (A) of this paragraph) in each school district, and the Secretary is authorized to pay (either in advance or by way of reimbursement) the Secretary of Commerce the cost of making this special estimate. The Secretary of Commerce shall give consideration to any request of the chief executive of a State for the collection of additional census information. For purposes of this section, the Secretary shall consider all children who are in correctional institutions to be living in institutions for delinquent children.

[(d) STATE MINIMUM.—Notwithstanding subsection (b)(1) or (d) of section 1122, the aggregate amount allotted for all local educational agencies within a State may not be less than the lesser of—

[(1) 0.25 percent of total grants under this section; or

[(2) the average of—

[(A) one-quarter of 1 percent of the total amount available for such fiscal year under this section; and

[(B) the number of children in such State counted under subsection (c) in the fiscal year multiplied by 150 percent of the national average per pupil payment made with funds available under this section for that year.

[SEC. 1124A. CONCENTRATION GRANTS TO LOCAL EDUCATIONAL AGENCIES.

[(a) ELIGIBILITY FOR AND AMOUNT OF GRANTS.—

[(1) IN GENERAL.—(A) Except as otherwise provided in this paragraph, each local educational agency, in a State other than Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, and Palau, which is eligible for a grant under this part for any fiscal year shall be eligible for an additional grant under this section for that fiscal year if—

[(i) the number of children counted under section 1124(c) in the county (for fiscal years 1996 through 1998), or local educational agency (for fiscal years beginning with 1999) for the fiscal year exceeds 6,500; or

[(ii) the number of children counted under section 1124(c) exceeds 15 percent of the total number of children aged 5 to 17, inclusive, in the county (for fiscal years 1996 through 1998), or local educational agency (for fiscal years beginning with 1999) in that fiscal year.

[(B) Notwithstanding such subsections (b)(1) and (d) of section 1122, no State described in subparagraph (A) shall receive less than the lesser of—

[(i) 0.25 percent of total grants; or

[(ii) the average of—

[(I) one-quarter of 1 percent of the sums available to carry out this section for such fiscal year; and

[(II) the greater of—

[(aa) \$340,000; or

[(bb) the number of children in such State counted for purposes of this section in that fiscal year multiplied by 150 percent of the national average per pupil payment made with funds available under this section for that year.

[(2) SPECIAL RULE.—For each county or local educational agency eligible to receive an additional grant under this section for any fiscal year the Secretary shall determine the product of—

[(A) the number of children counted under section 1124(c) for that fiscal year; and

[(B) the quotient resulting from the division of the amount determined for those agencies under section 1124(a)(1) for the fiscal year for which the determination is being made divided by the total number of children counted under section 1124(c) for that agency for fiscal year.

[(3) AMOUNT.—The amount of the additional grant for which an eligible local educational agency or county is eligible under this section for any fiscal year shall be an amount which bears the same ratio to the amount available to carry out this section for that fiscal year as the product determined under paragraph (2) for such local educational agency for that fiscal year bears

to the sum of such products for all local educational agencies in the United States for that fiscal year.

[(4) SUBALLOCATION.—For fiscal years 1996 through 1998, county amounts shall be suballocated to local educational agencies meeting the criteria of paragraph (1)(A) by State educational agencies, in accordance with regulations published by the Secretary. For fiscal years 1995 through 1998, grants shall be calculated by the Secretary on the basis of the number of children counted under section 1124(c) for counties, and State educational agencies shall suballocate county amounts to local educational agencies, in accordance with regulations published by the Secretary. In any State in which a large number of local educational agencies overlap county boundaries, the State educational agency may apply to the Secretary for authority during any particular fiscal year to make the allocations under this part (other than this section) directly to local educational agencies without regard to the counties. If the Secretary approves an application of a State educational agency for a particular year under this paragraph, the State educational agency shall provide assurances that—

[(A) such allocations will be made using precisely the same factors for determining a grant as are used under this part;

[(B) such allocations will be made using alternative data approved by the Secretary that the State determines best reflects the distribution of children in poor families and is adjusted to be equivalent in proportion to the number of children determined in accordance with section 1124(c); or

[(C) such allocations will be made using data that the State educational agency submits to the Secretary for approval that more accurately target poverty.

In addition, the State educational agency shall provide assurances that a procedure will be established through which local educational agencies dissatisfied with the determinations made by the State educational agency may appeal directly to the Secretary for a final determination. A State may reserve not more than 2 percent of its allocations in fiscal years 1996 through 1998 under this section for the purpose of making grants to local educational agencies that meet the criteria of clause (i) or (ii) of paragraph (1)(A), but are in ineligible counties. For fiscal years beginning with 1999, for each local educational agency serving an area with a total population of at least 20,000 persons, the grant under this section shall be the amount determined by the Secretary. For local educational agencies serving areas with total populations of fewer than 20,000 persons, the State educational agency may either (i) distribute to such local educational agencies grants under this section equal to the amounts determined by the Secretary; or (ii) use an alternative method, approved by the Secretary, to distribute the share of the State's total grants under this section that is based on local educational agencies with total populations of fewer than 20,000 persons. Such an alternative method of distributing grants under this section among a State's local educational agencies serving areas with total populations of fewer than 20,000 persons shall be based upon population data that the

State educational agency determines best reflects the current distribution of children in poor families among the State's local educational agencies serving areas with total populations of fewer than 20,000 persons and meeting the eligibility criteria of paragraph (1)(A). If a local educational agency serving an area with total population of less than 20,000 persons is dissatisfied with the determination of its grant by the State educational agency, then such local educational agency may appeal this determination to the Secretary. The Secretary shall respond to this appeal within 45 days of receipt. The Secretary shall consult with the Secretary of Commerce regarding whether available data on population for local educational agencies serving areas with total populations of fewer than 20,000 persons are sufficiently reliable to be used to determine final grants to such areas meeting the eligibility criteria of paragraph (1)(A).

[(b) RESERVATION OF FUNDS.—Of the total amount of funds available for this section and sections 1124 and 1125, an amount equal to the appropriation for fiscal year 1995 for section 1006 of this Act (as such section was in effect on the day preceding the date of enactment of this Act) shall be available to carry out this section.

[(c) RATABLE REDUCTION RULE.—If the sums available under subsection (b) for any fiscal year for making payments under this section are not sufficient to pay in full the total amounts which all States are eligible to receive under subsection (a) for such fiscal year, the maximum amounts which all States are eligible to receive under subsection (a) for such fiscal year shall be ratably reduced. In the case that additional funds become available for making such payments for any fiscal year during which the preceding sentence is applicable, such reduced amounts shall be increased on the same basis as they were reduced.

[(d) STATES RECEIVING MINIMUM GRANTS.—In States that receive the minimum grant under subsection (a)(1)(B), the State educational agency shall allocate such funds among the local educational agencies in each State either—

[(1) in accordance with paragraphs (2) and (4) of subsection (a); or

[(2) based on their respective concentrations and numbers of children counted under section 1124(c), except that only those local educational agencies with concentrations or numbers of children counted under section 1124(c) that exceed the statewide average percentage of such children or the statewide average number of such children shall receive any funds on the basis of this paragraph.

[SEC. 1125. TARGETED GRANTS TO LOCAL EDUCATIONAL AGENCIES.

[(a) ELIGIBILITY OF LOCAL EDUCATIONAL AGENCIES.—A local educational agency in a State is eligible to receive a targeted grant under this section for any fiscal year if the number of children in the local educational agency counted under subsection 1124(c), before application of the weighting factor described in subsection (c), is at least 10, and if the number of children counted for grants under section 1124 is at least 5 percent of the total population aged 5 to 17 years, inclusive, in the local educational agency. Funds made available as a result of applying this subsection shall be re-

allocated by the State educational agency to other eligible local educational agencies in the State in proportion to the distribution of other funds under this section.

[(b) GRANTS FOR LOCAL EDUCATIONAL AGENCIES, THE DISTRICT OF COLUMBIA, AND PUERTO RICO.—

[(1) IN GENERAL.—The amount of the grant that a local educational agency in a State or that the District of Columbia is eligible to receive under this section for any fiscal year shall be the product of—

[(A) the weighted child count determined under subsection (c); and

[(B) the amount in the second sentence of subparagraph 1124(a)(1)(A).

[(2) PUERTO RICO.—For each fiscal year, the amount of the grant for which the Commonwealth of Puerto Rico is eligible under this section shall be equal to the number of children counted under subsection (c) for Puerto Rico, multiplied by the amount determined in subparagraph 1124(a)(3).

[(c) WEIGHTED CHILD COUNT.—

[(1) FISCAL YEARS 1966–1998.—

[(A) IN GENERAL.—The weighted child count used to determine a county's allocation under this section is the larger of the two amounts determined under clause (i) or (ii), as follows:

[(i) BY PERCENTAGE OF CHILDREN.—This amount is determined by adding—

[(I) the number of children determined under section 1124(c) for that county constituting up to 12.20 percent, inclusive, of the county's total population aged 5 to 17, inclusive, multiplied by 1.0;

[(II) the number of such children constituting more than 12.20 percent, but not more than 17.70 percent, of such population, multiplied by 1.75;

[(III) the number of such children constituting more than 17.70 percent, but not more than 22.80 percent, of such population, multiplied by 2.5;

[(IV) the number of such children constituting more than 22.80 percent, but not more than 29.70 percent, of such population, multiplied by 3.25; and

[(V) the number of such children constituting more than 29.70 percent of such population, multiplied by 4.0.

[(ii) BY NUMBER OF CHILDREN.—This amount is determined by adding—

[(I) the number of children determined under section 1124(c) constituting up to 1,917, inclusive, of the county's total population aged 5 to 17, inclusive, multiplied by 1.0;

[(II) the number of such children between 1,918 and 5,938, inclusive, in such population, multiplied by 1.5;

[(III) the number of such children between 5,939 and 20,199, inclusive, in such population, multiplied by 2.0;

[(IV) the number of such children between 20,200 and 77,999, inclusive, in such population, multiplied by 2.5; and

[(V) the number of such children in excess of 77,999 in such population, multiplied by 3.0.

[(B) PUERTO RICO.—Notwithstanding subparagraph (A), the weighting factor for Puerto Rico under this paragraph shall not be greater than the total number of children counted under subsection 1124(c) multiplied by 1.72.

[(2) FISCAL YEARS AFTER 1999.—

[(A) IN GENERAL.—For each fiscal year beginning with fiscal year 1999 for which the Secretary uses local educational agency data, the weighted child count used to determine a local educational agency's grant under this section is the larger of the two amounts determined under clauses (i) and (ii), as follows:

[(i) BY PERCENTAGE OF CHILDREN.—This amount is determined by adding—

[(I) the number of children determined under section 1124(c) for that local educational agency constituting up to 14.265 percent, inclusive, of the agency's total population aged 5 to 17, inclusive, multiplied by 1.0;

[(II) the number of such children constituting more than 14.265 percent, but not more than 21.553 percent, of such population, multiplied by 1.75;

[(III) the number of such children constituting more than 21.553 percent, but not more than 29.223 percent, of such population, multiplied by 2.5;

[(IV) the number of such children constituting more than 29.223 percent, but not more than 36.538 percent, of such population, multiplied by 3.25; and

[(V) the number of such children constituting more than 36.538 percent of such population, multiplied by 4.0.

[(ii) BY NUMBER OF CHILDREN.—This amount is determined by adding—

[(I) the number of children determined under section 1124(c) constituting up to 575, inclusive, of the agency's total population aged 5 to 17, inclusive, multiplied by 1.0;

[(II) the number of such children between 576 and 1,870, inclusive, in such population, multiplied by 1.5;

[(III) the number of such children between 1,871 and 6,910, inclusive, in such population, multiplied by 2.0;

[(IV) the number of such children between 6,911 and 42,000, inclusive, in such population, multiplied by 2.5; and

[(V) the number of such children in excess of 42,000 in such population, multiplied by 3.0.

[(B) PUERTO RICO.—Notwithstanding subparagraph (A), the weighting factor for Puerto Rico under this paragraph shall not be greater than the total number of children counted under section 1124(c) multiplied by 1.72.

[(d) LOCAL EDUCATIONAL AGENCY ALLOCATIONS.—For fiscal years 1995 through 1998, grants shall be calculated by the Secretary on the basis of the number of children counted under section 1124 for counties, and State educational agencies shall suballocate county amounts to local educational agencies, in accordance with regulations published by the Secretary. In any State in which a large number of local educational agencies overlap county boundaries, the State educational agency may apply to the Secretary for authority during any particular fiscal year to make the allocations under this part (other than section 1124A) directly to local educational agencies without regard to the counties. If the Secretary approves an application of a State educational agency for a particular year under this subparagraph, the State educational agency shall provide assurances that—

[(1) such allocations will be made using precisely the same factors for determining a grant as are used under this part;

[(2) such allocations will be made using alternative data approved by the Secretary that the State determines best reflects the distribution of children in poor families and is adjusted to be equivalent in proportion to the number of children determined in accordance with section 1124(c); or

[(3) such allocations will be made using data that the State educational agency submits to the Secretary for approval that more accurately target poverty.

In addition, the State educational agency shall provide assurances that a procedure will be established through which local educational agencies dissatisfied with the determinations made by the State educational agency may appeal directly to the Secretary for a final determination. For fiscal years beginning in 1999, for each local educational agency serving an area with a total population of at least 20,000 persons, the grant under this section shall be the amount determined by the Secretary. For local educational agencies serving areas with total populations of fewer than 20,000 persons, the State educational agency may either (1) distribute to such local educational agencies grants under this section equal to the amounts determined by the Secretary; or (2) use an alternative method, approved by the Secretary, to distribute the share of the State's total grants under this section that is based on local educational agencies with total populations of fewer than 20,000 persons. Such an alternative method of distributing grants under this section among a State's local educational agencies serving areas with total populations of fewer than 20,000 persons shall be based upon population data that the State educational agency determines best reflects the current distribution of children in poor families among the State's local educational agencies serving areas with total populations of fewer than 20,000 persons. If a local educational agency serving an area with total populations of less than 20,000 persons is dissatisfied with the determination of its grant by the State educational agency, then the local educational agency may appeal this determination to the Secretary. The Secretary shall respond to this appeal within 45 days of receipt.

[(e) STATE MINIMUM.—Notwithstanding any other provision of this section or subsection (b)(1) or (d) of section 1122, from the total amount available for any fiscal year to carry out this section, each State shall be allotted at least the lesser of—

[(1) 0.25 percent of total appropriations; or

[(2) the average of—

[(A) one-quarter of 1 percent of the total amount available to carry out this section; and

[(B) 150 percent of the national average grant under this section per child described in section 1124(c), without application of a weighting factor, multiplied by the State's total number of children described in section 1124(c), without application of a weighting factor.

[SEC. 1125A. EDUCATION FINANCE INCENTIVE PROGRAM.

[(a) GRANTS.—The Secretary is authorized to make grants to States from the sums appropriated pursuant to subsection (e) to carry out the purposes of this part.

[(b) DISTRIBUTION BASED UPON FISCAL EFFORT AND EQUITY.—

[(1) IN GENERAL.—Funds appropriated pursuant to subsection (e) shall be allotted to each State based upon the number of children aged 5 to 17, inclusive, of such State multiplied by the product of—

[(A) such State's effort factor described in paragraph (2); multiplied by

[(B) 1.30 minus such State's equity factor described in paragraph (3),

except that for each fiscal year no State shall receive less than one-quarter of 1 percent of the total amount appropriated pursuant to subsection (e) for such fiscal year.

[(2) EFFORT FACTOR.—(A) Except as provided in subparagraph (B), the effort factor for a State shall be determined in accordance with the succeeding sentence, except that such factor shall not be less than .95 nor greater than 1.05. The effort factor determined under this sentence shall be a fraction the numerator of which is the product of the three-year average per-pupil expenditure in the State multiplied by the three-year average per capita income in the United States and the denominator of which is the product of the three-year average per capita income in such State multiplied by the three-year average per-pupil expenditure in the United States.

[(B) The effort factor for the Commonwealth of Puerto Rico shall be equal to the lowest effort factor calculated under subparagraph (A) for any State.

[(3) EQUITY FACTOR.—(A)(i) Except as provided in subparagraph (B), the Secretary shall determine the equity factor under this section for each State in accordance with clause (ii).

[(ii)(I) For each State, the Secretary shall compute a weighted coefficient of variation for the per-pupil expenditures of local educational agencies in accordance with subclauses (II), (III), (IV), and (V).

[(II) In computing coefficients of variation, the Secretary shall weigh the variation between per-pupil expenditures in each local educational agency and the average per-pupil expenditures in the State according to the number of pupils in the local educational agency.

[(III) In determining the number of pupils under this paragraph in each local educational agency and each State, the Secretary shall multiply the number of children from low-income families by 1.4 under this paragraph.

[(IV) In computing coefficients of variation, the Secretary shall include only those local educational agencies with an enrollment of more than 200 students.

[(V) The Secretary shall compute separate coefficients of variation for elementary, secondary, and unified local educational agencies and shall combine such coefficients into a single weighted average coefficient for the State by multiplying each coefficient by the total enrollments of the local educational agencies in each group, adding such products, and dividing such sum by the total enrollments of the local educational agencies in the State.

[(B) The equity factor for a State that meets the disparity standard described in section 222.63 of title 34, Code of Federal Regulations (as such section was in effect on the day preceding the date of enactment of this Act) or a State with only one local educational agency shall be not greater than .10.

[(C) The Secretary may revise each State's equity factor as necessary based on the advice of independent education finance scholars to reflect other need-based costs of local educational agencies in addition to low-income student enrollment, such as differing geographic costs, costs associated with students with disabilities, children with limited-English proficiency or other meaningful educational needs, which deserve additional support. In addition and also with the advice of independent education finance scholars, the Secretary may revise each State's equity factor to incorporate other valid and accepted methods to achieve adequacy of educational opportunity that may not be reflected in a coefficient of variation method.

[(c) USE OF FUNDS.—All funds awarded to each State under this section shall be allocated to local educational agencies and schools on a basis consistent with the distribution of other funds to such agencies and schools under sections 1124, 1124A, and 1125 to carry out activities under this part.

[(d) MAINTENANCE OF EFFORT.—

[(1) IN GENERAL.—Except as provided in paragraph (2), a State is entitled to receive its full allotment of funds under this part for any fiscal year if the Secretary finds that either the combined fiscal effort per student or the aggregate expenditures within the State with respect to the provision of free public education for the fiscal year preceding the fiscal year for which the determination is made was not less than 90 percent of such combined fiscal effort or aggregate expenditures for the second fiscal year preceding the fiscal year for which the determination is made.

[(2) REDUCTION OF FUNDS.—The Secretary shall reduce the amount of the of funds awarded to any State under this section in any fiscal year in the exact proportion to which the State fails to meet the requirements of paragraph (1) by falling below 90 percent of both the fiscal effort per student and aggregate expenditures (using the measure most favorable to the State),

and no such lesser amount shall be used for computing the effort required under paragraph (1) for subsequent years.

[(3) WAIVERS.—The Secretary may waive, for one fiscal year only, the requirements of this subsection if the Secretary determines that such a waiver would be equitable due to exceptional or uncontrollable circumstances such as a natural disaster or a precipitous and unforeseen decline in the financial resources of the State.

[(e) AUTHORIZATION OF APPROPRIATIONS.—For the purpose of making grants under this section, there are authorized to be appropriated \$200,000,000 for fiscal year 1996 and such sums as may be necessary for each of the three succeeding fiscal years.

[SEC. 1127. CARRYOVER AND WAIVER.

[(a) LIMITATION ON CARRYOVER.—Notwithstanding section 421 of the General Education Provisions Act or any other provision of law, not more than 15 percent of the funds allocated to a local educational agency for any fiscal year under this subpart (but not including funds received through any reallocation under this subpart) may remain available for obligation by such agency for one additional fiscal year.

(e) **CAPITAL EXPENSES.**—

(1) **IN GENERAL.**—(A) From the amount appropriated for this subsection under section 1002(g) for any fiscal year, each State is eligible to receive an amount that bears the same ratio to the amount so appropriated as the number of private school children who received services under this part in the State in the most recent year for which data satisfactory to the Secretary are available bears to the number of such children in all States in that same year.

(B) The Secretary shall reallocate any amounts allocated under subparagraph (A) that are not used by a State for the purpose of this subsection to other States on the basis of their respective needs, as determined by the Secretary.

(2) **CAPITAL EXPENSES.**—(A) A local educational agency may apply to the State educational agency for payments for capital expenses consistent with this subsection.

(c) *DEFINITIONS.*—For the purposes of subsections (a) and (b)—

(1) the term “freely associated States” means the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau; and

(2) the term “outlying area” means the United States Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(d) *ALLOTMENT TO THE SECRETARY OF THE INTERIOR.*—

(1) *IN GENERAL.*—The amount allotted for payments to the Secretary of the Interior under subsection (a)(2) for any fiscal year shall be, as determined pursuant to criteria established by the Secretary, the amount necessary to meet the special educational needs of—

(B) out-of-State Indian children in elementary and secondary schools in local educational agencies under special contracts with the Department of the Interior.

(2) *PAYMENTS.*—From the amount allotted for payments to the Secretary of the Interior under subsection (a)(2), the Secretary of the Interior shall make payments to local educational agencies, upon such terms as the Secretary determines will best carry out the purposes of this part, with respect to out-of-State Indian children described in paragraph (1). The amount of such payment may not exceed, for each such child, the greater of—

(A) 40 percent of the average per-pupil expenditure in the State in which the agency is located; or

(B) 48 percent of such expenditure in the United States.

SEC. 1122. AMOUNTS FOR BASIC GRANTS, CONCENTRATION GRANTS, AND TARGETED GRANTS.

(a) *ALLOCATION FORMULA.*—Of the amount appropriated to carry out this part for each of fiscal years 2002 through 2006 (referred to in this subsection as the current fiscal year)—

(3) an amount equal to 100 percent of the amount, if any, by which the amount appropriated under section 1002(a) for the current fiscal year exceeds the amount appropriated under such section for fiscal year 2001 shall be allocated in accordance with section 1125.

(b) **ADJUSTMENTS WHERE NECESSITATED BY APPROPRIATIONS.**—

(1) **IN GENERAL.**—If the sums available under this part for any fiscal year are insufficient to pay the full amounts that all local educational agencies in States are eligible to receive under sections 1124, 1124A, and 1125 for such year, the Secretary shall ratably reduce the allocations to such local educational agencies, subject to subsections (c) and (d) of this section.

(2) **ADDITIONAL FUNDS.**—If additional funds become available for making payments under sections 1124, 1124A, and 1125 for such fiscal year, allocations that were reduced under paragraph (1) shall be increased on the same basis as they were reduced.

(c) **HOLD-HARMLESS AMOUNTS.**—

(1) **AMOUNTS FOR SECTIONS 1124 AND 1125.**—For each fiscal year, the amount made available to each local educational agency under each of sections 1124 and 1125 shall be—

(A) not less than 95 percent of the amount made available in the preceding fiscal year if the number of children counted for grants under section 1124 is not less than 30 percent of the total number of children aged 5 to 17 years, inclusive, in the local educational agency;

(B) not less than 90 percent of the amount made available in the preceding fiscal year if the percentage described in subparagraph (A) is between 15 percent and 30 percent; and

(2) **AMOUNT FOR SECTION 1124A.**—The amount made available to each local educational agency under section 1124A shall be not less than 85 percent of the amount made available in the preceding fiscal year.

(3) **PAYMENTS.**—If sufficient funds are appropriated, the amounts described in paragraph (2) shall be paid to all local educational agencies that received grants under section 1124A for the preceding fiscal year, regardless of whether the local educational agency meets the minimum eligibility criteria for that fiscal year provided in section 1124A(a)(1)(A) except that a local educational agency that does not meet such minimum eligibility criteria for 4 consecutive years shall no longer be eligible to receive a hold harmless amount referred to in paragraph (2).

(4) **POPULATION DATA.**—In any fiscal year for which the Secretary calculates grants on the basis of population data for counties, the Secretary shall apply the hold harmless percentages in paragraphs (1) and (2) to counties, and if the Secretary's allocation for a county is not sufficient to meet the hold-harmless requirements of this subsection for every local edu-

cational agency within that county, the State educational agency shall reallocate funds proportionately from all other local educational agencies in the State that are receiving funds in excess of the hold harmless amounts specified in this subsection.

(d) RATABLE REDUCTIONS.—

(1) IN GENERAL.—If the sums made available under this part for any fiscal year are insufficient to pay the full amounts that all States are eligible to receive under subsection (c) for such year, the Secretary shall ratably reduce such amounts for such year.

(2) ADDITIONAL FUNDS.—If additional funds become available for making payments under subsection (c) for such fiscal year, amounts that were reduced under paragraph (1) shall be increased on the same basis as such amounts were reduced.

(e) DEFINITION.—For the purpose of this section and sections 1124, 1124A, and 1125, the term “State” means each of the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico.

SEC. 1124. BASIC GRANTS TO LOCAL EDUCATIONAL AGENCIES.

(a) AMOUNT OF GRANTS.—

(1) GRANTS FOR LOCAL EDUCATIONAL AGENCIES AND PUERTO RICO.—Except as provided in paragraph (4) and in section 1126, the grant that a local educational agency is eligible to receive under this section for a fiscal year is the amount determined by multiplying—

(A) the number of children counted under subsection (c); and

(B) 40 percent of the average per-pupil expenditure in the State, except that the amount determined under this subparagraph shall not be less than 32 percent or more than 48 percent, of the average per-pupil expenditure in the United States.

(2) CALCULATION OF GRANTS.—

(A) ALLOCATIONS TO LOCAL EDUCATIONAL AGENCIES.—

The Secretary shall calculate grants under this section on the basis of the number of children counted under subsection (c) for local educational agencies, unless the Secretary and the Secretary of Commerce determine that some or all of those data are unreliable or that their use would be otherwise inappropriate, in which case—

(i) the 2 Secretaries shall publicly disclose the reasons for their determination in detail; and

(ii) paragraph (3) shall apply.

(B) ALLOCATIONS TO LARGE AND SMALL LOCAL EDUCATIONAL AGENCIES.—*(i) For any fiscal year in which this paragraph applies, the Secretary shall calculate grants under this section for each local educational agency.*

(ii) The amount of a grant under this section for each large local educational agency shall be the amount determined under clause (i).

(iii) For small local educational agencies, the State educational agency may either—

(I) distribute grants under this section in amounts determined by the Secretary under clause (i); or

(II) use an alternative method approved by the Secretary to distribute the portion of the State's total grants under this section that is based on those small agencies.

(iv) An alternative method under clause (iii)(II) shall be based on population data that the State educational agency determines best reflect the current distribution of children in poor families among the State's small local educational agencies that meet the eligibility criteria of subsection (b).

(v) If a small local educational agency is dissatisfied with the determination of its grant by the State educational agency under clause (iii)(II), it may appeal that determination to the Secretary, who shall respond not later than 45 days after receipt of such appeal.

(vi) As used in this subparagraph—

(I) the term "large local educational agency" means a local educational agency serving an area with a total population of 20,000 or more; and

(II) the term "small local educational agency" means a local educational agency serving an area with a total population of less than 20,000.

(3) ALLOCATIONS TO COUNTIES.—

(A) CALCULATION.—For any fiscal year to which this paragraph applies, the Secretary shall calculate grants under this section on the basis of the number of children counted under section 1124(c) for counties, and State educational agencies shall suballocate county amounts to local educational agencies, in accordance with regulations issued by the Secretary.

(B) DIRECT ALLOCATIONS.—In any State in which a large number of local educational agencies overlap county boundaries, or for which the State believes it has data that would better target funds than allocating them by county, the State educational agency may apply to the Secretary for authority to make the allocations under this part for a particular fiscal year directly to local educational agencies without regard to counties.

(C) ASSURANCES.—If the Secretary approves the State educational agency's application under subparagraph (B), the State educational agency shall provide the Secretary an assurance that such allocations shall be made—

(i) using precisely the same factors for determining a grant as are used under this part; or

(ii) using data that the State educational agency submits to the Secretary for approval that more accurately target poverty.

(D) APPEAL.—The State educational agency shall provide the Secretary an assurance that it shall establish a procedure through which a local educational agency that is dissatisfied with its determinations under subparagraph (B) may appeal directly to the Secretary for a final determination.

(4) PUERTO RICO.—

(A) IN GENERAL.—For each fiscal year, the grant which the Commonwealth of Puerto Rico shall be eligible to re-

ceive under this section shall be the amount determined by multiplying the number of children counted under subsection (c) for the Commonwealth of Puerto Rico by the product of—

(i) the percentage which the average per-pupil expenditure in the Commonwealth of Puerto Rico is of the lowest average per-pupil expenditure of any of the 50 States; and

(ii) 32 percent of the average per-pupil expenditure in the United States.

(B) **MINIMUM PERCENTAGE.**—The percentage in subparagraph (A)(i) shall not be less than—

(i) for fiscal year 2002, 77.5 percent;

(ii) for fiscal year 2003, 80.0 percent;

(iii) for fiscal year 2004, 82.5 percent; and

(iv) for fiscal year 2005 and succeeding fiscal years, 85.0 percent.

(C) **LIMITATION.**—If the application of subparagraph (B) would result in any of the 50 States or the District of Columbia receiving less under this part than it received under this part for the preceding fiscal year, the percentage in subparagraph (A) shall be the greater of the percentage in subparagraph (A)(i) or the percentage used for the preceding fiscal year.

(5) **DEFINITION.**—For purposes of this subsection, the term “State” does not include Guam, American Samoa, the Virgin Islands, and the Northern Mariana Islands.

(b) **MINIMUM NUMBER OF CHILDREN TO QUALIFY.**—A local educational agency is eligible for a basic grant under this section for any fiscal year only if the number of children counted under subsection (c) for that agency is both—

(1) 10 or more; and

(2) more than 2 percent of the total school-age population in the agency’s jurisdiction.

(c) **CHILDREN TO BE COUNTED.**—

(1) **CATEGORIES OF CHILDREN.**—The number of children to be counted for purposes of this section is the aggregate of—

(A) the number of children aged 5 to 17, inclusive, in the school district of the local educational agency from families below the poverty level as determined under paragraph (2);

(B) the number of children (determined under paragraph (4) for either the preceding year as described in that paragraph, or for the second preceding year, as the Secretary finds appropriate) aged 5 to 17, inclusive, in the school district of such agency in institutions for neglected and delinquent children (other than such institutions operated by the United States), but not counted pursuant to subpart 1 of part D for the purposes of a grant to a State agency, or being supported in foster homes with public funds; and

(C) the number of children aged 5 to 17, inclusive, in the school district of such agency from families above the poverty level as determined under paragraph (4).

(2) **DETERMINATION OF NUMBER OF CHILDREN.**—For the purposes of this section, the Secretary shall determine the number of children aged 5 to 17, inclusive, from families below the pov-

erty level on the basis of the most recent satisfactory data, described in paragraph (3), available from the Department of Commerce. The District of Columbia and the Commonwealth of Puerto Rico shall be treated as individual local educational agencies. If a local educational agency contains 2 or more counties in their entirety, then each county will be treated as if such county were a separate local educational agency for purposes of calculating grants under this part. The total of grants for such counties shall be allocated to such a local educational agency, which local educational agency shall distribute to schools in each county within such agency a share of the local educational agency's total grant that is no less than the county's share of the population counts used to calculate the local educational agency's grant.

(3) **POPULATION UPDATES.**—In fiscal year 2001 and every 2 years thereafter, the Secretary shall use updated data on the number of children, aged 5 to 17, inclusive, from families below the poverty level for local educational agencies or counties, published by the Department of Commerce, unless the Secretary and the Secretary of Commerce determine that use of the updated population data would be inappropriate or unreliable. If the Secretary and the Secretary of Commerce determine that some or all of the data referred to in this paragraph are inappropriate or unreliable, they shall publicly disclose their reasons. In determining the families which are below the poverty level, the Secretary shall utilize the criteria of poverty used by the Bureau of the Census in compiling the most recent decennial census, in such form as those criteria have been updated by increases in the Consumer Price Index for all urban consumers, published by the Bureau of Labor Statistics.

(4) **OTHER CHILDREN TO BE COUNTED.**—For the purposes of this section, the Secretary shall determine the number of children aged 5 to 17, inclusive, from families above the poverty level on the basis of the number of such children from families receiving an annual income, in excess of the current criteria of poverty, from payments under a State program funded under part A of title IV of the Social Security Act; and in making such determinations the Secretary shall utilize the criteria of poverty used by the Bureau of the Census in compiling the most recent decennial census for a family of 4 in such form as those criteria have been updated by increases in the Consumer Price Index for all urban consumers, published by the Bureau of Labor Statistics. The Secretary shall determine the number of such children and the number of children aged 5 through 17 living in institutions for neglected or delinquent children, or being supported in foster homes with public funds, on the basis of the caseload data for the month of October of the preceding fiscal year (using, in the case of children described in the preceding sentence, the criteria of poverty and the form of such criteria required by such sentence which were determined for the calendar year preceding such month of October) or, to the extent that such data are not available to the Secretary before January of the calendar year in which the Secretary's determination is made, then on the basis of the most recent reliable data available to the Secretary at the time of such determination. The Sec-

retary of Health and Human Services shall collect and transmit the information required by this subparagraph to the Secretary not later than January 1 of each year. For the purpose of this section, the Secretary shall consider all children who are in correctional institutions to be living in institutions for delinquent children.

(5) *ESTIMATE*.—When requested by the Secretary, the Secretary of Commerce shall make a special updated estimate of the number of children of such ages who are from families below the poverty level (as determined under subparagraph (A) of this paragraph) in each school district, and the Secretary is authorized to pay (either in advance or by way of reimbursement) the Secretary of Commerce the cost of making this special estimate. The Secretary of Commerce shall give consideration to any request of the chief executive of a State for the collection of additional census information.

(d) *STATE MINIMUM*.—Notwithstanding section 1122, the aggregate amount allotted for all local educational agencies within a State may not be less than the lesser of—

(1) 0.25 percent of total grants under this section; or

(2) the average of—

(A) one-quarter of 1 percent of the total amount available for such fiscal year under this section; and

(B) the number of children in such State counted under subsection (c) in the fiscal year multiplied by 150 percent of the national average per-pupil payment made with funds available under this section for that year.

SEC. 1124A. CONCENTRATION GRANTS TO LOCAL EDUCATIONAL AGENCIES.

(a) *ELIGIBILITY FOR AND AMOUNT OF GRANTS*.—

(1) *IN GENERAL*.—(A) Except as otherwise provided in this paragraph, each local educational agency, in a State other than Guam, American Samoa, the Virgin Islands, and the Commonwealth of the Northern Mariana Islands, which is eligible for a grant under section 1124 for any fiscal year is eligible for an additional grant under this section for that fiscal year if the number of children counted under section 1124(c) in the agency exceeds either—

(i) 6,500; or

(ii) 15 percent of the total number of children aged 5 through 17 in the agency.

(B) Notwithstanding section 1122, no State described in subparagraph (A) shall receive less than the lesser of—

(i) 0.25 percent of total grants; or

(ii) the average of—

(I) one-quarter of 1 percent of the sums available to carry out this section for such fiscal year; and

(II) the greater of—

(aa) \$340,000; or

(bb) the number of children in such State counted for purposes of this section in that fiscal year multiplied by 150 percent of the national average per-pupil payment made with funds available under this section for that year.

(2) *SPECIAL RULE.*—For each county or local educational agency eligible to receive an additional grant under this section for any fiscal year the Secretary shall determine the product of—

(A) the number of children counted under section 1124(c) for that fiscal year; and

(B) the quotient resulting from the division of the amount determined for those agencies under section 1124(a)(1) for the fiscal year for which the determination is being made divided by the total number of children counted under section 1124(c) for that agency for that fiscal year.

(3) *AMOUNT.*—The amount of the additional grant for which an eligible local educational agency or county is eligible under this section for any fiscal year shall be an amount which bears the same ratio to the amount available to carry out this section for that fiscal year as the product determined under paragraph (2) for such local educational agency for that fiscal year bears to the sum of such products for all local educational agencies in the United States for that fiscal year.

(4) *LOCAL ALLOCATIONS.*—(A) Grant amounts under this section shall be determined in accordance with section 1124(a)(2) and (3).

(B) For any fiscal year for which the Secretary allocates funds under this section on the basis of counties, a State may reserve not more than 2 percent of its allocation under this section to make grants to local educational agencies that meet the criteria of paragraph (1)(A)(i) or (ii) and are in ineligible counties that do not meet these criteria.

(b) *STATES RECEIVING MINIMUM GRANTS.*—In States that receive the minimum grant under subsection (a)(1)(B), the State educational agency shall allocate such funds among the local educational agencies in each State either—

(1) in accordance with paragraphs (2) and (4) of subsection (a); or

(2) based on their respective concentrations and numbers of children counted under section 1124(c), except that only those local educational agencies with concentrations or numbers of children counted under section 1124(c) that exceed the statewide average percentage of such children or the statewide average number of such children shall receive any funds on the basis of this paragraph.

SEC. 1125. TARGETED GRANTS TO LOCAL EDUCATIONAL AGENCIES.

(a) *ELIGIBILITY OF LOCAL EDUCATIONAL AGENCIES.*—A local educational agency in a State is eligible to receive a targeted grant under this section for any fiscal year if the number of children in the local educational agency counted under subsection 1124(c), before application of the weighting factor described in subsection (c), is at least 10, and if the number of children counted for grants under section 1124 is at least 5 percent of the total population aged 5 to 17 years, inclusive, in the local educational agency. For each fiscal year for which the Secretary uses county population data to calculate grants, funds made available as a result of applying this subsection shall be reallocated by the State educational agency to other eligible local educational agencies in the State in proportion to the distribution of other funds under this section.

(b) *GRANTS FOR LOCAL EDUCATIONAL AGENCIES, THE DISTRICT OF COLUMBIA, AND PUERTO RICO.*—

(1) *IN GENERAL.*—The amount of the grant that a local educational agency in a State or that the District of Columbia is eligible to receive under this section for any fiscal year shall be the product of—

(A) the weighted child count determined under subsection (c); and

(B) the amount in paragraph 1124(a)(1)(B).

(2) *PUERTO RICO.*—For each fiscal year, the amount of the grant for which the Commonwealth of Puerto Rico is eligible under this section shall be equal to the number of children counted under subsection (c) for Puerto Rico, multiplied by the amount determined in subparagraph 1124(a)(4).

(c) *WEIGHTED CHILD COUNT.*—

(1) *WEIGHTS FOR ALLOCATIONS TO COUNTIES.*—

(A) *IN GENERAL.*—For each fiscal year for which the Secretary uses county population data to calculate grants, the weighted child count used to determine a county's allocation under this section is the larger of the 2 amounts determined under clause (i) or (ii), as follows:

(i) *BY PERCENTAGE OF CHILDREN.*—This amount is determined by adding—

(I) the number of children determined under section 1124(c) for that county constituting up to 15 percent, inclusive, of the county's total population aged 5 to 17, inclusive, multiplied by 1.0;

(II) the number of such children constituting more than 15 percent, but not more than 19 percent, of such population, multiplied by 1.75;

(III) the number of such children constituting more than 19 percent, but not more than 24.20 percent, of such population, multiplied by 2.5;

(IV) the number of such children constituting more than 24.20 percent, but not more than 29.20 percent, of such population, multiplied by 3.25; and

(V) the number of such children constituting more than 29.20 percent of such population, multiplied by 4.0.

(ii) *BY NUMBER OF CHILDREN.*—This amount is determined by adding—

(I) the number of children determined under section 1124(c) constituting up to 2,311, inclusive, of the county's total population aged 5 to 17, inclusive, multiplied by 1.0;

(II) the number of such children between 2,312 and 7,913, inclusive, in such population, multiplied by 1.5;

(III) the number of such children between 7,914 and 23,917, inclusive, in such population, multiplied by 2.0;

(IV) the number of such children between 23,918 and 93,810, inclusive, in such population, multiplied by 2.5; and

(V) *the number of such children in excess of 93,811 in such population, multiplied by 3.0.*

(B) *PUERTO RICO.—Notwithstanding subparagraph (A), the weighted child count for Puerto Rico under this paragraph shall not be greater than the total number of children counted under subsection 1124(c) multiplied by 1.72.*

(2) *WEIGHTS FOR ALLOCATIONS TO LOCAL EDUCATIONAL AGENCIES.—*

Subpart 1—Reading First

SEC. 1201. FINDINGS.

The Congress finds as follows:

(1) The 2000 National Assessment of Educational Progress found that 68 percent of fourth grade students in the United States are reading below the proficient level.

(2) According to the 2000 National Assessment of Educational Progress report on reading, 63 percent of African Americans, 58 percent of Hispanic Americans, 60 percent of children living in poverty, and 47 percent of children in urban schools scored “below basic” in reading.

(3) More than $\frac{1}{2}$ of the students placed in special education classes are identified as learning disabled and, for as many as 80 percent of the students so identified, reading is the primary difficulty.

(4) It is estimated that, at a minimum, 10,000,000 children have difficulty learning to read. 10 to 15 percent of those children eventually drop out of high school, and only 2 percent complete a 4-year program at an institution of higher education.

(5) It is estimated that the number of children who are typically identified as poor readers can be significantly reduced through the implementation of early identification and prevention programs that are based on scientifically based reading research.

(6) The report issued by the National Reading Panel in 2000 found that the course of reading instruction that obtains max-

imum benefits for students includes explicit and systematic instruction in phonemic awareness, phonics, vocabulary development, reading fluency, and reading comprehension strategies.

SEC. 1202. PURPOSES.

The purposes of this subpart are as follows:

(1) To provide assistance to States and local educational agencies in establishing reading programs for students in grades kindergarten through 3 that are based on scientifically based reading research, in order to ensure that every student can read at grade level or above not later than the end of the third grade.

(2) To provide assistance to States and local educational agencies in preparing teachers, including special education teachers, through professional development and other support, so the teachers can identify specific reading barriers facing their students and so the teachers have the tools to effectively help their students learn to read.

(3) To provide assistance to States and local educational agencies in selecting and administering rigorous diagnostic reading and screening assessment tools that are valid and reliable, document the effectiveness of this subpart in improving the reading skills of students, and improve classroom instruction.

(4) To provide assistance to States and local educational agencies in selecting or developing effective classroom instructional materials, programs, and strategies to implement scientific research-based methods that have been proven to prevent or remediate reading failure.

(5) To strengthen coordination among schools and early literacy programs in order to improve reading achievement for all children.

PART G—RURAL EDUCATION FLEXIBILITY AND ASSISTANCE

SEC. 1701. SHORT TITLE.

This part may be cited as the “Rural Education Initiative Act”.

SEC. 1702. FINDINGS.

Congress finds the following:

(1) While there are rural education initiatives identified at the State and local level, no Federal education policy focuses on the specific and unique needs of rural school districts and schools.

(2) Small school districts often cannot use Federal grant funds distributed by formula because the formula allocation does not provide enough revenue to carry out the program the grant is intended to fund.

(3) Rural schools often cannot compete for Federal funding distributed by competitive grants because the schools lack the personnel needed to prepare grant applications and the resources to hire specialists in the writing of Federal grant proposals.

(4) A critical problem for rural school districts involves the hiring and retention of qualified administrators and certified teachers (especially in reading, science, and mathematics). As a result, teachers in rural schools are almost twice as likely to provide instruction in three or more subject areas than teachers in urban schools. Rural schools also face other tough challenges, such as shrinking local tax bases, high transportation costs, aging buildings, limited course offerings, and limited resources.

[TITLE II—DWIGHT D. EISENHOWER PROFESSIONAL DEVELOPMENT PRO- GRAM

[SEC. 2001. FINDINGS.

[The Congress finds as follows:

[(1) Reaching the National Education Goals, particularly the third, fourth, and fifth National Education Goals, requires a comprehensive educational reform strategy that involves parents, schools, government, communities, and other public and private organizations at all levels.

[(2) A crucial component of the strategy for achieving such goals is ensuring, through sustained and intensive high-quality professional development, that all teachers will provide challenging learning experiences in the core academic subjects for their students.

[(3) Decisionmaking as to what activities a State or local educational agency should undertake to improve teaching and learning are best made by individuals in the schools closest to the classroom and most knowledgeable about the needs of schools and students.

[(4) The potential positive impact of high-quality professional development is underscored by recent research findings that—

[(A) professional development must be focused on teaching and learning in order to improve the opportunities of all students to achieve higher standards;

[(B) effective professional development focuses on discipline-based knowledge and effective subject-specific pedagogical skills, involves teams of teachers, and, where appropriate, administrators and pupil services personnel, in a school and, through professional networks of teachers, and, where appropriate, teacher educators, administrators, pupil services personnel, and parents, is interactive and collaborative, motivates by its intrinsic content and relationship to practice, builds on experience and learning-by-doing, and becomes incorporated into the everyday life of the school;

[(C) professional development can dramatically improve classroom instruction and learning when teachers, and, where appropriate, administrators, pupil services per-

sonnel, and parents, are partners in the development and implementation of such professional development; and

[(D) new and innovative strategies for teaching to high standards will require time for teachers, outside of the time spent teaching, for instruction, practice, and collegial collaboration.

[(5) Special attention must be given in professional development activities to ensure that education professionals are knowledgeable of, and make use of, strategies for serving populations that historically have lacked access to equal opportunities for advanced learning and career advancement.

[(6) Professional development is often a victim of budget reductions in fiscally difficult times.

[(7) The Federal Government has a vital role in helping States and local educational agencies to make sustained and intensive high-quality professional development in the core academic subjects become an integral part of the elementary and secondary education system.

[(8) Professional development activities must prepare teachers, pupil services personnel, paraprofessionals and other staff in the collaborative skills needed to appropriately teach children with disabilities, in the core academic subjects.

[(9) Parental involvement is an important aspect of school reform and improvement. There is a need for special attention to ensure the effective involvement of parents in the education of their children. Professional development should include methods and strategies to better prepare teachers and, where appropriate, administrators, to enable parents to participate fully and effectively in their children's education.

[(1) helping to ensure that teachers, and, where appropriate, other staff and administrators, have access to sustained and intensive high-quality professional development that is aligned to challenging State content standards and challenging State student performance standards, and to support the development and implementation of sustained and intensive high-quality professional development activities in the core academic subjects; and

[SEC. 2103. NATIONAL TEACHER TRAINING PROJECT.]

【(a) SHORT TITLE; FINDINGS; DEFINITIONS.—

【(1) SHORT TITLE.—This section may be cited as the “National Teacher Training Project Act of 1994”.

【(2) FINDINGS.—The Congress finds that—

【(A) teachers must be major players in educational reform in the United States;

【(B) teachers are isolated from their peers and have virtually no time during the school day to consult with other teachers;

【(C) there is a shortage of sustained, year-round professional development programs for teachers;

【(D) successful teaching methods are not adequately shared among teachers;

【(E) teachers are the best teachers of other teachers because practicing classroom teachers have experience that no outside consultant can match;

【(F) it is important for universities and schools to collaborate on teacher development programs if teaching and learning are to be improved;

【(G) pertinent research is not shared among teachers in a professional setting;

【(H) exemplary teachers should be recognized for their abilities and contributions and encouraged to refine their teaching methods;

【(I) each State should support a nationally based teacher training program, that is modeled after the National Writing Project, for teachers of early childhood education, and for teachers of core academic subjects including teachers of mathematics, science, English, civics and government, foreign languages, and arts;

【(J) the National Writing Project is a nationally recognized and honored nonprofit organization that recognizes there are teachers in every region of the United States who have developed successful methods for teaching writing and that such teachers can be trained and encouraged to train other teachers;

【(K) the National Writing Project is a collaborative university-school program which offers summer and school year inservice teacher training programs and a dissemination network to inform and teach teachers regarding developments in the field of writing;

【(L) each year, over 125,000 teachers voluntarily seek training in National Writing Project intensive summer institutes and workshops and school year inservice programs through one of the 155 sites located within the United States, and in 18 sites located outside of the United States;

【(M) in the 20 years of its existence, over 1,100,000 teachers, administrators, and parents have participated in National Writing Project programs;

【(N) less than \$16 per teacher was the average cost in Federal dollars for all teacher training at writing projects in academic year 1991–1992;

【(O) for every dollar in Federal support, the National Writing Project provides over \$5 in matching funds from States, local universities and schools, and the private sector;

【(P) private foundation resources, although generous in the past concerning National Writing Project programs, are inadequate to fund all of the National Teacher Training Project sites needed, and the future of the program is in jeopardy without secure financial support;

【(Q) the National Writing Project has become a model for programs in other fields, such as science, mathematics, history, literature, foreign languages, and the performing arts, and the development of programs in other fields should continue with the support of Federal funds; and

[(R) each of the 50 States should participate in the National Teacher Training Project by establishing regional teacher training sites in early childhood development, mathematics, science, English, civics and government, foreign languages, and arts to serve all teachers within the State.

[SEC. 2302. DEMONSTRATION PROGRAM AUTHORIZED.

[SEC. 2304. PLAN.

[Each eligible partnership desiring assistance under this part shall develop a plan for the program to be assisted under this part. Such plan shall—

[(1) identify clearly how such plan will support an overall systemic reform strategy giving special attention to the role of teacher preparation for new standards and assessment;

[(2) describe the eligible partnership's instructional objectives and how the professional development activities will support such objectives;

[(3) specify the organizational arrangements and delivery strategies to be used, such as teacher centers, professional development schools, teacher networks, and academic alliances, as well as the curriculum for teachers;

[(4) specify the commitments the local educational agencies, teacher's union, institutions of higher education, or any other entity participating in such partnership are prepared to make, not only to support program activities such as release time, contractual flexibility, support for interns or student teachers if applicable, but also to sustain the central aspects of the plan after the expiration of the grant; and

[(5) describe how the activities described under this part will lead to districtwide policy and budget changes.

[TITLE III—TECHNOLOGY FOR EDUCATION

[SEC. 3101. SHORT TITLE.

[This title may be cited as the “Technology for Education Act of 1994”.

[PART A—TECHNOLOGY FOR EDUCATION OF ALL STUDENTS

[SEC. 3111. FINDINGS.

[The Congress finds that—

[(1) technology can produce far greater opportunities for all students to learn to high standards, promote efficiency and effectiveness in education, and help propel our Nation’s school systems into very immediate and dramatic reform, without which our Nation will not meet the National Education Goals by the target year 2000;

[(2) the use of technology as a tool in the teaching and learning process is essential to the development and maintenance of a technologically literate citizenry and an internationally competitive workforce;

[(3) the acquisition and use of technology in education throughout the United States has been inhibited by—

[(A) the absence of Federal leadership;

[(B) the inability of many State and local educational agencies to invest in and support needed technologies;

[(C) the limited exposure of students and teachers to the power of technology as a cost-effective tool to improve student learning and achievement;

[(D) the lack of appropriate electrical and telephone connections in the classroom; and

[(E) the limited availability of appropriate technology-enhanced curriculum, instruction, professional development, and administrative support resources and services in the educational marketplace;

[(4) policies at the Federal, State, and local levels concerning technology in education must address disparities in the availability of technology to different groups of students, give priority to serving students in greatest need, and recognize that educational telecommunications and technology can address educational equalization concerns and school restructuring needs by providing universal access to high-quality teaching and programs, particularly in urban and rural areas;

[(5) the increasing use of new technologies and telecommunications systems in business has increased the gap between schooling and work force preparation, and underscores the need for technology policies at the Federal, State, tribal, and local levels that address preparation for school-to-work transitions;

[(6) technology can enhance the ongoing professional development of teachers and administrators by providing constant access to updated research in teaching and learning by means of telecommunications, and, through exposure to technology advancements, keep teachers and administrators excited and knowledgeable about unfolding opportunities for the classroom;

[(7) planned and creative uses of technology, combined with teachers adequately trained in the use of technology, can reshape our Nation's traditional method of providing education and empower teachers to create an environment in which students are challenged through rigorous, rich classroom instruction provided at a pace suited to each student's learning style, and in which students have increased opportunities to develop higher order thinking and technical skills;

[(8) schools need new ways of financing the acquisition and maintenance of educational technology;

[(9) the needs for educational technology differ from State to State;

[(10) technology can provide students, parents, teachers, other education professionals, communities, and industry with increased opportunities for partnerships and with increased access to information, instruction, and educational services in schools and other settings, including homes, libraries, pre-school and child-care facilities, adult and family education programs, and postsecondary institutions;

[(11) the Department, consistent with the overall national technology policy established by the President, must assume a vital leadership and coordinating role in developing the national vision and strategy to infuse advanced technology throughout all educational programs;

[(12) Federal support can ease the burden at the State and local levels by enabling the acquisition of advanced technology and initiating the development of teacher training and support as well as new educational products;

[(13) leadership at the Federal level should consider guidelines to ensure that educational technology is accessible to all users with maximum interoperability nationwide;

[(14) the rapidly changing nature of technology requires coordination and flexibility in Federal leadership; and

[(15) technology has the potential to assist and support the improvement of teaching and learning in schools and other settings.

[SEC. 3112. STATEMENT OF PURPOSE.

[The purpose of this part is to support a comprehensive system for the acquisition and use by elementary and secondary schools in the United States of technology and technology-enhanced curricula, instruction, and administrative support resources and services to improve the delivery of educational services. Such system shall include—

[(1) national leadership with respect to the need for, and the provision of, appropriate technology-enhanced curriculum, instruction, and administrative programs to improve learning in the United States, and to promote equal access for all students to educational opportunities in order to achieve the National Education Goals by the year 2000;

[(2) funding mechanisms which will support the development, interconnection, implementation, improvement, and maintenance of an effective educational technology infrastructure, including activities undertaken by State and local educational agencies to promote and provide equipment, training for teachers and school library and media personnel, and technical support;

[(3) support for technical assistance, professional development, information and resource dissemination, in order to help States, local educational agencies, teachers, school library and media personnel, and administrators successfully integrate technology into kindergarten through 12th grade classrooms and library media centers;

[(4) support for the development of educational and instructional programming in core subject areas, which shall address the National Education Goals;

[(5) strengthening and building upon, but not duplicating, existing telecommunications infrastructures dedicated to educational purposes;

[(6) development and evaluation of new and emerging educational technologies, telecommunications networks, and state-of-the-art educational technology products that promote the use of advanced technologies in the classroom and school library media center;

[(7) assessment data regarding state-of-the-art uses of technologies in United States education upon which commercial and noncommercial telecommunications entities, and governments can rely for decisionmaking about the need for, and provision of, appropriate technologies for education in the United States;

[(8) ensuring that uses of educational technology are consistent with the overall national technology policy established by the President, and ensuring that Federal technology-related policies and programs will facilitate the use of technology in education;

[(9) ensuring that activities supported under this part will form the basis for sound State and local decisions about investing in, sustaining, and expanding uses of technology in education;

[(10) establishing working guidelines to ensure maximum interoperability nationwide and ease of access for the emerging technologies so that no school system will be excluded from the technological revolution;

[(11) ensuring that, as technological advances are made, the educational uses of these advances are considered and their applications are developed; and

[(12) encouragement of collaborative relationships among the State agency for higher education, the State library administrative agency, the State telecommunications agency, and the State educational agency, in the area of technology support to strengthen the system of education.

CERTAIN FUNDS FOR SCHOOLS]**

**TITLE III—EDUCATION OF LIMITED
ENGLISH PROFICIENT AND IMMI-
GRANT CHILDREN; INDIAN AND ALAS-
KA NATIVE EDUCATION**

**PART A—EDUCATION OF LIMITED ENGLISH
PROFICIENT AND IMMIGRANT CHILDREN**

**Subpart 1—English Language and Academic
Instructional Programs**

SEC. 3101. SHORT TITLE.

This subpart may be cited as the “English Language Proficiency and Academic Achievement Act”.

SEC. 3102. FINDINGS AND PURPOSES.

(a) *FINDINGS.*—*The Congress finds as follows:*

(1) *English is the common language of the United States and every citizen and other person residing in the United States should have a command of the English language in order to develop to their full potential.*

(2) *Limited English proficient children, including recent immigrant children, must overcome a number of challenges in receiving an education in order to participate fully in American society, including—*

(A) segregated educational programs;

(B) disproportionate and improper placement in special education and other special programs due to the use of inappropriate evaluation procedures;

(C) the limited English proficiency of their parents, which hinders the parents’ ability to fully participate in the education of their children; and

(D) a need for additional teachers and other staff who are professionally trained and qualified to serve such children.

(3) *States and local educational agencies need assistance in developing the capacity to provide programs of instruction that offer and provide an equal educational opportunity to children who need special assistance because English is not their dominant language.*

(4) *Since 1979, the number of limited English proficient children attending school in the United States has more than doubled to greater than 4,000,000, and demographic trends indicate the population of limited English proficient children will continue to increase.*

(5) *Native Americans, including native residents of the outlying areas, and Native American languages (as such terms are defined in section 103 of the Native American Languages Act) have a unique status under Federal law that requires special policies within the broad purposes of this part to serve the edu-*

cational needs of language minority students in the United States.

(6) Research, evaluation, and data collection capabilities in the field of instruction for limited English proficient children need to be strengthened so that educators and other staff teaching limited English proficient children in the classroom can better identify and promote programs, program implementation strategies, and instructional practices that result in the effective education of limited English proficient children.

(7) The Federal Government has a special and continuing obligation to ensure that States and local educational agencies provide children of limited English proficiency the same educational opportunities afforded other children.

(b) PURPOSES.—The purposes of this part are—

(1) to help ensure that children who are limited English proficient, including recent immigrant children, attain English proficiency, develop high levels of academic attainment in English, and meet the same challenging State academic content standards and challenging State student academic achievement standards expected of all children;

(2) to develop high-quality programs designed to assist local educational agencies in teaching limited English proficient children;

(3) to assist local educational agencies to develop and enhance their capacity to provide high-quality instructional programs designed to prepare limited English proficient students, including recent immigrant students, to enter all-English instructional settings within 3 years; and

(4) to provide State educational agencies and local educational agencies with the flexibility to implement instructional programs, tied to scientifically based reading research and sound research and theory on teaching limited English proficient children, that the agencies believe to be the most effective for teaching English.

SEC. 3103. PARENTAL NOTIFICATION AND CONSENT FOR ENGLISH LANGUAGE INSTRUCTION.

(a) NOTIFICATION.—If a local educational agency uses funds under this subpart to provide English language instruction to limited English proficient children, the agency shall inform a parent or the parents of a child participating in an English language instruction program for limited English proficient children assisted under this subpart of—

(1) the reasons for the identification of the child as being in need of English language instruction;

(2) the child's level of English proficiency, how such level was assessed, and the status of the child's academic achievement;

(3) how the English language instruction program will specifically help the child acquire English and meet age-appropriate standards for grade promotion and graduation;

(4) what the specific exit requirements are for the program;

(5) the expected rate of transition from the program into a classroom that is not tailored for limited English proficient children; and

(6) *the expected rate of graduation from high school for the program if funds under this subpart are used for children in secondary schools.*

(b) *CONSENT.—*

(1) *AGENCY REQUIREMENTS.—*

(A) *INFORMED CONSENT.—For a child who has been identified as limited English proficient prior to the beginning of the school year, each local educational agency that receives funds under this subpart shall make a reasonable and substantial effort to obtain informed parental consent prior to the placement of a child in an English language instruction program for limited English proficient children funded under this subpart, if the program does not include classes which exclusively or almost exclusively use the English language in instruction.*

(B) *WRITTEN CONSENT NOT OBTAINED.—*

(i) *IN GENERAL.—If written consent is not obtained, the local educational agency shall maintain a written record that includes the date and the manner in which such informed consent was sought, including the specific efforts made to obtain such consent.*

(ii) *PROOF OF EFFORT.—Notice, in an understandable form, of specific efforts made to obtain written consent and a copy of the written record described in clause (i) shall be mailed or delivered in writing to a parent or the parents of a child prior to placing the child in a program described in subparagraph (A), and shall include a final request for parental consent for such services. After such notice has been mailed or delivered in writing, the local educational agency shall provide appropriate educational services.*

(iii) *SPECIAL RULE APPLICABLE DURING SCHOOL YEAR.—For those children who have not been identified as limited English proficient prior to the beginning of the school year, the local educational agency shall make a reasonable and substantial effort to obtain parental consent under this clause. For such children, the agency shall document, in writing, its specific efforts to obtain such consent prior to placing the child in a program described in subparagraph (A). After such documentation has been made, the local educational agency shall provide appropriate educational services to such child. The proof of documentation shall be mailed or delivered in writing to a parent or the parents of the child in a timely manner and shall include information on how to have their child immediately removed from the program upon their request. Nothing in this clause shall be construed as exempting a local educational agency from complying with the notification requirements of subsection (a) and the consent requirements of this paragraph.*

(2) *PARENTAL RIGHTS.—A parent or the parents of a child participating in an English language instruction program for limited English proficient children assisted under this subpart—*

(A) shall select among methods of instruction, if more than one method is offered in the program; and

(B) shall have the right to have their child immediately removed from the program upon their request.

(c) **RECEIPT OF INFORMATION.**—A parent or the parents of a child identified for participation in an English language instruction program for limited English proficient children assisted under this subpart shall receive, in a manner and form understandable to the parent or parents, the information required by this subsection. At a minimum, the parent or parents shall receive—

(1) timely information about English language instruction programs for limited English proficient children assisted under this part;

(2) if a parent or the parents of a participating child so desire, notice of opportunities for regular meetings for the purpose of formulating and responding to recommendations from the parent or parents; and

(d) **BASIS FOR ADMISSION OR EXCLUSION.**—Students shall not be admitted to, or excluded from, any federally assisted education program on the basis of a surname or language-minority status.

SEC. 3104. TESTING OF LIMITED ENGLISH PROFICIENT CHILDREN.

(a) **IN GENERAL.**—Assessments of limited English proficient children participating in programs funded under this subpart, to the extent practicable, shall be in the language and form most likely to yield accurate and reliable information on what such students know and can do in content areas.

(b) **SPECIAL RULE.**—Notwithstanding subsection (a), in the case of an assessment of reading or language arts of any student who has attended school in the United States (excluding Puerto Rico) for 3 or more consecutive school years, the assessment shall be in the form of a test written in English, except that, if the entity administering the assessment determines, on a case-by-case individual basis, that assessments in another language or form would likely yield more accurate and reliable information on what such student knows and can do, the entity may assess such student in such language or form for 1 additional year.

SEC. 3105. FORMULA GRANTS TO STATES.

(a) **IN GENERAL.**—In the case of each State that in accordance with section 3107 submits to the Secretary an application for a fiscal year, the Secretary shall make a grant for the year to the State for the purposes specified in subsection (b). (B) *REALLOTMENT.*—

(i) *IN GENERAL.*—If any State described in subparagraph (A) does not submit to the Secretary an application for a fiscal year, or submits an application (or any modification to an application) that the Secretary, after reasonable notice and opportunity for a hearing, determines does not satisfy the requirements of this subpart, the Secretary—

(1) *IN GENERAL.*—(A) For each fiscal year, in order to provide such information as is necessary to carry out the responsibility of the Secretary to provide technical assistance under this chapter, the Secretary shall conduct a monitoring and evaluation review of a sampling of the recipients of grants under this chapter. The sampling conducted under this subparagraph shall take into account the size of the local educational agency and the geographic location of such agency.

(B) A local educational agency may not be held liable to the United States or be subject to any penalty, by reason of the findings of an audit that relates to the date of completion, or the date of submission, of any forms used to establish, before April 28, 1988, the eligibility of a child for entitlement under the Indian Elementary and Secondary School Assistance Act.

(2) A count of the number of students for whom the school has eligibility forms that comply with this section.

(h) **TIMING OF CHILD COUNTS.**—For purposes of determining the number of children to be counted in calculating the amount of a local educational agency's grant under this chapter (other than in the case described in subsection (g)(1)), the local educational agency shall—

(2) determine that each such child was enrolled, and receiving a free public education, in a school of the agency on that date or during that period, as the case may be.

SEC. 3218. PAYMENTS.

(a) **IN GENERAL.**—Subject to subsections (b) and (c), the Secretary shall pay to each local educational agency that submits an application that is approved by the Secretary under this chapter the amount determined under section 3213. (b) **PAYMENTS TAKEN INTO ACCOUNT BY THE STATE.**—The Secretary may not make a grant under this chapter to a local educational agency for a fiscal year if, for such fiscal year, the State in which the local educational agency is located takes into consideration payments made under this chapter in determining the eligibility of the local educational agency for State aid, or the amount of the State aid, with respect to the free public education of children during such fiscal year or the preceding fiscal year.

(c) **REDUCTION OF PAYMENT FOR FAILURE TO MAINTAIN FISCAL EFFORT.**—

(1) **IN GENERAL.**—The Secretary may not pay a local educational agency the full amount of a grant award determined under section 3213 for any fiscal year unless the State educational agency notifies the Secretary, and the Secretary determines that, with respect to the provision of free public education by the local educational agency for the preceding fiscal year, the combined fiscal effort of the local educational agency and the State, computed on either a per student or aggregate expenditure basis, was not less than 90 percent of the amount of the combined fiscal effort, computed on the same basis, for the second preceding fiscal year.

the amount of expenditures that would have been required to comply with paragraph (1).

(3) **WAIVER.**—(A) *The Secretary may waive the requirement of paragraph (1), for not more than 1 year at a time, if the Secretary determines that the failure to comply with such requirement is due to exceptional or uncontrollable circumstances, such as a natural disaster or a precipitous and unforeseen decline in the agency's financial resources.*

(B) *The Secretary shall not use the reduced amount of such agency's expenditures for the fiscal year preceding the fiscal year for which a waiver is granted to determine compliance with paragraph (1) for any succeeding fiscal year, but shall use the amount of expenditures that would have been required to comply with paragraph (1) in the absence of the waiver.*

(d) **REALLOCATIONS.**—*The Secretary may reallocate, in a manner that the Secretary determines will best carry out the purpose of this chapter, any amounts that—*

Subpart 2—Alaska Native Education

SEC. 3301. SHORT TITLE.

This subpart may be cited as the “Alaska Native Educational Equity, Support, and Assistance Act”.

SEC. 3302. FINDINGS.

The Congress finds and declares:

(1) *The attainment of educational success is critical to the betterment of the conditions, long-term well-being and preservation of the culture of Alaska Natives.*

(2) *It is the policy of the Federal Government to encourage the maximum participation by Alaska Natives in the planning and the management of Alaska Native education programs.*

(3) *Alaska Native children enter and exit school with serious educational handicaps.*

(4) *The educational achievement of Alaska Native children is far below national norms. In addition to low Native performance on standardized tests, Native student dropout rates are high, and Natives are significantly underrepresented among holders of baccalaureate degrees in the State of Alaska. As a result, Native students are being denied their opportunity to become full participants in society by grade school and high school educations that are condemning an entire generation to an underclass status and a life of limited choices.*

(5) *The programs authorized herein, combined with expanded Head Start, infant learning and early childhood education programs, and parent education programs are essential if educational handicaps are to be overcome.*

(6) *The sheer magnitude of the geographic barriers to be overcome in delivering educational services in rural and village Alaska should be addressed through the development and implementation of innovative, model programs in a variety of areas.*

(7) *Congress finds that Native children should be afforded the opportunity to begin their formal education on a par with their non-Native peers. The Federal Government should lend support to efforts developed by and undertaken within the Alaska Native community to improve educational opportunity for all students.*

SEC. 3303. PURPOSE.

It is the purpose of this subpart to—

- (1) recognize the unique educational needs of Alaska Natives;*
- (2) authorize the development of supplemental educational programs to benefit Alaska Natives;*
- (3) supplement existing programs and authorities in the area of education to further the purposes of this subpart; and*
- (4) provide direction and guidance to appropriate Federal, State and local agencies to focus resources, including resources made available under this subpart, on meeting the educational needs of Alaska Natives.*

SEC. 3304. PROGRAM AUTHORIZED.

(a) GENERAL AUTHORITY.—

(1) PROGRAM AUTHORIZED.—The Secretary is authorized to make grants to, or enter into contracts with, Alaska Native organizations, educational entities with experience in developing or operating Alaska Native programs or programs of instruction conducted in Alaska Native languages, and consortia of such organizations and entities to carry out programs that meet the purpose of this subpart.

(2) PERMISSIBLE ACTIVITIES.—Programs under this subpart may include—

(A) the development and implementation of plans, methods, and strategies to improve the education of Alaska Natives;

(B) the development of curricula and educational programs that address the educational needs of Alaska Native students, including—

(i) curriculum materials that reflect the cultural diversity or the contributions of Alaska Natives;

(ii) instructional programs that make use of Native Alaskan languages; and

(iii) networks that introduce successful programs, materials, and techniques to urban and rural schools;

(C) professional development activities for educators, including—

(i) programs to prepare teachers to address the cultural diversity and unique needs of Alaska Native students;

(ii) in-service programs to improve the ability of teachers to meet the unique needs of Alaska Native students; and

(iii) recruiting and preparing teachers who are Alaska Natives, reside in communities with high concentrations of Alaska Native students, or are likely to succeed as teachers in isolated, rural communities and engage in cross-cultural instruction;

(D) the development and operation of home instruction programs for Alaska Native preschool children, the purpose of which is to ensure the active involvement of parents in their children's education from the earliest ages;

(E) family literacy services;

(F) the development and operation of student enrichment programs in science and mathematics that—

(i) are designed to prepare Alaska Native students from rural areas, who are preparing to enter high school, to excel in science and math; and

(ii) provide appropriate support services to the families of such students that are needed to enable such students to benefit from the program;

(G) research and data collection activities to determine the educational status and needs of Alaska Native children and adults;

(H) other research and evaluation activities related to programs under this subpart; and

(A) programs for parents and their infants, from prenatal through age three;

(B) preschool programs; and

(b) **LIMITATION ON ADMINISTRATIVE COSTS.**—Not more than 5 percent of funds provided to a grantee under this section for any fiscal year may be used for administrative purposes.

(c) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated \$15,000,000 for fiscal year 2002, and such sums as may be necessary for each of the fiscal years 2003 through 2006 to carry out this subpart.

SEC. 3305. ADMINISTRATIVE PROVISIONS.

(a) **APPLICATION REQUIRED.**—No grant may be made under this subpart, nor any contract be entered into under this subpart, unless an application is submitted to the Secretary in such form, in such manner, and containing such information as the Secretary may determine necessary to carry out the provisions of this subpart.

(b) **APPLICATIONS.**—State and local educational agencies may apply for an award under this subpart only as subpart of a consortium involving an Alaska Native organization. This consortium may include other eligible applicants.

(c) **CONSULTATION REQUIRED.**—Each applicant for funding shall provide for ongoing advice from and consultation with representatives of the Alaska Native community.

SEC. 3306. DEFINITIONS.

For purposes of this subpart—

(1) the term “Alaska Native” has the same meaning as the term “Native” has in section 3(b) of the Alaska Native Claims Settlement Act; and

(2) the term “Alaska Native organization” means a federally recognized tribe, consortium of tribes, regional nonprofit Native association, and other Alaska Native organizations that—

(A) has or commits to acquire expertise in the education of Alaska Natives; and

(B) has Alaska Natives in substantive and policy-making positions within the organization.

[TITLE IV—SAFE AND DRUG-FREE SCHOOLS AND COMMUNITIES

[SEC. 4001. SHORT TITLE.

[This title may be cited as the “Safe and Drug-Free Schools and Communities Act of 1994”.

[SEC. 4002. FINDINGS.

[The Congress finds as follows:

【(1) The seventh National Education Goal provides that by the year 2000, all schools in America will be free of drugs and violence and the unauthorized presence of firearms and alcohol, and offer a disciplined environment that is conducive to learning.

【(2) The widespread illegal use of alcohol and other drugs among the Nation’s secondary school students, and increasingly by students in elementary schools as well, constitutes a grave threat to such students’ physical and mental well-being, and significantly impedes the learning process. For example, data show that students who drink tend to receive lower grades and are more likely to miss school because of illness than students who do not drink.

【(3) Our Nation’s schools and communities are increasingly plagued by violence and crime. Approximately 3,000,000 thefts and violent crimes occur in or near our Nation’s schools every year, the equivalent of more than 16,000 incidents per school day.

【(4) Violence that is linked to prejudice and intolerance victimizes entire communities leading to more violence and discrimination.

【(5) The tragic consequences of violence and the illegal use of alcohol and drugs by students are felt not only by students and such students’ families, but by such students’ communities and the Nation, which can ill afford to lose such students’ skills, talents, and vitality.

【(6) While use of illegal drugs is a serious problem among a minority of teenagers, alcohol use is far more widespread. The proportion of high school students using alcohol, though lower than a decade ago, remains unacceptably high. By the 8th grade, 70 percent of youth report having tried alcohol and by the 12th grade, about 88 percent have used alcohol. Alcohol use by young people can and does have adverse consequences for users, their families, communities, schools, and colleges.

【(7) Alcohol and tobacco are widely used by young people. Such use can, and does, have adverse consequences for young people, their families, communities, schools, and colleges. Drug prevention programs for youth that address only controlled

drugs send an erroneous message that alcohol and tobacco do not present significant problems, or that society is willing to overlook their use. To be credible, messages opposing illegal drug use by youth should address alcohol and tobacco as well.

[(8) Every day approximately 3,000 children start smoking. Thirty percent of all secondary school seniors are smokers. Half of all new smokers begin smoking before the age of 14, 90 percent of such smokers begin before the age of 21, and the average age of the first use of smokeless tobacco is under the age of 10. Use of tobacco products has been linked to serious health problems. Drug education and prevention programs that include tobacco have been effective in reducing teenage use of tobacco.

[(9) Drug and violence prevention programs are essential components of a comprehensive strategy to promote school safety and to reduce the demand for and use of drugs throughout the Nation. Schools and local organizations in communities throughout the Nation have a special responsibility to work together to combat the growing epidemic of violence and illegal drug use and should measure the success of their programs against clearly defined goals and objectives.

[(10) Students must take greater responsibility for their own well-being, health, and safety if schools and communities are to achieve the goals of providing a safe, disciplined, and drug-free learning environment.

[SEC. 4003. PURPOSE.]

[The purpose of this title is to support programs to meet the seventh National Education Goal by preventing violence in and around schools and by strengthening programs that prevent the illegal use of alcohol, tobacco, and drugs, involve parents, and are coordinated with related Federal, State, and community efforts and resources, through the provision of Federal assistance to—

[(1) States for grants to local educational agencies and educational service agencies and consortia of such agencies to establish, operate, and improve local programs of school drug and violence prevention, early intervention, rehabilitation referral, and education in elementary and secondary schools (including intermediate and junior high schools);

[(2) States for grants to, and contracts with, community-based organizations and other public and private nonprofit agencies and organizations for programs of drug and violence prevention, early intervention, rehabilitation referral, and education;

[(3) States for development, training, technical assistance, and coordination activities;

[(4) public and private nonprofit organizations to conduct training, demonstrations, and evaluation, and to provide supplementary services for the prevention of drug use and violence among students and youth; and

[(5) institutions of higher education to establish, operate, expand, and improve programs of school drug and violence prevention, education, and rehabilitation referral for students enrolled in colleges and universities.

[SEC. 4004. FUNDING.

[There are authorized to be appropriated—

[(1) \$630,000,000 for fiscal year 1995, and such sums as may be necessary for each of the four succeeding fiscal years, for State grants under subpart 1; and

[(2) \$25,000,000 for fiscal year 1995, and such sums as may be necessary for each of the four succeeding fiscal years, for national programs under subpart 2.

(a) MAINTENANCE OF EFFORT.—

(1) *IN GENERAL.*—Except as provided in paragraph (2), a State is entitled to receive its full allocation of funds under this subpart for any fiscal year only if the Secretary determines that either the combined fiscal effort per student or the aggregate expenditures within the State with respect to the provision of free public education for the fiscal year preceding the fiscal year for which the determination is made was not less than 90 percent of such combined fiscal effort or aggregate expenditures for the fiscal year that is 2 fiscal years before the fiscal year for which the determination is made.

(2) *REDUCTION OF FUNDS.*—The Secretary shall reduce the amount of the allocation of funds under this subpart in any fiscal year in the exact proportion to which the State fails to meet the requirements of paragraph (1) by falling below 90 percent of both the fiscal effort per student and aggregate expenditures (using the measure most favorable to the State), and no such lesser amount shall be used for computing the effort required under paragraph (1) for subsequent years.

(3) *WAIVER.*—The Secretary may waive, for 1 fiscal year only, the requirements of this section if the Secretary determines that such a waiver would be equitable due to exceptional or uncontrollable circumstances such as a natural disaster or a precipitous and unforeseen decline in the financial resources of the State.

(b) *FEDERAL FUNDS SUPPLEMENTARY.*—A State or local educational agency may use and allocate funds received under this subpart only to supplement and, to the extent practical, to increase the level of funds that would, in the absence of Federal funds made available under this subpart, be made available from non-Federal sources, and in no case may such funds be used so as to supplant funds from non-Federal sources.

(2) *OTHER PROVISIONS FOR SERVICES.*—If no program or project is carried out under paragraph (1) in the school district of a local educational agency, the State shall make arrangements, such as through contracts with nonprofit agencies or organizations, under which children in private schools in such district are provided with services and materials to the extent that would have occurred if the local educational agency had received funds under this subpart.

(3) *APPLICATION OF REQUIREMENTS.*—The requirements of this section relating to the participation of children, teachers, and other personnel serving such children shall apply to programs and projects carried out under this subpart by a State or local educational agency, whether directly or through grants to or contracts with other public or private agencies, institutions, or organizations.

(1) STATE PROHIBITION WAIVER.—If by reason of any provision of law a State or local educational agency is prohibited from providing for the participation in programs of children enrolled in private elementary and secondary schools, as required by this section, the Secretary shall waive such requirements and shall arrange for the provision of services to such children through arrangements which shall be subject to the requirements of this section.

(2) FAILURE TO COMPLY.—If the Secretary determines that a State or a local educational agency has substantially failed or is unwilling to provide for the participation on an equitable basis of children enrolled in private elementary and secondary schools as required by this section, the Secretary may waive such requirements and shall arrange for the provision of services to such children through arrangements which shall be subject to the requirements of this section.

(e) WITHHOLDING OF ALLOCATION.—Pending final resolution of any investigation or complaint that could result in a waiver under subsection (d)(1) or (d)(2), the Secretary may withhold from the allocation of the affected State or local educational agency the amount estimated by the Secretary to be necessary to pay the cost of services to be provided by the Secretary under such subsection.

(f) TERM OF DETERMINATIONS.—Any determination by the Secretary under this section shall continue in effect until the Secretary determines that there will no longer be any failure or inability on the part of the State or local educational agency to meet the requirements of subsections (a) and (b).

(g) PAYMENT FROM STATE ALLOTMENT.—When the Secretary arranges for services pursuant to this section, the Secretary shall, after consultation with the appropriate public and private school officials, pay the cost of such services, including the administrative costs of arranging for those services, from the appropriate allotment of the State under this subpart.

(h) REVIEW.—

(1) WRITTEN OBJECTIONS.—The Secretary shall not take any final action under this section until the State and the local educational agency affected by such action have had an opportunity, for not less than 45 days after receiving written notice thereof, to submit written objections and to appear before the Secretary or the Secretary's designee to show cause why that action should not be taken.

(2) COURT ACTION.—If a State or local educational agency is dissatisfied with the Secretary's final action after a proceeding under paragraph (1), such agency may, not later than 60 days after notice of such action, file with the United States court of appeals for the circuit in which such State is located a petition for review of that action. Subpart 3—Gifted and Talented Children

SEC. 4161. SHORT TITLE.

This subpart may be cited as the “Jacob K. Javits Gifted and Talented Students Education Act of 2001”.

SEC. 4162. FINDINGS AND PURPOSE.

(a) *FINDINGS.*—Congress finds the following:

(1) While the families and communities of some gifted and talented students can provide private educational programs with appropriately trained staff to supplement public educational offerings, most gifted and talented students, especially those from inner cities, rural communities, or low-income families, must rely on the services and personnel available in public schools. In order to ensure that there are equal educational opportunities for all gifted and talented students in the United States, the public schools should provide gifted and talented education programs carried out by qualified professionals.

(2) Due to the wide dispersal of students who are gifted and talented and the national interest in a well-educated populace, it is the Federal Government that can most effectively and appropriately conduct scientifically based research and development to ensure that there is a national capacity to educate students who are gifted and talented in the 21st century.

(3) Many State and local educational agencies lack the specialized resources and trained personnel necessary to consistently plan and implement effective programs for the identification of gifted and talented students and for the provision of educational services and programs appropriate for the needs of such students.

(4) Because gifted and talented students are generally more advanced academically, are generally able to learn more quickly, and generally study in more depth and complexity than others their age, they require educational opportunities and experi-

ences that are different from those usually available to other students.

(5) A typical elementary school student who is academically gifted and talented has already mastered 35 to 50 percent of the content to be learned in several subjects in any school year before that year begins. Without an advanced and challenging curriculum, such a student may lose motivation and develop poor study habits that are difficult to break.

(6) Classes in elementary and secondary schools in the United States consist of students with a wide variety of traits, characteristics, and needs. Although most teachers receive some training to meet the needs of students with limited English proficiency, students with disabilities, and students from diverse cultural and racial backgrounds, few receive training to meet the needs of students who are gifted and talented.

(b) **PURPOSE.**—The purpose of this subpart is to initiate a coordinated program of scientifically based research, demonstration projects, innovative strategies, and similar activities designed to build and enhance the ability of elementary and secondary schools nationwide to meet the special educational needs of gifted and talented students.

SEC. 4163. RULE OF CONSTRUCTION.

Nothing in this subpart shall be construed to prohibit a recipient of funds under this subpart from serving gifted and talented students simultaneously with students with similar educational needs, in the same educational settings where appropriate.

SEC. 4164. AUTHORIZED PROGRAMS.

(1) *IN GENERAL.*—The Secretary (after consultation with experts in the field of the education of gifted and talented students) shall establish a National Center for Research and Development in the Education of Gifted and Talented Children and Youth through grants to or contracts with one or more institutions of higher education or State educational agencies, or a combination or consortium of such institutions and agencies and other public or private agencies and organizations, for the purpose of carrying out activities described in paragraph (1) of subsection (b).

(2) *DIRECTOR.*—The National Center established under paragraph (1) shall be headed by a Director. The Secretary may authorize the Director to carry out such functions of the National Center as may be agreed upon through arrangements with institutions of higher education, State or local educational agencies, or other public or private agencies and organizations.

SEC. 4166. GENERAL PROVISIONS.

(a) PARTICIPATION OF PRIVATE SCHOOL CHILDREN AND TEACHERS.—In making grants and entering into contracts under this subpart, the Secretary shall ensure, where appropriate, that provision is made for the equitable participation of students and teachers in private nonprofit elementary and secondary schools, including the participation of teachers and other personnel in professional development programs serving such children.

(1) use a peer review process in reviewing applications under this subpart;

(2) ensure that information on the activities and results of programs and projects funded under this subpart is disseminated to appropriate State and local educational agencies and other appropriate organizations, including nonprofit private organizations; and

(3) evaluate the effectiveness of programs under this subpart in accordance with section 8651, both in terms of the impact on students traditionally served in separate gifted and talented programs and on other students, and submit the results of such evaluation to the Congress not later than 2 years after the date of the enactment of the No Child Left Behind Act of 2001.

SEC. 4167. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out this subpart such sums as may be necessary for each of fiscal years 2002 through 2006.

PART B—PUBLIC CHARTER SCHOOLS

SEC. 4201. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) enhancement of parent and student choices among public schools can assist in promoting comprehensive educational reform and give more students the opportunity to meet challenging State academic content standards and State student academic achievement standards, if sufficiently diverse and high-quality choices, and genuine opportunities to take advantage of such choices, are available to all students;

(2) useful examples of such choices can come from States and communities that experiment with methods of offering teachers and other educators, parents, and other members of the public the opportunity to design and implement new public schools and to transform existing public schools;

(3) charter schools are a mechanism for testing a variety of educational approaches and should, therefore, be exempted from restrictive rules and regulations if the leadership of such schools commits to attaining specific and ambitious educational results for educationally disadvantaged students consistent with challenging State academic content standards and State student academic achievement standards for all students;

(4) charter schools can embody the necessary mixture of enhanced choice, exemption from restrictive regulations, and a focus on learning gains;

(5) charter schools, including charter schools that are schools-within-schools, can help reduce school size, and this reduction can have a significant effect on student achievement;

(6) the Federal Government should test, evaluate, and disseminate information on a variety of charter school models in order to help demonstrate the benefits of this promising educational reform; and

(7) there is a strong documented need for cash-flow assistance to charter schools that are starting up, because State and local operating revenue streams are not immediately available.

(b) PURPOSE.—It is the purpose of this part to increase national understanding of the charter schools model by—

(1) providing financial assistance for the planning, program design and initial implementation of charter schools;

(2) evaluating the effects of such schools, including the effects on students, student achievement, staff, and parents; and

(3) expanding the number of high-quality charter schools available to students across the Nation.

(3) *PRIORITY CRITERIA.*—The criteria referred to in paragraph (1) are the following:

(A) The State has demonstrated progress, in increasing the number of high quality charter schools that are held accountable in the terms of the schools' charters for meeting clear and measurable objectives for the educational progress of the students attending the schools, in the period prior to the period for which a State educational agency or eligible applicant applies for a grant under this part.

(B) The State—

(i) provides for one authorized public chartering agency that is not a local educational agency, such as a State chartering board, for each individual or entity seeking to operate a charter school pursuant to such State law; or

(ii) in the case of a State in which local educational agencies are the only authorized public chartering agencies, allows for an appeals process for the denial of an application for a charter school.

(C) The State ensures that each charter school has a high degree of autonomy over the charter school's budgets and expenditures.

**PART D—ELEMENTARY AND SECONDARY
SCHOOL COUNSELING PROGRAMS**

SEC. 5401. ELEMENTARY AND SECONDARY SCHOOL COUNSELING PROGRAMS.

(a) *FINDINGS.*—Congress finds as follows:

(1) *The Surgeon General reported in January 2001 that 1 in 10 children suffer from mental illnesses severe enough to impair development and fewer than 1 in 5 children get treatment for mental illnesses.*

(2) *The Surgeon General reported that the burden of suffering by children with mental health needs and their families has created a health crisis in this country. Growing numbers of children are suffering needlessly because their emotional, behavioral, and developmental needs are not being met by the very institutions and systems that were created to take care of them.*

(3) *As a result of the concern about the failure of the healthcare system to reach children and adolescents with mental illnesses, there is currently great interest in developing new models for the delivery of mental health and counseling services that can reach underserved groups efficiently.*

(4) *Schools are a sensible point of intervention because of their central position in many children's lives and development, especially when families are unable to assume a leading role.*

(5) *School-based mental health and counseling services allow for the identification of children in need of treatment much earlier in their development.*

(6) *Establishing mental health and counseling services in schools provides access to underserved youth with or at risk of emotional or behavioral problems.*

(7) *The Surgeon General's 2000 report on youth violence concludes that effective treatment can divert a significant proportion of delinquent and violent youths from future violence and crime.*

(8) *Mental health and counseling services can play an important role in violence prevention on all levels, including preventing problem behaviors from developing; identifying and serving specific, at-risk populations; and reducing the deleterious effects of violence on victims and witnesses.*

(9) *An evaluation of the model program for the elementary school counseling demonstration program established pursuant to this section prior to the date of enactment of the Elementary and Secondary Counseling Improvement Act of 2001 found that the number of referrals to the principal's office decreased by nearly half, the use of force, weapons, and threatening of others also decreased, school suspensions were reduced, and students felt safer.*

(10) *The report produced by the Institute of Medicine, "Schools and Health: Our Nation's Investment", recommended*

a student-to-school counselor ratio of 250:1, student-to-school psychologist ratio of 1000:1, and a student-to-school social worker ratio of 800:1. The United States average student-to-counselor ratio is 551:1. Ratios for school psychologists and school social workers also exceed the recommended levels.

by school counselors, school psychologists, school social workers, and child and adolescent psychiatrists;

(8) involve parents of participating students in the design, implementation, and evaluation of a counseling program;

(9) involve community groups, social service agencies, or other public or private entities in collaborative efforts to enhance the program;

(10) evaluate annually the effectiveness and outcomes of the counseling services and activities assisted under this section;

[SEC. 6001. FINDINGS AND STATEMENT OF PURPOSE.

[(a) FINDINGS.—The Congress finds that chapter 2 of title I of this Act (as such chapter was in effect on the day preceding the date of enactment of the Improving America's Schools Act of 1994) has been successful in achieving the goals of increasing local flexibility, reducing administrative burden, providing services for private school students, encouraging innovation, and contributing to the improvement of elementary and secondary educational programs.

[(b) STATEMENT OF PURPOSE.—It is the purpose of programs under this title—

[(1) to support local education reform efforts which are consistent with and support statewide reform efforts under Goals 2000: Educate America Act;

[(2) to support State and local efforts to accomplish the National Education Goals;

[(3) to provide funding to enable State and local educational agencies to implement promising educational reform programs;

[(4) to provide a continuing source of innovation, and educational improvement, including support for library services and instructional and media materials; and

[(5) to meet the special educational needs of at risk and high cost students.

[(c) STATE AND LOCAL RESPONSIBILITY.—The basic responsibility for the administration of funds made available under this title is within the State educational agencies, but it is the intent of Congress that the responsibility be carried out with a minimum of paperwork and that the responsibility for the design and implementation of programs assisted under this title will be mainly that of local educational agencies, school superintendents and principals, and classroom teachers and supporting personnel, because such agencies and individuals have the most direct contact with students and are most likely to be able to design programs to meet the educational needs of students in their own school districts.

[SEC. 6002. AUTHORIZATION OF APPROPRIATIONS; DURATION OF ASSISTANCE.

[(a) AUTHORIZATION.—To carry out the purposes of this title, there are authorized to be appropriated \$370,000,000 for fiscal year 1995 and such sums as may be necessary for each of the four succeeding fiscal years.

[(b) DURATION OF ASSISTANCE.—During the period beginning October 1, 1994, and ending September 30, 1999, the Secretary shall, in accordance with the provisions of this title, make payments to State educational agencies for the purpose of this title.

[SEC. 6003. DEFINITION.

[For the purposes of this title the term “effective schools programs” means school-based programs that may encompass pre-school through secondary school levels and that have the objectives of (1) promoting school-level planning, instructional improvement, and staff development, (2) increasing the academic achievement levels of all children and particularly educationally disadvantaged children, and (3) achieving as ongoing conditions in the school the following factors identified through effective schools research as distinguishing effective from ineffective schools:

[(A) Strong and effective administrative and instructional leadership that creates consensus on instructional goals and organizational capacity for instructional problem solving.

[(B) Emphasis on the acquisition of basic and higher order skills.

[(C) A safe and orderly school environment that allows teachers and pupils to focus their energies on academic achievement.

[(D) A climate of expectation that virtually all children can learn under appropriate conditions.

[(E) Continuous assessment of students and programs to evaluate the effects of instruction.

[PART A—STATE AND LOCAL PROGRAMS

[SEC. 6101. ALLOTMENT TO STATES.

[(b) ALLOTMENT.—From the remainder of such sums, the Secretary shall allot to each State an amount which bears the same ratio to the amount of such remainder as the school-age population of the State bears to the school-age population of all States, except that no State shall receive less than an amount equal to one-half of one percent of such remainder.

[(c) DEFINITIONS.—For purposes of this part:

[(1) The term “school-age population” means the population aged 5 through 17.

[(2) The term “States” includes the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico.

[SEC. 6102. ALLOCATION TO LOCAL EDUCATIONAL AGENCIES.

[(a) DISTRIBUTION RULE.—From the sums made available each year to carry out this title, the State educational agency shall dis-

tribute not less than 85 percent to local educational agencies within such State according to the relative enrollments in public and private, nonprofit schools within the school districts of such agencies, adjusted, in accordance with criteria approved by the Secretary, to provide higher per pupil allocations to local educational agencies which have the greatest numbers or percentages of children whose education imposes a higher than average cost per child, such as—

- [(1) children living in areas with high concentrations of low-income families;
- [(2) children from low-income families; and
- [(3) children living in sparsely populated areas.

[(b) CALCULATION OF ENROLLMENTS.—

[(1) IN GENERAL.—The calculation of relative enrollments under subsection (a) shall be on the basis of the total of—

[(A) the number of children enrolled in public schools; and

[(B) the number of children enrolled in private nonprofit schools that desire that their children participate in programs or projects assisted under this title, for the fiscal year preceding the fiscal year for which the determination is made.

[(2) CONSTRUCTION.—Nothing in this subsection shall diminish the responsibility of local educational agencies to contact, on an annual basis, appropriate officials from private nonprofit schools within the areas served by such agencies in order to determine whether such schools desire that their children participate in programs assisted under this part.

[(2) REDUCTION OF FUNDS.—]The Secretary shall reduce the amount of the allocation of funds under this part in any fiscal year in the exact proportion to which the State fails to meet the requirements of paragraph (1) by falling below 90 percent of both the fiscal effort per student and aggregate expenditures (using the measure most favorable to the State), and no such lesser amount shall be used for computing the effort required under paragraph (1) for subsequent years.

[(3) WAIVERS.—]The Secretary may waive, for one fiscal year only, the requirements of this section if the Secretary determines that such a waiver would be equitable due to exceptional or uncontrollable circumstances such as a natural disaster or a precipitous and unforeseen decline in the financial resources of the State.

[(b) FEDERAL FUNDS SUPPLEMENTARY.—]A State or local educational agency may use and allocate funds received under this part only so as to supplement and, to the extent practical, increase the level of funds that would, in the absence of Federal funds made available under this part, be made available from non-Federal sources, and in no case may such funds be used so as to supplant funds from non-Federal sources.

[(2) COURT ACTION.—If a State or local educational agency is dissatisfied with the Secretary's final action after a proceeding under paragraph (1), such agency may, not later than 60 days after notice of such action, file with the United States court of appeals for the circuit in which such State is located a petition for review of that action. A copy of the petition shall be transmitted by the clerk of the court to the Secretary. The Secretary thereupon shall file in the court the record of the proceedings on which the Secretary based this action, as provided in section 2112 of title 28, United States Code.

Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.]

[(4) COURT REVIEW.—Upon the filing of such petition, the court shall have jurisdiction to affirm the action of the Secretary or to set such action aside, in whole or in part. [TITLE VII—BILINGUAL EDUCATION, LANGUAGE ENHANCEMENT, AND LAN- GUAGE ACQUISITION PROGRAMS

[PART A—BILINGUAL EDUCATION

[SEC. 7101. SHORT TITLE.

[This part may be cited as the “Bilingual Education Act”.

[SEC. 7102. FINDINGS, POLICY, AND PURPOSE.

[(a) FINDINGS.—The Congress finds that—

[(1) language-minority Americans speak virtually all world languages plus many that are indigenous to the United States;

[(2) there are large and growing numbers of children and youth of limited-English proficiency, many of whom have a cultural heritage that differs from that of their English-proficient peers;

[(3) the presence of language-minority Americans is related in part to Federal immigration policies;

[(4) many language-minority Americans are limited in their English proficiency, and many have limited education and income;

[(5) limited English proficient children and youth face a number of challenges in receiving an education that will enable such children and youth to participate fully in American society, including—

[(A) segregated education programs;

[(B) disproportionate and improper placement in special education and other special programs due to the use of inappropriate evaluation procedures;

[(C) the limited-English proficiency of their own parents, which hinders the parents’ ability to fully participate in the education of their children; and

[(D) a shortage of teachers and other staff who are professionally trained and qualified to serve such children and youth;

[(6) Native Americans and Native American languages (as such terms are defined in section 103 of the Native American Languages Act), including native residents of the outlying areas, have a unique status under Federal law that requires special policies within the broad purposes of this Act to serve the education needs of language minority students in the United States;

[(7) institutions of higher education can assist in preparing teachers, administrators and other school personnel to understand and build upon the educational strengths and needs of language-minority and culturally diverse student enrollments;

[(8) it is the purpose of this title to help ensure that limited English proficient students master English and develop high levels of academic attainment in content areas;

[(9) quality bilingual education programs enable children and youth to learn English and meet high academic standards including proficiency in more than one language;

[(10) as the world becomes increasingly interdependent and as international communication becomes a daily occurrence in government, business, commerce, and family life, multilingual skills constitute an important national resource which deserves protection and development;

[(11) educational technology has the potential for improving the education of language-minority and limited English proficient students and their families, and the Federal Government should foster this development;

[(12) parent and community participation in bilingual education programs contributes to program effectiveness;

[(13) research, evaluation, and data-collection capabilities in the field of bilingual education need to be strengthened so that educators and other staff can better identify and promote those programs, program implementation strategies, and instructional practices that result in effective education of limited English proficient children;

[(14) the use of a child or youth's native language and culture in classroom instruction can—

[(A) promote self-esteem and contribute to academic achievement and learning English by limited English proficient children and youth;

[(B) benefit English-proficient children and youth who also participate in such programs; and

[(C) develop our Nation's national language resources, thus promoting our Nation's competitiveness in the global economy;

[(15) the Federal Government, as exemplified by title VI of the Civil Rights Act of 1964 and section 204(f) of the Equal Education Opportunities Act of 1974, has a special and continuing obligation to ensure that States and local school districts take appropriate action to provide equal educational opportunities to children and youth of limited English proficiency; and

[(16) the Federal Government also, as exemplified by the Federal Government's efforts under this title, has a special and continuing obligation to assist States and local school districts in developing the capacity to provide programs of instruction that offer limited English proficient children and youth an equal educational opportunity.

[(b) POLICY.—The Congress declares it to be the policy of the United States, in order to ensure equal educational opportunity for all children and youth and to promote educational excellence, to assist State and local educational agencies, institutions of higher education and community-based organizations to build their capacity to establish, implement, and sustain programs of instruction for children and youth of limited English proficiency.

[(c) PURPOSE.—The purpose of this part is to educate limited English proficient children and youth to meet the same rigorous standards for academic performance expected of all children and youth, including meeting challenging State content standards and challenging State student performance standards in academic areas by—

[(1) developing systemic improvement and reform of educational programs serving limited English proficient students

[PART B—FOREIGN LANGUAGE ASSISTANCE PROGRAM

[SEC. 7201. SHORT TITLE.

This part may be cited as the “Foreign Language Assistance Act of 1994”.

[SEC. 7202. FINDINGS.

The Congress finds as follows:

- [(1) Foreign language proficiency is crucial to our Nation's economic competitiveness and national security. Significant improvement in the quantity and quality of foreign language instruction offered in our Nation's elementary and secondary schools is necessary.
- [(2) All Americans need a global perspective. To understand the world around us, we must acquaint ourselves with the languages, cultures, and history of other nations.
- [(3) Proficiency in two or more languages should be promoted for all American students. Multilingualism enhances cognitive and social growth, competitiveness in the global marketplace, national security, and understanding of diverse people and cultures.
- [(4) The United States lags behind other developed countries in offering foreign language study to elementary and secondary school students.

[(5) Four out of five new jobs in the United States are created from foreign trade.

[(6) The optimum time to begin learning a second language is in elementary school, when children have the ability to learn and excel in several foreign language acquisition skills, including pronunciation, and when children are most open to appreciating and valuing a culture other than their own.

[(7) Foreign language study can increase childrens' capacity for critical and creative thinking skills and children who study a second language show greater cognitive development in areas such as mental flexibility, creativity, tolerance, and higher order thinking skills.

[(8) Children who have studied a foreign language in elementary school achieve expected gains and score higher on standardized tests of reading, language arts, and mathematics than children who have not studied a foreign language.

[SEC. 7203. PROGRAM AUTHORIZED.

[(a) PROGRAM AUTHORITY.—

[(1) IN GENERAL.—The Secretary shall make grants, on a competitive basis, to State educational agencies or local educational agencies to pay the Federal share of the cost of innovative model programs providing for the establishment, improvement or expansion of foreign language study for elementary and secondary school students.

[(2) DURATION.—Each grant under paragraph (1) shall be awarded for a period of three years.

[(b) REQUIREMENTS.—

[(1) GRANTS TO STATE EDUCATIONAL AGENCIES.—In awarding a grant under subsection (a) to a State educational agency, the Secretary shall support programs that promote systemic approaches to improving foreign language learning in the State.

[(2) GRANTS TO LOCAL EDUCATIONAL AGENCIES.—In awarding a grant under subsection (a) to a local educational agency, the Secretary shall support programs that—

[(A) show the promise of being continued beyond the grant period;

[(B) demonstrate approaches that can be disseminated and duplicated in other local educational agencies; and

[(C) may include a professional development component.

[(c) FEDERAL SHARE.—

[(1) IN GENERAL.—The Federal share for each fiscal year shall be 50 percent.

[(2) WAIVER.—The Secretary may waive the requirement of paragraph (1) for any local educational agency which the Secretary determines does not have adequate resources to pay the non-Federal share of the cost of the activities assisted under this part.

[(3) SPECIAL RULE.—Not less than three-fourths of the funds appropriated under section 7206 shall be used for the expansion of foreign language learning in the elementary grades.

[(4) RESERVATION.—The Secretary may reserve not more than 5 percent of funds appropriated under section 7206 to evaluate the efficacy of programs under this part.

[SEC. 7204. APPLICATIONS.

[(a) IN GENERAL.—Any State educational agency or local educational agency desiring a grant under this part shall submit an application to the Secretary at such time, in such form, and containing such information and assurances as the Secretary may require.

[(b) SPECIAL CONSIDERATION.—The Secretary shall give special consideration to applications describing programs that—

[(1) include intensive summer foreign language programs for professional development;

[(2) link non-native English speakers in the community with the schools in order to promote two-way language learning; or

[SEC. 7205. ELEMENTARY SCHOOL FOREIGN LANGUAGE INCENTIVE PROGRAM.

[(a) INCENTIVE PAYMENTS.—From amounts appropriated under section 7206 the Secretary shall make an incentive payment for each fiscal year to each public elementary school that provides to students attending such school a program designed to lead to communicative competency in a foreign language.

[(b) AMOUNT.—The Secretary shall determine the amount of the incentive payment under subsection (a) for each public elementary school for each fiscal year on the basis of the number of students participating in a program described in such subsection at such school for such year compared to the total number of such students at all such schools in the United States for such year.

[(c) REQUIREMENT.—The Secretary shall consider a program to be designed to lead to communicative competency in a foreign language if such program is comparable to a program that provides not less than 45 minutes of instruction in a foreign language not less than four days per week throughout an academic year.

[SEC. 7206. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated \$35,000,000 for the fiscal year 1995, and such sums as may be necessary for each of the four succeeding fiscal years, to carry out this part, of which not more than \$20,000,000 may be used in each fiscal year to carry out section 7205.

[PART C—EMERGENCY IMMIGRANT EDUCATION PROGRAM

[SEC. 7301. FINDINGS AND PURPOSE.

[(a) FINDINGS.—The Congress finds that—

[(1) the education of our Nation's children and youth is one of the most sacred government responsibilities;

[(2) local educational agencies have struggled to fund adequately education services;

[(3) in the case of *Plyler v. Doe*, the Supreme Court held that States have a responsibility under the Equal Protection Clause of the Constitution to educate all children, regardless of immigration status; and

(4) immigration policy is solely a responsibility of the Federal Government.

[(b) PURPOSE.—The purpose of this part is to assist eligible local educational agencies that experience unexpectedly large increases in their student population due to immigration to—

[(1) provide high-quality instruction to immigrant children and youth; and

[(2) help such children and youth—

[(A) with their transition into American society; and

[(B) meet the same challenging State performance standards expected of all children and youth.

[SEC. 7302. STATE ADMINISTRATIVE COSTS.

[For any fiscal year, a State educational agency may reserve not more than 1.5 percent of the amount allocated to such agency under section 7304 to pay the costs of performing such agency's administrative functions under this part.

[SEC. 7303. WITHHOLDING.

[Whenever the Secretary, after providing reasonable notice and opportunity for a hearing to any State educational agency, finds that there is a failure to meet the requirement of any provision of this part, the Secretary shall notify that agency that further payments will not be made to the agency under this part, or in the discretion of the Secretary, that the State educational agency shall not make further payments under this part to specified local educational agencies whose actions cause or are involved in such failure until the Secretary is satisfied that there is no longer any such failure to comply. Until the Secretary is so satisfied, no further payments shall be made to the State educational agency under this part, or payments by the State educational agency under this part shall be limited to local educational agencies whose actions did not cause or were not involved in the failure, as the case may be.

[SEC. 7304. STATE ALLOCATIONS.

[(a) PAYMENTS.—The Secretary shall, in accordance with the provisions of this section, make payments to State educational agencies for each of the fiscal years 1995 through 1999 for the purpose set forth in section 7301(b).

[(b) ALLOCATIONS.—

[(1) IN GENERAL.—Except as provided in subsections (c) and (d), of the amount appropriated for each fiscal year for this part, each State participating in the program assisted under this part shall receive an allocation equal to the proportion of such State's number of immigrant children and youth who are enrolled in public elementary or secondary schools under the jurisdiction of each local educational agency described in paragraph (2) within such State, and in nonpublic elementary or secondary schools within the district served by each such local educational agency, relative to the total number of immigrant children and youth so enrolled in all the States participating in the program assisted under this part.

[(2) ELIGIBLE LOCAL EDUCATIONAL AGENCIES.—The local educational agencies referred to in paragraph (1) are those local educational agencies in which the sum of the number of immigrant children and youth who are enrolled in public elementary or secondary schools under the jurisdiction of such agencies, and in nonpublic elementary or secondary schools within the districts served by such agencies, during the fiscal year for

which the payments are to be made under this part, is equal to—

[(A) at least 500; or

[(B) at least 3 percent of the total number of students enrolled in such public or nonpublic schools during such fiscal year,

whichever number is less.

[(c) DETERMINATIONS OF NUMBER OF CHILDREN AND YOUTH.—

[(1) IN GENERAL.—Determinations by the Secretary under this section for any period with respect to the number of immigrant children and youth shall be made on the basis of data or estimates provided to the Secretary by each State educational agency in accordance with criteria established by the Secretary, unless the Secretary determines, after notice and opportunity for a hearing to the affected State educational agency, that such data or estimates are clearly erroneous.

[(2) SPECIAL RULE.—No such determination with respect to the number of immigrant children and youth shall operate because of an underestimate or overestimate to deprive any State educational agency of the allocation under this section that such State would otherwise have received had such determination been made on the basis of accurate data.

[(d) REALLOCATION.—Whenever the Secretary determines that any amount of a payment made to a State under this part for a fiscal year will not be used by such State for carrying out the purpose for which the payment was made, the Secretary shall make such amount available for carrying out such purpose to one or more other States to the extent the Secretary determines that such other States will be able to use such additional amount for carrying out such purpose. Any amount made available to a State from any appropriation for a fiscal year in accordance with the preceding sentence shall, for purposes of this part, be regarded as part of such State's payment (as determined under subsection (b)) for such year, but shall remain available until the end of the succeeding fiscal year.

[(e) RESERVATION OF FUNDS.—

[(1) IN GENERAL.—Notwithstanding any other provision of this part, if the amount appropriated to carry out this part exceeds \$50,000,000 for a fiscal year, a State educational agency may reserve not more than 20 percent of such agency's payment under this part for such year to award grants, on a competitive basis, to local educational agencies within the State as follows:

[(A) At least one-half of such grants shall be made available to eligible local educational agencies (as described in subsection (b)(2)) within the State with the highest numbers and percentages of immigrant children and youth.

[(B) Funds reserved under this paragraph and not made available under subparagraph (A) may be distributed to local educational agencies within the State experiencing a sudden influx of immigrant children and youth which are otherwise not eligible for assistance under this part.

[(2) USE OF GRANT FUNDS.—Each local educational agency receiving a grant under paragraph (1) shall use such grant funds to carry out the activities described in section 7307.

[(3) INFORMATION.—Local educational agencies with the highest number of immigrant children and youth receiving funds under paragraph (1) may make information available on serving immigrant children and youth to local educational agencies in the State with sparse numbers of such children.

[SEC. 7305. STATE APPLICATIONS.

[(a) SUBMISSION.—No State educational agency shall receive any payment under this part for any fiscal year unless such agency submits an application to the Secretary at such time, in such manner, and containing or accompanied by such information, as the Secretary may reasonably require. Each such application shall—

[(1) provide that the educational programs, services, and activities for which payments under this part are made will be administered by or under the supervision of the agency;

[(2) provide assurances that payments under this part will be used for purposes set forth in sections 7301 and 7307, including a description of how local educational agencies receiving funds under this part will use such funds to meet such purposes and will coordinate with other programs assisted under this Act, the Goals 2000: Educate America Act, and other Acts as appropriate;

[(5) provide assurances that the State educational agency will not finally disapprove in whole or in part any application for funds received under this part without first affording the local educational agency submitting an application for such funds reasonable notice and opportunity for a hearing;

[(6) provide for making such reports as the Secretary may reasonably require to perform the Secretary's functions under this part;

[(7) provide assurances—

[(A) that to the extent consistent with the number of immigrant children and youth enrolled in the nonpublic elementary or secondary schools within the district served by a local educational agency, such agency, after consultation with appropriate officials of such schools, shall provide for the benefit of such children and youth secular, neutral, and nonideological services, materials, and equipment necessary for the education of such children and youth;

[(B) that the control of funds provided under this part to any materials, equipment, and property repaired, remodeled, or constructed with those funds shall be in a public agency for the uses and purposes provided in this part, and a public agency shall administer such funds and property; and

[(C) that the provision of services pursuant to this paragraph shall be provided by employees of a public agency or

through contract by such public agency with a person, association, agency, or corporation who or which, in the provision of such services, is independent of such nonpublic elementary or secondary school and of any religious organization, and such employment or contract shall be under the control and supervision of such public agency, and the funds provided under this paragraph shall not be commingled with State or local funds;

[(8) provide that funds reserved under subsection (e) of section 7304 be awarded on a competitive basis based on merit and need in accordance with such subsection; and

[(b) SERVICES TO CHILDREN ENROLLED IN NONPUBLIC SCHOOLS.—If by reason of any provision of law a local educational agency is prohibited from providing educational services for children enrolled in elementary and secondary nonpublic schools, as required by section 7305(a)(7), or if the Secretary determines that a local educational agency has substantially failed or is unwilling to provide for the participation on an equitable basis of children enrolled in such schools, the Secretary may waive such requirement and shall arrange for the provision of services, subject to the requirements of this part, to such children. Such waivers shall be subject to consultation, withholding, notice, and judicial review requirements in accordance with the provisions of title I.

[PART B—NATIVE HAWAIIANS

[SEC. 9201. SHORT TITLE.

[(This part may be cited as the “Native Hawaiian Education Act”).

[SEC. 9202. FINDINGS.

[(The Congress finds and declares as follows:

[(1) Native Hawaiians are a distinct and unique indigenous people with a historical continuity to the original inhabitants of the Hawaiian archipelago, whose society was organized as a nation and internationally recognized as such by the United States, Britain, France, and Japan, as evidenced by treaties governing friendship, commerce, and navigation.

[(2) At the time of the arrival of the first non-indigenous people in Hawai‘i in 1778, the Native Hawaiian people lived in a highly organized, self-sufficient subsistence social system based on a communal land tenure system with a sophisticated language, culture, and religion.

[(3) A unified monarchial government of the Hawaiian Islands was established in 1810 under Kamehameha I, the first King of Hawai‘i.

[(4) From 1826 until 1893, the United States recognized the sovereignty and independence of the Kingdom of Hawai‘i, which was established in 1810 under Kamehameha I, extended full and complete diplomatic recognition to the Kingdom of

Hawai'i, and entered into treaties and conventions with the Kingdom of Hawai'i to govern friendship, commerce and navigation in 1826, 1842, 1849, 1875, and 1887.

【(5) In 1893, the sovereign, independent, internationally recognized, and indigenous government of Hawai'i, the Kingdom of Hawai'i, was overthrown by a small group of non-Hawaiians, including United States citizens, who were assisted in their efforts by the United States Minister, a United States naval representative, and armed naval forces of the United States. Because of the participation of United States agents and citizens in the overthrow of the Kingdom of Hawai'i, the Congress, on behalf of the people of the United States, apologized to Native Hawaiians for the overthrow and the deprivation of the rights of Native Hawaiians to self-determination through Public Law 103-150 (107 Stat. 1510).

【(6) In 1898, the joint resolution entitled "A Joint Resolution to provide for annexing the Hawaiian Islands to the United States", approved July 7, 1898 (30 Stat. 750), ceded absolute title of all lands held by the Republic of Hawai'i, including the government and crown lands of the former Kingdom of Hawai'i, to the United States, but mandated that revenue generated from these lands be used "solely for the benefit of the inhabitants of the Hawaiian Islands for educational and other public purposes".

【(7) By 1919, the Native Hawaiian population had declined from an estimated 1,000,000 in 1778 to an alarming 22,600, and in recognition of this severe decline, the Congress in 1921 enacted the Hawaiian Homes Commission Act, 1920, which designated approximately 200,000 acres of ceded public lands for homesteading by Native Hawaiians.

【(8) Through the enactment of the Hawaiian Homes Commission Act, 1920, the Congress affirmed the special relationship between the United States and the Native Hawaiians, as expressed by then Secretary of the Interior Franklin K. Lane, who was quoted in the committee report for the Hawaiian Homes Commission Act, 1920, as saying: "One thing that impressed me . . . was the fact that the natives of the island who are our wards, I should say, and for whom in a sense we are trustees, are falling off rapidly in numbers and many of them are in poverty."

【(9) In 1938, the United States Congress again acknowledged the unique status of the Hawaiian people by including in the Act of June 20, 1938 (52 Stat. 781 et seq.), a provision to lease lands within the National Parks extension to Native Hawaiians and to permit fishing in the area "only by native Hawaiian residents of said area or of adjacent villages and by visitors under their guidance."

【(10) Under the Act entitled "An Act to provide for the admission of the State of Hawai'i into the Union" approved March 18, 1959 (73 Stat. 4), the United States transferred responsibility for the administration of the Hawaiian Home Lands to the State of Hawai'i but reaffirmed the trust relationship which existed between the United States and the Hawaiian people by retaining the exclusive power to enforce the trust, including the power to approve land exchanges and legis-

lative amendments affecting the rights of beneficiaries under such Act.

[(11) In 1959, under the Act entitled "An Act to provide for the admission of the State of Hawai'i into the Union", approved March 18, 1959 (73 Stat. 4), the United States ceded to the State of Hawai'i title to the public lands formerly held by the United States, but mandated that such lands be held by the State "in public trust" and reaffirmed the special relationship which existed between the United States and the Hawaiian people by retaining the legal responsibility to enforce the public trust responsibility of the State of Hawai'i for the betterment of the conditions of Native Hawaiians, as defined in section 201(a) of the Hawaiian Homes Commission Act, 1920.

[(12) The United States assumed special responsibilities for Native Hawaiian lands and resources at the time of the annexation of the Territory in 1898, upon adoption of the Hawaiian Homes Commission Act, 1920, and upon admission of the State of Hawai'i into the Union in 1959, and has retained certain of those responsibilities.

[(13) In recognition of the special relationship which exists between the United States and the Native Hawaiian people, the Congress has extended to Native Hawaiians the same rights and privileges accorded to American Indian, Alaska Native, Eskimo, and Aleut communities under the Native American Programs Act of 1974, the American Indian Religious Freedom Act, the National Museum of the American Indian Act, the Native American Graves Protection and Repatriation Act, the National Historic Preservation Act, and the Native American Languages Act.

[(14) In recognition of the special relationship which exists between the United States and the Native Hawaiian people, the Congress has enacted numerous special provisions of law for the benefit of Native Hawaiians in the areas of health, education, labor, and housing.

[(15) In 1981, the Senate instructed the Office of Education to submit to the Congress a comprehensive report on Native Hawaiian education. The report, entitled the "Native Hawaiian Educational Assessment Project", was released in 1983 and documented that Native Hawaiians scored below parity with national norms on standardized achievement tests, were disproportionately represented in many negative social and physical statistics, indicative of special educational needs, and had educational needs which were related to their unique cultural situation, such as different learning styles and low self-image.

[(16) In recognition of the educational needs of Native Hawaiians, in 1988, the Congress enacted title IV of the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 to authorize and develop supplemental educational programs to benefit Native Hawaiians.

[(17) In 1993, the Kamehameha Schools Bishop Estate released a ten-year update of the Native Hawaiian Educational Assessment Project, which found that despite the successes of the programs established under title IV of the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School

Improvement Amendments of 1988, many of the same educational needs still exist for Native Hawaiians. For example—

[(A) educational risk factors continue to start even before birth for many Native Hawaiian children, including—

[(i) late or no prenatal care;

[(ii) half of Native Hawaiian women who give birth are unmarried; and

[(iii) high rates of births to teenage parents;

[(B) Native Hawaiian students continue to begin their school experience lagging behind other students in terms of readiness factors such as vocabulary test scores;

[(C) Native Hawaiian students continue to score below national norms on standardized education achievement tests at all grade levels;

[(D) both public and private schools continue to show a pattern of lower percentages of Native Hawaiian students in the uppermost achievement levels and in gifted and talented programs;

[(E) Native Hawaiian students continue to be overrepresented among students qualifying for special education programs provided to students with learning disabilities, mild mental retardation, emotional impairment, and other such disabilities;

[(F) Native Hawaiians continue to be underrepresented in institutions of higher education and among adults who have completed four or more years of college;

[(G) Native Hawaiians continue to be disproportionately represented in many negative social and physical statistics, indicative of special educational needs, for example—

[(i) Native Hawaiian students are more likely to be retained in grade level and to be excessively absent in secondary school;

[(ii) Native Hawaiian students are the highest users of drugs and alcohol in the State of Hawai'i; and

[(iii) Native Hawaiian children continue to be disproportionately victimized by child abuse and neglect; and

[(H) Native Hawaiians now comprise over 23 percent of the students served by the State of Hawai'i Department of Education and there are and will continue to be geographically rural, isolated areas with a high Native Hawaiian population density.

[(18) The findings described in paragraphs (1) through (17) are contrary to the high rate of literacy and integration of traditional culture and Western education achieved by Native Hawaiians through a Hawaiian language-based public school system established in 1840 by Kamehameha III.

[(19) After the overthrow of the Kingdom of Hawai'i in 1893, Hawaiian medium schools were banned. After annexation, throughout the territorial and statehood period, and until 1986, use of Hawaiian as a medium of education in public schools was declared unlawful, thereby causing incalculable harm to a culture that placed a very high value on the power of language, as exemplified in the traditional saying: "I ka

“ōlelo no ke ola; I ka “ōlelo no ka make. In the language rests life; In the language rests death.”

[(20) Despite the consequences of over 100 years of non-indigenous influence, the Native Hawaiian people are determined to preserve, develop, and transmit to future generations their ancestral territory, and their cultural identity in accordance with their own spiritual and traditional beliefs, customs, practices, language, and social institutions.

[(21) The State of Hawai‘i, in the constitution and statutes of the State of Hawai‘i—

[(A) reaffirms and protects the unique right of the Native Hawaiian people to practice and perpetuate their culture and religious customs, beliefs, practices, and language; and

[(B) recognizes the traditional language of the Native Hawaiian people as an official language of the State of Hawai‘i, which may be used as the language of instruction for all subjects and grades in the public school system.

[PART C—ALASKA NATIVE EDUCATION

[SEC. 9301. SHORT TITLE.

[This part may be cited as the “Alaska Native Educational Equity, Support and Assistance Act”.

[SEC. 9302. FINDINGS.

[The Congress finds and declares:

[(1) The attainment of educational success is critical to the betterment of the conditions, long-term well-being and preservation of the culture of Alaska Natives.

[(2) It is the policy of the Federal Government to encourage the maximum participation by Alaska Natives in the planning and the management of Alaska Native education programs.

[(3) Alaska Native children enter and exit school with serious educational handicaps.

[(4) The educational achievement of Alaska Native children is far below national norms. In addition to low Native performance on standardized tests, Native student dropout rates are high, and Natives are significantly underrepresented among holders of baccalaureate degrees in the State of Alaska. As a result, Native students are being denied their opportunity to become full participants in society by grade school and high school educations that are condemning an entire generation to an underclass status and a life of limited choices.

[(5) The programs authorized herein, combined with expanded Head Start, infant learning and early childhood education programs, and parent education programs are essential if educational handicaps are to be overcome.

[(6) The sheer magnitude of the geographic barriers to be overcome in delivering educational services in rural and village Alaska should be addressed through the development and implementation of innovative, model programs in a variety of areas.

[(7) Congress finds that Native children should be afforded the opportunity to begin their formal education on a par with their non-Native peers. The Federal Government should lend support to efforts developed by and undertaken within the Alaska Native community to improve educational opportunity for all students.

[SEC. 9303. PURPOSE.

[It is the purpose of this part to—

[(1) recognize the unique educational needs of Alaska Natives;

[(2) authorize the development of supplemental educational programs to benefit Alaska Natives;

[(3) supplement existing programs and authorities in the area of education to further the purposes of this part; and

[(4) provide direction and guidance to appropriate Federal, State and local agencies to focus resources, including resources made available under this part, on meeting the educational needs of Alaska Natives.

[PART B—GIFTED AND TALENTED CHILDREN

[SEC. 10201. SHORT TITLE.

[This part may be cited as the “Jacob K. Javits Gifted and Talented Students Education Act of 1994”.

[SEC. 10202. FINDINGS AND PURPOSES.

[(a) FINDINGS.—The Congress finds and declares that—

[(1) all students can learn to high standards and must develop their talents and realize their potential if the United States is to prosper;

[(2) gifted and talented students are a national resource vital to the future of the Nation and its security and well-being;

[(3) too often schools fail to challenge students to do their best work, and students who are not challenged will not learn to challenging State content standards and challenging State student performance standards, fully develop their talents, and realize their potential;

[(4) unless the special abilities of gifted and talented students are recognized and developed during such students' elementary and secondary school years, much of such students' special potential for contributing to the national interest is likely to be lost;

[(5) gifted and talented students from economically disadvantaged families and areas, and students of limited-English proficiency are at greatest risk of being unrecognized and of not being provided adequate or appropriate educational services;

[(6) State and local educational agencies and private non-profit schools often lack the necessary specialized resources to plan and implement effective programs for the early identification of gifted and talented students and for the provision of educational services and programs appropriate to their special needs;

[(7) the Federal Government can best carry out the limited but essential role of stimulating research and development and personnel training and providing a national focal point of information and technical assistance that is necessary to ensure that the Nation's schools are able to meet the special educational needs of gifted and talented students, and thereby serve a profound national interest; and

[(8) the experience and knowledge gained in developing and implementing programs for gifted and talented students can and should be used as a basis to—

[(A) develop a rich and challenging curriculum for all students; and

[(B) provide all students with important and challenging subject matter to study and encourage the habits of hard work.

[(b) STATEMENT OF PURPOSE.—It is the purpose of this part—

[(1) to provide financial assistance to State and local educational agencies, institutions of higher education, and other public and private agencies and organizations, to initiate a coordinated program of research, demonstration projects, personnel training, and similar activities designed to build a nationwide capability in elementary and secondary schools to meet the special educational needs of gifted and talented students;

[(2) to encourage the development of rich and challenging curricula for all students through the appropriate application and adaptation of materials and instructional methods developed under this part; and

[(3) to supplement and make more effective the expenditure of State and local funds, for the education of gifted and talented students.

[SEC. 10203. CONSTRUCTION.

[Nothing in this part shall be construed to prohibit a recipient of funds under this part from serving gifted and talented students simultaneously with students with similar educational needs, in the same educational settings where appropriate.

[SEC. 10204. AUTHORIZED PROGRAMS.

[PART C—PUBLIC CHARTER SCHOOLS

[Subpart 1—Basic Charter School Grant Program

[SEC. 10301. FINDINGS AND PURPOSE.

[(a) FINDINGS.—The Congress finds that—

[(1) enhancement of parent and student choices among public schools can assist in promoting comprehensive educational reform and give more students the opportunity to learn to challenging State content standards and challenging State student performance standards, if sufficiently diverse and high-quality choices, and genuine opportunities to take advantage of such choices, are available to all students;

[(2) useful examples of such choices can come from States and communities that experiment with methods of offering teachers and other educators, parents, and other members of the public the opportunity to design and implement new public schools and to transform existing public schools;

[(3) charter schools are a mechanism for testing a variety of educational approaches and should, therefore, be exempted from restrictive rules and regulations if the leadership of such schools commits to attaining specific and ambitious educational results for educationally disadvantaged students consistent with challenging State content standards and challenging State student performance standards for all students;

[(4) charter schools, as such schools have been implemented in a few States, can embody the necessary mixture of enhanced choice, exemption from restrictive regulations, and a focus on learning gains;

[(5) charter schools, including charter schools that are schools-within-schools, can help reduce school size, which reduction can have a significant effect on student achievement;

[(6) the Federal Government should test, evaluate, and disseminate information on a variety of charter school models in order to help demonstrate the benefits of this promising educational reform; and

[(7) there is a strong documented need for cash-flow assistance to charter schools that are starting up, because State and local operating revenue streams are not immediately available.

[(b) PURPOSE.—It is the purpose of this subpart to increase national understanding of the charter schools model by—

[(1) providing financial assistance for the planning, program design and initial implementation of charter schools;

[(2) evaluating the effects of such schools, including the effects on students, student achievement, staff, and parents; and

[(3) expanding the number of high-quality charter schools available to students across the Nation.

[SEC. 10302. PROGRAM AUTHORIZED.]

[(a) IN GENERAL.—The Secretary may award grants to State educational agencies having applications approved pursuant to section 10303 to enable such agencies to conduct a charter school grant program in accordance with this subpart.

[PART L—PHYSICAL EDUCATION FOR PROGRESS

[SEC. 10999A. SHORT TITLE.

【This part may be cited as the “Physical Education for Progress Act”.

[SEC. 10999B. PURPOSE.

【The purpose of this part is to award grants and contracts to local educational agencies to enable the local educational agencies to initiate, expand and improve physical education programs for all kindergarten through 12th grade students.

[SEC. 10999C. FINDINGS.

【Congress makes the following findings:

【(1) Physical education is essential to the development of growing children.

【(2) Physical education helps improve the overall health of children by improving their cardiovascular endurance, muscular strength and power, and flexibility, and by enhancing weight regulation, bone development, posture, skillful moving, active lifestyle habits, and constructive use of leisure time.

【(3) Physical education helps improve the self esteem, interpersonal relationships, responsible behavior, and independence of children.

【(4) Children who participate in high quality daily physical education programs tend to be more healthy and physically fit.

【(5) The percentage of young people who are overweight has more than doubled in the 30 years preceding 1999.

【(6) Low levels of activity contribute to the high prevalence of obesity among children in the United States.

【(7) Obesity related diseases cost the United States economy more than \$100,000,000,000 every year.

【(8) Inactivity and poor diet cause at least 300,000 deaths a year in the United States.

【(9) Physically fit adults have significantly reduced risk factors for heart attacks and stroke.

【(10) Children are not as active as they should be and fewer than one in four children get 20 minutes of vigorous activity every day of the week.

【(11) The Surgeon General’s 1996 Report on Physical Activity and Health, and the Centers for Disease Control and Prevention, recommend daily physical education for all students in kindergarten through grade 12.

【(12) Twelve years after Congress passed House Concurrent Resolution 97, 100th Congress, agreed to December 11, 1987, encouraging State and local governments and local educational agencies to provide high quality daily physical education programs for all children in kindergarten through grade 12, little progress has been made.

【(13) Every student in our Nation’s schools, from kindergarten through grade 12, should have the opportunity to participate in quality physical education. It is the unique role of quality physical education programs to develop the health-related fitness, physical competence, and cognitive understanding

about physical activity for all students so that the students can adopt healthy and physically active lifestyles.

[SEC. 10999D. PROGRAM AUTHORIZED.]

【The Secretary is authorized to award grants to, and enter into contracts with, local educational agencies to pay the Federal share of the costs of initiating, expanding, and improving physical education programs for kindergarten through grade 12 students by—

- 【(1) providing equipment and support to enable students to actively participate in physical education activities; and
- 【(2) providing funds for staff and teacher training and education.

[SEC. 10999E. APPLICATIONS; PROGRAM ELEMENTS.]

【(a) APPLICATIONS.—Each local educational agency desiring a grant or contract under this part shall submit to the Secretary an application that contains a plan to initiate, expand, or improve physical education programs in the schools served by the agency in order to make progress toward meeting State standards for physical education.

【(b) PROGRAM ELEMENTS.—A physical education program described in any application submitted under subsection (a) may provide—

- 【(1) fitness education and assessment to help children understand, improve, or maintain their physical well-being;
- 【(2) instruction in a variety of motor skills and physical activities designed to enhance the physical, mental, and social or emotional development of every child;
- 【(3) development of cognitive concepts about motor skill and physical fitness that support a lifelong healthy lifestyle;
- 【(4) opportunities to develop positive social and cooperative skills through physical activity participation;
- 【(5) instruction in healthy eating habits and good nutrition; and
- 【(6) teachers of physical education the opportunity for professional development to stay abreast of the latest research, issues, and trends in the field of physical education.

【(c) SPECIAL RULE.—For the purpose of this part, extracurricular activities such as team sports and Reserve Officers' Training Corps (ROTC) program activities shall not be considered as part of the curriculum of a physical education program assisted under this part.

[SEC. 10999F. PROPORTIONALITY.]

【The Secretary shall ensure that grants awarded and contracts entered into under this part shall be equitably distributed between local educational agencies serving urban and rural areas, and between local educational agencies serving large and small numbers of students.

[SEC. 10999G. PRIVATE SCHOOL STUDENTS AND HOME-SCHOOLED STUDENTS.]

【An application for funds under this part may provide for the participation, in the activities funded under this part, of—

- 【(1) home-schooled children, and their parents and teachers;
- or
- 【(2) children enrolled in private nonprofit elementary schools or secondary schools, and their parents and teachers.

[SEC. 10999H. REPORT REQUIRED FOR CONTINUED FUNDING.]

As a condition to continue to receive grant or contract funding after the first year of a multiyear grant or contract under this part, the administrator of the grant or contract for the local educational agency shall submit to the Secretary an annual report that describes the activities conducted during the preceding year and demonstrates that progress has been made toward meeting State standards for physical education.

[SEC. 10999I. REPORT TO CONGRESS.]

The Secretary shall submit a report to Congress not later than June 1, 2003, that describes the programs assisted under this part, documents the success of such programs in improving physical fitness, and makes such recommendations as the Secretary determines appropriate for the continuation and improvement of the programs assisted under this part.

[SEC. 10999J. ADMINISTRATIVE COSTS.]

Not more than 5 percent of the grant or contract funds made available to a local educational agency under this part for any fiscal year may be used for administrative costs.

[SEC. 10999K. FEDERAL SHARE; SUPPLEMENT NOT SUPPLANT.]

(a) **FEDERAL SHARE.**—The Federal share under this part may not exceed—

(1) 90 percent of the total cost of a project for the first year for which the project receives assistance under this part; and

(2) 75 percent of such cost for the second and each subsequent such year.

(b) **SUPPLEMENT NOT SUPPLANT.**—Funds made available under this part shall be used to supplement and not supplant other Federal, State and local funds available for physical education activities.

[SEC. 10999L. AUTHORIZATION OF APPROPRIATIONS.]

There are authorized to be appropriated \$30,000,000 for fiscal year 2001, \$70,000,000 for fiscal year 2002, and \$100,000,000 for each of the fiscal years 2003 through 2005, to carry out this part. Such funds shall remain available until expended.

[TITLE XI—COORDINATED SERVICES]

[SEC. 11001. FINDINGS AND PURPOSE.]

(a) **FINDINGS.**—The Congress finds the following:

(1) Growing numbers of children are negatively affected by influences outside of the classroom which increase such children's risk of academic failure.

(2) Factors such as poor nutrition, unsafe living conditions, physical and sexual abuse, family and gang violence, inadequate health care, unemployment, lack of child care, and substance abuse, adversely affect family relationships and the ability of a child to learn.

(3) Parents and other caregivers in today's high pressure society often face demands which place restraints on such parents' and caregivers' time and affect such parents' and caregivers' ability to adequately provide for the needs of the families of such parents and caregivers.

[(4) Access to health and social service programs can address the basic physical and emotional needs of children so that children can fully participate in the learning experiences offered children in school.

[(5) Services for at-risk students need to be more convenient, and less fragmented, regulated and duplicative, in order to meet the needs of children and their families.

[(6) School personnel, parents, and support service providers often lack knowledge of, and access to, available services for at-risk students and their families in the community, and have few resources to coordinate services and make services accessible.

[(7) Service providers, such as teachers, social workers, health care and child care providers, juvenile justice workers and others, are often trained in separate disciplines that provide little support for the coordination of services.

[(8) Coordination of services is more cost effective because such coordination substitutes prevention for expensive crisis intervention.

[(9) Coordinating health and social services with education can help the Nation meet the National Education Goals by ensuring better outcomes for children.

[(b) PURPOSE OF COORDINATING SERVICES.—The purpose of this title is to provide elementary and secondary school students and their families better access to the social, health and education services necessary for students to succeed in school and for their families to take an active role in ensuring that such students receive the best possible education.

sence of such Federal funds, be made available from non-Federal sources for coordinated services, and not to supplant such funds.

[SEC. 11006. CONTINUING AUTHORITY.]

[SEC. 12001. SHORT TITLE.]

【This title may be cited as the “Education Infrastructure Act of 1994”.

[SEC. 12002. FINDINGS.]

【The Congress finds the following:

【(1) According to a 1991 survey conducted by the American Association of School Administrators, 74 percent of all public school buildings in the United States need to be replaced.

【(2) Almost one-third of such buildings were built prior to World War II.

【(3) It is estimated that one of every four public school buildings in the United States is in inadequate condition, and of such buildings, 61 percent need maintenance or major repairs, 43 percent are obsolete, 42 percent contain environmental hazards, 25 percent are overcrowded, and 13 percent are structurally unsound.

【(4) Large numbers of local educational agencies have difficulties securing financing for school facility improvement, including school libraries, media centers, and facilities.

[TITLE XIII—SUPPORT AND ASSISTANCE PROGRAMS TO IMPROVE EDUCATION

[SEC. 13001. FINDINGS.

[The Congress finds that—

[(1) high-quality technical assistance can enhance the improvements in teaching and learning achieved through the implementation of programs under this Act;

[(2) comprehensive technical assistance and effective program dissemination are essential ingredients of the overall strategy of the Improving America's Schools Act of 1994 to improve programs and provide all children opportunities to meet challenging State content standards and challenging State student performance standards;

[(3) States, local educational agencies, tribes, and schools serving students with special needs, such as students with limited-English proficiency and students with disabilities, have great need for comprehensive technical assistance in order to use funds under this Act to provide such students with opportunities to learn to challenging State content standards and challenging State student performance standards;

[(4) current technical assistance and dissemination efforts are fragmented and categorical in nature, and thus fail to address adequately the needs of States, local educational agencies and tribes for help in integrating into a coherent strategy for improving teaching and learning the various programs under this Act with State and local programs and other education reform efforts;

[(5) too little creative use is made of technology as a means of providing information and assistance in a cost-effective way;

[(6) comprehensive technical assistance can help schools and school systems focus on improving opportunities for all children to meet challenging State content standards and challenging State student performance standards, as such schools and systems implement programs under this Act;

[(7) comprehensive technical assistance will provide coordinated assistance to help States, local educational agencies, tribes, participating colleges and universities, and schools integrate Federal, State, and local education programs in ways that contribute to improving schools and entire school systems;

[(8) technical assistance in support of programs under this Act should be coordinated with the Department's regional offices, the regional educational laboratories, State Literacy Resource Centers, vocational resource centers, and other technical assistance efforts supported by the Department; and

[(9) technical assistance providers should prioritize assistance for local educational agencies and schools.

[SEC. 13002. PURPOSE.

[The purpose of this title is to create a national technical assistance and dissemination system to make available to States, local educational agencies, tribes, schools, and other recipients of funds under this Act technical assistance in—

[(1) administering and implementing programs under this Act;

[(2) implementing school reform programs in a manner that improves teaching and learning for all students;

[(3) coordinating such programs with other Federal, State, and local education plans and activities, so that all students, particularly students at risk of educational failure, are provided opportunities to meet challenging State content standards and challenging State student performance standards; and

[(4) adopting, adapting, and implementing promising and proven practices for improving teaching and learning.

[PART H—SENSE OF THE CONGRESS

[SEC. 14801. SENSE OF CONGRESS TO INCREASE THE TOTAL SHARE OF FEDERAL SPENDING ON EDUCATION.

[(a) FINDINGS.—The Congress finds that—

[(1) in order to increase our Nation's standard of living and to increase the number of good jobs, the United States must increase its productivity and ability to compete in the international marketplace by improving the educational level of our workforce;

[(2) although efforts are being made to establish higher educational standards and goals, there is a substantial shortage of resources to meet such standards and goals;

[(3) States and local communities are finding it increasingly difficult to meet ever higher educational standards and goals, and States will not be able to fund needed changes without Federal help to reach such standards and goals;

[(4) the Federal Government has established many educational programs but failed to provide adequate funding for such programs, for example one such program provides education to our Nation's disabled students and was established

with a promise of 40 percent Federal funding but currently receives only eight percent Federal funding;

[(5) the annual shortfall in Federal education programs is approximately half of the promised funding;

[(6) many needed educational improvements will not need Federal funds, however, other suggested changes such as lengthened school years, better pay, after-school activities, mentoring for students at risk, programs for gifted students, and replacing substandard buildings, will require substantial Federal assistance; and

[(7) the Federal contribution to education is less than two percent of the total Federal budget, and in order to make education a national priority, the total percentage of Federal educational funding should be increased by one percent each year over the next eight years to reach 10 percent of the total Federal budget.

[(b) SENSE OF THE CONGRESS.—It is the sense of the Congress that the total share of the Federal spending on education should increase by at least one percent each year until such share reaches 10 percent of the total Federal budget.

[SEC. 14802. SENSE OF CONGRESS; REQUIREMENT REGARDING NOTICE.

[(a) PURCHASE OF AMERICAN-MADE EQUIPMENT AND PRODUCTS.—In the case of any equipment or products that may be authorized to be purchased with financial assistance provided under this Act, it is the sense of the Congress that entities receiving such assistance should, in expending the assistance, purchase only American-made equipment and products.

[PART B—BUREAU OF INDIAN AFFAIRS PROGRAMS]

[SEC. 1121. STANDARDS FOR THE BASIC EDUCATION OF INDIAN CHILDREN IN BUREAU OF INDIAN AFFAIRS SCHOOLS.]

[(a)(1)] The purpose of the standards developed under this section shall be to afford Indian students being served by a Bureau funded school with the same opportunities as all other students to achieve the National Education Goals embodied in the Goals 2000: Educate America Act. Consistent with the provisions of this section and section 1131, the Secretary shall take such actions as are necessary to coordinate standards developed and implemented under this section with those in the State improvement plans developed and implemented pursuant to the Goals 2000: Educate America Act for the States in which each Bureau funded school operates. In developing and reviewing such standards and coordination, the Secretary shall utilize the findings and recommendations of the panel established in section 315(b)(4) of such Act.

[(2)] The Secretary shall take immediate steps to encourage school boards of Bureau funded schools to engage their communities in adopting declarations of purposes of education in their

communities, analyzing the implications of such purposes for their schools, and determining how such purposes may be made to motivate students and faculties and otherwise animate their schools by May 1, 1995. Such declarations shall represent the aspirations of a community for the kinds of persons such community wants its children to increasingly become, and shall include such purposes as assuring that all learners are becoming accomplished in ways important to themselves and respected by their parents and communities, shaping worthwhile and satisfying lives for themselves, exemplifying the best values of the community and humankind, and becoming increasingly effective in shaping the character and quality of the world all learners share.

[(b) Within 18 months of the publication of the voluntary national content standards described in section 203(a)(2) of the Goals 2000: Educate America Act, the Secretary, in consultation with the Secretary of Education and Indian organizations and tribes, shall carry out or cause to be carried out by contract with an Indian organization such studies and surveys, making the fullest use possible of other existing studies, surveys, and plans, as are necessary to establish and revise standards for the basic education of Indian children attending Bureau funded schools. Such studies and surveys shall take into account factors such as academic needs, local cultural differences, type and level of language skills, geographic isolation, and appropriate teacher-student ratios for such children, and shall be directed toward the attainment of equal educational opportunity for such children.

[(c)(1) The Secretary shall revise the minimum academic standards published in the Federal Register of September 9, 1985 (50 Fed. Reg. 174) for the basic education of Indian children in accordance with the purpose described in subsection (a) and the findings of the studies and surveys described in subsection (b), and shall publish such revised standards in the Federal Register for the purpose of receiving comments from the tribes and other interested parties. Within 21 months of the date of enactment of the Improving America's Schools Act of 1994, the Secretary shall establish final standards, distribute such standards to all the tribes and publish such final standards in the Federal Register. The Secretary shall revise such final standards periodically as necessary. Prior to any revision of such final standards, the Secretary shall distribute such proposed revision to all the tribes, and publish such proposed revision in the Federal Register, for the purpose of receiving comments from the tribes and other interested parties.

[(2) The standards described in paragraph (1) shall apply to Bureau schools, and subject to subsection (f), to contract or grant schools, and may also serve as a model for educational programs for Indian children in public schools. In establishing and revising such standards, the Secretary shall take into account the special needs of Indian students and the support and reinforcement of the specific cultural heritage of each tribe.

[(d) The Secretary shall provide alternative or modified standards in lieu of the standards established under subsection (c), where necessary, so that the programs of each school shall be in compliance with the minimum standards required for accreditation of schools in the State where the school is located.

[(e) A tribal governing body, or the local school board so designated by the tribal governing body, shall have the local authority to waive, in part or in whole, the standards established under subsection (c) and (d), where such standards are deemed by such body to be inappropriate. The tribal governing body or designated school board shall, within 60 days thereafter, submit to the Secretary a proposal for alternative standards that take into account the specific needs of the tribe's children. Such revised standards shall be established by the Secretary unless specifically rejected by the Secretary for good cause and in writing to the affected tribes or local school board, which rejection shall be final and unreviewable.

[(f)(1) The Secretary, through contracting and grant-making procedures, shall assist school boards of contract or grant schools in the implementation of the standards established under subsections (c) and (d), if the school boards request that such standards, in part or in whole, be implemented. At the request of a contract or grant school board, the Secretary shall provide alternative or modified standards for the standards established under subsections (c) and (d) to take into account the needs of the Indian children and the contract or grant school.

[(2) Within 1 year of the date of the enactment of the Indian Education Technical Amendments Act of 1985, the Bureau shall, either directly or through contract with an Indian organization, establish a consistent system of reporting standards for fiscal control and fund accounting for all contract or grant schools. Such standards shall yield data results comparable to those used by Bureau schools.

[(g) Subject to subsections (e) and (f), the Secretary shall begin to implement the standards established under this section immediately upon the date of their establishment. Not later than January 1, 1995, and at each time thereafter that the annual budget request for Bureau educational services is presented, the Secretary shall submit to the appropriate committees of Congress a detailed plan to bring all Bureau schools and contract or grant schools up to the level required by the applicable standards established under this section. Such plan shall include detailed information on the status of each school's educational program in relation to the applicable standards established under this section, specific cost estimates for meeting such standards at each school, and specific time lines for bringing each school up to the level required by such standards.

[(h)(1) Except as specifically required by statute, no school or peripheral dormitory operated by the Bureau on or after January 1, 1992, may be closed or consolidated or have its program substantially curtailed unless done according to the requirements of this subsection, except that, in those cases where the tribal governing body, or the local school board concerned (if so designated by the tribal governing body), requests closure or consolidation, the requirements of this subsection shall not apply. The requirements of this subsection shall not apply when a temporary closure, consolidation, or substantial curtailment is required by plant conditions which constitute an immediate hazard to health and safety.

[(2) The Secretary shall, by regulation, promulgate standards and procedures for the closing, consolidation, or substantial curtail-

ment of Bureau schools in accordance with the requirements of this subsection.

[(3) Whenever closure, transfer to any other authority, consolidation, or substantial curtailment of a school is under active consideration or review by any division of the Bureau or the Department of the Interior, the affected tribe, tribal governing body, and designated local school board, will be notified as soon as such consideration or review begins, kept fully and currently informed, and afforded an opportunity to comment with respect to such consideration or review. When a formal decision is made to close, transfer to any other authority, consolidate, or substantially curtail a school, the affected tribe, tribal governing body, and designated local school board shall be notified at least 6 months prior to the end of the school year preceding the proposed closure date. Copies of any such notices and information shall be transmitted promptly to the Congress and published in the Federal Register.

[(4) The Secretary may terminate, contract, transfer to any other authority, or consolidate or substantially curtail the operation or facilities of—

[(A) any Bureau funded school that is operated on or after April 1, 1987,

[(B) any program of such a school that is operated on or after April 1, 1987, or

[(C) any school board of a school operated under a grant under the Tribally Controlled Schools Act of 1988, only if the tribal governing body approves such action.

[(i) There are authorized to be appropriated such sums as may be necessary, for academic program costs, in order to bring all Bureau schools and contract or grant schools up to the level required by the applicable standards established under this section.

[(j)(1) All Bureau funded schools shall include within their curriculum a program of instruction relating to alcohol and substance abuse prevention and treatment. The Assistant Secretary shall provide the technical assistance necessary to develop and implement such a program for students in kindergarten and grades 1 through 12, at the request of—

[(A) any Bureau school (subject to the approval of the school board of such school);

[(B) any school board of a school operating under a contract entered into under the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450 et seq.); or

[(C) any school board of a school operating under a grant under the Tribally Controlled Schools Act of 1988.

[(2) In schools operated directly by the Bureau, the Secretary shall provide for—

[(A) accurate reporting of all incidents relating to alcohol and substance abuse; and

[(B) individual student crisis intervention.

[(3) The programs requested under paragraph (1) shall be developed in consultation with the Indian tribe that is to be served by such program and health personnel in the local community of such tribe.

[(4) Schools requesting program assistance under this subsection are encouraged to involve family units and, where appropriate, tribal elders and Native healers in such instructions.

[(k) For purposes of this section, the term “tribal governing body” means, with respect to any school, the tribal governing body, or tribal governing bodies, that represent at least 90 percent of the students served by such school.

[(1)(1)(A)(i) The Secretary shall only consider the factors described in subparagraphs (B) and (C) in reviewing—

[(I) applications from any tribe for the awarding of a contract or grant for a school that is not a Bureau funded school; and

[(II) applications from any tribe or school board of any Bureau funded school for—

[(aa) a school which is not a Bureau funded school; or

[(bb) the expansion of a Bureau funded school which would increase the amount of funds received by the Indian tribe or school board under section 1127.

[(ii) The Secretary shall give consideration to all of the factors under clause (i), but none of the applications under clause (i) may be denied based primarily upon the geographic proximity of public education.

[(B) The Secretary shall consider the following factors relating to the program that is the subject of an application described in subparagraph (A):

[(i) The adequacy of facilities or the potential to obtain or provide adequate facilities.

[(ii) Geographic and demographic factors in the affected areas.

[(iii) Adequacy of the applicant’s program plans or, in the case of a Bureau funded school, of projected needs analysis done either by a tribe or by Bureau personnel.

[(iv) Geographic proximity of comparable public education.

[(v) The stated needs of all affected parties, including students, families, tribal governments at both the central and local levels, and school organizations.

[(C) The Secretary shall consider with respect to applications described in subparagraph (A) the following factors relating to all the educational services available at the time the application is considered:

[(i) Geographic and demographic factors in the affected areas.

[(ii) Adequacy and comparability of programs already available.

[(iii) Consistency of available programs with tribal educational codes or tribal legislation on education.

[(iv) The history and success of these services for the proposed population to be served, as determined from all factors and not just standardized examination performance.

[(2)(A) The Secretary shall make a determination of whether to approve any application described in paragraph (1)(A) by not later than the date that is 180 days after the day on which such application is submitted to the Secretary.

[(B) If the Secretary fails to make the determination described in subparagraph (A) with respect to an application by the date described in subparagraph (A), the application shall be treated as having been approved by the Secretary.

[(3)(A) Any application described in paragraph (1)(A) may be submitted to the Secretary only if—

[(i) the application has been approved by the tribal governing body of the students served by (or to be served by) the school or program that is the subject of the application, and

[(ii) written evidence of such approval is submitted with the application.

[(B) Each application described in paragraph (1)(A)—

[(i) shall provide information concerning each of the factors described in paragraph (1)(B), and

[(ii) may provide information concerning the factors described in paragraph (1)(C).

[(4) Whenever the Secretary makes a determination to deny approval of any application described in paragraph (1)(A), the Secretary shall—

[(A) state the objections in writing to the applicant by not later than the date that is 180 days after the day on which the application is submitted to the Secretary,

[(B) provide assistance to the applicant to overcome stated objections, and

[(C) provide the applicant a hearing, under the same rules and regulations pertaining to the Indian Self-Determination and Education Assistance Act, and an opportunity to appeal the objections raised by the Secretary.

[(5)(A) Except as otherwise provided in this paragraph, the action which is the subject of any application described in paragraph (1)(A) that is approved by the Secretary shall become effective with the commencement of the academic year succeeding the fiscal year in which the application is approved, or at an earlier date determined by the Secretary.

[(B) If an application is treated as having been approved by the Secretary by reason of paragraph (2)(B), the action that is the subject of the application shall become effective on the date that is 18 months after the date on which the application is submitted to the Secretary, or at an earlier date determined by the Secretary.

[SEC. 1122. NATIONAL CRITERIA FOR DORMITORY SITUATIONS.

[(a) The Secretary, in consultation with the Secretary of the Department of Education, and in consultation with Indian organizations and tribes, shall conduct or cause to be conducted by contract with an Indian organization, a study of the costs applicable to boarding arrangements for Indian students provided in Bureau schools, and contract or grant schools, for the purpose of establishing national criteria for such dormitory situations. Such criteria shall include adult-child ratios, needs for counselors (including special needs related to off-reservation boarding arrangements), space, and privacy.

[(b) Not later than January 1, 1996, the Secretary shall propose such criteria, and shall distribute such proposed criteria to the tribes and publish such proposed criteria in the Federal Register for the purpose of receiving comments from the tribes and other interested parties. Within 18 months of the date of the enactment of the Improving America's Schools Act of 1994, the Secretary shall establish final criteria, distribute such final criteria to all the tribes, and publish such final criteria in the Federal Register. The Secretary shall revise such final criteria periodically as necessary.

Any revisions to the criteria established under this section shall be developed subject to requirements established under section 1131.

[(c) The Secretary shall begin to implement the criteria established under this section immediately upon the date of the establishment of such criteria. Not later than January 1, 1997, and at each time thereafter that the annual budget request for Bureau educational services is presented, the Secretary shall submit to the appropriate committees of Congress a detailed plan to bring all Bureau contract boarding schools up to the criteria established under this section. Such plan shall include predictions for the relative need for each boarding school in the future, detailed information on the status of each school in relation to the criteria established under this section, specific cost estimates for meeting such criteria at each school, and specific time lines for bringing each school up to the level required by such criteria.

[(d)(1) The criteria established under this section may be waived in the same manner as the standards provided under section 1121(c) may be waived under section 1121(e).

[(2) No school in operation on or before January 1, 1987 (regardless of compliance or noncompliance with the criteria established under this section) may be closed, transferred to another authority, consolidated or have its program substantially curtailed for failure to meet the criteria.

[(e) There are authorized to be appropriated such sums as may be necessary in order to bring each school up to the level required by the criteria established under this section.

[SEC. 1123. REGULATIONS.

[(a) The provisions of part 32 of title 25 of the Code of Federal Regulations, as in effect on January 1, 1987, are incorporated into this Act and shall be treated as though such provisions are set forth in this subsection. Accordingly, such provisions may be altered only by means of an amendment to this subsection that is contained in an Act or joint resolution which is enacted into law. To the extent that such provisions of part 32 do not conform with this Act or any statutory provision of law enacted before the date of enactment of this Act, the provisions of this Act and the provisions of such other statutory law shall govern.

[(b) The provisions of parts 31, 33, 36, 39, 42, and 43 of title 25 of the Code of Federal Regulations, as in effect on January 1, 1987, shall be applied by the Federal Government and shall not, before July 1, 1989, be amended, revoked, or altered in any manner. No officer or employee of the executive branch shall have the authority to issue any other regulations, prior to July 1, 1989, that supersede, supplement, or otherwise affect the provisions of such parts. To the extent that the provisions of such parts do not conform with this Act or any statutory provision of law enacted before the date of enactment of this Act, the provisions of this Act and the provisions of such other statutory law shall govern.

[(c) After June 30, 1989, no regulation prescribed for the application of any program provided under this title shall become effective unless—

[(1) the regulation has been published as a proposed regulation in the Federal Register,

[(2) an opportunity of not less than 90 days has been afforded the public to comment on the published proposed regulation, and

[(3) the regulation has, after such period for public comment, been published in the Federal Register as a final regulation.

[(d) For purposes of this section, the term "regulation" means any rules, regulations, guidelines, interpretations, orders, or requirements of general applicability prescribed by any officer or employee of the executive branch.

[SEC. 1124. SCHOOL BOUNDARIES.]

[(a) The Secretary shall, in accordance with this section, establish separate geographical attendance areas for each Bureau school.

[(b)(1) Except as provided in paragraph (2), on or after July 1, 1985, no attendance area shall be changed or established with respect to any Bureau funded school unless the tribal governing body or the local school board concerned (if so designated by the tribal governing body) has been (i) afforded at least six months notice of the intention of the Bureau to change or establish such attendance area, and (ii) given the opportunity to propose alternative boundaries. Any tribe may petition the Secretary for revision of existing attendance area boundaries. The Secretary shall accept such proposed alternative or revised boundaries unless the Secretary finds, after consultation with the affected tribe or tribes, that such revised boundaries do not reflect the needs of the Indian students to be served or do not provide adequate stability to all of the affected programs.

[(2) In any case where there is more than 1 Bureau funded school located on an Indian reservation, at the direction of the tribal governing body, the relevant school boards of the Bureau funded schools on the reservation may, by mutual consent, establish the relevant attendance areas for such schools, subject to the approval of the tribal governing body. Any such boundaries so established shall be accepted by the Secretary.

[(c) In any case where there is only 1 Bureau operated program located on an Indian reservation, the attendance area for the program shall be the boundaries of the reservation served, and those students residing near the reservation shall also receive services from such program.

[(d) The Bureau shall include in the regulations the requirement that each appropriate education line officer coordinate and consult with the affected tribes and relevant school boards in the establishment of such geographic boundaries.

[SEC. 1125. FACILITIES CONSTRUCTION.]

[(a) The Secretary shall immediately begin to bring all schools, dormitories, and other facilities operated by the Bureau or under contract or grant with the Bureau in connection with the education of Indian children into compliance with all applicable Federal, tribal, or State health and safety standards, whichever provide greater protection (except that the tribal standards to be applied shall be no greater than any otherwise applicable Federal or State standards), with section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), and with the Americans with Disabilities Act of 1990, except that nothing in this section shall require termination of the oper-

ations of any facility which does not comply with such provisions and which is in use on the date of enactment of the Improving America's Schools Act of 1994.

[(b) By January 1, 1996, and at each time thereafter that the annual budget request for Bureau educational services is presented, the Secretary shall submit to the appropriate committees of Congress a detailed plan to bring such facilities into compliance with such standards. Such plan shall include detailed information on the status of each facility's compliance with such standards, specific cost estimates for meeting such standards at each school, and specific time lines for bringing each school into compliance with such standards.

[(c) Within six months of the date of enactment of this Act, the Secretary shall submit to the appropriate committees of Congress, and publish in the Federal Register, the system used to establish priorities for school construction projects. At the time any budget request for school construction is presented, the Secretary shall publish in the Federal Register and submit with the budget request the current list of all school construction priorities.

[(d)(1) A Bureau school may be closed or consolidated, and the programs of a Bureau school may be substantially curtailed, by reason of plant conditions that constitute an immediate hazard to health and safety only if a health and safety officer of the Bureau determines that such conditions exist at the Bureau school.

[(2)(A) In making determinations described in paragraph (1) before July 1, 1989, health and safety officers of the Bureau shall use the health and safety guidelines of the Bureau that were in effect on January 1, 1988.

[(B)(i) If—

[(I) the Secretary fails to publish in the Federal Register in final form before July 1, 1989, and

[(II) action described in paragraph (1) is taken after June 30, 1989, and before the date on which such regulations are published in final form in the Federal Register by reason of the condition of any plant,

an inspection of the condition of such plant shall be conducted by an appropriate tribal, county, municipal, or State health and safety officer to determine whether conditions at such plant constitute an immediate hazard to health and safety. Such inspection shall be completed by not later than the date that is 30 days after the date on which the action described in paragraph (1) is taken.

[(ii) The inspection required under clause (i) shall be conducted by a health and safety officer designated jointly by the Secretary and the tribes affected by the action described in paragraph (1). If the Secretary and such tribes are unable to agree on the designation of the health and safety officer, the Secretary shall designate the health and safety officer and shall provide notice of such designation to each of such tribes before the inspection is conducted by such officer.

[(iii) If the health and safety officer conducting an inspection of a plant required under clause (i) determines that conditions at the plant do not constitute an immediate hazard to health and safety, any consolidation or curtailment that was made by reason of conditions at the plant shall immediately cease and any school closed by reason of conditions at the plant shall be reopened immediately.

[(3) If—

[(A) a Bureau school is temporarily closed or consolidated, or the programs of a Bureau school are substantially curtailed, by reason of plant conditions that constitute an immediate hazard to health and safety, and

[(B) the Secretary estimates that the closure, consolidation, or curtailment will be more than 1 year in duration, the Secretary shall submit to the Congress, by not later than the date that is 6 months after the date on which the closure, consolidation, or curtailment is initiated, a report which sets forth the reasons for such temporary actions and the actions the Secretary is taking to eliminate the conditions that constitute the hazard.

[(e) There are authorized to be appropriated such sums as may be necessary to carry out subsection (a).

[SEC. 1126. BUREAU OF INDIAN AFFAIRS EDUCATION FUNCTIONS.]

[(a) The Secretary shall vest in the Assistant Secretary for Indian Affairs all functions with respect to formulation and establishment of policy and procedure, and supervision of programs and expenditures of Federal funds for the purpose of Indian education administered by the Bureau. The Assistant Secretary shall carry out such functions through the Director of the Office of Indian Education.

[(b) The Director of the Office shall direct and supervise the operations of all personnel directly and substantially involved with provision of education services by the Bureau, including school or institution custodial or maintenance personnel. The Assistant Secretary for Indian Affairs shall provide for the adequate coordination between the affected Bureau Offices and the Office to facilitate the consideration of all contract functions relating to education. Except as required by section 1129, nothing in this Act shall be construed to require the provision of separate support services for Indian education.

[(c) Education personnel who are under the direction and supervision of the Director of the Office in accordance with the first sentence of subsection (b) shall—

[(1) monitor and evaluate Bureau education programs,

[(2) provide all services and support functions for education programs with respect to personnel matters involving staffing actions and functions, and

[(3) provide technical and coordinating assistance in areas such as procurement, contracting, budgeting, personnel, and curriculum.

[(d)(1) The Assistant Secretary shall submit in the annual Budget a plan—

[(A) for school facilities to be constructed under the system required by section 1125(c);

[(B) for establishing priorities among projects and for the improvement and repair of education facilities, which together shall form the basis for the distribution of appropriated funds; and

[(C) including a 5-year plan for capital improvements.

[(2)(A) The Assistant Secretary shall establish a program, including the distribution of appropriated funds, for the operation and maintenance of education facilities. Such program shall include—

[(i) a method of computing the amount necessary for each education facility;

[(ii) similar treatment of all Bureau funded schools;

[(iii) a notice of an allocation of appropriated funds from the Director of the Office directly to the appropriate education line officers; and

[(iv) a system for the conduct of routine preventive maintenance.

[(B) The appropriate education line officers shall make arrangements for the maintenance of education facilities with the local supervisors of the Bureau maintenance personnel who are under the authority of the agency superintendent or area directors, respectively. The local supervisors of Bureau maintenance personnel shall take appropriate action to implement the decisions made by the appropriate education line officers, except that no funds under this part may be authorized for expenditure unless such appropriate education line officer is assured that the necessary maintenance has been, or will be, provided in a reasonable manner. Subject to the requirements of subsection (b) of this section, nothing in this Act shall be construed to require the provision of separate operations and maintenance personnel for the Office.

[(3) The requirements of this subsection shall be implemented not later than July 1, 1995.

[(e) Notwithstanding any other provision of law, the Director shall promulgate guidelines for the establishment of mechanisms for the acceptance of gifts and bequests for the use of, and benefit of, particular schools or designated Bureau operated education programs, including, where appropriate, the establishment and administration of trust funds. When a Bureau operated program is the beneficiary of such a gift or bequest, the Director shall make provisions for monitoring its use, and shall report to the appropriate committees of Congress the amount and terms of such gift or bequest, the use to which such gift or bequest is put, and any positive results achieved by such action.

[(f) For the purpose of this section the term “functions” includes powers and duties.

[SEC. 1127. ALLOTMENT FORMULA.]

[(a)(1) The Secretary shall establish, by regulation adopted in accordance with section 1139, a formula for determining the minimum annual amount of funds necessary to sustain each Bureau funded school. In establishing such formula, the Secretary shall consider—

[(A) the number of eligible Indian students served and size of the school;

[(B) special cost factors, such as—

[(i) the isolation of the school;

[(ii) the need for special staffing, transportation, or educational programs;

[(iii) food and housing costs;

[(iv) maintenance and repair costs associated with the physical condition of the educational facilities;

[(v) special transportation and other costs of isolated and small schools;

[(vi) the costs of boarding arrangements, where determined necessary by a tribal governing body or designated local school board;

[(vii) costs associated with greater lengths of service by educational personnel; and

[(viii) special programs for gifted and talented students;

[(C) the cost of providing academic services which are at least equivalent to those provided by public schools in the State in which the school is located; and

[(D) such other relevant factors as the Secretary determines are appropriate.

[(2) Upon the establishment of the standards required by sections 1121 and 1122, the Secretary shall revise the formula established under this subsection to reflect the cost and funding standards so established. Prior to January 1, 1996, the Secretary shall review the formula established under this section and shall take such steps as may be necessary to increase the availability of counseling services for students in off-reservation boarding schools and other Bureau operated residential facilities. Concurrent with such action, the Secretary shall review the standards established under section 1121 to be certain that adequate provision is made for parental notification regarding, and consent for, such counseling services.

[(b) Notwithstanding any other provisions of law, Federal funds appropriated for the general local operation of Bureau funded schools shall be allotted pro rata in accordance with the formula established under subsection (a).

[(c)(1) For fiscal year 1990, and for each subsequent fiscal year, the Secretary shall adjust the formula established under subsection (a) to—

[(A) use a weighted unit of 1.2 for each eligible Indian student enrolled in the seventh and eighth grades of the school in considering the number of eligible Indian students served by the school;

[(B) consider a school with an enrollment of less than 50 eligible Indian students as having an average daily attendance of 50 eligible Indian students for purposes of implementing the adjustment factor for small schools; and

[(C) take into account the provision of residential services on a less than 9-month basis at a school when the school board and supervisor of the school determine that a less than 9-month basis will be implemented for the school year involved.

[(2)(A) The Secretary shall reserve for national school board training 0.2 percent of the funds appropriated for each fiscal year for distribution under this section. Such training shall be conducted through the same organizations through which, and in the same manner in which, the training was conducted in fiscal year 1992, except that the contracts for distribution of such funds shall require that such funds be distributed by the recipient organizations in a manner that assures the same pro rata share is made available for training for each school board in the system. If the contract for such training is not awarded before May 1 of each fiscal year, the contract under which such training was provided for the fiscal year preceding such fiscal year shall be renewed by the Secretary for such fiscal year. The agenda for the training sessions shall be

established by the school boards through their regional or national organizations.

[(B) For each year in which the Secretary uses a weighted unit formula established under subsection (a) to fund Bureau schools, a Bureau school which generates less than 168 weighted units shall receive an additional 2 weighted units to defray school board activities.

[(C) From the funds allotted in accordance with the formula established under subsection (a) for each Bureau school, the local school board of such school may reserve an amount which does not exceed the greater of—

- [(i) \$5,000, or
- [(ii) the lesser of—

[(I) \$15,000, or

[(II) 1 percent of such allotted funds,

for school board activities for such school, including and notwithstanding any other provision of law, meeting expenses and the cost of membership in, and support of, organizations engaged in activities on behalf of Indian education.

[(3) The Secretary shall adjust the formula established under subsection (a) to use a weighted unit of 2.0 for each eligible Indian student that—

[(A) is gifted and talented, and

[(B) is enrolled in the school on a full-time basis,

in considering the number of eligible Indian students served by the school.

[(4)(A) The Secretary shall adjust the formula established under subsection (a) to use a weighted unit of 0.25 for each eligible Indian student who is enrolled in a year-long credit course in an Indian or Native language as part of the regular curriculum of a school, in considering the number of eligible Indian students served by such school.

[(B) The adjustment required under subparagraph (A) shall be used for such school after—

[(i) the certification of the Indian or Native language curriculum by the school board of such school to the Secretary, together with an estimate of the number of full-time students expected to be enrolled in the curriculum in the second school year following the school year for which the certification is made; and

[(ii) the funds appropriated for allotment under this section are designated by the appropriations Act appropriating such funds as the amount necessary to implement such adjustment at such school without reducing allotments made under this section to any school by virtue of such adjustment.

[(d) The Secretary shall reserve from the funds available for distribution for each fiscal year under this section an amount which, in the aggregate, shall equal 1 percent of the funds available for such purpose for that fiscal year. Such funds shall be used, at the discretion of the Director of the Office, to meet emergencies and unforeseen contingencies affecting the education programs funded under this section. Funds reserved under this subsection may only be expended for education services or programs at a schoolsite (as defined in section 5204(c)(2) of the Tribally Controlled Schools Act of 1988). Funds reserved under this subsection shall remain avail-

able without fiscal year limitation until expended. However, the aggregate amount available from all fiscal years may not exceed 1 percent of the current year funds. Whenever the Secretary makes funds available under this subsection, the Secretary shall report such action to the appropriate committees of Congress within the annual budget submission.

[(e) Supplemental appropriations enacted to meet increased pay costs attributable to school level personnel shall be distributed under this section.

[(f) For the purpose of this section, the term “eligible Indian student” means a student who—

[(1) is a member of or is at least a $\frac{1}{4}$ degree Indian blood descendant of a member of an Indian tribe which is eligible for the special programs and services provided by the United States through the Bureau to Indians because of their status as Indians, and

[(2) resides on or near an Indian reservation or meets the criteria for attendance at a Bureau off-reservation boarding school.

[(g)(1) An eligible Indian student may not be charged tuition for attendance at a Bureau school or contract or grant school. A student attending a Bureau school under paragraph (2)(C) may not be charged tuition.

[(2) The Secretary may permit the attendance at a Bureau school of a student who is not an eligible Indian student if—

[(A) the Secretary determines that the student’s attendance will not adversely affect the school’s program for eligible Indian students because of cost, overcrowding, or violation of standards,

[(B) the school board consents,

[(C) the student is a dependent of a Bureau, Indian Health Service, or tribal government, employee who lives on or near the school site, or

[(D) a tuition is paid for the student that is not more than that charged by the nearest public school district for out-of-district students, is in addition to the school’s allocation under this section.

[(3) The school board of a contract or grant school may permit students who are not eligible Indian students under this subsection to attend its contract school or grant school and any tuition collected for those students is in addition to funding under this section.

[(h) Notwithstanding any other provision of law, at the election of the school board of a Bureau school made at any time during the fiscal year, a portion equal to not more than 15 percent of the funds allocated with respect to a school under this section for any fiscal year shall remain available to the school for expenditure without fiscal year limitation. The Assistant Secretary shall take steps as may be necessary to implement this provision immediately.

[(i) Beginning with academic year 1994–1995, tuition for the out-of-State students boarding at the Richfield Dormitory in Richfield, Utah, who attend Sevier County high schools in Richfield, Utah, shall be paid from the Indian school equalization program funds authorized in this section and section 1130 at a rate not to exceed

the amount per weighted student unit for that year for the instruction of such students. No additional administrative cost funds shall be added to the grant.

[SEC. 1128. ADMINISTRATIVE COST GRANTS.]

[(a)(1) The Secretary shall, subject to the availability of appropriated funds, provide grants to each tribe or tribal organization operating a contract school or grant school in the amount determined under this section with respect to the tribe or tribal organization for the purpose of paying the administrative and indirect costs incurred in operating contract or grant schools in order to—

[(A) enable tribes and tribal organizations operating such schools, without reducing direct program services to the beneficiaries of the program, to provide all related administrative overhead services and operations necessary to meet the requirements of law and prudent management practice, and

[(B) carry out other necessary support functions which would otherwise be provided by the Secretary or other Federal officers or employees, from resources other than direct program funds, in support of comparable Bureau operated programs.

[(2) Amounts appropriated to fund the grants provided under this section shall be in addition to, and shall not reduce, the amounts appropriated for the program being administered by the contract or grant school.

[(b)(1) The amount of the grant provided to each tribe or tribal organization under this section for each fiscal year shall be determined by applying the administrative cost percentage rate of the tribe or tribal organization to the aggregate of the Bureau elementary and secondary functions operated by the tribe or tribal organization for which funds are received from or through the Bureau. The administrative cost percentage rate determined under subsection (c) does not apply to other programs operated by the tribe or tribal organization.

[(2) The Secretary shall—

[(A) reduce the amount of the grant determined under paragraph (1) to the extent that payments for administrative costs are actually received by an Indian tribe or tribal organization under any Federal education program included in the direct cost base of the tribe or tribal organization, and

[(B) take such actions as may be necessary to be reimbursed by any other department or agency of the Federal Government for the portion of grants made under this section for the costs of administering any program for Indians that is funded by appropriations made to such other department or agency.

[(c)(1) For purposes of this section, the administrative cost percentage rate for a contract or grant school for a fiscal year is equal to the percentage determined by dividing—

[(A) the sum of—

[(i) the amount equal to—

[(I) the direct cost base of the tribe or tribal organization for the fiscal year, multiplied by

[(II) the minimum base rate, plus

[(ii) the amount equal to—

[(I) the standard direct cost base, multiplied by

[(II) the maximum base rate, by

[(B) the sum of—

[(i) the direct cost base of the tribe or tribal organization for the fiscal year, plus

[(ii) the standard direct cost base.

[(2) The administrative cost percentage rate shall be determined to the $\frac{1}{100}$ of a decimal point.

[(d)(1)(A) Funds received by a tribe or contract or grant school as grants under this section for tribal elementary or secondary educational programs may be combined by the tribe or contract or grant school into a single administrative cost account without the necessity of maintaining separate funding source accounting.

[(B) Indirect cost funds for programs at the school which share common administrative services with tribal elementary or secondary educational programs may be included in the administrative cost account described in subparagraph (A).

[(2) Funds received as grants under this section with respect to tribal elementary or secondary education programs shall remain available to the contract or grant school without fiscal year limitation and without diminishing the amount of any grants otherwise payable to the school under this section for any fiscal year beginning after the fiscal year for which the grant is provided.

[(3) Funds received as grants under this section for Bureau funded programs operated by a tribe or tribal organization under a contract or agreement shall not be taken into consideration for purposes of indirect cost underrecovery and overrecovery determinations by any Federal agency for any other funds, from whatever source derived.

[(4) In applying this section and section 105 of the Indian Self-Determination and Education Assistance Act with respect to an Indian tribe or tribal organization that—

[(A) receives funds under this section for administrative costs incurred in operating a contract or grant school or a school operated under the Tribally Controlled Schools Act of 1988, and

[(B) operates 1 or more other programs under a contract or grant provided under the Indian Self-Determination and Education Assistance Act,

the Secretary shall ensure that the Indian tribe or tribal organization is provided with the full amount of the administrative costs, and of the indirect costs, that are associated with operating the contract or grant school, a school operated under the Tribally Controlled Schools Act of 1988, and all of such other programs, except that funds appropriated for implementation of this section shall be used only to supply the amount of the grant required to be provided by this section.

[(e) For purposes of this section:

[(1)(A) The term “administrative cost” means the costs of necessary administrative functions which—

[(i) the tribe or tribal organization incurs as a result of operating a tribal elementary or secondary educational program,

[(ii) are not customarily paid by comparable Bureau operated programs out of direct program funds, and

[(iii) are either—

[(I) normally provided for comparable Bureau programs by Federal officials using resources other than Bureau direct program funds, or

[(II) are otherwise required of tribal self-determination program operators by law or prudent management practice.

[(B) The term “administrative cost” may include—

[(i) contract or grant (or other agreement) administration;

[(ii) executive, policy, and corporate leadership and decisionmaking;

[(iii) program planning, development, and management;

[(iv) fiscal, personnel, property, and procurement management;

[(v) related office services and record keeping; and

[(vi) costs of necessary insurance, auditing, legal, safety and security services.

[(2) The term “Bureau elementary and secondary functions” means—

[(A) all functions funded at Bureau schools by the Office;

[(B) all programs—

[(i) funds for which are appropriated to other agencies of the Federal Government, and

[(ii) which are administered for the benefit of Indians through Bureau schools; and

[(C) all operation, maintenance, and repair funds for facilities and government quarters used in the operation or support of elementary and secondary education functions for the benefit of Indians, from whatever source derived.

[(3)(A) Except as otherwise provided in this subparagraph (B), the direct cost base of a tribe or tribal organization for the fiscal year is the aggregate direct cost program funding for all tribal elementary or secondary educational programs operated by the tribe or tribal organization during—

[(i) the second fiscal year preceding such fiscal year, or

[(ii) if such programs have not been operated by the tribe or tribal organization during the 2 preceding fiscal years, the first fiscal year preceding such fiscal year.

[(B) In the case of Bureau elementary or secondary education functions which have not previously been operated by a tribe or tribal organization under contract, grant, or agreement with the Bureau, the direct cost base for the initial year shall be the projected aggregate direct cost program funding for all Bureau elementary and secondary functions to be operated by the tribe or tribal organization during that fiscal year.

[(4) The term “maximum base rate” means 50 percent.

[(5) The term “minimum base rate” means 11 percent.

[(6) The term “standard direct cost base” means \$600,000.

[(7) The term “tribal elementary or secondary educational programs” means all Bureau elementary and secondary functions, together with any other Bureau programs or portions of programs (excluding funds for social services that are appropriated to agencies other than the Bureau and are expended through the Bureau, funds for major subcontracts, construc-

tion, and other major capital expenditures, and unexpended funds carried over from prior years) which share common administrative cost functions, that are operated directly by a tribe or tribal organization under a contract, grant, or agreement with the Bureau.

[(f)(1) Upon the date of enactment of the Indian Education Amendments of 1988, the Secretary shall—

[(A) conduct such studies as may be needed to establish an empirical basis for determining relevant factors substantially affecting the required administrative costs of tribal elementary and secondary educational programs, using the formula set forth in subsection (c), and

[(B) conduct a study to determine—

[(i) a maximum base rate which ensures that the amount of the grants provided under this section will provide adequate (but not excessive) funding of the administrative costs of the smallest tribal elementary or secondary educational programs,

[(ii) a minimum base rate which ensures that the amount of the grants provided under this section will provide adequate (but not excessive) funding of the administrative costs of the largest tribal elementary or secondary educational programs, and

[(iii) a standard direct cost base which is the aggregate direct cost funding level for which the percentage determined under subsection (c) will—

[(I) be equal to the median between the maximum base rate and the minimum base rate, and

[(II) ensure that the amount of the grants provided under this section will provide adequate (but not excessive) funding of the administrative costs of tribal elementary or secondary educational programs closest to the size of the program.

[(2) The studies required under paragraph (1) shall—

[(A) be conducted in full consultation (in accordance with section 1131) with—

[(i) the tribes and tribal organizations that are affected by the application of the formula set forth in subsection (c), and

[(ii) all national and regional Indian organizations of which such tribes and tribal organizations are typically members;

[(B) be conducted onsite with a representative statistical sample of the tribal elementary or secondary educational programs under a contract entered into with a nationally reputable public accounting and business consulting firm;

[(C) take into account the availability of skilled labor, commodities, business and automatic data processing services, related Indian preference and Indian control of education requirements, and any other market factors found substantially to affect the administrative costs and efficiency of each such tribal elementary or secondary educational program studied in order to assure that all required administrative activities can reasonably be delivered in a cost effective manner for each such program, given an administrative cost allowance gen-

erated by the values, percentages, or other factors found in the studies to be relevant in such formula;

[(D) identify, and quantify in terms of percentages of direct program costs, any general factors arising from geographic isolation, or numbers of programs administered, independent of program size factors used to compute a base administrative cost percentage in such formula; and

[(E) identify any other incremental cost factors substantially affecting the costs of required administrative cost functions at any of the tribal elementary or secondary educational programs studied and determine whether the factors are of general applicability to other such programs, and (if so) how the factors may effectively be incorporated into such formula.

[(3) In carrying out the studies required under this subsection, the Secretary shall obtain the input of, and afford an opportunity to participate to, the Inspector General of the Department of the Interior.

[(4) Determinations described in paragraph (2)(C) shall be based on what is pragmatically possible to do at each location studied, given prudent management practice, irrespective of whether required administrative services were actually or fully delivered at these sites, or other services were delivered instead, during the period of the study.

[(5) Upon completion of the studies conducted under paragraph (1), but in no case later than October 1, 1989, the Secretary shall submit to the Congress a report on the findings of the studies, together with determinations based upon such findings that would affect the definitions of terms used in the formula that is set forth in subsection (c).

[(6) The Secretary shall include in the Bureau's justification for each appropriations request for each fiscal year beginning after fiscal year 1989, a projection of the overall costs associated with the formula set forth in subsection (c) for all tribal elementary or secondary educational programs which the Secretary expects to be funded in the fiscal year for which the appropriations are sought.

[(7) For purposes of this subsection, the size of tribal elementary or secondary educational programs is determined by the aggregate direct cost program funding level for all Bureau funded programs which share common administrative cost functions.

[(g)(1) There are authorized to be appropriated for each fiscal year such sums as may be necessary to carry out this section.

[(2) If the total amount of funds necessary to provide grants to tribes and tribal organizations in the amounts determined under subsection (b) for a fiscal year exceeds the amount of funds appropriated to carry out this section for such fiscal year, the Secretary shall reduce the amount of each grant determined under subsection (b) for such fiscal year by an amount that bears the same relationship to such excess as the amount of such grant determined under subsection (b) bears to the total of all grants determined under subsection (b) for all tribes and tribal organizations for such fiscal year.

[(h)(1) Notwithstanding any other provision of this section, the amount of the grants provided under this section for fiscal year 1989 shall—

[(A) in lieu of being determined under subsection (b), be determined for each tribal elementary or secondary educational program on the same basis that indirect costs were determined for such programs for fiscal year 1988, and

[(B) be subject to the provisions of subsection (d).

[(2) Notwithstanding any other provision of this section, the amount of the grant provided under this section for fiscal year 1990 with respect to each tribal elementary and secondary educational program that was operated by a tribe or tribal organization in fiscal year 1989 shall be equal to—

[(A) if the amount of the grant determined under subsection (b) for fiscal year 1990 with respect to such program exceeds the amount received by the tribe or tribal organization with respect to such program for administrative costs for fiscal year 1988 (or fiscal year 1989 if such program was not operated by the tribe or tribal organization during fiscal year 1988), the sum of—

[(i) such amount received, plus

[(ii) $\frac{1}{3}$ of the excess of—

[(I) such amount determined under subsection (b), over

[(II) such amount received, or

[(B) if such amount received exceeds such amount determined under subsection (b), the excess of—

[(i) such amount received, over

[(ii) an amount equal to $\frac{1}{3}$ of the excess of—

[(I) such amount received, over

[(II) such amount determined under subsection (b).

[(3) Notwithstanding any other provision of this section, the amount of the grants provided under this section for fiscal year 1991 with respect to each tribal elementary and secondary educational program that was operated by a tribe or tribal organization in fiscal year 1989 shall be equal to—

[(A) if the amount of the grant determined under subsection (b) for fiscal year 1991 with respect to such program exceeds the amount received by the tribe or tribal organization with respect to such program for administrative costs for fiscal year 1990, the sum of—

[(i) such amount received, plus

[(ii) $\frac{1}{2}$ of the excess of—

[(I) such amount determined under subsection (b), over

[(II) such amount received, or

[(B) if such amount received exceeds such amount determined under subsection (b), the excess of—

[(i) such amount received, over

[(ii) an amount equal to $\frac{1}{2}$ of the excess of—

[(I) such amount received over,

[(II) such amount determined under subsection (b).

[(i) The provisions of this section shall also apply to those schools operating under the Tribally Controlled Schools Act of 1988.

[SEC. 1129. DIVISION OF BUDGET ANALYSIS.

[(a) Within 24 months of the date of enactment of the Improving America's Schools Act of 1994, the Secretary shall establish within the Office a Division of Budget Analysis (hereinafter referred to as

the "Division"). Such Division shall be under the direct supervision and control of the Director of the Office.

[(b) The Division shall have the capacity to conduct such studies, surveys, or other activities as are necessary to gather demographic information on Bureau-funded schools (current and future) and project the amount necessary to provide Indian students in such schools the educational program set forth in this part.

[(c) The Division shall prepare projections on such amounts, along with such other information as the Director of the Office shall require, for each fiscal year beginning after October 1, 1996. The Director of the Office and the Assistant Secretary for Indian Affairs shall use such reports when preparing their annual budget submissions.

[SEC. 1130. UNIFORM DIRECT FUNDING AND SUPPORT.

[(a)(1) Within six months after the date of enactment of the Improving America's Schools Act of 1994, the Secretary shall establish, by regulation adopted in accordance with section 1139, a system for the direct funding and support of all Bureau funded schools. Such system shall allot funds, in accordance with section 1127. All amounts appropriated for distribution under this section may be made available under paragraph (2).

[(2)(A) For the purpose of affording adequate notice of funding available pursuant to the allotments made by section 1127, amounts appropriated in an appropriation Act for any fiscal year shall become available for obligation by the affected schools on July 1 of the fiscal year in which such amounts are appropriated without further action by the Secretary, and shall remain available for obligation through the succeeding fiscal year.

[(B) The Secretary shall, on the basis of the amount appropriated in accordance with this paragraph—

[(i) publish, on July 1 of the fiscal year for which the funds are appropriated, allotments to each affected school made under section 1127 of 85 percent of such appropriation; and

[(ii) publish, not later than September 30 of such fiscal year, the allotments to be made under section 1127 of the remaining 15 percent of such appropriation, adjusted to reflect actual student attendance.

[(3)(A) Notwithstanding any law or regulation, the supervisor of a Bureau school may expend an aggregate of not more than \$35,000 of the amount allotted the school under section 1127 to acquire supplies and equipment for the school without competitive bidding if—

[(i) the cost for any single item purchased does not exceed \$10,000;

[(ii) the school board approves the procurement;

[(iii) the supervisor certifies that the cost is fair and reasonable;

[(iv) the documents relating to the procurement executed by the supervisor or other school staff cite this paragraph as authority for the procurement; and

[(v) the transaction is documented in a journal maintained at the school clearly identifying when the transaction occurred, what was acquired and from whom, the prices paid, the quantities acquired, and any other information the supervisor or school board considers relevant.

[(B) The Director shall be responsible for determining the application of this paragraph, including the authorization of specific individuals to carry out this paragraph, and shall be responsible for the provision of guidelines on the use of this paragraph and adequate training on such guidelines.

[(4) If a sequestration order issued under the Balanced Budget and Emergency Deficit Control Act of 1985 reduces the amount of funds available for allotment under section 1127 for any fiscal year by more than 7 percent of the amount of funds available for allotment under such section during the preceding fiscal year—

[(A) the Secretary, notwithstanding any other law, may use—

[(i) funds appropriated for the operation of any Bureau school that is closed or consolidated, and

[(ii) funds appropriated for any program that has been curtailed at any Bureau school,
to fund allotments made under section 1127, and

[(B) the Secretary may waive the application of the provisions of section 1121(h) with respect to the closure or consolidation of a school, or the curtailment of a program at a school, during such fiscal year if the funds described in clauses (i) and (ii) of subparagraph (A) with respect to such school are used to fund allotments made under section 1127 for such fiscal year.

[(b) In the case of all Bureau schools, allotted funds shall be expended on the basis of local financial plans which shall be prepared by the local school supervisor in active consultation with the local school board for each school, and the local school board for each school shall have the authority to ratify, reject, or amend such financial plan, and expenditures thereunder, and, on its own determination or in response to the supervisor of the school, to revise such financial plan to meet needs not foreseen at the time of preparation of the financial plan. The supervisor shall provide the appropriate union representative of the education employees with copies of proposed draft financial plans and all amendments or modifications thereto, at the same time such copies are submitted to the local school board. The supervisor of the school may appeal any such action of the local school board to the appropriate education line officer of the Bureau agency by filing a written statement describing the action and the reasons the supervisor believes such action should be overturned. A copy of such statement shall be submitted to the local school board and such board shall be afforded an opportunity to respond, in writing, to such appeal. After reviewing such written appeal and response, the appropriate education line officer may, for good cause, overturn the action of the local school board. The appropriate line education officer shall transmit the determination of such appeal in the form of a written opinion to such board and to such supervisor identifying the reasons for overturning such action.

[(c) Funds for self-determination grants under section 103(a)(2) of the Indian Self-Determination and Education Assistance Act shall not be used for providing technical assistance and training in the field of education by the Bureau unless such services are provided in accordance with a plan, agreed to by the tribe or tribes affected and the Bureau, under which control of education pro-

grams is intended to be transferred to such tribe or tribes within a specific period of time negotiated under such agreement. The Secretary may approve applications for funding tribal divisions of education and the development of tribal codes of education from funds appropriated pursuant to section 104(a) of such Act.

[(d) In the exercise of its authority under this section, a local school board may request technical assistance and training from the Secretary, and the Secretary shall, to the greatest extent possible, provide such services, and make appropriate provisions in the budget of the Office for such services.

[(e)(1) A financial plan under subsection (b) for a school may include, at the discretion of the local administrator and the school board of such school, a provision for a summer program of academic and support services for students of the school. Any such program may include activities related to the prevention of alcohol and substance abuse. The Assistant Secretary of Indian Affairs shall provide for the utilization of any such school facility during any summer in which such utilization is requested.

[(2) Notwithstanding any other provision of law, funds authorized under the Act of April 16, 1934 (25 U.S.C. 452 et seq.) and this Act may be used to augment the services provided in each summer program at the option, and under the control, of the tribe or Indian controlled school receiving such funds.

[(3) The Assistant Secretary of Indian Affairs, acting through the Director of the Office, shall provide technical assistance and coordination for any program described in paragraph (1) and shall, to the extent possible, encourage the coordination of such programs with any other summer programs that might benefit Indian youth, regardless of the funding source or administrative entity of any such program.

[(f)(1) From funds allotted to a Bureau school under section 1127, the Secretary shall, if specifically requested by the tribal governing body (within the meaning of section 1121(k)), implement any cooperative agreement entered into between the tribe, the Bureau school board, and the local public school district which meets the requirements of paragraph (2) and involves the school. The tribe, the Bureau school board, and the local public school district shall determine the terms of the agreement. Such agreement may encompass coordination of all or any part of the following:

[(A) Academic program and curriculum, unless the Bureau school is currently accredited by a State or regional accrediting entity and would not continue to be so accredited.

[(B) Support services, including procurement and facilities maintenance.

[(C) Transportation.

[(2) Each agreement entered into pursuant to the authority provided in paragraph (1) shall confer a benefit upon the Bureau school commensurate with the burden assumed, though this requirement shall not be construed so as to require equal expenditures or an exchange of similar services.

[(g) Notwithstanding any other provision of law, where there is agreement on action between the superintendent and the school board of a Bureau funded school, the product or result of a project conducted in whole or in major part by a student may be given to that student upon the completion of such project.

[(h) Notwithstanding any other provision of law, funds received by a Bureau funded school under this title shall not be considered Federal funds for purposes of meeting a matching funds requirement in any Federal program.

[SEC. 1131. POLICY FOR INDIAN CONTROL OF INDIAN EDUCATION.

[(a) It shall be the policy of the Secretary and the Bureau, in carrying out the functions of the Bureau, to facilitate Indian control of Indian affairs in all matters relating to education.

[(b)(1) All actions under this Act shall be done with active consultation with tribes.

[(2) The consultation required under paragraph (1) means a process involving the open discussion and joint deliberation of all options with respect to potential issues or changes between the Bureau and all interested parties. During such discussions and joint deliberations, interested parties (including tribes and school officials) shall be given an opportunity to present issues including proposals regarding changes in current practices or programs which will be considered for future action by the Bureau. All interested parties shall be given an opportunity to participate and discuss the options presented or to present other alternatives, with the views and concerns of the interested parties given effect unless the Secretary determines, from information received or presented by the interested parties during 1 or more of the discussions and deliberations, that there is a substantial reason for another course of action. The Secretary shall submit to any Member of Congress, within 18 days of the receipt of a written request by such Member, a written explanation of any decision made by the Secretary which is not consistent with the views of the interested parties.

[SEC. 1132. EDUCATION PERSONNEL.

[(a)(1) Chapter 51, subchapter III of chapter 53, and chapter 63 of title 5, United States Code, relating to classification, pay, and leave, respectively, and the sections of such title relating to the appointment, promotion, and removal of civil service employees, shall not apply to educators or to education positions (as defined in subsection (n)).

[(2) Paragraph (1) shall take effect 1 year after the date of enactment of this Act.

[(b) Not later than the effective date of subsection (a)(2), the Secretary shall prescribe regulations to carry out this section. Such regulations shall govern—

- [(1) the establishment of education positions,
- [(2) the establishment of qualifications for educators,
- [(3) the fixing of basic compensation for educators and education positions,
- [(4) the appointment of educators,
- [(5) the discharge of educators,
- [(6) the entitlement of educators to compensation,
- [(7) the payment of compensation to educators,
- [(8) the conditions of employment of educators,
- [(9) the length of the school year applicable to education positions described in subsection (n)(1)(A),
- [(10) the leave system for educators, and
- [(11) such other matters as may be appropriate.

[(c)(1) In prescribing regulations to govern the qualifications of educators, the Secretary shall require—

[(A)(i) that lists of qualified and interviewed applicants for education positions be maintained in each agency and area office of the Bureau from among individuals who have applied at the agency or area level for an education position or who have applied at the national level and have indicated in such application an interest in working in certain areas or agencies; and

[(ii) that a list of qualified and interviewed applicants for education positions be maintained in the Office from among individuals who have applied at the national level for an education position and who have expressed interest in working in an education position anywhere in the United States;

[(B) that a local school board shall have the authority to waive on a case-by-case basis, any formal education or degree qualifications established by regulation pursuant to subsection (b)(2), in order for a tribal member to be hired in an education position to teach courses on tribal culture and language and that subject to subsection (d)(2)(A), a determination by a school board that such a person be hired shall be followed by the supervisor; and

[(C) that it shall not be a prerequisite to the employment of an individual in an education position at the local level that such individual's name appear on the national list maintained pursuant to paragraph (1)(A)(ii) or that such individual has applied at the national level for an education position.

[(2) The Secretary may authorize the temporary employment in an education position of an individual who has not met the certification standards established pursuant to regulations, if the Secretary determines that failure to do so would result in that position remaining vacant.

[(d)(1) In prescribing regulations to govern the appointment of educators, the Secretary shall require—

[(A)(i) that educators employed in a school (other than the supervisor of the school) shall be hired by the supervisor of the school unless there are no qualified applicants available, in which case the vacant position shall be filled at the national level from the list maintained pursuant to subsection (c)(1)(A)(ii);

[(ii) each school supervisor shall be hired by the education line officer of the agency office of the Bureau in which the school is located; and

[(iii) educators employed in an agency office of the Bureau shall be hired by the superintendent for education of the agency office;

[(B) that before an individual is employed in an education position in a school by the supervisor of a school (or, with respect to the position of supervisor, by the appropriate agency education line officer), the local school board for the school shall be consulted, and that subject to paragraph (2), a determination by the school board that such individual should or should not be so employed shall be followed by the supervisor (or with respect to the position of supervisor, by the agency superintendent for education); and

[(C) that before an individual may be employed in an education position at the agency level, the appropriate agency school board shall be consulted, and that, subject to paragraph (3), a determination by such school board that such individual should or should not be employed shall be followed by the agency superintendent for education.

[(2)(A) The supervisor of a school may appeal to the appropriate agency education line officer any determination by the local school board for the school that an individual be employed, or not be employed, in an education position in the school (other than that of supervisor) by filing a written statement describing the determination and the reasons the supervisor believes such determination should be overturned. A copy of such statement shall be submitted to the local school board and such board shall be afforded an opportunity to respond, in writing, to such appeal. After reviewing such written appeal and response, the education line officer may, for good cause, overturn the determination of the local school board. The education line officer shall transmit the determination of such appeal in the form of a written opinion to such board and to such supervisor identifying the reasons for overturning such determination.

[(B) The education line officer of an agency office of the Bureau may appeal to the Director of the Office any determination by the local school board for the school that an individual be employed, or not be employed, as the supervisor of a school by filing a written statement describing the determination and the reasons the supervisor believes such determination should be overturned. A copy of such statement shall be submitted to the local school board and such board shall be afforded an opportunity to respond, in writing, to such appeal. After reviewing such written appeal and response, the Director may, for good cause, overturn the determination of the local school board. The Director shall transmit the determination of such appeal in the form of a written opinion to such board and to such education line officer identifying the reasons for overturning such determination.

[(3) The education line officer of an agency office of the Bureau may appeal to the Director of the Office any determination by the agency school board that an individual be employed, or not be employed, in an education position in such agency office by filing a written statement describing the determination and the reasons the supervisor believes such determination should be overturned. A copy of such statement shall be submitted to the agency school board and such board shall be afforded an opportunity to respond, in writing, to such appeal. After reviewing such written appeal and response, the Director may, for good cause, overturn the determination of the agency school board. The Director shall transmit the determination of such appeal in the form of a written opinion to such board and to such education line officer identifying the reasons for overturning such determination.

[(4) Any individual who applies at the local level for an education position shall state on such individual's application whether or not such individual has applied at the national level for an education position in the Bureau. If such individual is employed at the local level, such individual's name shall immediately be forwarded to the Secretary, who shall, as soon as possible but in no event in

more than 30 days, ascertain the accuracy of the statement made by such individual pursuant to the first sentence of this paragraph. If the individual's statement is found to have been false, such individual, at the Secretary's discretion, may be disciplined or discharged. If the individual had applied at the national level for an education position in the Bureau, the appointment of such individual at the local level shall be conditional for a period of 90 days, during which period the Secretary may appoint a more qualified individual (as determined by the Secretary) from the list maintained at the national level pursuant to subsection (c)(1)(A)(ii) to the position to which such individual was appointed.

[(5) Except as expressly provided, nothing in this section shall be construed as conferring upon local school boards, authority over, or control of, educators.

[(e)(1) In prescribing regulations to govern the discharge and conditions of employment of educators, the Secretary shall require—

Upon giving notice of proposed discharge to an educator, the supervisor involved shall immediately notify the local school board for the school of such action. A determination by the local school board that such educator shall not be discharged shall be followed by the supervisor. The supervisor shall have the right to appeal such action to the education line officer of the appropriate agency office of the Bureau. Upon such an appeal, the agency education line officer may, for good cause and in writing to the local school board, overturn the determination of the local school board with respect to the employment of such individual.

[(3) Each local school board for a Bureau school shall have the right—

[(A) to recommend to the supervisor of such school that an educator employed in the school be discharged; and

[(B) to recommend to the education line officer of the appropriate agency office of the Bureau and to the Director of the Office, that the supervisor of the school be discharged.

[(f)(1) Notwithstanding any provision of the Indian preference laws, such laws shall not apply in the case of any personnel action within the purview of this section respecting an applicant or employee not entitled to Indian preference if each tribal organization concerned grants, in writing, a waiver of the application of such laws with respect to such personnel action, if such a waiver is in writing deemed to be a necessity by the tribal organization, except that this paragraph shall in no way relieve the Bureau of the Bureau's responsibility to issue timely and adequate announcements

and advertisements concerning any such personnel action if such action is intended to fill a vacancy (no matter how such vacancy is created).

[(2) For purposes of this subsection, the term “tribal organization” means—

[(A) the recognized governing body of any Indian tribe, band, nation, pueblo, or other organized community, including a Native village (as defined in section 3(c) of the Alaska Native Claims Settlement Act (43 U.S.C. 1602(c); 85 Stat. 688)); or

[(B) in connection with any personnel action referred to in this subsection, any local school board as defined in section 1146, and which has been delegated by such governing body the authority to grant a waiver under such subsection with respect to such personnel action.

[(3) The term “Indian preference laws” means section 12 of the Act of June 18, 1934 (25 U.S.C. 472; 48 Stat. 986) or any other provision of law granting a preference to Indians in promotions and other personnel actions, except that such term shall not be considered to include section 7(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450e(b)).

[(g) Subject to the authority of the Office of Personnel Management to determine finally the applicability of chapter 51 of title 5, United States Code, to specific positions and employees in the executive branch, the Secretary shall determine in accordance with subsection (a)(1) the applicability or inapplicability of such chapter to positions and employees in the Bureau.

[(h)(1)(A) Except as otherwise provided in this section, the Secretary shall fix the basic compensation or annual salary rate for educators and education positions at rates comparable to the rates in effect under the General Schedule for individuals with comparable qualifications, and holding comparable positions, to whom chapter 51 of title 5, United States Code, is applicable or on the basis of the Federal Wage System schedule in effect for the locality.

[(B) By not later than October 28, 1988, the Secretary shall establish, for contracts for the 1991–1992 academic year, and thereafter, the rates of basic compensation, or annual salary rates, for the positions of teachers and counselors (including dormitory counselors and home-living counselors) at the rates of basic compensation applicable (on the date of enactment of such amendments and thereafter) to comparable positions in overseas schools under the Defense Department Overseas Teachers Pay and Personnel Practices Act, unless the Secretary establishes such rates within such 6-month period through collective bargaining with the appropriate union representative of the education employees that is recognized by the Bureau.

[(C) By not later than October 28, 1988, the Secretary shall establish the rates of basic compensation or annual salary rates for the positions of teachers and counselors (including dormitory and home-living counselors)—

[(i) for contracts for the 1989–1990 academic year, at rates which reflect $\frac{1}{3}$ of the changes in the rates applicable to such positions on April 28, 1988, that must be made to conform the rates to the rates established under subparagraph (B) for such positions for contracts for the 1991–1992 academic year, and

[(ii) for contracts for the 1990–1991 academic year, at rates which reflect $\frac{2}{3}$ of such changes.

[(D) The establishment of rates of basic compensation and annual salary rates by the Secretary under subparagraphs (B) and (C) shall not preclude the use of regulations and procedures used by the Bureau before the enactment of the Indian Education Amendments of 1988 in making determinations regarding promotions and advancements through levels of pay that are based on the merit, education, experience, or tenure of the educator.

[(E)(i) Except as provided in clause (ii), the establishment of rates of basic compensation and annual salary rates by the Secretary under subparagraphs (B) and (C) shall not affect the continued employment or compensation of an educator who was employed in an education position on October 31, 1979, and who did not make the election under paragraph (2) of subsection (o).

[(ii) Any individual described in clause (i) may, during the 5-year period beginning on the date on which the Secretary establishes rates of basic compensation and annual salary rates under subparagraph (B), make an irrevocable election to have the basic compensation rate or annual salary rate of such individual determined in accordance with this paragraph.

[(iii) If an individual makes the election described in clause (ii), such election shall not affect the application to the individual of the same retirement system and leave system that applies to the individual during the fiscal year preceding the fiscal year in which such election is made, except that the individual must use leave accrued during a contract period by the end of that contract period.

[(F) The President shall include with the budget submitted under section 1105 of title 31, United States Code, for each of the fiscal years 1990, 1991, and 1992 a written statement by the Secretary which specifies—

[(i) the amount of funds the Secretary needs to pay basic compensation and the annual salaries of educators for such fiscal year, and

[(ii) the amount of funds the Secretary estimates would be needed to pay basic compensation and the annual salaries of educators for such fiscal year if the amendments made to this paragraph by the Indian Education Amendments of 1988 had not been enacted.

[(2) Each educator employed in an education position in Alaska shall be paid a cost-of-living allowance equal to 25 percent of the rate of basic compensation to which such educator is entitled.

[(3)(A) The Secretary may pay a postdifferential not to exceed 25 percent of the rate of basic compensation, on the basis of conditions of environment or work which warrant additional pay as a recruitment and retention incentive.

[(B)(i) Upon the request of the supervisor and the local school board of a Bureau school, the Secretary shall grant the supervisor of the school authorization to provide 1 or more post differentials under subparagraph (A) unless the Secretary determines for clear and convincing reasons (and advises the board in writing of those reasons) that certain of the requested post differentials should be disapproved or decreased because there is no disparity of compensation for the involved employees or positions in the Bureau school, as compared with the nearest public school, that is either—

[(I) at least 5 percent, or

[(II) less than 5 percent and affects the recruitment or retention of employees at the school.

[(ii) The request under clause (i) shall be deemed granted as requested at the end of the 60th day after the request is received in the Central Office of the Bureau unless before that time the request is approved, approved with modification, or disapproved by the Secretary.

[(iii) The Secretary or the supervisor of a Bureau school may discontinue or decrease a post differential authorized by reason of this subparagraph at the beginning of a school year after either—

[(I) the local school board requests that such differential be discontinued or decreased, or

[(II) the Secretary or the supervisor determines for clear and convincing reasons (and advises the board in writing of those reasons) that there is no disparity of compensation that would affect the recruitment or retention of employees at the school after the differential is discontinued or decreased.

[(i) Any individual—

[(1) who on the date of enactment of this Act is holding a position which is determined under subsection (f) to be an education position and who elects under subsection (o)(2) to be covered under the provisions of this section, or

[(2) who is an employee of the Federal Government or the municipal government of the District of Columbia and is transferred, promoted, or reappointed, without break in service, from a position under a different leave system to an education position,

shall be credited for the purpose of the leave system provided under regulations prescribed pursuant to subsection (b)(10), with the annual and sick leave to such individual's credit immediately before the effective date of such election, transfer, promotion, or reappointment.

[(j) Upon termination of employment with the Bureau, any annual leave remaining to the credit of an individual within the purview of this section shall be liquidated in accordance with sections 5551(a) and 6306 of title 5, United States Code, except that leave earned or accrued under regulations prescribed pursuant to subsection (b)(10) shall not be so liquidated.

[(k) In the case of any educator who is transferred, promoted, or reappointed, without break in service, to a position in the Federal Government under a different leave system, any remaining leave to the credit of such person earned or credited under the regulations prescribed pursuant to subsection (b)(10) shall be transferred to such person's credit in the employing agency on an adjusted basis in accordance with regulations which shall be prescribed by the Office of Personnel Management.

[(l) An educator who voluntarily terminates employment with the Bureau before the expiration of the existing employment contract between such educator and the Bureau shall not be eligible to be employed in another education position in the Bureau during the remainder of the term of such contract.

[(m) In the case of any educator employed in an education position described in subsection (n)(1)(A) who—

[(1) is employed at the close of a school year,

[(2) agrees in writing to serve in such a position for the next school year, and

[(3) is employed in another position during the recess period immediately preceding such next school year, or during such recess period receives additional compensation referred to in section 5533 of title 5, United States Code, relating to dual compensation, shall not apply to such educator by reason of any such employment during a recess period for any such receipt of additional compensation.

[(A) the supervisor, with the approval of the local school board (or of the education line officer upon appeal under paragraph (2)), of the Bureau school at which such educator provides services determines that a longer period of furlough is necessary due to an insufficient amount of funds available for personnel compensation at such school, as determined under the financial plan process as determined under section 1130(b) of this Act, and

[(B) all educators (other than principals and clerical employees) providing services at such Bureau school are placed on furloughs of equal length, except that the supervisor, with the approval of the local school board (or of the agency education line officer upon appeal under paragraph (2)), may continue 1 or more educators in pay status if—

[(i) such educators are needed to operate summer programs, attend summer training sessions, or participate in special activities including curriculum development committees; and

[(2) The supervisor of a Bureau school may appeal to the appropriate agency education line officer any refusal by the local school board to approve any determination of the supervisor that is described in paragraph (1)(A) by filing a written statement describing the determination and the reasons the supervisor believes such determination should be approved. A copy of such statement shall be submitted to the local school board and such board shall be afforded an opportunity to respond, in writing, to such appeal. The Secretary shall cause such revisions to be published in the Federal Register.

Nothing in this section shall require termination of the operations of any facility which does not comply with such provisions and which is in use on the date of the enactment of the No Child Left Behind Act of 2001.

(b) *COMPLIANCE PLAN.*—At the time that the annual budget request for Bureau educational services is presented, the Secretary shall submit to the appropriate committees of Congress a detailed plan to bring all facilities covered under subsection (a) of this section into compliance with the standards referred to in subsection (a). (E) cause the final list to be published in the Federal Register.

(d) *HAZARDOUS CONDITION AT BUREAU SCHOOL.*—

(1) *CLOSURE OR CONSOLIDATION.*—A Bureau funded school may be closed or consolidated, and the programs of a Bureau funded school may be substantially curtailed by reason of plant conditions that constitute an immediate hazard to health and safety only if a health and safety officer of the Bureau determines that such conditions exist at the Bureau funded school.

(2) *INSPECTION.*—(A) After making a determination described in paragraph (1), the Bureau health and safety officer shall conduct an inspection of the condition of such plant accompanied by an appropriate tribal, county, municipal, or State health and safety officer in order to determine whether conditions at such plant constitute an immediate hazard to health and safety. Such inspection shall be completed by not later than the date that is 30 days after the date on which the action described in paragraph (1) is taken. No further negative action may be taken unless the findings are concurred in by the second, non-Bureau of Indian Affairs inspector.

(B) If the health and safety officer conducting the inspection of a plant required under subparagraph (A) determines that conditions at the plant do not constitute an immediate hazard to health and safety, any consolidation or curtailment that was made under paragraph (1) shall immediately cease and any school closed by reason of conditions at the plant shall be reopened immediately.

(C) If a Bureau funded school is temporarily closed or consolidated or the programs of a Bureau funded school are substantially curtailed under this subsection and the Secretary determines that the closure, consolidation, or curtailment will exceed 1 year, the Secretary shall submit to the Congress, by not later than 6 months after the date on which the closure, consolidation, or curtailment was initiated, a report which sets forth

the reasons for such temporary actions, the actions the Secretary is taking to eliminate the conditions that constitute the hazard, and an estimated date by which such actions will be concluded.

(e) FUNDING REQUIREMENT.—

(1) DISTRIBUTION OF FUNDS.—Beginning with the fiscal year following the year of the date of the enactment of the No Child Left Behind Act of 2001, all funds appropriated for the operations and maintenance of Bureau funded schools shall be distributed by formula to the schools. No funds from this account may be retained or segregated by the Bureau to pay for administrative or other costs of any facilities branch or office, at any level of the Bureau.

(2) REQUIREMENTS FOR CERTAIN USES.—No funds shall be withheld from the distribution to the budget of any school operated under contract or grant by the Bureau for maintenance or any other facilities or road related purpose, unless such school has consented, as a modification to the contract or in writing for grants schools, to the withholding of such funds, including the amount thereof, the purpose for which the funds will be used, and the timeline for the services to be provided. The school may, at the end of any fiscal year, cancel an agreement under this paragraph upon giving the Bureau 30 days notice of its intent to do so.

(B) *Considers a school with an enrollment of less than 50 eligible Indian students as having an average daily attendance of 50 eligible Indian students for purposes of implementing the adjustment factor for small schools.*

(C) *Takes into account the provision of residential services on less than a 9-month basis at a school when the school board and supervisor of the school determine that a less than 9-month basis will be implemented for the school year involved.*

(D) *Uses a weighted unit of 2.0 for each eligible Indian student that—*

(i) is gifted and talented; and

(ii) is enrolled in the school on a full-time basis, in considering the number of eligible Indian students served by the school.

(E) *Uses a weighted unit of 0.25 for each eligible Indian student who is enrolled in a yearlong credit course in an Indian or Native language as part of the regular curriculum of a school, in considering the number of eligible Indian students served by such school. The adjustment required under this subparagraph shall be used for such school after—*

(i) the certification of the Indian or Native language curriculum by the school board of such school to the Secretary, together with an estimate of the number of full-time students expected to be enrolled in the curriculum in the second school year for which the certification is made; and

(ii) the funds appropriated for allotment under this section are designated by the appropriations Act appropriating such funds as the amount necessary to implement such adjustment at such school without reducing allotments made under this section to any school by virtue of such adjustment.

(2) *RESERVATION OF AMOUNT.*—

(A) *IN GENERAL.*—*From the funds allotted in accordance with the formula established under subsection (a) for each Bureau school, the local school board of such school may reserve an amount which does not exceed the greater of—*

Such training may include legal issues pertaining to schools funded by the Bureau, legal issues pertaining to school boards, ethics, and other topics deemed appropriate by the school board.

(d) RESERVATION OF AMOUNT FOR EMERGENCIES.—The Secretary shall reserve from the funds available for distribution for each fiscal year under this section an amount which, in the aggregate, shall equal 1 percent of the funds available for such purpose for that fiscal year. (B) the school board consents;

(C) the student is a dependent of a Bureau, Indian Health Service, or tribal government employee who lives on or near the school site; or

(A) enable tribes and tribal organizations operating such schools, without reducing direct program services to the beneficiaries of the program, to provide all related administrative overhead services and operations necessary to meet the requirements of law and prudent management practice; and

(B) carry out other necessary support functions which would otherwise be provided by the Secretary or other Federal officers or employees, from resources other than direct program funds, in support of comparable Bureau operated programs.

(2) *EFFECT UPON APPROPRIATED AMOUNTS.*—Amounts appropriated to fund the grants provided under this section shall be in addition to, and shall not reduce, the amounts appropriated for the program being administered by the contract or grant school.

(b) *DETERMINATION OF GRANT AMOUNT.*—

(1) *IN GENERAL.*—The amount of the grant provided to each tribe or tribal organization under this section for each fiscal year shall be determined by applying the administrative cost percentage rate of the tribe or tribal organization to the aggregate of the Bureau elementary and secondary functions operated by the tribe or tribal organization for which funds are received from or through the Bureau. The administrative cost percentage rate determined under subsection (c) does not apply to other programs operated by the tribe or tribal organization.

(2) *DIRECT COST BASE FUNDS.*—The Secretary shall—

(A) reduce the amount of the grant determined under paragraph (1) to the extent that payments for administrative costs are actually received by an Indian tribe or tribal organization under any Federal education program included in the direct cost base of the tribe or tribal organization; and

(B) take such actions as may be necessary to be reimbursed by any other department or agency of the Federal Government for the portion of grants made under this section for the costs of administering any program for Indians that is funded by appropriations made to such other department or agency.

(c) *ADMINISTRATIVE COST PERCENTAGE RATE.*—

(1) *IN GENERAL.*—For purposes of this section, the administrative cost percentage rate for a contract or grant school for a fiscal year is equal to the percentage determined by dividing—

(i) the amount equal to—

(I) the direct cost base of the tribe or tribal organization for the fiscal year, multiplied by

(II) the minimum base rate; plus

(ii) the amount equal to—

(I) the standard direct cost base; multiplied by

(II) the maximum base rate; by

(B) the sum of—

(i) the direct cost base of the tribe or tribal organization for the fiscal year; plus

(ii) the standard direct cost base.

(2) *ROUNDING.*—The administrative cost percentage rate shall be determined to the $\frac{1}{100}$ of a decimal point.

(d) *COMBINING FUNDS.*—

(1) *IN GENERAL.*—Funds received by a tribe or contract or grant school as grants under this section for tribal elementary or secondary educational programs may be combined by the

tribe or contract or grant school into a single administrative cost account without the necessity of maintaining separate funding source accounting.

(e) *AVAILABILITY OF FUNDS.*—Funds received as grants under this section with respect to tribal elementary or secondary education programs shall remain available to the contract or grant school without fiscal year limitation and without diminishing the amount of any grants otherwise payable to the school under this section for any fiscal year beginning after the fiscal year for which the grant is provided.

(f) *TREATMENT OF FUNDS.*—Funds received as grants under this section for Bureau funded programs operated by a tribe or tribal organization under a contract or agreement shall not be taken into consideration for purposes of indirect cost underrecovery and overrecovery determinations by any Federal agency for any other funds, from whatever source derived.

(g) *TREATMENT OF ENTITY OPERATING OTHER PROGRAMS.*—In applying this section and section 105 of the Indian Self-Determination and Education Assistance Act with respect to an Indian tribe or tribal organization that—

(1) receives funds under this section for administrative costs incurred in operating a contract or grant school or a school operated under the Tribally Controlled Schools Act of 1988; and

(2) operates one or more other programs under a contract or grant provided under the Indian Self-Determination and Education Assistance Act,

the Secretary shall ensure that the Indian tribe or tribal organization is provided with the full amount of the administrative costs that are associated with operating the contract or grant school, and of the indirect costs, that are associated with all of such other programs, provided that funds appropriated for implementation of this section shall be used only to supply the amount of the grant required to be provided by this section.

(i) *STUDIES FOR DETERMINATION OF FACTORS AFFECTING COSTS; BASE RATES LIMITS; STANDARD DIRECT COST BASE; REPORT TO CONGRESS.*—

(1) *STUDIES.*—Not later than 120 days after the date of the enactment of the No Child Left Behind Act of 2001, the Director of the Office of Indian Education Programs shall—

- (A) conduct such studies as may be needed to establish an empirical basis for determining relevant factors substantially affecting required administrative costs of tribal elementary and secondary education programs, using the formula set forth in subsection (c); and
- (B) conduct a study to determine—

- (i) a maximum base rate which ensures that the amount of the grants provided under this section will provide adequate (but not excessive) funding of the administrative costs of the smallest tribal elementary or secondary educational programs;

- (ii) a minimum base rate which ensures that the amount of the grants provided under this section will provide adequate (but not excessive) funding of the administrative costs of the largest tribal elementary or secondary educational programs; and

- (iii) a standard direct cost base which is the aggregate direct cost funding level for which the percentage determined under subsection (c) will—

- (I) be equal to the median between the maximum base rate and the minimum base rate; and

- (II) ensure that the amount of the grants provided under this section will provide adequate (but not excessive) funding of the administrative costs of tribal elementary or secondary educational programs closest to the size of the program.

(2) *GUIDELINES.*—The studies required under paragraph (1) shall—

- (A) be conducted in full consultation (in accordance with section 1131) with—

- (i) the tribes and tribal organizations that are affected by the application of the formula set forth in subsection (c); and

- (ii) all national and regional Indian organizations of which such tribes and tribal organizations are typically members;

- (B) be conducted onsite with a representative statistical sample of the tribal elementary or secondary educational programs under a contract entered into with a nationally reputable public accounting and business consulting firm;

- (C) take into account the availability of skilled labor; commodities, business and automatic data processing services, related Indian preference and Indian control of education requirements, and any other market factors found substantially to affect the administrative costs and efficiency of each such tribal elementary or secondary educational program studied in order to assure that all required administrative activities can reasonably be delivered in a cost effective manner for each such program, given an

administrative cost allowance generated by the values, percentages, or other factors found in the studies to be relevant in such formula;

(D) identify, and quantify in terms of percentages of direct program costs, any general factors arising from geographic isolation, or numbers of programs administered, independent of program size factors used to compute a base administrative cost percentage in such formula; and

(E) identify any other incremental cost factors substantially affecting the costs of required administrative cost functions at any of the tribal elementary or secondary educational programs studied and determine whether the factors are of general applicability to other such programs, and (if so) how the factors may effectively be incorporated into such formula.

(3) CONSULTATION WITH INSPECTOR GENERAL.—In carrying out the studies required under this subsection, the Director shall obtain the input of, and afford an opportunity to participate to, the Inspector General of the Department of the Interior.

(4) CONSIDERATION OF DELIVERY OF ADMINISTRATIVE SERVICES.—Determinations described in paragraph (2)(C) shall be based on what is practicable at each location studied, given prudent management practice, irrespective of whether required administrative services were actually or fully delivered at these sites, or whether other services were delivered instead, during the period of the study.

(5) REPORT.—Upon completion of the studies conducted under paragraph (1), the Director shall submit to Congress a report on the findings of the studies, together with determinations based upon such studies that would affect the definitions set forth under subsection (e) that are used in the formula set forth in subsection (c).

(6) PROJECTION OF COSTS.—The Secretary shall include in the Bureau's justification for each appropriations request beginning in the first fiscal year after the completion of the studies conducted under paragraph (1), a projection of the overall costs associated with the formula set forth in subsection (c) for all tribal elementary or secondary education programs which the Secretary expects to be funded in the fiscal year for which the appropriations are sought.

(7) DETERMINATION OF PROGRAM SIZE.—For purposes of this subsection, the size of tribal elementary or secondary educational programs is determined by the aggregate direct cost program funding level for all Bureau funded programs which share common administrative cost functions.

(j) AUTHORIZATION OF APPROPRIATIONS.—

(1) IN GENERAL.—There are authorized to be appropriated such sums as necessary to carry out this section.

(2) REDUCTIONS.—If the total amount of funds necessary to provide grants to tribes and tribal organizations in the amounts determined under subsection (b) for a fiscal year exceeds the amount of funds appropriated to carry out this section for such fiscal year, the Secretary shall reduce the amount of each grant determined under subsection (b) for such fiscal year by an amount that bears the same relationship to such excess as the

amount of such grants determined under subsection (b) bears to the total of all grants determined under subsection (b) section for all tribes and tribal organizations for such fiscal year.

(k) APPLICABILITY TO SCHOOLS OPERATING UNDER TRIBALLY CONTROLLED SCHOOLS ACT OF 1988.—The provisions of this section shall also apply to those schools operating under the Tribally Controlled Schools Act of 1988.

(c) ANNUAL REPORTS.—Not later than the date that the Assistant Secretary for Indian Affairs makes the annual budget submission, for each fiscal year after the date of the enactment of the No Child Left Behind Act of 2001, the Director of the Office shall submit to the appropriate committees of Congress (including the Appropriations committees), all Bureau funded schools, and the tribal governing bodies of such schools, a report which shall contain—

(1) projections, based upon the information gathered pursuant to subparagraph (b) and any other relevant information, of amounts necessary to provide Indian students in Bureau funded schools the educational program set forth in this part;

(2) a description of the methods and formulas used to calculate the amounts projected pursuant to paragraph (1); and

(3) such other information as the Director of the Office considers appropriate.

(2) TIMING FOR USE OF FUNDS.—(A) For the purposes of affording adequate notice of funding available pursuant to the allotments made under section 1127, amounts appropriated in an appropriations Act for any fiscal year shall become available for obligation by the affected schools on July 1 of the fiscal year in which such amounts are appropriated without further action by

the Secretary, and shall remain available for obligation through the succeeding fiscal year.

(B) The Secretary shall, on the basis of the amount appropriated in accordance with this paragraph—

(i) publish, not later than July 1 of the fiscal year for which the funds are appropriated, allotments to each affected school made under section 1127 of 85 percent of such appropriation; and

(ii) publish, not later than September 30 of such fiscal year, the allotments to be made under section 1127 of the remaining 15 percent of such appropriation, adjusted to reflect the actual student attendance.

(3) *LIMITATION.*—(A) Notwithstanding any other provision of law or regulation, the supervisor of a Bureau funded school may expend an aggregate of not more than \$50,000 of the amount allotted the school under section 1127 to acquire materials, supplies, equipment, services, operation, and maintenance for the school without competitive bidding if—

(i) the cost for any single item purchased does not exceed \$15,000;

(ii) the school board approves the procurement;

(iii) the supervisor certifies that the cost is fair and reasonable;

(iv) the documents relating to the procurement executed by the supervisor or other school staff cite this paragraph as authority for the procurement; and

(v) the transaction is documented in a journal maintained at the school clearly identifying when the transaction occurred, what was acquired and from whom, the price paid, the quantities acquired, and any other information the supervisor or school board considers relevant.

(B) *the Secretary may waive the application of the provisions of section 1121(h) with respect to the closure or consolidation of a school, or the curtailment of a program at a school, during such fiscal year if the funds described in clauses (i) and (ii) of subparagraph (A) with respect to such school are used to fund allotments made under section 1127 for such fiscal year.*

(b) **LOCAL FINANCIAL PLANS FOR EXPENDITURE OF FUNDS.—**

(1) **PLAN REQUIRED.**—*In the case of all Bureau operated schools, allotted funds shall be expended on the basis of local financial plans which ensure meeting the accreditation requirements or standards for the school established pursuant to section 1121 and which shall be prepared by the local school supervisor in active consultation with the local school board for each school. The local school board for each school shall have the authority to ratify, reject, or amend such financial plan, and expenditures thereunder, and, on its own determination or in response to the supervisor of the school, to revise such financial plan to meet needs not foreseen at the time of preparation of the financial plan.*

(2) **The supervisor—**

(A) *shall put into effect the decisions of the school board;*

(B) *shall provide the appropriate local union representative of the education employees with copies of proposed draft financial plans and all amendments or modifications thereto, at the same time such copies are submitted to the local school board; and*

(C) *may appeal any such action of the local school board to the appropriate education line officer of the Bureau agency by filing a written statement describing the action and the reasons the supervisor believes such action should be overturned. A copy of such statement shall be submitted to the local school board and such board shall be afforded an opportunity to respond, in writing, to such appeal. After reviewing such written appeal and response, the appropriate education line officer may, for good cause, overturn the action of the local school board. The appropriate education line officer shall transmit the determination of such appeal in the form of a written opinion to such board and to such supervisor identifying the reasons for overturning such action.*

(c) **USE OF SELF-DETERMINATION GRANTS FUNDS.**—*Funds for self-determination grants under section 103(a)(2) of the Indian Self-Determination and Education Assistance Act shall not be used for providing technical assistance and training in the field of education by the Bureau unless such services are provided in accordance with a plan, agreed to by the tribe or tribes affected and the Bureau, under which control of education programs is intended to be transferred to such tribe or tribes within a specific period of time negotiated under such agreement. The Secretary may approve applications for funding tribal divisions of education and development of tribal codes of education from funds appropriated pursuant to section 104(a) of such Act.*

(d) **TECHNICAL ASSISTANCE AND TRAINING.**—*In the exercise of its authority under this section, a local school board may request tech-*

(e) **SUMMER PROGRAM OF ACADEMIC AND SUPPORT SERVICES.**—

(1) **IN GENERAL.**—A financial plan under subsection (b) for a school may include, at the discretion of the local administrator and the school board of such school, a provision for a summer program of academic and support services for students of the school. Any such program may include activities related to the prevention of alcohol and substance abuse. The Assistant Secretary for Indian Affairs shall provide for the utilization of any such school facility during any summer in which such utilization is requested.

(2) **USE OF OTHER FUNDS.**—Notwithstanding any other provision of law, funds authorized under the Act of April 16, 1934, and this Act may be used to augment the services provided in each summer program at the option, and under the control, of the tribe or Indian controlled school receiving such funds.

(3) **TECHNICAL ASSISTANCE AND PROGRAM COORDINATION.**—The Assistant Secretary for Indian Affairs, acting through the Director of the Office, shall provide technical assistance and coordination for any program described in paragraph (1) and shall, to the extent possible, encourage the coordination of such programs with any other summer programs that might benefit Indian youth, regardless of the funding source or administrative entity of any such program.

(f) **COOPERATIVE AGREEMENTS.**—

(1) **IN GENERAL.**—From funds allotted to a Bureau school under section 1127, the Secretary shall, if specifically requested by the tribal governing body (as defined in section 1141), implement any cooperative agreement entered into between the tribe, the Bureau school board, and the local public school district which meets the requirements of paragraph (2) and involves the school. The tribe, the Bureau school board, and the local public school district shall determine the terms of the agreement. Such agreement may encompass coordination of all or any part of the following:

(A) Academic program and curriculum, unless the Bureau school is currently accredited by a State or regional accrediting entity and would not continue to be so accredited.

(B) Support services, including procurement and facilities maintenance.

(C) Transportation.

(2) **EQUAL BENEFIT AND BURDEN.**—Each agreement entered into pursuant to the authority provided in paragraph (1) shall confer a benefit upon the Bureau school commensurate with the burden assumed, though this requirement shall not be construed so as to require equal expenditures or an exchange of similar services.

(g) **PRODUCT OR RESULT OF STUDENT PROJECTS.**—Notwithstanding any other provision of law, where there is agreement on action between the superintendent and the school board of a Bureau funded school, the product or result of a project conducted in whole

or in major part by a student may be given to that student upon the completion of such project.

(h) **NOT CONSIDERED FEDERAL FUNDS FOR MATCHING REQUIREMENTS.**—Notwithstanding any other provision of law, funds received by a Bureau funded school under this part shall not be considered Federal funds for the purposes of meeting a matching funds requirement for any Federal program.

All interested parties shall be given an opportunity to participate and discuss the options presented or to present alternatives, with the views and concerns of the interested parties given effect unless the Secretary determines, from information available from or presented by the interested parties during one or more of the discussions and deliberations, that there is a substantial reason for another course of action. The Secretary shall submit to any Member of Congress, within 18 days of the receipt of a written request by such Member, a written explanation of any decision made by the Secretary which is not consistent with the views of the interested parties.

(1) *IN GENERAL.*—(A) Except as otherwise provided in this section, the Secretary shall fix the basic compensation for educators and education positions at rates in effect under the General Schedule for individuals with comparable qualifications, and holding comparable positions, to whom chapter 51 of title 5, United States Code, is applicable or on the basis of the Federal Wage System schedule in effect for the locality, and for the comparable positions, the rates of compensation in effect for the senior executive service.

(B) The Secretary shall establish the rate of basic compensation, or annual salary rates, for the positions of teachers and counselors (including dormitory counselors and home-living counselors) at the rates of basic compensation applicable (on the date of the enactment of the No Child Left Behind Act of 2001 and thereafter) to comparable positions in the overseas schools under the Defense Department Overseas Teachers Pay Act. The Secretary shall allow the local school boards authority to implement only the aspects of the Defense Department Overseas Teacher pay provisions that are considered essential for recruitment and retention. Implementation of such provisions shall not be construed to require the implementation of the Act in its entirety.

(C)(i) Beginning with the fiscal year following the date of the enactment of the No Child Left Behind Act of 2001, each school board may set the rate of compensation or annual salary rate for teachers and counselors (including academic counselors) who are new hires at the school and who have not worked at the school on the date of implementation of this provision, at rates consistent with the rates paid for individuals in the same positions, with the same tenure and training, in any other school within whose boundaries the Bureau school lies. In instances where the adoption of such rates cause a reduction in the payment of compensation from that which was in effect for the fiscal year following the date of the enactment of the No Child Left Behind Act of 2001, the new rate may be applied to the compensation of employees of the school who worked at the school on or after the date of the enactment of that Act by applying those rates to each contract renewal such that the reduction takes effect in three equal installments. Where adoption of such rates lead to an increase in the payment of compensation from that which was in effect for the fiscal year following the date of the enactment of the No Child Left Behind Act of 2001, the school board may make such rates applicable at the next contract renewal such that either—

(I) the increase occurs in its entirety; or

(II) the increase is applied in three equal installments.

(ii) The establishment of rates of basic compensation and annual salary rates under subparagraphs (B) and (C) shall not

preclude the use of regulations and procedures used by the Bureau prior to April 28, 1988, in making determinations regarding promotions and advancements through levels of pay that are based on the merit, education, experience, or tenure of the educator.

(D) The establishment of rates of basic compensation and annual salary rates under subparagraphs (B) and (C) shall not affect the continued employment or compensation of an educator who was employed in an education position on October 31, 1979, and who did not make an election under subsection (p) is in effect on January 1, 1990.

(2) POST-DIFFERENTIAL RATES.—(A) The Secretary may pay a post-differential rate not to exceed 25 percent of the rate of basic compensation, on the basis of conditions of environment or work which warrant additional pay as a recruitment and retention incentive.

(B)(i) Upon the request of the supervisor and the local school board of a Bureau school, the Secretary shall grant the supervisor of the school authorization to provide one or more post-differentials under subparagraph (A) unless the Secretary determines for clear and convincing reasons (and advises the board in writing of those reasons) that certain of the requested post-differentials should be disapproved or decreased because there is no disparity of compensation for the involved employees or positions in the Bureau school, as compared with the nearest public school, that is either—

(I) at least 5 percent; or

(II) less than 5 percent and affects the recruitment or retention of employees at the school.

(ii) A request under clause (i) shall be deemed granted at the end of the 60th day after the request is received in the Central Office of the Bureau unless before that time the request is approved, approved with modification, or disapproved by the Secretary.

(iii) The Secretary or the supervisor of a Bureau school may discontinue or decrease a post-differential authorized under this subparagraph at the beginning of a school year if—

(I) the local school board requests that such differential be discontinued or decreased; or

(II) the Secretary or the supervisor determines for clear and convincing reasons (and advises the board in writing of those reasons) that there is no disparity of compensation that would affect the recruitment or retention of employees at the school after the differential is discontinued or decreased.

An individual providing volunteer services under this section is a Federal employee only for purposes of chapter 81 of title 5, United States Code, and chapter 171 of title 28, United States Code.

(1) **ELECTION OF EMPLOYEE.**—Notwithstanding any other provision of law, including laws relating to dual compensation, the Secretary, at the election of the employee, shall prorate the salary of an employee employed in an education position for the academic school year over the entire 12-month period. Each educator employed for the academic school year shall annually elect to be paid on a 12-month basis or for those months while school is in session. No educator shall suffer a loss of pay or benefits, including benefits under unemployment or other Federal or federally assisted programs, because of such election.

TRIBALLY CONTROLLED SCHOOLS ACT OF 1988

* * * * *

[SEC. 5202. FINDINGS.

【The Congress, after careful review of the Federal Government’s historical and special legal relationship with, and resulting responsibilities to, Indians, finds that—

【(1) the Indian Self-Determination and Education Assistance Act, which was a product of the legitimate aspirations and a recognition of the inherent authority of Indian nations, was and is a crucial positive step towards tribal and community control;

【(2) the Bureau of Indian Affairs’ administration and domination of the contracting process under such Act has not provided the full opportunity to develop leadership skills crucial to the realization of self-government, and has denied to the Indian people an effective voice in the planning and implementation of programs for the benefit of Indians which are responsive to the true needs of Indian communities;

【(3) Indians will never surrender their desire to control their relationships both among themselves and with the non-Indian governments, organizations, and persons;

【(4) true self-determination in any society of people is dependent upon an educational process which will ensure the development of qualified people to fulfill meaningful leadership roles;

【(5) the Federal administration of education for Indian children has not effected the desired level of educational achievement nor created the diverse opportunities and personal satisfaction which education can and should provide;

【(6) true local control requires the least possible Federal interference; and

[(7) the time has come to enhance the concepts made manifest in the Indian Self-Determination and Education Assistance Act.

[SEC. 5203. DECLARATION OF POLICY.]

[(a) RECOGNITION.—The Congress recognizes the obligation of the United States to respond to the strong expression of the Indian people for self-determination by assuring maximum Indian participation in the direction of educational services so as to render such services more responsive to the needs and desires of those communities.

[(b) COMMITMENT.—The Congress declares its commitment to the maintenance of the Federal Government's unique and continuing trust relationship with and responsibility to the Indian people through the establishment of a meaningful Indian self-determination policy for education which will deter further perpetuation of Federal bureaucratic domination of programs.

[(c) NATIONAL GOAL.—The Congress declares that a major national goal of the United States is to provide the resources, processes, and structures which will enable tribes and local communities to effect the quantity and quality of educational services and opportunities which will permit Indian children to compete and excel in the life areas of their choice, and to achieve the measure of self-determination essential to their social and economic well-being.

[(d) EDUCATIONAL NEEDS.—The Congress affirms the reality of the special and unique educational needs of Indian peoples, including the need for programs to meet the linguistic and cultural aspirations of Indian tribes and communities. These may best be met through a grant process.

[(e) FEDERAL RELATIONS.—The Congress declares its commitment to these policies and its support, to the full extent of its responsibility, for Federal relations with the Indian Nations.

[(f) TERMINATION.—The Congress hereby repudiates and rejects House Concurrent Resolution 108 of the 83rd Congress and any policy of unilateral termination of Federal relations with any Indian Nation.

SEC. 5202. FINDINGS.

Congress, after careful review of the Federal Government’s historical and special legal relationship with, and resulting responsibilities to, Indians, finds that—

(1) the Indian Self-Determination and Education Assistance Act, which was a product of the legitimate aspirations and a recognition of the inherent authority of Indian nations, was and is a crucial positive step towards tribal and community control;

(2) the Bureau of Indian Affairs’ administration and domination of the contracting process under such Act has not provided the full opportunity to develop leadership skills crucial to the realization of self-government and has denied Indians an effective voice in the planning and implementation of programs for the benefit of Indians which are responsive to the true needs of Indian communities;

(3) Indians will never surrender their desire to control their relationships both among themselves and with non-Indian governments, organizations, and persons;

(4) true self-determination in any society of people is dependent upon an educational process which will ensure the development of qualified people to fulfill meaningful leadership roles;

(5) *the Federal administration of education for Indian children has not effected the desired level of educational achievement or created the diverse opportunities and personal satisfaction that education can and should provide;*

(6) *true local control requires the least possible Federal interference; and*

(7) *the time has come to enhance the concepts made manifest in the Indian Self-Determination and Education Assistance Act.*

SEC. 5203. DECLARATION OF POLICY.

(a) *RECOGNITION.*—Congress recognizes the obligation of the United States to respond to the strong expression of the Indian people for self-determination by assuring maximum Indian participation in the direction of educational services so as to render such services more responsive to the needs and desires of those communities.

(b) *COMMITMENT.*—Congress declares its commitment to the maintenance of the Federal Government's unique and continuing trust relationship with and responsibility to the Indian people through the establishment of a meaningful Indian self-determination policy for education which will deter further perpetuation of Federal bureaucratic domination of programs.

(c) *NATIONAL GOAL.*—Congress declares that a major national goal of the United States is to provide the resources, processes, and structure which will enable tribes and local communities to effect the quantity and quality of educational services and opportunities which will permit Indian children to compete and excel in the life areas of their choice and to achieve the measure of self-determination essential to their social and economic well-being.

(d) *EDUCATIONAL NEEDS.*—Congress affirms the reality of the special and unique educational needs of Indian peoples, including the need for programs to meet the linguistic and cultural aspirations of Indian tribes and communities. These may best be met through a grant process.

(e) *FEDERAL RELATIONS.*—Congress declares its commitment to these policies and its support, to the full extent of its responsibility, for Federal relations with the Indian Nations.

(f) *TERMINATION.*—Congress hereby repudiates and rejects House Resolution 108 of the 83d Congress and any policy of unilateral termination of Federal relations with any Indian Nation.

ADDITIONAL VIEWS TO H.R. 1

We commend the Committee on Education and the Workforce for reporting a bill to reauthorize the Elementary and Secondary Education Act that will reach the House floor with broad bipartisan support. With its focus on high standards for all children and results-based accountability, the bill seeks to build upon lessons learned since the previous reauthorization in 1994. Moreover, H.R. 1 provides better targeting to reach these goals and authorizes additional resources for these purposes.

Notwithstanding the many virtues of H.R. 1, we remain concerned that the bill goes too far in its reliance on standardized testing. Recent years have seen a growing trend in education policy toward more standardized testing of students at all levels of their education despite uncertain scientific evidence that the tests currently in use are fair and accurate. In fact, studies have consistently shown that many popular standardized tests are poorly designed, may be discriminatory toward poor and minority students, and are not sufficiently aligned to the content taught in schools. Furthermore, we have not to date had an appropriate national evaluation of the trade-offs increased testing requires in other aspects of the curriculum. With more and more time being devoted to preparation for standardized tests, many schools have been forced to sharply curtail their offerings in civics, social studies, and the arts. We would argue that reductions in these subjects deprive students of vital components in a balanced education.

Given these realities, the testing provisions in H.R. 1 raise questions. With its requirement of annual testing in grades 3 through 8, the bill significantly expands the number and scope of standardized tests in our schools. It does so without fully addressing the cost these tests exact in dollars at the local level, in their impact on the quality of education in our schools, or in the psychological effects of yearly testing on our students. Further, H.R. 1 does not provide adequate assurances that the tests being given will be fair and accurate. By allowing states to substitute their own assessments for the National Assessment of Educational Progress as a benchmark against which to judge their annual tests in reading and mathematics, H.R. 1, offers no student performance. A bill of such scope, with such profound importance in the lives of our nation's children should confront these issues more directly and realistically than H.R. 1, as reported, does. We will continue to work to address these concerns as the legislation moves forward.

ADDITIONAL VIEWS TO H.R. 1

INTRODUCTION

We are pleased that H.R. 1 has been reported with a strong bipartisan vote, and has the enthusiastic support of the Bush Administration. It provides real accountability for results, ensures that all children are taught by qualified teachers, and targets critical resources to the schools that need them the most. H.R. 1 also avoids divisive issues such as a federal funding of private school vouchers, and block grants to states which would undermine strong, new accountability requirements, and sabotage local control over education.

In order to get the job of school reform done right, H.R. 1 authorizes substantial new resources to schools—over \$5 billion more than last year's appropriation levels for elementary and secondary schools. Additional investments promised in H.R. 1 are critical to the success of education reform.

Given this bipartisan support for greater investment in education reform, it is disappointing to us that the recently passed budget resolution fails to make any new investments in education. This is in direct contradiction to the commitments provided in H.R. 1. We implore the Republican leadership to make good on this bipartisan promise. We intend to continue the fight to ensure that the Congress makes good on H.R. 1's promise for new investments in education.

REAL ACCOUNTABILITY FOR RESULTS

H.R. 1 strengthens accountability for results, increases the amount of resources and targeting to disadvantaged areas, supports America's teachers through quality training, provides parents with meaningful information and involvement, and ensures we maintain critical national education priorities.

H.R. 1 provides an important new focus by adding State, school district and school report cards on student academic performance. It significantly increases the amount of resources for teacher training—and makes clear that all States require their teachers to become fully qualified by the year 2005. H.R. 1 also preserves Title I's targeting of resources to high poverty school districts and schools.

H.R. 1 preserves and builds upon many of the core advances that the last reauthorization of ESEA in 1994 instituted. It maintains the requirements for State systemic reform, based on challenging standards and aligned assessments. Further building on 1994's assessment requirement, the bill includes annual testing for children in grades 3 through 8 and requires States to check their performance against the National Assessment of Education Progress (NAEP) or an alternative assessment.

H.R. 1 enhances accountability and resources to Title I—both of which are critical to education reform. It requires all children to perform well in school; it helps close the achievement gap between disadvantaged groups and their more advantaged peers; it requires the reporting of data in a way that allows schools and parents to gauge the success of at-risk populations; it increases teacher and paraprofessional quality requirements; and it provides a strong focus on turning around and struggling schools through the investment of additional help and resources.

We can no longer tolerate low-performing schools that place the education of our children at risk. This means that States and school districts will need to provide substantive intervention to help the students of low-performing schools reach high standards. If schools are still failing after they are given the resources and opportunity to succeed—then consequences must exist. This bill will accomplish these important reforms.

MAKING CRITICAL NEW INVESTMENTS FOR EDUCATION REFORM

H.R. 1 also adds significant resources to ESEA, while increasing targeting to the most disadvantaged areas. In the past six appropriations cycles, funding for the Department of Education has increased by an average of 13 percent. H.R. 1 would increase funding for ESEA programs by \$5.5 to \$24 billion in FY 2002, a 32 percent increase. H.R. 1 also includes a doubling of the Title I authorization by FY 2006 to \$17.2 billion. Coupled with these increases in overall funding are significantly more targeted formulas. Funding for teacher quality will be distributed on a 80% poverty, 20% population formula, rather than the 50% poverty, 50% population formula under current law. Technology funding is more targeted in H.R. 1, by moving to a combination of formula and competitive grants targeted on Title I and the highest poverty school districts in a State. Lastly, targeting of Safe and Drug Free Schools funding is more focused on areas of need.

NATIONAL EDUCATION PRIORITIES

The bill also expands parent information and involvement. The bill preserves the requirement that 1% of a school district's Title I allocation be used to encourage parental involvement. Added are provisions to ensure that parents receive information in a form and language they can understand. Lastly, parents are empowered with "right-to-know" provisions that entitle them to information on the professional qualifications of their children's teachers.

We are pleased the reported version of H.R. 1 maintains critical national priorities for after-school programs, such as the 21st Century Community Learning Centers, the National Writing Project, Civic and International Education and Women's Educational Equity Act.

PRESERVING BIPARTISAN SUPPORT FOR H.R. 1

While the bill as introduced included numerous provisions allowing private school vouchers, including the voucherizing of Title I, a bipartisan majority of the Committee voted to strike the voucher provisions. This vote, in addition to the absence of Straight A's

from the legislation, made it possible for us to support H.R. 1 on final passage. Inclusion of either of these items as proceed with floor consideration will jeopardize bipartisan support for this legislation.

ADDITIONAL DEMOCRATIC PRIORITIES

Also, we believe several amendments offered by Democratic Members during Committee consideration deserve further deliberation and consideration when this bill is considered on the House Floor. These amendments include: Funding for School Renovation and Construction; Class-Size Reduction; Universal and Expanded Preschool programs; and Go-Girls program (training, mentoring and educational opportunities for girls to enter the mathematics, science, engineering and science); safeguards against inappropriate high stakes testing, maintaining the school wide percentage at 50%; Smaller Learning Communities (separate funding for smaller schools and schools within schools); reinstating the Coordinated Services program, and providing training for school library media specialists.

ADDITIONAL ISSUES

We are pleased by commitments from the majority to continue to work on some of these concerns between Committee action and Floor consideration. Chief among these concerns are provisions remaining in the bill regarding segregation of homeless students and teacher liability provisions. Presently, the bill allows State receiving funds under the McKinney-Vento Homeless Assistance Act to segregate homeless students from their housed peers and use Federal McKinney Funds to support segregated schools that presently exist. We object to this provision because it denies homeless children equal educational opportunities and rewards noncompliance with the original intent of the McKinney-Vento statute. We have ended the practice of segregating various segments of our population through actions by the Court and Congress. We should not go back on these historic advances through the adoption of this provision.

In addition, we continue to have concerns over the inclusion of a provision providing teachers immunity from Federal liability claims. This immunity exempts a teacher from monetary damages when an action was taken by the teacher to maintain discipline. We are concerned that the immunity allowed under this provision will permit, or even encourage inappropriate actions such as corporal punishment in our schools. The fact that this provision will have the affect of preventing causes of action against teachers for the violations of a child's civil rights troubles us greatly. The Majority has committed to further discussions on this matter and we look forward to resolving it in a mutually agreeable fashion prior consideration.

Also, we have continually voiced concern during this process over the inclusion of an alternative assessment, rather than simply utilizing the National Assessment of Education Progress (NAEP), to ensure State assessment results are valid. Allowing States to use an alternative assessment as a "check" on the results of their own

State assessment will not produce the accountability the President and Congress is seeking.

Lastly, we continue to be concerned about the impact of parental consent provisions included in the legislation for limited English proficient children to receive bilingual education services and the lack of a sufficient authorization level for the Title III, Part A Bilingual Education program. As we proceed with Floor consideration and Conference Committee Action we hope both of these concerns will be further addressed.

DISSENTING VIEWS ON H.R. 1

I. INTRODUCTION

In 1998, the House Education and the Workforce Oversight Subcommittee began a comprehensive investigation into the federal government's role in the education of America's children. After an exhaustive study and numerous field hearings across the country with parents, students and administrators, *Education at a Crossroads* was released detailing the hundreds of education related programs across 39 agencies that cost taxpayers \$120 billion a year. Despite the enormous increase in federal spending over the past decade alone, it found that academic achievement has still not improved. In addition, the achievement gaps between poor students and their more affluent peers and between minority students and non-minorities remain unchanged or have grown. It further highlighted the solution to the problem of education stagnation—that of empowering parents, returning control back to the local level, encouraging basic academic achievements and returning dollars to the classroom.

With the results in hand, last Congress, Republican members on the Committee labored to draft legislation to reauthorize the Elementary and Secondary Education Act (ESEA). While Congress and the President were unable to reach final agreement on reauthorizing the bill, progress was significant, including passage by the full House of Representatives of H.R. 2300, the Academic Achievement for All Students Act, or Straight A's as it is most often called. The Straight A's approach demanded higher achievement—which current law does not—and eliminated the red tape and bureaucracy that gets in the way of education reform and innovation. In exchange for this flexibility, states would be required to provide academic results disaggregated by socioeconomic status and to meet state goals for each of these groups.

II. A VISION FOR TRUE EDUCATION REFORM—EMPOWERING PARENTS, NOT GOVERNMENT BUREAUCRACY

During his campaign for the presidency, candidate George W. Bush forcefully articulated his bold new initiative to improve academic opportunities for all children and to “leave no child behind.” Faced with undeniable facts that the nation's government-owned education monopoly has betrayed too many of America's children, Bush promised that things would be different if he won the presidency.

True to his word, one of Bush's first presidential acts was the unveiling of an impressive and ambitious education proposal that elevated the hopes and expectations of us all. Bush proposed to redefine the federal role in education by predicated his reform agenda upon three key pillars—parental empowerment, state flexibility

and accountability. Initially, conservatives and liberals alike seemed to rally behind Bush's innovative ideas.

Bush also proposed significant consolidation of federal programs and sizable increases in discretionary authority for state and local officials. This combination would allow local education leaders—the ones who actually know the names of our children—to target scarce resources more effectively.

On March 22nd, H.R. 1, the No Child left Behind Act, encompassing most of the President's plan, was introduced taking a comprehensive approach to closing the achievement gap between disadvantaged students and their peers. The bill aimed to give states and local school districts flexibility in spending federal education dollars by advocating a new Charter states option (similar to Straight A's) and consolidating a number of questionable education programs while empowering parents by advancing a number of school choice provisions. The bill would also hold states and localities strictly accountable for increasing student achievement by requiring states to implement annual reading and math tests for students in grades three through eight.

While some Republicans had concerns about the testing provisions encompassed in the proposal, the President's plan was widely hailed as embracing the belief that federal education policy should allow states and local school districts to use federal education dollars to advance their own priorities, not those of a distant bureaucracy. State and local education leaders know better how to tailor their education programs to meet the unique needs of their students than bureaucrats in Washington who have never visited their school or even their state. The President's plan wisely also stressed the importance of parental involvement. Involved parents, after all, can hold our schools accountable, ensuring that our kids come first.

III. REVIVING THE STATUS QUO—LEAVING TOO MANY CHILDREN BEHIND

Because of our excitement over the President's belief in education reform, we were dismayed and disappointed that the bill recently reported by the Committee on Education and Workforce largely rejects this philosophy and contains very few provisions of the president's original proposal. While the reported bill includes the testing aspects of the President's plan and new reading, math and science programs, it does not include the Straight A's provision, does not include massive consolidation of education programs, nor does it include any provisions dealing with private school choice and substantially increases federal education funding.

Specifically torn from the bill is the President's initiative that calls for empowering parents through school choice. As proposed, this provision would have enabled parents of disadvantaged students to move their children to better schools, including private schools, if it had been determined that their child had languished in a failing school or at least three years.

This notable feature was the centerpiece of the original Bush plan.

It was designed to begin the process of holding schools accountable for performance by treating parents like real customers and making schools competitive. Sadly, five Republicans on the House

Education and the Workforce Committee defied the President and voted for a Democrat-sponsored amendment to remove this crucial part of Bush's plan. This anti-choice amendment was the very first to be considered by the committee before other harmful amendments were adopted.

The only remaining element of the Bush plan in H.R. 1 is the implementation of massive new federal testing mandates. Holding schools accountable for results in exchange for flexibility and choice was the tradeoff upon which Bush based his education proposal. But with flexibility and choice now effectively stripped from the bill, accountability—to the federal government and not to parents—is all that remains.

The concept of the Bush plan was simple: the federal government would free states and school districts from process controls and only measure a state's ability to increase student achievement. This model closely mirrored the successful strategy Bush used while governor of Texas and the one Illinois used to reverse the education crisis in Chicago public schools. In both of these cases, process mandates were removed and results were measured.

This balanced approach has also worked elsewhere and we, like the President, are convinced it can work for the whole country. But now that President Bush's school choice and flexibility provisions have been eliminated from the bill, the ingenious balance Bush sought to achieve is all but impossible. In fact, subsequent amendments in the Education Committee creating new federal programs and inflating spending levels have been adopted in place of the conservative reform platform upon which candidate Bush campaigned.

IV. SUPPORTING OUR PRESIDENT'S ORIGINAL EDUCATION PLAN

As members of the House Education and Workforce Committee, we are no doubt passionate about the issue of education and are committed to improving our schools. We wholeheartedly support the President's effort to ensure that no child is left behind and support the concepts embodied in this original plan.

Unfortunately, the reported version of H.R. 1 does very little to improve the current education system and merely maintains the status quo which shows that despite the increase in federal education spending over the last several decades, students are clearly not learning at their greatest potential. As such, as much as it pained us to do so, we had no choice but to oppose H.R. 1. The fact is the bill contains very little education reform, as illustrated by the nearly unanimous Democratic support for the reported bill.

On May 4th, the Wall Street Journal ran a story entitled, "Teddy Takes George to School: Bush's education plan is Potemkin reform," stating "Mr. [Checker] Finn is the conservative who helped Candidate Bush write his education plan. But after inspecting the Senate-House fine print, he now says, 'I'm fairly depressed. It's Potemkin reform, a façade underwritten by billions in new spending. Jeanne Allen of the Center for Education Reform, another Bush ally, calls the emerging product at best a '15% to 20% improvement.' And given all the new spending . . . they ought to be getting a lot more reform than that."

On that same day, the New York Times ran the story "On the Way to Passage, Bush's Education Plan Gets a Makeover," stating

that, "Bill Bennett, an education secretary in the first Bush Administration, urged the new president today to stand strong. The proposals he sent up to the Hill are good proposals . . . But right now they are in the process of being eviscerated. I would plead with the president to fight for these proposals . . . I know he wants to get a bill signed. But it's critical to get a good bill signed."

These two articles speak more clearly than we can as to what has happened to H.R. 1 in the House Education and Workforce Committee.

Presently, what Republicans are preparing for their President is a humiliating defeat on the most important issue facing the nation. The inability of Congress to give America's schools the opportunity to transform themselves and the reluctance of White House lobbyists to fight harder for the President's agenda conveys the wrong message to the country.

Republicans cannot afford to abandon their passion for children and free-market education so easily to the teacher unions and the education bureaucracy. Unless Congressional Republicans can be persuaded to redeem their virtues, put students first and salvage the President's agenda, Bush eventually may be forced to consider vetoing H.R. 1 and demand a bill Republicans can wholeheartedly support.

The current legislation making its way through Congress is no longer the President's education bill. It has been radically amended into something else, something more likely to be produced by the last Administration. For President Bush to sign it into law would be a perilous mistake—one that would leave too many children behind.

V. CONCLUSION

We believe that now is the time to implement creative, innovative ideas for improving education.

Rather than relying solely on increased federal funding and efforts to maintain the status quo, we must return control, decision-making authority and money back to the local level—back to the teachers, parents and school boards to whom we entrust our children.

Congress can best do this by passing legislation consolidating the numerous existing education programs, empowering parents through school choice and giving states and localities increased flexibility through the Straight A's proposal.

While it is unfortunate that H.R. 1 as currently drafted does not embody these principals, we will continue to fight for these initiatives on the floor and in conference as we know that this is the only way that no child is left behind.
